Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 28th June at 2 p.m. in the ComReg Offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form. Please note over half the available places have already been allocated.

South Eastern Amateur Radio Group

SEARG kicked-off it's theory classes at the last meeting on Monday 30 April last. The meeting was well attended by those wishing to sit the theory exam. If anyone else would like to participate, please get in touch with Mark Wall on 087 630 2026 or by e-mail to markwall /at/ vodafone /dot/ ie.

The Geoparks communications weekend this year takes place on Saturday 26 and Sunday 27 May. South Eastern Amateur Radio Group will again operate from Tankardstown on the Copper Coast Geopark in Co. Waterford. The callsign is EI2GEO (pending approval). Activity will mainly be on HF. Anyone wishing to get involved should contact the club on info/ at/searg.com or phone Mark Wall on 087 630 2026 . For more information about the Geopark, visit www.coppercoastgeopark.com

---

European Football Championship 2012 on the AIR

EFC 2012 is an on-the-air activity which promises to be a great deal of fun, organized by Polish and Ukrainian amateurs affiliated with PZK and UARL.

>From June 1st to July 5th 2012, there will be numerous special event stations active on the air. They will be operating concurrently with the 2012 European Football Championship, which this year is organized jointly by Poland and Ukraine.

More detailed information about our activity can be found on website http://efc2012.pzk.org.pl There are two awards which can be earned during this period, as well as many interesting QSL cards and prizes.

North Cork Radio Group

North Cork Radio Group are pleased to announce another 1st time CASHOTA activity. This time we will be activating Barryscourt Castle, East Cork. Barryscourt Castle is the 16th century seat of the Barry family. The present castle, with its largely intact bawn wall and corner towers, is a fine example of an Irish tower house.

We are looking forward to operating from this site on Sunday, 20th May 2012 from 11am to 5pm approximately. As the castle is closed to the public until 24th May, this is a closed event but we look forward to working you on the day.

Logbook of the World

Logbook of the World (LoTW for short) is an online QSL system - an alternative to paper QSLs for award credits. ARRL, which runs the LoTW system, have announced that LoTW now has 50,000 users. These users include more than 100 EI radio amateurs. QSLs from LoTW can be used towards DXCC and other ARRL-sponsored awards. Recently it was announced that LoTW QSLs will shortly be valid for operating awards issued by CQ Communications.

A review of LoTW users shows that call signs from all but one of the 340 current DXCC entities have, at some stage or other, uploaded logs to LoTW - the one entity that has no participation in LoTW is Mount Athos. Most major DXpeditions upload their logs to LoTW, some immediately the DXpedition finishes and others after a delay of a few months. Experience has shown that contest stations have a particularly high participation in LoTW.

While paper QSL cards are still popular, anyone interested in maximising DXCC credits should consider using the Logbook of the World system.

Cork Radio Club

The Cork Radio Club will meet at the Community Centre in Carrigtwohill on Monday next May 14th at 8.00pm. A few more shack logging programmes will be looked at courtesy of Claus EI7JZ and the raffle will be held for the 2012 ARRL Handbook and Antenna Book.

Following on last years wins in the CW and SSB field days, participation in this years events will be discussed. Anyone interested in attending classes in the Autumn should contact any club member.

CASHOTA Activity Weekend 19th & 20th also 26th & 27th May 2012

This annual event is held over 2 weekends to allow individuals to activate or chase castles and stately homes, as well as other historical locations. It is open to any individual, group or club who wish to participate, with both activators and chasers being able to claim their award certificate. Irish castles will count towards the main UK CASHOTA award. The CASHOTA IRELAND AWARD is for working Irish castles in both EI and GI. Anyone intending to work a castle in EI should contact Steve EI5DD to obtain a designated number for the Castle. See requirements an details listed on other pages of this site.

Barryscourt Castle Activation 20th May 2012

Barryscourt castle, Co. Cork, will be activated by the North Cork Radio Group on Sunday the 20th of May by the North Cork Radio Group using the Callsign EI1NC/P from 11 am to 5 pm the Designator for this castle is EI017/C which is located in WAI Square W87. Full details about the CASHOTA-Ireland activities and awards may be found at http://cashota-ireland.org further enquiries may be directed to Steve EI5DD whose details may be found by clicking on the EI Co-ordinator button on the CASHOT-Ireland Website.

Limerick Radio Club

At last Wednesday's meeting of Limerick Radio Club, a presentation was made to Kris, EI9GAB. Kris attended the Region 4 theory classes and has been a very active club member. He will be moving to the USA shortly with his wife and children and we wish him the best of luck in the future.

Skerries Radio Club

Skerries radio Club EI2NCR will be using the call EI80IRTS for the Mills on the Air weekend on the 12th and 13th of May.

DX News

Vlad RK4FF will be active from Senegal in west Africa from 16 - 26 May. He will use the callsign 6V7S from the Le Calao rental shack which has become very popular with amateurs visiting Senegal. Look for Vlad on all bands 80 -10m on CW, SSB and RTTY.

A ten man group from Spain will be in Macao from 17 - 23 May. They will be QRV as XX9E and will be located on the island of Coloane which will count as AS-075 for the Islands on the Air Award. QSL manager is EB7DX.

DJ9RR will be on holiday in the Seychelles from 15 - 23 May. Look for the call S79RR on 40 - 10m on CW and RTTY.

VC2CBS30 is the unusual callsign is being used by the Sorel-Tracy Amateur Radio Club in Quebec, Canada until 30 May. This is in connection with their 30th anniversary celebrations. A special QSL card is available from the club.

Declan EI6FR will be part of a team activating St. Kilda EU-059 from May 16th to May 21st, callsign GM7WCO/P

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Radio Club On the Airwaves for 65 Years!

Posted: 12 May 2012 07:19 PM PDT
http://www.eham.net/articles/28278

BALLYMENA Amateur Radio Club has been transmitting since 1947 and last week they were officially recognised by Ballymena Borough Council for their 65 years of service to the community. Last Wednesday night members of the club were invited to the Mayor's parlour to be presented with a plague for their achievement. Chairman Aubrey Kincaid gave a short speech to Mayor Hubert Nicholl explaining the club's history. The club was officially first started back in 1947, by local enthusiasts and ex-servicemen. However it's thought a club was broadcasting from as far back as 1929. An extract from the Ballymena Observer in 1949 by 'Ham' read: "Things are certainly looking up at the Ballymena Radio Club since they built their two new transmitter: Last week they made their first American contact, when they got in touch with a 'ham' in Minnesota." During their 65 years members have made contacts and with other 'hams' around the globe, and sometimes further. Members are often communicating with international enthusiasts, one former member, Graham Williamson, was even in regular contact with King Hussain of Jordan. On many occasions members have also used their radio equipment to contact the International Space station as it passes bye during its orbit. While it is a popular hobby, there is a serious side and one condition of the society is that they make themselves available for civil authorities in case of an emergency situation.

GB2RS NEWS

Sunday 13th May 2012

The news headlines:

* Special WAB award for Olympic Flame stations

* Volunteers wanted for RSGB Centenary Working Group

* DXCC approves Yemeni and Somali DXpeditions

The Worked All Britain Awards Group has organised special awards to coincide with the passage of the Olympic Flame around the country. Various clubs around the UK will be operating from locations along the route used by the Torch Bearers for that particular day. They will use the callsigns G4WAB and G7WAB. The main call will be G4WAB, the exceptions for this being Shetland and Orkney, Jersey and Guernsey, when both callsigns will be used on the same day. There will be Bronze, Silver and Gold versions of the award, depending on the number of stations worked. Full details of the cost, route and club stations are available on the WAB website, www.worked-all-britain.co.uk.

With the RSGB Centenary now just over 6 months away detailed planning of events to mark the occasion, as well as publicise our hobby to the public, is under way. Rob Harwood, G0HRT has been appointed to chair a Centenary Working Group to lead the work. He is looking for a few volunteers to join the Centenary Working Group to help plan and implement a number of events. The scope for the events is still under consideration, but it is likely to include a yearlong sequence of themed Special Event Stations, local events with clubs, and events to both publicise the hobby to our national and international partners as well as highlight the supporting role that Society plays. Rob is seeking a few volunteers from our membership who can think creatively, work mostly virtually, and have the necessary skills and self-motivation to drive the ideas forward to implementation. Please contact Rob along with a brief CV and interests to centenary@rsgb.org.uk.

The current 7O6T DXpedition to Yemen and the February 2012 6O3A DXpedition to Somalia have both been approved for DXCC credit. If you had cards that were recently rejected for the 6O3A operation, contact the ARRL DXCC Desk. Once your record is updated, results will appear in Logbook of The World accounts or in the live, daily DXCC Standings. On 1 May, YT3PDT, become the 50,000th person to join Logbook of The World.

If you can't make it to the Dayton Hamvention next weekend but would like to know what is going on, Tom Medlin, W5KUB may be your answer. Since 2002 Tom has run a live web video stream of the event, traditionally starting with his 500 mile drive from Tennessee. The live broadcast starts at around 2pm BST on Wednesday 16 May at www.W5KUB.com.

The life of Tony Sale, who was best-known for his work in re-creating the Colossus computer at Bletchley Park, is to be commemorated by the creation of an award for the best computer restoration project. Overseen by the Computer Conservation Society (CCS) and backed by Google, the award will seek out those projects carried out in the same spirit that Tony Sale brought to his work, said David Hartley, chairman of the CCS. An article in the publication Computer Weekly notes that Tony Sale, who passed away in August 2011, was principal science officer at the Security Service MI5 and says he was also a radio ham, although it is not clear if he actually held a licence.

And now for the details of rallies and events for the coming week

The RSGB will be represented at Dayton Hamvention on 18 to 20 May by RSGB President Dave Wilson, M0OBW and there will also be a RSGB book stall at the event.

The Dunstable Downs Radio Club Boot Sale takes place on Sunday 20 May at Stockwood Park, Dunstable. Entrance and car parking is £2 and the event opens at 9am. More information is at www.ddrcbootsale.org. Now for the news of special events

Botley Flour Mills near Southampton is one of the UK's oldest known milling sites, is listed in the Doomsday book and is believed to have been a mill site in pre Roman times. The Mill will be activated with the callsign GB0BFM for Mills on the Air weekend on 12 and 13 May from 10am to 4pm. Using 80m, 40m, 2m & 70cm, the station will be run by M0IED and G6FRT and other members of Itchen Valley Radio Club, with added assistance from Southampton University Wireless Society.

Today, 13 May, Shannon Basin Radio Club will operate from Elphin Windmill, Co. Roscommon as part of the Mills on the air weekend. The call will be EI2EWM and will be active on all bands, SSB and CW.

Also today, 13 May, Cray Valley Radio Society will be airing GB6MW from Meopham Windmill, Meopham Green, Kent DA13 0QA as part of the National Mills Weekend. The stations will be active on HF, 2 and 4m. Anyone in the area or planning to visit will be welcome to see the mill and meet some of the CVRS members.

Lincoln Short Wave club will be operating GB5DAM on 16 and 17 May to remember air crew of RAF Bomber Command who lost their lives during the raid by 617 Squadron, the Dambusters, on the great dams of the Ruhr Valley in the early morning of 17 May 1943.

GS5NB will be on the air from Ness Battery, Stromness, Orkney from 0800UTC on 19 May to 2000UTC on 21 May using the 80 through to 10m

bands, running SSB, CW RTTY and PSK. Run by Orkney Amateur Radio Club, it celebrates the official opening of this Scheduled Ancient Monument to the public after its restoration by Scapa Flow Landscape Partnership. There will be some activity during set up in the preceding week. QSL is direct only via GM0WED and LoTW. Full details on http://eu009.webplus.net, and qrz.com.

The Geoparks communications weekend this year takes place on 26 and 27 May. South Eastern Amateur Radio Group will again operate from Tankardstown on the Copper Coast Geopark in Co. Waterford. The callsign should be EI2GEO and activity will mainly be on HF.

And now the DX news compiled from 425 DX News and other sources

Barry, 9V1FJ will be operating from a number of Caribbean countries in the coming weeks. From 12 to 14 May he will operate from Saba Island signing PJ5/G4MFW. He then plans to appear as FJ/G4MFW from St Barthelemy from 15 &#65533; 16 May. Next on the list is Cura&#65533;ao as PJ2/G4MFW and finally Bonaire as PJ4/G4MFW from 17 &#65533; 20 May.

A group of Japanese operators will be on the air from the Maldives until 16 May. Callsigns to look out for are 8Q7NK, 8Q7IC, 8Q7TE, 8Q7CJ and 8Q7ZS. Activity will be on all bands from 160 to 6m using CW, SSB, RTTY and PSK.

A group of operators from the Charente DX Group will be active as TM0CI from the Chausey Islands (EU-039) on 19-25 May. QSL via F5EOT, direct or bureau, instructions are on qrz.com.

XX9E is the callsign for the 17-23 May DXpedition to Coloane Island (AS-075), Macau. A large team will be active on 6 to 160m using CW, SSB and RTTY with at least three stations. QSL via EB7DX and LoTW. Further information at www.adxg.org/xx9/

Now the contest news

The 70MHz CW Contest takes place from 0900 to 1200UTC today, 13 May. The exchange is signal report, serial number, locator and postcode. The Worked All Britain LF phone contest takes place today, 13 May, from 1000 to 1400UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website www.worked-all-britain.co.uk or from the Contest Manager, G3XKT, via e-mail to ataebbooks@ntlworld.com.

On 15 May the 1.3GHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

On 16 May the data leg of the 80m Club Championships takes place from 1900 to 2030UTC. The exchange is signal report and serial number.

The weekend of 19 and 20 sees overlapping VHF events. The 144MHz May Contest takes place for 24 hours, with the First 144MHz Backpackers overlapping the final three hours of it and that contest then continues

for another hour on its own. The exchange for the 144MHz contest is signal report, serial number locator and postcode, whilst the Backpackers exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 4th to Thursday the 10th of May, compiled by Neil Clarke, G0CAS on Friday 11th of May.

First this week the latest smoothed monthly sunspot numbers which are for August, September and October 2011 and are 59, 59.5 and 59.9 respectively.

On the 5th a large complex sunspot group rotated into view and with it solar activity increased to moderate levels with M class solar flares taking place every day. In total, 11 M class flares took place, along with dozens of C class solar flares. With these M class solar flares several sudden ionospheric disturbances occurred, which affect the daylight side of the Earth. Also, several coronal mass ejections occurred. Those that were directed towards us were small and weak. Solar flux levels increased from 114 units on the 4th to 131 by the 10th. The average was 121 units. The 90 day solar flux average on the 10th was 113, that's one unit up on the previous week. That's the first rise so far this year. X-ray flux levels increased from B3.9 units on the 4th to B6.5 by the 10th. The average was B5.1 units. Geomagnetic activity was quiet at first with an Ap index of only 4 units for the first 3 days of the period but by the 9th a coronal hole disturbance arrived and the Ap index increased to 25 units. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from a slow 290 kilometres per second on the 4th to a fast 670 by early on the 10th. Particle densities were low every day except for a brief increase to 22 particles per cubic centimetre on the 8th. Bz varied between minus 1 and plus 7 nanoTeslas on the quiet days and between minus and plus 13 nanoTeslas during the disturbance. For most of week propagation reached predicted levels but the magnetic storm reduced MUFs by 5MHz or more, particularly over high latitude paths. Aurora associated with the disturbance during afternoon and evening of the 9th appears to have been confined to high latitudes - but a Canadian 6m beacon was heard in Scotland. Otherwise, sporadic- E reached 60MHz on several days with occasional openings on 70MHz, mainly to southern Europe.

And finally the solar forecast. This week the active side of the Sun is expected to be looking our way. Solar activity is expected to be moderate most days with a slight chance that activity could increase to high with an X class flare taking place. Solar flux levels should increase and be around the 140 mark by midweek. Geomagnetic activity should be quiet most days but a solar flare related coronal mass ejection could increase activity at any time. A weak coronal hole disturbance could arrive right at the end of the period. MUFs during daylight hours at equal latitudes should be about 24MHz for the south and 21MHz for the north. Darkness hour are expected to be around 12MHz.

Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 23MHz. The optimum working frequency with a 90 per cent success rate will be about 18MHz. The best time to try this path will be between 1000 and 1500 hours UTC. Sporadic-E is expected to take place most days with openings up to 50MHz and 70MHz on some days.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Friskney and East Lincolnshire Communications Club has a club net on 144.165 USB, vertical polarization, from 7pm on Monday 14 May. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. On Friday 18 May there is a club net is on GB3FR from 7.30pm. For more information contact the FELCC Information Line on 07554 362 020.

Lincoln Short-Wave Club is taking part in Mills on the Air on Sunday 13 May, operating GB5EM at Ellis Mill, and also taking part in the WAB LF Phone contest from the shack between 10 and 2. Tuesday sees them taking part in the 1.3GHz UK AC. On Wednesday 16 and Thursday 17 May Lincoln Short-Wave Club is operating GB5DAM in memory of the Dambusters raid in 1943. On Thursday evening they are taking part in the 80m CC Data and holding a simplex club net on 145.375MHz from 20.00. Finally, Saturday in the Shack starts at 9am on the 19th. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is holding a field day planning meeting on Monday 14 May. Thursday the 17th sees training classes with Dave Murphy, G8OWL, and on Friday there's shack and aerial work. Contact Don, on 01214 581 603.

Wythall Radio Club continues its Intermediate course on Monday 14 May, then on Tuesday is having an interactive demo on Instant Morse by Steve White, G3ZVW. On Sunday 20 May it's the club trip to Dunstable Downs Rally. Details from Chris, G0EYO, on 07710 412 819.

Now we return to the traditional listing in date order. On Monday 14 May Gloucester Amateur Radio & Electronics Society is holding a construction and operating evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 14 May Stratford Upon Avon District Radio Society is having a talk on amateur radio satellites by AMSAT-UK committee member Ciaran,

M0XTD. Contact G0CHO, on 01608 664 488.

On Tuesday 15 May Derby & District Amateur Radio Society is having a talk on the Glenn Miller wartime broadcasts with audio memories by Fred Tagg. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 15 May Loughborough & District Amateur Radio Club is having a talk on `going loopy' by Art, G3KWY. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 15 May Worcester Radio Amateurs Association is on the air. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday 16 May Midland Amateur Radio Society is holding a review of the station at Cottage Farm and holding training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 16 May South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 16 May Telford & District Amateur Radio Society is holding a 2m walking DF hunt. Contact Mike, G3JKX, on 01952 299 677. On Wednesday 16 May Welland Valley Amateur Radio Society is taking part in the 80m CC DATA contest. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Thursday 17 May Brigg & District Amateur Radio Club is having a talk about the recent changes to the RSGB QSL bureau by Richard, G3UGF. Members and guests are most welcome. Contact James, M6JKC, on 0785 403 7708.

On Thursday 17 May Cheltenham Amateur Radio Association is holding a texting versus Morse code challenge. More information from Derek Thom, G3NKS, on 01242 241 099.

On Thursday 17 May Salop Amateur Radio Society is holding a fox hunt. Details are online at www.salop-ars.org.uk.

On Friday 18 May Coventry Amateur Radio Society is having a VHF and UHF radio workshop evening. Contact John, G8SEQ, on 07958 777 363.

On Friday 18 May Melton Mowbray Amateur Radio Society is holding its annual construction contest. For more information contact Geoff, G3STG, on 01664 480 733.

NEWS FOR THE NORTH OF ENGLAND On Monday 14 May Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 14 May Bolton Wireless Club is having an evening of radio DF hunting on foot with Ross, G6GVI. For details, send an email to boltonwireless@gmail.com.

On Monday 14 May Sheffield Amateur Radio Club is having a talk on the Elecraft K2 transceiver by Mike, G0NEY. More information from Peter

Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 15 May Chester & District Radio Society is holding its annual dinner. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 15 May Morecambe Bay Amateur Radio Society has a committee meeting. Contact Sheila, on 07867 516 836.

On Tuesday 15 May Stockport Radio Society is having a talk on logging programs by Peter, M1PTR. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 16 May Denby Dale Radio Club is having a club night. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 16 May Sheffield Amateur Radio Club is taking part in the RSGB 80m Contest DATA from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Wednesday 16 May Wirral & District Amateur Radio Club is having a drink and waffle at Pollards, Willaston. Contact Simon, G6XHF, on 0151 601 3269.

On Thursday 17 May Ripon & District Amateur Radio Society is working on the DCD/RBY Beverage project. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 17 May South Manchester Radio and Computer Club is having a talk on amateur satellite communications by Peter, G0BHP. Details from Ron, G3SVW, on 01619 693 999.

On Friday 18 May East Cleveland Amateur Radio Club is having a bring in something interesting evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 18 May Tynemouth Amateur Radio Club is having a talk on the Hexbeam antenna by 2E0KLO. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Sunday 20 May North Cheshire Radio Club is holding training classes at 7.30pm, followed by the AGM at 9pm. Contact Gordon, G3LEQ on 01565 652 652.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 15 May Ayr Amateur Radio Group is holding a School Radio Day. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Tuesday 15 May Livingston & District Amateur Radio Society is having Morse Code Practice. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 16 May Ayr Amateur Radio Group is having a group meeting. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday 16 May Glenrothes & District Radio Club is having a demonstration of contest and other software. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Thursday 17 May Wigtownshire Amateur Radio Club is having a talk by Wul, 2M0WUL, on Bernie The Bolt. Contact Ellis Gaston, GM0HPK, on 07979 692 580.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week.

Bedford and District Amateur Radio Club is running a club net on GB3BF on Monday 14 May from 20:30, and another net on GB3BF from 20.30 on Thursday 17 May. On Saturday 19 May the club is participating in Castles on the Air weekend, and Sunday 20 May sees a club trip to the Dunstable Downs boot sale. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

Bromley & District Amateur Radio Society is having a talk on Tuesday 15 May on technology in eco-houses by Justin, G8YTZ. On Sunday 20 May its Intermediate course continues. Details from Andy, G4WGZ, on 01689 878 089.

Chesham & District Amateur Radio Society is taking part in Windmills on the Air on Sunday 13 May, and on Wednesday 16 May is having a technical talk on computer logging by Terry, G0VFW. More details from Terry, G0VFW, on 01442 831 491.

Mid-Sussex Amateur Radio Society is having a radio night and post event equipment on Friday 18 May, then on Sunday 20 May it's the club Aspidistra visit. Details from Rob, 2E0RJA, on 01444 232 129.

Now we return to the traditional listing in date order.

On Sunday 13 May South Essex Amateur Radio Society is taking part in Mills on the Air as GB2RWM from Rayleigh Windmill. Contact Dave, G4UVJ, on 01268 697 978.

On Sunday 13 May Southdown Amateur Radio Society is operating GB2PW for Mills day at Polegate Windmill. Details from John, G3DQY, on 01424 424 319.

On Sunday 13 May Surrey Radio Contact Club is operating GX3SRC/P at the Sutton model Engineering Club open day. Details from John, G3MCX, on 020 8688 3322. On Monday 14 May Coulsdon Amateur Transmitting Society is having a talk on WSPR by G3JKV. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 14 May Southdown Amateur Radio Society is having a talk by John, G3DQY on GB2PW, QSL cards and memorabilia. Details from John, G3DQY, on 01424 424 319.

On Monday 14 May Surrey Radio Contact Club is having a construction evening. Contact John, G3MCX, on 02086 883 322.

On Monday 14 May West Kent Amateur Radio Society is having a talk about GB3MH by the repeater keeper, Malcolm G3NZP. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 15 May Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 15 May Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 15 May Verulam Amateur Radio Club is having a talk on DX for the busy person by Alan, G4DJX. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday 16 May Havering & District Amateur Radio Club is having a talk by Ollie Tillett, G3TPJ on the C in electronics. More information from John, M0UKD, on 07890 222 111.

On Wednesday 16 May Norfolk Amateur Radio Club is having an informal meeting and taking part in the RSGB 80m Club Championship DATA leg. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday 17 May Bredhurst Receiving and Transmitting Society is holding a general and committee meeting. Details from Andrew, M6AAE, on 07403 325 075.

On Thursday 17 May Colchester Radio Amateurs have a talk on pedestrian mobile by Peter, G8BLS. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday 17 May Horndean & District Amateur Radio Club is watching the T32C DXpedition DVD. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 17 May Horsham Amateur Radio Club is having a social evening at The Chequers Inn, Rowhook. Details are on the web at www.harc.org.uk.

On Thursday 17 May King's Lynn Amateur Radio Club is having a club night. Contact Ray, G3RSV, by email to ral- g3rsv@supanet.com.

On Thursday 17 May Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 17 May Shefford & District Amateur Radio Society is having a 2m mobile fox hunt, the foxes being Ken, G4YRF and Ian, G3ORG. Details from John Burnett, M6JBU, on 07860 804 793.

On Friday 18 May Wey Valley Amateur Radio Group is having a talk on six metres by Peter Bacon, G3ZSS. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 19 May Fort Purbrook Amateur Radio Club commences its CASHOTA field weekend at the Fort. Contact Mick Ponsford, M0GWD, on 02392 366 699.

On Sunday 20 May Radio Society of Harrow is at Old Redding calling CQ GX3EFX/P. More information from Linda, G7RJL, on 02083 868 586.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society is having a talk on antenna design and construction on Monday 14 May, then a club net on 145.575MHz at 19:45 on Tuesday. Thursday 17 May sees the club 4m net on 70.425MHz at 19:00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday 14 May Riviera Amateur Radio Club is having a club night. Details from Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Monday 14 May Weston Super Mare Radio Society is holding Morse classes and having a natter night. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 16 May Thornbury & South Gloucestershire Amateur Radio Club is holding a video night. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 16 May Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 17 May Cornish Radio Amateur Club is having a workshop evening. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 17 May South Bristol Amateur Radio Club is having a talk on kite antennas by Henryk, M0HTB. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 17 May Swindon & District Amateur Radio Club is having an activity night and preparing for the 144MHz Contest. Contact Den, M0ACM, on 07810 317 750.

NEWS FOR WALES On Tuesday 15 May Carmarthen Amateur Radio Society is holding its AGM. Contact Lloyd, 2W0LLT, on 01239 711 297.

741. Weekly Highlights of Solar and Geomagnetic Activity, 07 - 13 May 2012

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
07 - 13 May 2012

Solar activity ranged from low to moderate levels. Region 1476 (N10, L=180, class/area=Fkc/1050 on 09 May) was responsible for almost all x-ray flare activity during the week. It produced a total of 55 C-class flares, 6 M-class flares, and 69 optical flares. Region 1476 began the week as an Fkc type group with a beta-gamma magnetic configuration. By the 8th, it had grown in extent (17 degrees), spot count (35), and complexity (beta-gamma-delta) and produced an M1/1F flare at 1308 UTC. It reached its maximum areal coverage of 1050 millionths on the 9th when it produced an M4/1n at 1232 UTC, an M1/1b at 1408 UTC, and another M4 at 2105 UTC. The maximum extent and spot count (20 degrees, 50 spots) followed on the 10th when Region 1476 produced the largest of the flares, an M5/2b at 0418 UTC. The flare was accompanied by a three minute 10cm burst (690 sfu) at 10/0417 UTC and a Type IV emission at 10/0402 UTC, followed by a weak earth-directed Coronal Mass Ejection (CME). Later that day, Region 1476 produced an M1 at 2026 UTC, the last M-class event of the week. The region then began a slow but steady decline in areal coverage, longitudinal extent and spot count, although it sustained its beta-gamma-delta magnetic configuration.

Earlier in the week, the only M-class event not produced by Region 1476 was an M1/1n flare observed from Region 1471 (S21, L=276, class/area=Eho/320 on 02 May) at 07/1431 UTC. This flare was also accompanied by a 10cm burst (230 sfu) at 10/1415 UTC and a Type IV emission at 07/1409 UTC. STEREO-Ahead imagery suggested an earth-directed CME. The following day, two more potentially earth-directed, weak CMEs were observed in STEREO-A COR2 imagery.

Region 1477 (S24, L=140, class/area Dso/150 on 09 May) was split to form new Region 1478 (S24, L=135, class/area=Hsx/090 on 10 May) on 10 May. Similarly, Region 1479 (N15, L=105, class/area Dso/130 on 12 May) was split to form new Region 1482 (N14, L=100, class/area=Dso/080 on 13 May). Both of these divisions resulted from

careful analysis of magnetogram data. After the split, Region 1477 became an Hsx type group with L=144, and Region 1479 became an Hxs type group near L=109.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at high levels on the 10th through the 13th, and at moderate levels for the remainder.

Geomagnetic field activity ranged from quiet to active conditions with minor to major storm periods observed at high latitudes. The week began with quiet conditions on 7th and the majority of the 8th. Around 08/0400 UTC, a solar sector boundary crossing from positive to negative was observed at the ACE spacecraft. By midday, the solar wind speed at ACE began to rise, marking the arrival of a coronal hole high speed stream (CH-HSS). Significant southward Bz began around 1730 UTC and reached a minimum of -13 nT late on the 8th before beginning a gradual return to neutral conditions late on the 10th. The geomagnetic field responded with active conditions from the last synoptic period on the 8th through the 9th. Minor to major storm levels were observed at high latitudes on the 9th. Activity subsided to mostly unsettled levels on the 10th, followed by mostly quiet conditions on the 11-12 May. The solar wind speed at ACE remained above 500 km/s until around 13/0000 UTC. Conditions were mostly unsettled on the 13th. Although there were a number of CMEs identified as potentially earth-directed, there was no definitive indication of CME arrival reflected in the ACE data suggesting the transient signatures were obliterated in the high speed stream.

Forecast of Solar and Geomagnetic Activity
14 May - 09 June 2012

Solar activity is expected to be at low to moderate levels throughout the period, with moderate activity most likely with the return of Old Region 1476 on 31 May.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal levels except on 14 May, 23-29 May, and 06-09 June. The high levels are expected in response to the presence of recurrent coronal hole high speed streams.

Geomagnetic field activity is expected to be quiet to unsettled with occasional active periods. The unsettled to active periods are associated with the geoeffective periods of recurrent CH-HSSs on 14 May, 21-23 May, and 05-08 June. Unsettled to occasionally active conditions are also expected on 14 May with the anticipated arrival of a CME from 12 May.

Behrend Engineers' Project Could Go Into Space:

Posted: 13 May 2012 05:41 PM PDT
http://www.eham.net/articles/28288

The trio speaks the language of supercapacitors and charges cycles, and they offer informed views on how circuit boards can shed excess heat. When David Jesberger, Kathleen Nicholas and Jacob Sherk graduated May 4 from Penn State Behrend, they left speaking the language of engineers. But they also left behind a finished senior project that could soon be headed into outer space. Senior engineering students at Behrend pitch ideas each year for projects they would like to tackle in their final year. Nicholas said she, Jesberger and Sherk all bid for a chance to be part of a project for the Radio Amateur Satellite Corp.

World HF Backpack Ops Converge on Dayton:

Posted: 12 May 2012 05:00 PM PDT
http://www.eham.net/articles/28287

HFpack, the international organization of High Frequency portable operators, will stage a massive event at Dayton this year. The 2012 HFpack Eyeball QSO Rally, also known as World's Largest Gathering of HF Backpack Operators, provides an opportunity for everyone to share the experience of lightweight HF SSB ham radio technology in action.

743. [RAC-Bulletin] RAC Bulletin 2012-026E - 60 metre Consultation Bulletin

Newsgroup: rec.radio.amateur.misc
Date: 2012-05-15 06:53:04 UTC
From: rac-bulletins@eton.ca
Message-ID: <4FB1FCB8.9050608@rac.ca>
Source record: 3010
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2012-026E - 60 metre Consultation Bulletin
2012-05-14

As of May 12th, Industry Canada has begun the consultation process to see final approval for the use of six channels on the 60 metre band. As part of the consultation, Industry Canada is seeking input on five items. RAC feels it is important for amateur radio operators to comment on this proposal and indicate their preference for the rules governing the frequencies going forward. The five items are explained below.

Item One: Should Industry Canada allow amateur radio operators the use of five frequencies that are harmonized with the US on a no-protection, no-interference basis? These channels are 5332kHz, 5348kHz, 5358.5kHz, 5373kHz, 5405kHz. Transmissions would be limited to a 2.8Khz bandwidth centered on these frequencies.

- The obvious answer to Item One is that as amateur radio operators, these additional frequencies are needed for additional emergency communication capacity and having harmonization on frequency with the US will allow for cross border operation.
Item Two: Should Industry Canada harmonize the emission modes and designators on these five channels? In the US they are limited to telephony, data, RTTY and CW.

- In Item Two, IC asks if the operating modes should be the same as the US on the five harmonized channels. It was assumed prior to consultation that this was not optional but in the consultation, it appears that input will be taken on this item. However in the proposed revisions to RBR-4, these designators are in place. Unless reason is shown to not harmonize this item, it will likely be implemented.

Item Three: Should Industry Canada specify a maximum radiated power of 100 watts peak envelope power?

-Again, in Item Three, IC asks if there should be harmonization on the output power on the five channels. In the US, the FCC has limited transmit power to 100 watts. In the proposed revisions to RBR-4, these designators are in place. Unless reason is shown to not harmonize this item, it will likely be implemented.

Item Four: Should Industry Canada allow Canadian amateurs access to the 5329kHz channel? Transmissions would be restricted to 2.8 kHz centered on this frequency.

In Item Four, IC asks if they should allow a sixth, Canadian only channel. Originally, RAC had requested two Canadian only channels but one was found to be un-useable. RAC recommends Canadian Amateurs support the allotment of a sixth channel.

Item Five: Should Industry Canada specify emission designators and peak power for this sixth channel? If so, what would those be?

-Given that the channel referred to in Item Five is domestic only there is little need to harmonize emission types with the US. RAC recommends that as few limits as possible be placed upon the sixth channel to encourage development of domestic communications on this channel.

Those wishing to provide their comments to Industry Canada are asked to do so in the following ways:

In electronic format (WordPerfect, MS Word or PDF) sent to spectrum.engineering@ic.gc.ca . RAC requests a copy of your comments also be sent to regulatory@rac.ca so that we may track response from amateur radio operators.

In written format by mail to Manager, Mobile Systems, Industry Canada, 300 Slater Street, 19th Floor, Ottawa, Ontario, K1A 0C8. RAC requests that if possible, a copy of written comments be faxed to RAC at 866-660-1187 so that we may track response from amateur radio operators. Please note that Industry Canada will not accept comments by fax.

Comments on these items must be received prior to June 12th. All comments will be posted publicly on the Industry Canada website after the consultation process closes.

The Radio Amateurs of Canada has been working to obtain permanent authorization for Canadian Amateurs on the 60 metre band since 2010. This consultation process represents one of the last steps in that work. Development Licenses continue to be available for those operators who wish to have temporary use of the five frequencies identified in Item One. There is a small cost for the development license. If you wish to obtain a temporary development license, please contact your local District Office of Industry Canada.

We thank Industry Canada and all respondents for their continued work to see the completion of the process to obtain permanent authorization. If you require help sending comments to Industry Canada or have additional questions for RAC on this or any other regulatory matter, please email regulatory@rac.ca

World's Largest Gathering of HF Backpack Operators Converges on Dayton

Posted: 13 May 2012 03:04 PM PDT
http://forums.qrz.com/showthread.php?346051-World-s-Largest-Gathering-of-HF-Backpack-Operators-Converges-on-Dayton&goto=newpost

HFpack, the international organization of High Frequency portable operators, will stage a massive event at Dayton this year. The 2012 HFpack Eyeball QSO Rally, also known as World's Largest Gathering of HF Backpack Operators, provides an opportunity for everyone to share the experience of lightweight HF SSB ham radio technology in action. Simultaneously on the air, the HFpack Portable Pedestrian Mobile Net takes check-ins with net control Mark KI0PF/PM. All ham operators worldwide are welcome to check in to the net.

All kinds of HF backpack, portable, and mobile stations participate in this unique net on 18157.5 kHz USB. The /PM operators provide an awesome sight for hams, walking around the outdoor Dayton arena area, while operating with their tall HF whip antennas and fully equipped HF packs. Over the

years, many interesting mil manpacks and state-of-the-art HF backpacks have been shown off at the event, including everything from the tiniest QRP HF SSB HTs, to a full kilowatt HF backpack running on lithium ion batteries!

HFpack

2012 HFpack Eyeball QSO Rally

World's largest gathering of HF backpack operators

When: May 19 at 12:30pm to 1:45pm Saturday

Location: Dayton Hara Arena outside entrance (awning)

HFpack VHF Intercom HT Frequency: 144.300 FM Simplex PL151.4

HFpack Calling Frequency: 18157.5kHz USB

HFpack Portable Pedestrian Mobile Net

Huge Net of HF Portable Ops

When: May 19 around 1PM Saturday (1700 UTC)

Frequency: 18157.5 kHz USB

Location: Dayton Hamvention outside

Net Control: Mark KI0PF /PM

AMSAT/TAPR Hamvention Banquet, Friday Evening, 5/18

Posted: 11 May 2012 10:12 PM PDT
http://forums.qrz.com/showthread.php?345862-AMSAT-TAPR-Hamvention-Banquet-Friday-Evening-5-18&goto=newpost

http://www.amsat.org/amsat-new/hamve...12/Banquet.php

2012 AMSAT/TAPR Hamvention Banquet

The sixth annual joint AMSAT/TAPR Banquet will be held Friday evening, May 18, 2012 during the Dayton Hamvention.

The Banquet will be at the:

Kohler Presidental Banquet Center

4572 Presidential Way

Kettering, OH 45429

(just south of Dayton).

Reservations are required and must be made by Monday, 14 May 2012 . Seating is limited, so make your reservations early.

The price for the Banquet is $30 per person. Reserved tickets may be picked up at the AMSAT booth at Hamvention on Friday, or at the door.

You may make reservations for the 2012 AMSAT/TAPR Banquet online in the AMSAT Store.

AMSAT Presidents Club Gold members should let Martha know if they are planning to attend the banquet.

Reserved tickets can be picked up at the AMSAT booth on Friday or at the door to the Banquet.

For additional information contact Martha at the AMSAT office (martha@amsat.org).

Banquet Schedule

6:30 PM Doors open and Cash bar is available with Beer, Wine, Liquor and soft drinks.

7:15 PM Buffet Dinner service begins. The Center has a justly deserved reputation for good food and service.

8:15 Presentation by Howard Long, G6LVB, talking about his FUNcube Dongle, the 64 - 1700 MHz Software Defined Receiver.

60 metre consultation

Posted: 15 May 2012 12:59 AM PDT
http://forums.qrz.com/showthread.php?346252-60-metre-consultation&goto=newpost

60 metre consultation

As of May 12th, Industry Canada has begun the consultation process to see final approval for the use of six channels on the 60 metre band.

As part of the consultation, Industry Canada is seeking input on five items. Radio Amateurs of Canada (RAC) feels it is important for amateur radio operators to comment on this proposal and indicate their preference for the rules governing the frequencies going forward.

The five items are explained below.

Item One: Should Industry Canada allow amateur radio operators the use of five frequencies that are harmonized with the US on a no-protection, no-interference basis? These channels are 5332kHz, 5348kHz, 5358.5kHz, 5373kHz, 5405kHz. Transmissions would be limited to a 2.8Khz bandwidth centered on these frequencies.

- The obvious answer to Item One is that as amateur radio operators, these additional frequencies are needed for additional emergency communication capacity and having harmonization on frequency with the US will allow for cross border operation.

Item Two: Should Industry Canada harmonize the emission modes and designators on these five channels? In the US they are limited to telephony, data, RTTY and CW.

- In Item Two, IC asks if the operating modes should be the same as the US on the five harmonized channels. It was assumed prior to consultation that this was not optional but in the consultation, it appears that input will be taken on this item. However in the proposed revisions to RBR-4, these designators are in place. Unless reason is shown to not harmonize this item, it will likely be implemented.

Item Three: Should Industry Canada specify a maximum radiated power of 100 watts peak envelope power?

-Again, in Item Three, IC asks if there should be harmonization on the output power on the five channels. In the US, the FCC has limited transmit

power to 100 watts. In the proposed revisions to RBR-4, these designators are in place. Unless reason is shown to not harmonize this item, it will likely be implemented.

Item Four: Should Industry Canada allow Canadian amateurs access to the 5329kHz channel? Transmissions would be restricted to 2.8 kHz centered on this frequency.

In Item Four, IC asks if they should allow a sixth, Canadian only channel. Originally, RAC had requested two Canadian only channels but one was found to be un-useable. RAC recommends Canadian Amateurs support the allotment of a sixth channel.

Item Five: Should Industry Canada specify emission designators and peak power for this sixth channel? If so, what would those be?

-Given that the channel referred to in Item Five is domestic only there is little need to harmonize emission types with the US. RAC recommends that as few limits as possible be placed upon the sixth channel to encourage development of domestic communications on this channel.

Those wishing to provide their comments to Industry Canada are asked to do so in the following ways:

In electronic format (WordPerfect, MS Word or PDF) sent to spectrum.engineering@ic.gc.ca . RAC requests a copy of your comments also be sent to regulatory@rac.ca so that we may track response from amateur radio operators.

In written format by mail to Manager, Mobile Systems, Industry Canada, 300 Slater Street, 19th Floor, Ottawa, Ontario, K1A 0C8. RAC requests that if possible, a copy of written comments be faxed to RAC at 866-660-1187 so that we may track response from amateur radio operators. Please note that Industry Canada will not accept comments by fax.

Comments on these items must be received prior to June 12th.

All comments will be posted publicly on the Industry Canada website after the consultation process closes.

The Radio Amateurs of Canada has been working to obtain permanent authorization for Canadian Amateurs on the 60 metre band since 2010. This consultation process represents one of the last steps in that work. Development Licenses continue to be available for those operators who wish to have temporary use of the five frequencies identified in Item One. There is a small cost for the development license. If you wish to obtain a temporary development license, please contact your local District Office of Industry Canada.

We thank Industry Canada and all respondents for their continued work to see the completion of the process to obtain permanent authorization. If you require help sending comments to Industry Canada or have additional questions for RAC on this or any other regulatory matter, please email regulatory@rac.ca

ON0EME 1296 MHz Moonbounce Beacon

Posted: 15 May 2012 12:55 AM PDT
http://forums.qrz.com/showthread.php?346251-ON0EME-1296-MHz-Moonbounce-Beacon&goto=newpost

ON0EME 1296 MHz Moonbounce Beacon

This is possibly the first amateur radio beacon to beam signals off the Moon. It's aim is to encourage people to try and receive EME signals.

According to a report in 432 and Above EME News the idea started in Orebro, Sweden during the EME meeting in May 2011. After about 11 months of intensive work by ON7UN, HB9BBD and ON4BCB the beacon ON0EME started transmitting on 1296.000 MHz in the direction of the Moon.

ON0EME□s total EIRP is about half a megawatt. The antenna is a solid 3.7 m dish and it is active when the Moon is >10° at its location.

The system is completely automatic. The beacon starts when the moon is on the east side +10 degrees, by turning the antenna from the point where it stopped the last Moon pass (Moonset at +10°).

The frequency is GPS locked at 1296.000 MHz with an accuracy of 3 x 10-11. The timing is also GPS controlled. The beacon will start transmitting at the minute. The amplitude of the signal is constant within ± 0.2 dB. Antenna pointing is updated every 0.4°. There is complete remote monitoring and control of the beacon with indication of voltages, power and temperatures.

Reports have been received from some small stations receiving the beacon. Please post reports on "moon" or the "moon-net" reflectors.

The beacon is located in the north of Belgium and has good Moon visibility at both high and low declination for the complete Moon pass.

Users can check the operational status and beacon parameters at the ON0EME Status Page http://www.on0eme.org/

Moon-Net Email List

This is an e-mail reflector intended for discussion and announcements concerning amateur radio moonbounce communications. Subscription is free and open to anyone.

Professor Know How's Lab

Posted: 12 May 2012 04:21 PM PDT
http://forums.qrz.com/showthread.php?345935-Professor-Know-How-s-Lab&goto=newpost

Kids in Professor's Lab 2.0.jpg

My name is Jim Phillips. My bride and fellow ham Shelly, AB1CD, have something very important to share with the amateur radio community. First, we would like to invite you to watch a short cartoon video called □Professor Know-How□s Lab□. The video is an especially entertaining way to explore a great new program to get young people interested in the secret inner workings of science and technology. The link for the video can be found at: http://www.qrz.com/db/AB2CD

After taking a look at the video and the summary posted on my QRZ page, we would like you to consider adopting the cause and becoming the "Ultimate Elmer", a volunteer professor. Working with young people has been so much fun and rewarding for us. I am certain it can be equally rewarding for you as well. To date, 121 hams have expressed an interest in becoming an Adjunct Professor Know-How. We could sure use some more help. Please email jim@tlcfun.com to sign up.

Thank you and please help us spread the word. Jim & Shelly

Also, this is a great article about what it means to be an "amateur":

(e-mail: dl7voa@darc.de)

4X, ISRAEL
Jaap,PA7DA, Loek,PA9LUC, mit XYL, Hans,PA0JBB, and SWL Aad van den Nieuwendijk are going to visit Israel from May 17-30. 4X/PA7DA and 4X/PA9LUC will be QRV on 10m, 6m and 2m from Nes Ammim (KM72nx) during the first week and from Rishon LeZion (KM71jw) in the second week. QSLs via homecalls. See also: http://pa7da.jouwweb.nl

5X, UGANDA (update)
Freddy,F5IRO (J28RO), received his callsign 5X5RO meanwhile and is working in CW (maybe also PSK) during his spare time until June 8. QSL via F8DFP.

6V, SENEGAL
Vlad,RK4FF, plans to show up as 6V7S from Le Calao in Ngaparou in CW, SSB and RTTY on 80m/40m/20m/15m/10m from May 16-28. QSL via RK4FF.

7X, ALGERIA
Members of the Djelfa Radio Club (7X2VFK) are activating the special event station 7U50ND from the 4th International HAM radio meeting in Djelfa from May 20-26 celebrating the 50th anniversary of Algerian independence and the 20th jubilee of their club.

9N, NEPAL
This year, about 20 Nepalis obtained an amateur radio license and a repeater has been installed in Kathmandu. So far the following callsigns have been issued:
9N1GJ OM Ganesh K. Gimi
9N1KK OM Pravin Joshi
9N1KS OM Khadga Sen Oli
9N1MM YL Kalpana Pokharel
9N1NS YL Nisha Shrestha
9N1NU YL Niva Upretee
9N1SP OM Sanjeev Pandey

9N1ss OM Surya N. Shrestha
9N1TN OM Tara B. Neupane

D2, ANGOLA
Craig,D2SG is working on an offshore oil rig until about May 2013
(according to other reports only until Oct 3, 2012) and can do his
radio hoppy only during his leisure time onshore near Luanda.
QSL via GM4FDM.

E4, PALESTINE
Vladimir,UA4WHX, who just went QRT as JY8VB has been spotted as E40VB
on 12m meanwhile. More details of the stay are not known as always.
QSL via home call.

FK, FRENCH NEW CALEDONIA, OC-032
Jacky,ZL3CW, is working as TX5CW from Noumea (OC-032) until May 29.
QSL via homecall.

HA, HUNGARY
Zoli,HA1ZH, is active in all modes and on all bands using the special
callsign until Dec 31 on the occasion of his 50th jubilee as a HAM.
QSL via homecall. See also: http://www.ha1zh.hu

HB9, SWITZERLAND
A group of HB9FCF will be active using the special call HB9MERK in CW
and SSB QRV from the "Mennonite European Regional Conference" in
Sumiswald near Bern from May 18-20. QSL via bureau to PA0HEL.
See also: http://homepage.bluewin.ch/hb9merk/index2.html

JA, JAPAN
The special event station 8N1TDU is active from the "Tokyo Denki
University New Campus" (Tokyo Senju Campus) until December 31.

The special event station 8J1ITU will be activated during the
"World Telecommunication and Information Society Day" until May 31.

The JARL club in Abashiri was renamed to Okhotsk which is marked on air
with the special callsign 8N8OKH until Jun 3.

The special callsign 8J0WAZA promotes the "National Skills Competition/
National Abilympics" competition 2012 in Nagano until Oct 31.
QSL cards to special event stations from JA are always ok via bureau.

ON, BELGIUM
A few members of the UBA section ODE will be active from the castle
De Ghellinck (BCA ref. OV-032, WCA ref. ON-00364, Loc JO10st) in the
Oost Vlaanderen province from May 18,1400 UTC, until May 20,1400 UTC.
Listen for OT7G/p in SSB and CW on all HF bands and in FM on 2m or
ATV via local repeaters. QSL via ON5MA.

P4, ARUBA, SA-036
Michal,P4/OK7MT, Vit,P4/OK5MM, and Petr,P4/OK2PP, announced to be
active from Aruba (SA-036) from May 17-31. They will sign P40H in the

upcoming WPX CW Contest (May 26-27). QSLs via OK7MT, LoTW.

SP, POLAND
The special event station SN750K marks the 750th anniversary of the
city of Krzesnica. OPs will be Weronika,SQ1KSL, from May 18 until Jun 8
and Slawek,SQ1KSM, between June 9 and July 2. QSL via bureau.
See also: http://slawera.ovh.org

UT, UKRAINE
The special callsign EM100RU celebrates 100 years of amateur radio in
the Ukraine until May 31. They have issued also special awards.
QSL via UT1RT. See also: http://uarl.com.ua

VE, CANADA
Members of the Manotick Amateur Radio Group (VE3RIX) will be QRV from
the Fort Wellington National Historic Site (WCA SU-00215) in Prescott/
Ontario using the special call VX3W on May 19, 1400-2000 UTC.
They will choose their operating modes and bands depending on the
propagation conditions. QSL via VE3XGD, unfortunately only direct.
See also: http://www.ve3rix.ca

VU, INDIA
Manju,VU2SMS, is active as AU50GOA 40m/20m/15m/10m from Goa until
May 31, which could be of interest not only for the WPX hunters.
QSL via homecall, unfortunately only direct.

W, USA
In the last week of May, Connie,NR4CB, will start her 6000 mile trip
which will lead her through 23 US states, Washington DC, 2 Canadian
provinces and many counties until the second week of August. She is
working with a Kenwood TS480SAT and Opek HVT-400B antenna from 80m-6m.

XX9, MACAU, AS-075
The ADX Group members EA5BZ, EA5CEE, EA6DD, EB5BBM, F5VLY, EA1ACP,
EA5FX, EA7FTR and EB7DX plan to show up as XX9E with at least three
stations in CW, SSB and RTTY on 6-160m from Coloane Island (AS-075,
Loc OL62sc) from May 17-23. Following frequencies were announced:
CW: 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893, 28023 kHz
SSB: 1825, 3780, 7065/7160, 14145, 18145, 21295, 24945, 28495 kHz
RTTY: 7035, 10140, 14080, 18100, 21080, 24921, 28080 kHz
6m: 50103 kHz (CW) and 50115 kHz (SSB)
QSL via EB7DX. See also: http://www.adxg.org/xx9

YV, VENEZUELA
A pure YL team (Mayka,YY5ALO, Carolina,YV4AW, Maria Celina,YY5MCO,
Naudys,YY5ANG, Suer,YY5EBV, Yanira,YY5SRR, Ingrid,YY5ILN, Lesmi,YY5LR,
Alejandra,YY5AA, and Laura,YY5OLA) will be QRV in SSB/CW/digital modes
signing YW5YL from Isla la Playita from May 18-20. QSL via YV5AJ.

SJ9WL/LG5LG, MOROKULIEN
Ron,DL6AUK, and Sven,DJ2AT, are going to visit the peace monument
"Morokulien" from May 22-31. Both calls, LG5LG and SJ9WL, will be used
changing daily in CW/SSB/digital modes on 160-6m (mainly on 40m/20m).
During the last two days they will work in QRP only on 80m/40m/30m/20m.
See also DJ2AT on QRZ.com and http://www.sj9wl-lg5lg.com

FOLLOW THE TORCH AWARD
The "Worked All Britain Awards Group" supports a special award on the
occasion of the Olympic torch relay through Greeat Britain. The torch
relay will take place from Lands End through the whole United Kingdom
to the Olympic Park in London between May 19 and July 27. The WAB calls
G4WAB and G7WAB are following the torch using the prefixes GX, GT, GN,
GH, GS, GP and GC. See also: http://www.worked-all-britain.co.uk and
http://www.bbc.co.uk/news/uk-17358291

DX RUMOURS: The DXpedition to Clipperton Island indicated in the last DXNL
seems to take place actually. The date is scheduled for March 2013 and
a website has been set up as well: http://www.cordell.org/CI

DXCC FIELD CHECKERS: All Field Checkers may now check also QSL cards of
deleted DXCCs. The only restrictions left are for the 160m band.
See also: http://www.arrl.org/dxcc-card-checker-master-1

SILENT KEY: Lawrence A. Gandy,AH8LG, passed away on May 8 at the age of 80.
The president of the American Samoa Amateur Radio Association (ASARA)
was an active DXer and supported many DXpeditions to the South Pacific.
Xavier Paradel,EA3ALV, died on May 12. He was director of the Spanish
edition of "CQ Radio Amateur".
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost them, but grateful that we could
get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 17 QRP Minimal Art Session
May 19/20 King of Spain Contest
May 19/20 Baltic Contest
May 21-25 AGCW DL Activity week
May 26-27 CQ World Wide WPX Contest, CW

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: The special event station EH8ITU is working
from Gran Canaria (Loc IL28FC) during the ITU day from May 17-20.
QSL via EA8ADL (bureau/direct).

EU-008, GM/MM, Inner Hebrides: A mini DXpedition leads Glyn,GW0ANA, to
Gigha Island (IOSA NH24, SCOTIA CS23) where he will sign GM0ANA in SSB,
CW, RTTY, PSK and SSTV from May 21-27. QSL via GW0ANA (bureau/direct).

EU-009, GM/MM, Orkney: Andre,GM3VLB, is making a tour to the Orkney Islands
to activate the last five islands of the EU-009 group himself. Thus he
would have visited and activated all 200 islands. His trip will start
on May 21 and is scheduled to last until Jun 7 but an extension may be
possible. The five "last" islands are
Muckle Green Holm (IOSA OR32, SCOTIA OI20),
Linga Holm (IOSA OR31, SCOTIA OI21),
Eynhallow (IOSA OR24, SCOTIA OI24),
Faray (IOSA OR23, SCOTIA OI28) and
Calf of Eday (IOSA OR29, SCOTIA OI29)
The visit depends on the weather conditions since access to the island
is not always easy. He will sign GM3VLB/p and is on his own.
QSL only direct via homecall. See also: http://www.gm3vlb.com
---
Members of the Orkney Amateur Radio Club will be active as GS5NB from
Ness Battery on Scapa Flow from May 19-21. They will work with two
stations in CW, SSB and digital modes on 80m-10m.
QSL only direct via GM0WED or via LoTW.
More information is available at: http://eu009.webplus.net

EU-017, I*9, Eolie Island: The Sicilian Radio Amateurs in the World (RASM)
members Carmelo,IT9TFX, Fabio,IT9AHI, Antonio,IT9YMM, Sergio,IW9FSG,
Max,IT9AKC, and Gino,IZ8MWG, will be active as ID9Z from Lipari
(IIA ME-001, MIA MI-053, WLOTA 1144) in all modes on all bands from
May 17-20. Direct QSLs via IT9TFX, bureau QSLs via ID9Z, LoTW upload.
More info at: http://www.radioamatorisicilianinelmondo.jimdo.com

EU-032, F, Poitou-Charentes Region group: EA2DXR, EA2JB, EA2KK, EA2RC, EA2TT
and EA2VE will be QRV as TM12O from Ile d'Oleron (DIFM AT-025, WLOTA
1369) from May 18-20. Listen for them in SSB and RTTY on 80m, 40m, 20m,
15m and 10m. QSL via EA2TT (bureau/direct).

EU-039, F, Chausey Islands: Members of the Charente DX Group (Laurent,F5MNK,
Eric,F5LOW, Bertrand,F6HKA, Leon,ON4ZD/OS0S) are going to activate
Chausey Island (DIFM MA004, WLOTA 0424, DPF 04, Loc IN89CU) as TM0CI
from May 19-25. Chausey is a group of small islands at the coast of
Normandy. QSL via F5EOT (bureau/direct). See also QRZ.com.
More details can be found at: http://www.frag33.org/www.cdxg.org/TM0CI

EU-043, SM6, Goteborg och Bohus/Halland County group: 7S6W is going to hit
the airwaves from Vinga Island (SWA-163, SMFF-3495) with three stations
mainly in SSB but also in CW/RTTY from May 17-20.
Bureau QSLs via SM6MIS, direct via SM6WET.
More information is available at: http://sm6.se/7s6w

EU-047, DL, Niedersachsen State group: Sebastian,DL1AXX/p, will show up from
the island Baltrum (GIA N-06) in CW/SSB on HF from May 20-25. His focus
will lie on 40m CW. QSL via homecall (bureau/direct).

EU-059, GM/MM, St. Kilda: Allan,GM3OZB, Barry,GM3YEH, Bill,GM3ZRT,
John,GM0DJG, Gordon,MM0BIM, and Declan,EI6FR, are working from the
biggest island in the Hirta group from May 16-21. Listen for GM7WCO/p
in SSB, CW and RTTY on HF and 6m. QSL via GM7WCO.

EU-061, LA, Vest Agder to Ostfold County group: Ric,LA/DL2VFR, and
Norbert,LA/DL2RNS, are handing out a few IOTA points from Hvaler Island
in SSB and CW on the HF bands from May 16-20. QSLs via homecalls.

EU-120, G/M, English Coastal Islands: Kev,M0TNX, and Martin,M3POG, will
sign GB2HI from Hilbre Island on 80m-10m from May 17-20.
QSL via M0OXO (d) or via bureau.

EU-129, DL, Usedom Island: Peter,DL3APO/p, is working from Usedom (DLFF-075)
in CW, SSB and RTTY on HF from May 14-20. QSL via homecall.

Hans,DL2RU/p, is spending his holidays on Usedom from May 21-26. He
plans to visit also Goermitz Island (GIA O-15) for a few hours starting
on May 20 around 1200 UTC. His preferred frequencies are 7028, 10120,
14038, 18088 kHz. QSL via DL2RU (bureau/direct).

EU-146, PA, Zuid Holland/Zeeland Province group: Marcel,PD5MVH/p, is going
to hit the airwaves from the island Goerree Overflakkee (WLOTA 3501)
between May 19 and Jun 2. His preferred frequencies are 14245, 28555
and 144300 kHz (+/- QRM). QSL via homecall (bureau/direct).

OC-199, VK6, Western Australia State (NW Coast) Centre group: Wally,VK6YS/p,
will show up from West Lewis Island mainly in SSB on on 40m-10m from
May 19-21. QSLs only direct or eQSL via homecall.

US Island FL-488: A group of local HAMs (including KD4MZM and K4FLV) of
the Sarasota-Venice Iceland Activation Group is taking a day trip to
Venetian Waterway Park (not IOTA, USi FL-488). They plan to work for
4-6 hours in SSB on 7250, 21350, 28450 and 14250-14260 kHz, in PSK31
on 14070 kHz and on the usual CW frequencies on May 19.
For QSL info see QRZ.com (KD4MZM and K4FLV).

Lighthouse activities

P4/OK2PP LH 0033 May 17-31
P4/OK5MM LH 0033 May 17-31
P4/OK7MT LH 0033 May 17-31
PJ2/G4MFW LH 0942 May 17-20
PJ4/G4MFW LH 1279 May 17-20

WFF activities

SPFF: SN0WFF is working from the Park area SPFF-018 on 80m, 40m, 30m, 20m
and 15m from May 17-20. QSL via SP5X (bureau/direct).

Radio Club Members Connect to the World, Serve Local Community:

Posted: 14 May 2012 05:09 PM PDT
http://www.eham.net/articles/28291

LEWES -- Since 2004, the Lewes Amateur Radio Society has been embracing and promoting short-wave communication in the Lewes community and beyond. What was a five-member group of local amateur radio operators at its inception has expanded to 41. "It's a very diverse group and they're a hoot to be with," member Mike McClanahan said, adding that the members, while mostly retired, have been involved in numerous industries. McClanahan has had his license since the mid-1950s and is still amazed by it. Amateur radio operators are licensed by the federal government and are given codes to identify themselves: McClanahan's is W3RMM. "It's the awe of being able to converse with people around the world without picking up the phone or spending a lot of money," he said. "It's a neat hobby. It's just fun. it really is." LARS president Richard Drevo, who goes by W3GNQ, said he got his amateur radio license in 1956 and still goes to his radio to communicate with others on a regular basis. In fact, the group meets over the airwaves on a weekly basis when there's no in-person meeting scheduled. The in-person meetings are noon on the first Wednesday of the month at The Green Turtle Sports Bar and Grill in Five Points. Drevo said he regularly talks with people from western Europe and elsewhere. "A lot of people just like to get on the air and talk," he said. "I think it's quite amazing that ... we can talk around the world."

- K1CE For a Final

==> HURRICANE SEASON 2012

The forecast for hurricane season 2012, which begins next month, is a
bit more benign than past years, but that is no reason for complacency.
Prepare now!

EXTENDED RANGE FORECAST OF ATLANTIC SEASONAL HURRICANE ACTIVITY AND
LANDFALL STRIKE PROBABILITY FOR 2012
```

"We anticipate that the 2012 Atlantic basin hurricane season will have reduced activity compared with the 1981-2010 climatology. The tropical Atlantic has anomalously cooled over the past several months, and it appears that the chances of an El Ni&#65533;o event this summer and fall are relatively high. We anticipate a below-average probability for major hurricanes making landfall along the United States coastline and in the Caribbean. However, coastal residents are reminded that it only takes one hurricane making landfall to make it an active season for them, and they need to prepare the same for every season, regardless of how much activity is predicted. (as of April 4, 2012)" -- Philip J. Klotzbach and William M. Gray, Department of Atmospheric Science, Colorado State University, Fort Collins, CO 80523

```
ARES and Hurricane Operations
```

Now is the time for ARES® members to assess their portfolio of communications equipment and disaster response knowledge. Here are several tips for amateurs involved with hurricane operations:

- Monitor major HF hurricane networks during events this season. The Hurricane Watch Net (HWN <http://www.hwn.org/>) on 14.325 MHz is one of several key players. It serves either the Atlantic or Pacific during a watch or warning period and coordinates with the National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) in Miami. Frequent, detailed information is issued on nets when storms pose a threat to the US mainland. In addition to hurricane spotting, local communicators may announce that residents have evacuated from low-lying flood areas. Other amateurs across the country can help by relaying information, keeping the net frequency clear and by listening. See the HWN's website <http://www.hwn.org/> for more information. The net works closely with WX4NHC <http://www.wx4nhc.com/>, the Amateur Radio station at the NHC.
- The SATERN Net <http://www.satern.org/> (Salvation Army Team Emergency Radio Network) provides emergency communication support to the Salvation Army and populations at large. They also handle health-and-welfare traffic. SATERN holds high profile nets on 20 meters (14.265 MHz) during major hurricanes and has a long history of excellence, discipline and service. Refer to the SATERN website <http://www.satern.org/> for more information.
- The Maritime Mobile Service Net (MMSN <http://www.mmsn.org/>) meets on 14.300 MHz and is composed of hams who serve and assist those in need of communications on the high seas. According to its website <http://www.mmsn.org/>, the primary purpose of the net is for handling traffic from maritime mobile stations. The network is recognized by the United States Coast Guard and has an excellent working relationship with that agency. The MMSN has handled hundreds of incidents involving vessels in distress and medical emergencies in remote locations, as well as passing health and welfare traffic in and out of affected areas. They also work closely with the NWS and NHC by relaying weather reports from maritime stations.
- The VoIP SKYWARN and Hurricane Net <http://www.voipwx.net/> operates by combining both the EchoLink and IRLP linked repeater networks, while handling critical wide area communications during major severe weather and tropical events. These operations have gained national stature in recent years and the net is a critical partner with WX4NHC. Whenever tropical weather is imposing a threat to the US mainland and certain other areas of interest, the VoIP WX net will be fully operational. See the VoIP SKYWARN and Hurricane Net website <http://www.voipwx.net/> for more information.

Florida Hurricane Net on D-STAR

The Florida Hurricane Net is a D-STAR net that meets each Monday night on D-STAR Reflector 034A at 2100 EST. The primary purpose of the Net is to provide training to ARES members in the three Florida ARRL Sections and hurricane emergency communications in the State of Florida for served agencies if a hurricane or other disaster is threatening or strikes Florida. Although this net is focused on training and support

for ARES members and their served agencies, any Amateur Radio emcomm operator or organization is welcome and encouraged to participate in the net. In addition to hurricanes, the net can and will be activated by any major emergency of state wide or regional significance where it would be necessary to provide communications for and to served agencies and/or the State Emergency Operations Center.

To participate in the net, repeaters and Dongle users should connect directly to REF034A. D-STAR stations using their local repeater should have their radio programmed for local use with CQCQCQ in the UR field and their local repeater's gateway in RPT2.

The net takes check-ins using the Quick Key Format to transmit your callsign. When your Section is called, key your radio or Dongle for one second only when the frequency is clear. Net Control will acknowledge all check-ins seen. -- Journal of the North East Florida D-STAR Repeater Network

----

During hurricane events, there are usually two or three regional nets (usually on 40 or 20 meters) that spring to prominence as major key assets to the disaster response on an ad hoc basis. Watch for these nets, as well as the nationally recognized networks described above, this season. Don't transmit on their frequencies unless you are absolutely sure you have something substantive to add, and then only under the direction of the net control station.

ARRL Emergency Preparedness Manager Mike Corey, KI1U, adds that when ARES® activates in response to any tropical event, it is crucial that information flows up through the Section and is reported to Headquarters. "These reports allow us to develop the situational awareness and disaster intelligence that is required for us as an organization to support the Sections that are impacted," he explained. "In this way, we are able to respond to relevant requests from the media and finally to coordinate with the governmental and non-governmental organizations. This information also allows us to make the decision at Headquarters on whether to stand up the ARRL HQ Emergency Response Team to support and coordinate the operations."

==> HAMS ACTIVE IN DEXTER, MICHIGAN TORNADO

On Thursday, March 15, at around 5:15 pm, the village of Dexter, Michigan was struck by what the National Weather Service (NWS) has confirmed as an EF-3 tornado, with maximum wind speeds of 135-140 mph. The storm was on the ground for roughly half-an-hour, moving to the southeast before making a left turn. The NWS estimated the path as a little over seven miles long and roughly 800 yards wide. Though the storm caused considerable damage to structures and personal property, no one was seriously injured or killed.

Reports indicated that this welcome outcome was due primarily to Washtenaw County's system of warning sirens. Other reports give credit to the SKYWARN® network of spotters, trained by the NWS to recognize conditions leading up to severe weather, what it is and what can generate it. SKYWARN volunteers served to give the NWS forecasters the information they needed of what is actually happening in the field, information that they can't get from their instruments, the so-called "ground-truth." While meteorologists monitored conditions in the atmosphere above that lead to severe weather, the destruction occurs at ground level, literally "under-the-radar."

SKYWARN spotters reported conditions from the safety of their homes, but also ventured out in the field to provide information in the territory that normally wouldn't be covered. Information was transmitted back to not only the National Weather Service, but to county emergency service departments and county dispatch centers.

The hams of Washtenaw County, in the field during their SKYWAN net, were among the first to confirm the existence of a wall cloud; and confirm it was rotating and that a tornado was forming. For their efforts, they were pelted by debris and hail, and suffered damage to their vehicles, including a shattered window.

During "peacetime," the hams of Washtenaw County as well as other counties throughout the state, position themselves near the county's warning sirens during the monthly test, providing information on the sirens that are working and which need maintenance. - Pat Mullett, KC8RTW, Michigan Section Public Information Officer, kc8rtw@arrl.net

==> SANTA FE (NEW MEXICO) ARES SUPPORTS SAR MISSION

>From Wednesday, March 15, through Saturday, March 18, Santa Fe ARES (SFARES) participated in a search and rescue effort for a lost 51 year-old male. Seven SFARES members supported the mission in two teams from its SAR Communications Group. Unfortunately, the missing subject has not been found yet.

The SFARES SAR Communication Teams (KE5TFU and N4VIP for Thursday's activity and N5XDF and NM5AK for Saturday's effort) were requested to provide communications support for the mission on the Taos/Colfax county line, 28 miles East of Costilla, New Mexico on mostly back roads. On arrival at Incident Base, the operators noted that communications were going to be challenging due to the terrain. It was also cold: 19 degrees with a steady wind at Incident Base.

On Thursday, the Incident Commander assigned Kenneth Robinson, KE5TFU, to be positioned one half mile up the road from Incident Base, while Don Hinsman, N4VIP, would remain at Incident Base. The plan called for KE5TFU up the road to talk to the State Police Mission helicopter on VHF channel SAR1 and N4VIP would talk to the other teams on channel SAR3. KE5TFU and N4VIP would use channel SAR2 to communicate between themselves.

Prior to splitting the team and assigning them to the two locations, the Logistics Chief had requested the development of a Communications Plan (ICS 205) but there was never an opportunity to prepare it. Also, KE5TFU and N4VIP had determined that there were at least two amateur repeaters and two more Megalink <http://www.arrl-nm.org/wp/clubs/state-wide/mega-link> repeaters available for use, but the Incident Commander made it clear that he did not want the use of amateur repeaters due to the risk that news media personnel might be listening.

Prior to the departure of each search team, radio checks were conducted on SAR3. It was quickly noticed that once a team departed for their assignments, the terrain could block line-of-sight communications, so the Incident Commander requested that a radio check and position report be conducted with each team every 30 minutes. Position reports were made in the standard 2 group UTM (Universal Transverse Mercator coordinate) system. Each position report made to Incident Base was repeated back to the team to ensure 100% copy. The Operations Section Chief would then ask N4VIP to repeat the UTM coordinates to him and he would then plot the positions.

Regular communications between the Incident Base and the search teams started at 0900 and continued until 1900 with a steady tempo. Almost all communications were in the form of a radio check and a position report. When a team would report finding a shoe print or a shell casing or a cigarette stub, the exact UTM coordinates were passed to Incident Base. Incident Base would request more detailed information on the find.

A wavelength antenna was installed on a magmount on top of the truck used as the Command Post. The Planning Section Chief, Operations Section Chief and N4VIP fully occupied the tailgate. The Incident Commander was parked immediately behind the tailgate and would hover nearby looking at the map plots. The Operations Section Chief would plot the location of all routes followed by the teams and the location of all found items.

KE5TFU made all communications with the helicopter. Search area assignments were developed by the Operations Section Chief and passed from N4VIP to KE5TFU (on SAR2) and then on to the helicopter on SAR1. The helicopter crew used latitude/longitude instead of UTM so search assignments passed to the helicopter had to be passed in latitude/longitude, which required the Operations Section Chief to convert UTM coordinates.

For the Saturday effort, Charles Rogers, KJ5KU, with the Los Alamos ARES Group was at the Incident Base with the Los Alamos ARES communications trailer and had spent the night at Incident Base after working communications for the mission on Friday. The communications trailer was set up for both amateur 2-meter operations and SAR VHF operations with a J-pole antenna on a mast for each. The trailer also had two generators running: a very quiet Honda 2000i powering the lights and radios (and associated batteries); and a fairly loud Coleman

camp generator running an electric heater.

On Saturday, given the large number of search teams that would be participating, it was decided to organize the search into two Strike Teams with multiple sub teams under each. Strike Team 1 and its sub teams were assigned the SAR3 VHF frequency, and Strike Team 2 and its sub teams were assigned SAR2 VHF. SAR1 VHF was used for the Strike Team Leaders to communicate back to Incident Base and via the Civil Air Patrol (CAP) plane that was providing overhead relay support (referred to has High Bird or HB). In addition, Family Radio Service (FRS) channel 1 (no tone) was used within the Incident Base for a command network.

Alexander Kent, NM5AK, had brought three FRS radios and the Safety Officer also had several allowing an FRS radio individually for Comms, Incident Commander, Operations, Logistics, and Safety plus a backup. One Amateur Radio frequency and repeater were also used -- the Angel Fire repeater (147.34 MHz) -- to communicate with Hollis Atkinson, N5LEM, who was relaying coordination information from the outside world since there was no cellular phone service at Incident Base.

Throughout Saturday's operational period, Terence Morton, N5XDF, usually manned the SAR radio as communicator while NM5AK recorded all communications in the log and manned the FRS and amateur radios. It wasn't unusual for activity to occur on two or three (SAR, Amateur, FRS) radios at the same time. Approximately five pages of communication logs were filled during the period from 0900 to 1600. All logs, messages, and the communication plan were given to the Operations Chief at the end of the operational period.

After the missions, a debriefing of both teams with SFARES' Management Group resulted in a detailed description of the "Lessons Learned" and an accompanying set of recommendations on ways to improve. -- Don Hinsman, N4VIP, Santa Fe, New Mexico ARES EC; Santa Fe and San Miguel Counties DEC

[The New Mexico Emergency Services Council (NMESC) holds the FCC license for the Primary SAR frequency and new Secondary SAR frequencies, and it authorizes these VHF and UHF frequencies for current NMESC member teams to operate in New Mexico SAR (State Mission Number Issued) activities and training.

All traffic is carried out using plain English only. The only acceptable deviation from this rule is the condition or "death" message assigned when the mission is started. No use of these frequencies other than during a SAR Mission or a SAR training exercise is permitted.

The Primary SAR Frequency (155.160 MHz) is used by teams in the field for communication with Incident Base and other teams in the field. It is not used for intra-team communication while on a SAR mission. Teams are expected to use a SAR Secondary Frequency or their own FCC licensed team frequency for intra-team communications.

The Secondary SAR Frequencies 151.370 MHz and159.285 MHz are assigned for use by the Incident Commander as appropriate for the particular mission and circumstances. -- NMESC. See the New Mexico Search and Rescue Council's website <http://www.nmsarc.org/> for a good look at current SAR protocols and methodologies. -- ed.]

==> LETTERS: NIMS AND ICS TRAINING TAILORED TO AREA HAZARDS

There are different threat dynamics that impact different jurisdictions and geographic areas. For example, Pennsylvania may be affected by floods and mudslides, while California is affected more by earthquakes and wildfires. Organizations should use their jurisdictions' hazard/threat analyses to determine the types of incidents most likely to occur in their areas and tailor their NIMS/ICS training accordingly. Our community goal and objective is to train our personnel to NIMS typing and qualification standards based on these analyses.

Also, there is a drastic difference between a population of 2,993 town residents and nearly 13,684 county residents, from a city of 3,792,621 and a county population of 37,691,912 when it involves planning, training, certifying, exercising, qualifying, and credentialing personnel resources to a hazard/threat analysis. The population dynamic must also be taken into account. -- Michael J. Cyran, WD6ALM, Master Exercise Practitioner (MEP); Communitions Unit Leader (COML); Los Angeles, California

==> ILLINOIS STATE REP WV9C VISITS STATION AT ILLINOIS EMA FACILITY

Illinois State Representative Chuck Krezwick, WV9C (Orland Park, IL), the only amateur licensee in the state General Assembly, visited the RACES station (NC9IL) at the Illinois Emergency Management Agency facility at Springfield recently. The tour was set up by ARRL Illinois legislative liaison Charlie Richey, K9DUE. Also on the tour was Jim Pitchford, N9LQF, Emergency Coordinator, who had just returned from tornado-ravaged southern Illinois. -- Thanks, Ben Kiningham, K9IDQ, Petersburg, Illinois

==> ARES MUTUAL ASSISTANCE TEAM (ARESMAT) CONCEPT

The ARESMAT concept recognizes that a neighboring section's ARES resources can be quickly overwhelmed in a large-scale disaster. ARES members in the affected areas may be preoccupied with mitigation of their own personal situations and therefore not be able to respond in local ARES operations. Accordingly, communications support must come from ARES personnel outside the affected areas. This is when help may be requested from neighboring sections' ARESMAT teams.

To effect inter-sectional support mechanisms, each Section Emergency Coordinator (SEC) should consider adopting the following principles in their ARES planning:

- Pre-disaster planning with other sections in the Division, and adjoining sections outside the Division. Planning should be conducted through written memoranda, and in-person at conventions and

director-called cabinet meetings. An ARESMAT inter-sectional emergency response plan should be drafted.

- Development of a roster of ARESMAT members able, willing and trained to travel to neighboring sections to provide communication support inside the disaster area.

- Inter-sectional communication/coordination during and immediately following the onslaught of the disaster.

- Post-event evaluation and subsequent revision/updating of the inter-sectional emergency response plan.

When developing ARESMAT functions, ARES leadership should include the following basic action elements:

Pre-Departure Functions

Team leaders should provide ARESMAT members with notification of activation/assignment. Credentials should be provided for recognition by local authorities. They should provide a general and technical briefing on information drawn principally from the requesting authority, supplemented by reports from Amateur Radio, commercial radio, W1AW bulletins and ARRL officials. The briefing should include an overview of equipment and communication needs, ARESMAT leadership contacts and conditions in the disaster area.

The host SEC's invitation, transportation (including routes in disaster area) and accommodations considerations, and expected length of deployment should all also be reviewed with the team members.

In-Travel Functions

Before and while in travel to the affected areas, team leaders should review the situation's status with the team: job assignments, checklists, affected area profile, mission disaster relief plan, strengths and weaknesses of previous and current responses, maps, technical documents, contact lists, tactical operation procedures and response team requirements.

Arrival Functions

Upon arrival, team leaders should check with host ARES officials and obtain information about frequencies in use, current actions, available personnel, communication and computer equipment, and support facilities that could be used by the team to support the relief effort. The host's ARES plan in effect for the disaster should be obtained. A priority upon arrival should be the establishment of an initial intra-team communication network and an HF or VHF channel back to the home section for morale traffic.

Team leaders should meet with served agencies, Amateur Radio clubs' communications staff, local ARRL communications authority, and others as needed to obtain information and coordinate the use of frequencies.

Communication site selections should take into account team requirements and local constraints.

In-situ Functions

Team leaders should make an initial assessment of functioning communication facilities, and monitor host ARES officials' communications, and other response team relief efforts to coordinate operations and reduce duplication of effort. Team members should be monitored and their capabilities to perform their duties evaluated. Proper safety practices and procedures must be followed. A daily critique of communication effectiveness with served units and communication personnel should be conducted.

Pre-Demobilization and Demobilization Functions

An extraction procedure for ham communicators should be negotiated with served agencies and host ARES officials before it is needed. To get volunteers' commitment to travel and participate, they must be assured that there will be an end to their commitment. Open-ended commitments of volunteers are undesirable, partly because they make potential volunteers hesitate to become involved.Leaders must coordinate with the host ARES officials and served agencies, and other functions to determine when equipment and personnel are no longer needed. A demobilization plan should be in effect.

A team critique, begun on the trip home, should be conducted. Individual performance evaluations on team members should be prepared. Copies of critiques should be sent to both the home SEC and in-disaster SEC. Problems stemming from personality conflicts should be addressed and/or resolved outside of formal reports, as they only provide distractions to the reports. Equipment should be accounted for.

A post-event evaluation meeting should always be conducted, and a final report prepared so that an update to the inter-sectional ARESMAT plan can be made.

ARESMAT Member Qualifications

The individual filling the role of ARESMAT member must have high performance standards, qualifications, experience, and the ability to work with a diverse group of team members that will be required to provide relief to the affected areas. He or she must be able to work efficiently in a disaster relief operation under the most adverse conditions.

Additionally, a member should have demonstrated ability to be an effective team player, in crisis situations, a strong personal desire and strong interpersonal communication skills. A knowledge of how ARRL, Red Cross and other agencies function at both the national and local levels is helpful. A working knowledge of the incident command system is useful as many events are managed under this system.

Members should be respected and recognized by officials and peers as competent communicators and should understand a broad range of disaster response organizations' capabilities and communication requirements.

Important: Members must be available with the consent of their employer to participate! They should be physically fit to perform arduous work under adverse environmental conditions.

Summary

It should be noted that there is a fine balance of authority over a deployed ARESMAT. The in-disaster SEC (or delegated authority) should be able to make decisions as to use and deployment of an incoming team. Therefore, an incoming team should be prepared to submit themselves to such authority; this is evidenced by the fact that any team, internal or external, has only a limited view of the overall operation. The supervising authorities will have a better overview of the whole situation.

In turn, however, the in-disaster authority should be discouraged from abusing the resources of incoming teams. Should a team no longer be required, or a situation de-escalate, the team should be released at the earliest possible time, so that they may return home to their own lives.

The ARESMAT tool should be one of last resort. Whenever possible, amateurs from the affected section should be used for support. It is a lot to ask of a volunteer to travel far from home, family and job for extended periods of arduous and potentially dangerous work.

==> K1CE FOR A FINAL

I particularly enjoyed including N4VIP's after-action report on a recent New Mexico SAR mission above in this issue. New Mexico has a longstanding reputation as a leader in the development and enhancement of SAR protocols and methodologies out of pure need: many subjects are lost in the vastness of many of the remote parts of the state, as well as more populated areas. It is noted that much of the participating ham operators communications were conducted on state VHF and UHF frequencies reserved for SAR missions, not on amateur frequencies. The message I took away from this is that ARES members can make themselves more valuable to served agencies if they are able to operate radios from other services, and know their different protocols, rules and regulations, guidelines and principles. Kudos to the New Mexico ARES community for their "extended range."

Fred Kleber, K9VV, has been appointed as Section Manager of the Virgin Islands Section beginning May 1, 2012. Kleber, of Christiansted, is taking the reins from John Ellis, NP2B, who is planning to move out of the Section soon. Ellis has been Section Manager of the Virgin Islands since 1996. Kleber has served as the Section Emergency Coordinator of the Virgin Islands this past year.

I traveled and visited with John Ellis, NP2B, on numerous occasions over the years, as he was and is one of the main emcomm go-to guys for not only the US Virgin Islands, but also for the entire Caribbean basin. His knowledge and contacts were invaluable to ARRL interests in emcomms in the region. John is also a good personal friend, with his enthusiasm and big smile always in evidence. Good luck in your future endeavors, John, and thanks for all you did for ARRL as Section Manager and otherwise.

Space Station project- ISS commorative coin- need some help re: donations

Posted: 16 May 2012 09:23 AM PDT
http://forums.qrz.com/showthread.php?346392-Space-Station-project-ISS-commorative-coin-need-some-help-re-donations&goto=newpost

Joe here N2GBT- were making a commemorative ceramic 46mm ISS coin for the Sept 2012 group project between the Daytona Beach Amateur Radio Assoc and Burns Science & Technology Charter School in Oak Hill Florida.

These coins are made by a company I own- Palm Gaming International/Palm Imports inc. We are one of the largest custom gaming chip manufacturers in the USA. These coins are 10.00 each and all proceeds go to purchasing needed equipment in order to meet NASA requirements for the uplink our club will provide to the space station.

The school is one of a select few who will have the opportunity to speak with the space station this September.

If you would like to donate 10.00 we will ship you a coin

iss back burns dbara.jpg

paypal is fine to: palmimports@aol.com

email me with any questions to: sales@palmimports.com

we could use your support

Thanks

Ham Radio Deluxe v5.22 Released

Posted: 14 May 2012 07:41 PM PDT
http://forums.qrz.com/showthread.php?346239-Ham-Radio-Deluxe-v5-22-Released&goto=newpost

HRD Software, LLC announces the release of Ham Radio Deluxe 5.22. This is the 4th release of software since W4PC, WA9PIE and K0CBH acquired the rights in November of 2011.

Erik Gawtry KC0WWC and Rick Ruhl W4PC have been coding in tandem for the past few weeks and have created this version with more fixes and some new beta features which will be in version 6.x. Version 5.22 includes a significant number of fixes, many that go back several generations of the software. This version also offers a preliminary manual, which is on the web site ready for download.

Mike Carper, WA9PIE, said, ☐I☐m very excited about this release. Many of the functions that never worked before are working now. We had great participation by our group of beta-testers and we☐ve tested every function of the suite that we can. Many of the testers also report that it☐s faster, and I agree. Erik Gawtry (KC0WWC) has a lot to do with the code-level improvements. Erik has been a great asset to this process.☐

Rick Ruhl, W4PC, said, ☐Erik and I as well as the QA team and the beta sites have worked painstakingly for more than a thousand hours to ensure that the software works as intended. It has been a long process that has yielded the results that we were all originally looking for when this venture was started. ☐

Mike adds, ☐We made a conscious decision to delay feature development for v6.x until after the v5.22 release. We wanted all our development resources focused on the backlog of user requests and on making 5.22 the best version of HRD yet. Our users asked us for that.☐ Users who take advantage of the discounted pre-buy opportunity for v6.x will continue to receive direct support on the v5.22 product. According to Mike, ☐It☐s important to download and use 5.22, as this will be the last free version that is produced. 5.22 will also be the only free version that will continue to receive support.☐

Version 6.x will have many new features which will include FSK support, a new QSL and awards tracking interface, improved cluster filters, label printing, and the Super Sweeper in Digital Master. Super Sweeper will allow

multiple signals to be decoded in the window formerly referred to as ☐Superbrowser☐.

HRD Software now has someone new for QA and Tech Support, W1MNK, Jon Maguire, will be leading the phone and email support. Jon has many years of experience in support and is a power user of HRD. This is the first of many hams HRD hopes to have on staff.

HRD Software will be in Audio Alley booths 108-109-100 at the Dayton Hamvention. The company has also created a YouTube site where feature demonstrations will be published for this and other versions.

A discounted pre-buy of version 6.0 is being offered for $59.95. This includes technical support for v5.2. The retail version of HRD will be $79.95 when it☐s released after Dayton 2012. Those that have purchased or will purchase the 5.X support will still get one year of support from the date of the 6.0 release.

You can purchase and download the product at http://www.ham-radio-deluxe.com.

//
LightSquared Files Bankruptcy After Network Blocked

Posted: 14 May 2012 04:08 PM PDT
http://forums.qrz.com/showthread.php?346205-LightSquared-Files-Bankruptcy-After-Network-Blocked&goto=newpost

LightSquared Inc. filed for bankruptcy, saying it will seek to resolve the concerns of U.S. regulators who thwarted the company☐s plan to deliver high-speed wireless to as many as 260 million people.

. . .

Bankruptcy ☐is intended to give LightSquared sufficient breathing room to continue working through the regulatory process that will allow us to build our 4G wireless network,☐ Chief Financial Officer Marc Montagner said in a statement. Reaching agreements with U.S. agencies may take as long as two years, he said in court papers.

. . .

LightSquared hit a roadblock in February when the FCC said it would withdraw preliminary approval for the company☐s network after government tests found that the signals would interfere with global-positioning systems.

HAMRADIONOW.tv

Episode 11: FCC Forum at the 2011 Dayton Hamvention

OK, we know this is last year's FCC forum, and we're just getting around to putting it

on-line. But it's still worth watching, especially as a warm-up to this year's Hamvention

forum, which we will get on-line quickly. Last year, Bill Cross W3TN reviewed and previewed

regulations, and Curt Bartholomew N3GQ talked about EmComm. And they answered your questions.

MMMonVHF Newsletter no. 1/ WEEK 20 2012
2012-05-09 at 20:05 UTC

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-05-09
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

** Sporadic E season 2012 **

The Sporadic E season 2012 has started. On May 8th at 13.08 UTC the first
ES QSO of 2012 was reported between YO3FOU (KN34) and IW1BCV (JN44).
The opening was short and hardly noticed as most will have been at work.
A bit later at 13:23 UTC another short opening starting with a QSO
between F5XU (JN15) and LZ3GM (KN32).

For the statistics; first openings reported in:
2008 May 11
2009 May 17
2010 May 11
2011 May 15

So 2012 looks like an early starter... let's see what is going to happen!

Good Hunting!

**DXCC: OH0: Aland; square JP90; start 2012-05-24

OH8K/0 will be qrv from JP90SF during the Nordic VUSHF-Meeting 2012

The plan from Jussi, OH6ZZ and Sami, OH9GDT will be to join the
Nordic VUSHF-Meeting at Island Aland during 24-27 Mai 2012
(http://vushf.rats.fi/)
They try to be qrv as OH8K/0 on 2m FSK/EME on 25-27 May.
QRG and more details will be spread later...

SOURCE: tnx to Jussi, OH6ZZ direct to MMMonVHF

**DXCC: 5X: Oeganda; square KJ60; start 2012-05-25

Moonbounce from Uganda, 5X1EME, KJ60GH

Soon we will travel to Uganda.
>From May 25th till June 3rd 2012, PA3CEE and PE1L will be active as 5X1EME. The locator is KJ60GH.

We have the same equipment as when we where operating as C56EME.
At 144 we have 2 x 8 element cross yagi and wa2odo preamp.
At 432 we have a small station with a 23 el yagi

If we can manage internet we will be on N0UK logger and HB9Q logger for last minute freq change etc.

Welcome to website! http://www.emelogger.com/uganda

We want to give a big thanks to our sponsors, without this support its not possible to do this trip.
http://www.emelogger.com/uganda/default.asp?page=sponsor

SOURCE: Rene PE1L and Eltje PA3CEE via Moonne

After some very successfull DXpeditions to the Gambia past year
(C56EME with 361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz),
Bonaire (PJ4X) and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya (5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near Kampala on the equator.

The plan is to leave May 21st and build up the station before the weekend. It's just
the two of us but we know what we are doing. It's a hard job to get the license there.
Callsign is still a bit insecure but we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a update via MoonNet, MMMonVHF and our mailinglist.
If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood.
We have to come back as often as possible. We can't resist....

SOURCE: Rene PE1L and Eltje PA3CEE direct to MMMonVHF

** DXCC: F: France ; square JN14; start 2012-06-02 **

F/PA2CHR/p qev from JN14BU begin of June

During my summer holiday I will be QRV on Saturday 2
June and (if good activity) Sunday 3 June from a
hilltop in Southern France.
This is not a real DX-pedition, just some hours fun.
If you need JN14 locator pse let me know, maybe we
can arrange a sked.

Station 144 MHz: FT857, 150W. PA and 10el.
Station 432 Mhz: FT857, 100W. PA and 21el.

Best 73's

ME-DXpedition 2012 de DL1YMK

The M&M-team is preparing the next EME-DXpedition, taking place in
May 2012. We will set out for our destination just after having
returned from the Swedish EME Meeting, organised by Lars, SM4IVE,
on the weekend 12./13th of May in Oerebro. We hope to reach our
destination in time and to get QRV on Thursday, 17th of May
(bank holiday in Europe) on 23 cm, followed by 70 cm on 18.05.
On Saturday, 19.05., we will be on 13 cm and on Sunday again on
23 cm. 13 cm will be run with a significant increase in power and
full 2424 MHz coverage. For the first time during an EME- DXpedition,
we intend to get also operational on 6 cm with our old, but proven
stressed dish and a new superb feed made by our friend Tommy,
WD5AGO. 6 cm will have an experimental character despite some 100 W
out, as we could not test so far, if the under-illuminated dish will
work up that high in frequency, so keep your fingers crossed!! Our
plan is to give it a try on Monday, 21th May. Also, we intend to
get active on 3 cm with a separate solid dish, which of course is
a lot smaller. Last weekend we made the first test with LX1DB, having
installed the dish in our garden place. The tests were not yet
satisfying, so our friend Willi right now is trying to help us out
with some substantial development aid!
During the DUBUS contest 26./27th of May, we will of course be
active on 23 cm in order to boost activity in the moonbounce contest
of contests. Our last day of operation will be Thursday, 31st of May.
A detailed schedule for the days from 21th May onwards predominantly
will depend on the progress with 10GHz in the meantime. Further details
to be published soon!! This years DXpedition will be the 9th

EME-DXpedition in a sequence for us. We hope to have fun all together
as experienced during past years DXpeditions.but this largely depends
on you.
Needless to say that it will be again a CW random event, although
doodle mode technically is possible (with a new laptop computer)
on request. We have no idea yet to what extent (if at all) i-net
access is feasable, though.

Vy 73, Michael and Monika

SOURCE: Moon mailing list ; Moon@moonbounce.info

** DXCC: 4X: Israel; square KM72; start 2012-05-17 **

2012 sees the first DXpedition by the group of Dutch radio amateurs
listed below to Israel, who, apart from making QSO's, look forward
to meeting local hams and visiting places of cultural and historical interest.
We will be active from May 17th until May 30th
The first 6 days we will stay in Nes Ammim in the Northwest between Nahariya
and Akko in KM72nx. From there we will travel to Rishon LeZion in KM71jw.

The members of the team during May 2012 are Jaap PA7DA, Loek PA9LUC and XYL,
Hans PA0JBB and SWL Aad van den Nieuwendijk.
At this moment we don't have a 4X callsign and will be QRV according CEPT-regulations with
4X/PA7DA and 4X/PA9LUC. We will operate mainly on 10, 6 and 2m.

More information on the PA7DA website!

Messages In An Emergency:

Posted: 16 May 2012 01:44 AM PDT
http://www.eham.net/articles/28301

Local governments marked National Emergency Preparedness Week (May 6-12) by introducing a new communications trailer. Customized with countless donations and volunteer hours for just $26,000, the District 69 Emergency Communications Team can tow it to any secure location, unlock the door, turn on the battery, generator or plug it in and be relaying life saving information back and forth to the world in minutes. With several overlapping technologies the team -- comprised largely of Mid-Island Radio Association members -- can speak to or exchange e-mail by radio, with the nearest emergency centre.

//
Legion Post Forms Radio Club:

Posted: 16 May 2012 01:44 AM PDT
http://www.eham.net/articles/28300

REDLANDS - The executive board of American Legion Post 106 recently approved the constitution of the post's Amateur Radio Club. The club is seeking accreditation from the American Radio Relay League. The primary purpose of the club is to provide communications in the event of natural disasters or other emergencies by working with other entities of Post 106 and relief providers in the area. Another purpose is to foster education and training among members with respect to electronic communication and emergency preparedness.

//
Dangerous Weather Focus of Class:

Posted: 16 May 2012 01:44 AM PDT
http://www.eham.net/articles/28299

As the rain pounded the roof of the Emporia National Guard, 20 individuals attended a
SKYWARN basic instruction class to become Wakefield Trained Spotters on May 9.
Storm Spotters are the "eyes" on the ground of the National Weather Service. They do
what all the expensive radar can't, detect.

//
The Hidden History of WTYJ at Georgia Tech:

Posted: 16 May 2012 01:45 AM PDT
http://www.eham.net/articles/28298

Georgia Tech was home to an amateur radio station and Radio Club long before it ever
had its own student radio station. By 1949, preliminary talks were underway about
expanding their activities into broadcasting. According to a June 1949 article in the
campus publication, The Technique, "Some time ago a plan was presented for the
installation of a campus radio station. The plan originated from two-sources -- the
YMCA and Marshall Painter, who graduated in March\& It was decided that a studio
having good microphones, turntables, and other broadcasting equipment would be a far
better investment than one built in a shipshod manner. Because of an Intercollegiate
Broadcasting Co. ruling that the waves of the station cannot go more than 200 feet from
their source, it is expected that use will be made of the common power of heating systems
to 'pipe' the programs to dormitories and fraternities."

//
Hopes are Dashed for WTC Morse Code Light:

Posted: 16 May 2012 01:45 AM PDT
http://www.eham.net/articles/28297

Forgotten in the flap over whether a design change will cost 1 World Trade Center its status as the nation's tallest building is the loss of a symbolic New York gesture. A flashing light -- or "architectural beacon" -- atop the tower that was to spell out "N" in Morse code has been changed to a simple blink. "The original design intent was to have the beacon act as a symbolic lighthouse for New York harbor [and the world] flashing 'N' in Morse code [dash-dot]," said Jordan Barowitz, a spokesman for the Durst Organization. "The design has been altered to a dot-dot to project the beam

as far and bright as possible."

//
Motorola Radar Tower Demolished for Office Park:

Posted: 16 May 2012 01:48 AM PDT
http://www.eham.net/articles/28296

Crews over the weekend tore down a small piece of the Valley's technology history. The
old Motorola radar tower at Elliot Road and Loop 101 was demolished to prepare the
site for the Discovery Business Campus, a 136-acre mixed-use office park. THE
TOWER The tower was built in the mid-1970s to test Motorola's radar technologies, a
spokeswoman said. Motorola stopped using the tower in the mid-1980s. Since then it
has been used by a Motorola amateur radio club, a Freescale Ham radio club and as a
T-Mobile cellphone tower.

//
Greenwich Boasts Historic Communications Feat:

Posted: 15 May 2012 05:25 PM PDT
http://www.eham.net/articles/28295

Did you know that the first Trans-Atlantic shortwave message was sent from a small structure near the corner of Clapboard Ridge Road and North Street, right here in Greenwich? In an age when nearly instantaneous global communication is taken for granted and communication delays of only a fraction of a second are intolerable for certain businesses, it's easy to forget how far we've come in this arena in a relatively short time. Greenwich was the site of a noteworthy early step in this constantly evolving technology. Shortwave radio uses a portion of the radio spectrum where wavelength characteristics are suitable for long distance communication. During the early part of the last century, many people were interested in the exciting possibilities that radio waves offered for rapid communication, and clubs were formed to explore this nascent technology. One of the earliest was the Radio Club of America. On December 11, 1921, amateur radio station 1BCG successfully transmitted a message that was received by Radio Club member Paul Godley in Ardrossan, Scotland. This resulted from a great deal of experimentation and skill on the part of Mr. Godley and six fellow Club members, who constructed the antenna and operating shack on the Greenwich property of their team Minton Cronkhite. Accounts of the event note that these men employed then-unconventional radio techniques to make their breakthrough. Today, a small monument commemorating the event can be found on a traffic island near the site of the original transmission. The achievement was important enough that two notable figures traveled to Greenwich to view the station's configuration. They were Professor Michael Idvorsky Pupin, a scientist and inventor who

made significant contributions to telephony and Mr. David Sarnoff, a leader in the development of radio and television as successful commercial broadcast media. Mr. Sarnoff also served as chairman of the board of the Radio Corporation of America (commonly referred to as RCA).

ANNOUNCEMENT

7O6T Socotra Island DX-pedition
April 30 thru May 15, 2012
By Dmitry (RA9USU; Leader), Igor (RA3AUU; Co-Leader) and David (K3LP; Co-Leader)
Dated: May 16, 2012

It gives us great pleasure to bring the 7O6T Socotra Island DX-pedition
to a successful finish on May 15, 2012, at 2100 GMT. As we finalize the checking of our Club Log QSO data, we celebrate with each of you in achieving the 162,029 QSO's logged. Each of our team members achieved many individual and team successes. This included working outside their normal operating comfort zone and working day after day using 8 to 12 hour work shifts with only getting 4 hours of sleep then hitting the stations operating again. They did not complain as they forged forward in a manner we've never seen. For this, we are extremely proud of their efforts.

As part of the informal operating agreement, we were limited to six radios and ten operators total. Remember, this means five operators available during anyone shift with six operators operating during peak performance periods. When you break these five operators into CW, SSB, RTTY & 160/80 Meter, you can run out of enough people quickly just because all bands and modes are open at the same time. We had three camp locations in order to reduce interference; CW Camp (Summerland Hotel), SSB Camp (Taj Socotra Hotel) and 160/80 Meter Camp at a remote beach location. Each of these locations remained on gas or diesel power generators throughout their operation. We would lose power at least once or twice each day at the Taj Socotra Hotel location for 1 to 3 hours

each time. We acquired a gas powered generator for use at the 160/80 Meter Camp.

Though in any major DX-peditions such as this, there are issues that get identified and warrant re-direction, re-planning and even a few changes in operating philosophy. Prior to, during and after closing our operating positions, the team had many review meetings to improve our team's performance. The DX Community at large provided valuable information that helped us to succeed. Thank you for your emails and comments regarding adjustments to frequencies, band openings, best use of operators, mode use, and logging errors. This input made us stronger and will be applied as we move forward on future planned DX-peditions.

As early as February 2010, the planning for this trip began. Initially, one may not believe that such an event would be even possible. This trip came about as a result of focusing on being a good person and building meaningful relationships in the Republic of Yemen. After numerous Dmitry trips and flights from Moscow to Sana'a, then from Sana'a to Socotra Island, it became evident that a future DX-pedition to the Republic of Yemen might be possible. Just like in business, even a 99% possible business deal sometimes doesn't close. For this reason, events occurring prior to Dmitry's formal announcement were never released or discussed except with the two Co-Leaders, Igor (RA3AUU) and David (K3LP).

Dmitry (RA9USU) and David (K3LP) had various conversions along the away leading up to this event regarding the Operating Plan and Logistics. Our plan was to have the DX-pedition occur the first week of June 2012 when we both had cleared our work schedules and when all the radios, amps, antennas, and supplies would be shipped in advance. After Dmitry landed on Socotra Island on April 12, it became apparent that our plan was coming to fruition faster than expected. Dmitry made a couple of round trips to and from Socotra Island and Sana'a resulting in several formal approvals being given. At this point, we were faced with a choice on either to have Dmitry operate as a single operator or try to invest as much energy as possible in brief moment to organize a team and have them fly two days later to Socotra Island. We elected to proceed with a bigger team and try our best to make the event significant!

Dmitry (RA9USU ' Team Leader) and Igor (RA3AUU) had contacted David (K3LP) just as he arrived in California at the Visalia DX-Convention on April 18-19, 2012, that our trip was a go and needed to be started on April 30 and ended on May 15, 2012. This forced us to abandon our prior Operations Plan and quickly devise a quick and dirty approach before the opportunity disappeared. This meant assembling an operating team that could go immediately, applying for VISAs, having each team member pack their applicable radios, amps, computers, antennas, filters, keyer, headset, coax, etc., immediately purchase their airline tickets and get ready to depart on April 26, 2012 arriving in Socotra Island on April 28, 2012.

This also meant that we were not in a position to discuss or request donations from organizations, clubs or individuals in fear of having the DX-pedition cancelled. As you can imagine, this was an expensive trip that lasted from April 12 (i.e. included on site planning) through May 16, 2012.

In order not to draw any attention to our activities, we used only one large movement of equipment into the country and prevented our second arriving team members to bring anything. In addition, no informal or formal announcement was made until April 30, 2012 as we activated our 7O6T website (www.yemen2012.com) and communicated our intentions via the internet and emails.

After getting limited team member contributions requested beyond their personal hotel, food and airline tickets (about $2,800.00), we are still in the hole about $25,000.00, so your individual contributions are greatly really needed. A complete 7O6T Finance spreadsheet was put together detailing all income and expenses for this trip and will be shared with NCDXF upon our return in hopes of getting their support.

You can submit your QSL Card request direct or via the bureau. Each will be responded too in a timely manner. In saying this, it takes a lot more time to process the manual requests. In order to provide an expedited QSL service, here are a few adjustments that we are making to our website (www.yemen2012.com):

• Adding PayPal payment for electronic QSL Card confirmations. No need to send QSL cards, once you •valid date and time• of your QSO•s on line and make a payment, these cards will be sent out first.
• Adding key space for major sponsors to the website

We want to thank the DX Community for their hard work, patience and willingness in making this DX-pedition a major success. We are all on our way home at this time.

New RSGB General Manager

Graham Coomber G0NBI has been appointed as General Manager of the Radio Society of Great Britain (RSGB)

He takes over from Don Beattie G3BJ who had been doing the job on a voluntary basis for 17 months following the sudden departure of the previous incumbent.

Graham's QRZ.com entry says he has recently returned to the UK from Greece, where his callsign was SV0XBA.

Amateur Radio Newsline(tm) Report 1814 - May 18 2012

Amateur Radio Newsline report number 1814 with a release date of May 18th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Canada take a first step toward gaining access to 60 meters; amateur radio gets drawn into the argument over whop really owns Scarborough Reef, entry level hams in Belgium get a power upgrade and the 2012 Dayton Hamvention is here. Find out the details are on Amateur Radio Newsline(tm) report number 1814 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: CANADIAN HAMS MAY SOON GET 60 METER PRIVELEGES

Canadian hams may soon be heard on the 5 MHz band. This as telecommunications regulator Industry Canada has posted the request from Radio Amateurs of Canada for access to 60 Meters and opened a window for anyone to file comments on the proposal. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

By way of background, back in 2010, Radio Amateurs of Canada approached Industry Canada and requested the use of five center frequencies in the 5 MHz band. Specifically 5332, 5348, 5358.5, 5373 and 5405 kHz.

The national society stated that the use of these frequencies would allow for more reliable communications during emergency operations. It noted that the propagation characteristics in the 5 MHz frequency range allow for both local and inter-provincial communications.

Radio Amateurs of Canada also noted that the U.S. amateur radio community has access to these frequencies and that harmonizing frequency use would allow Canadian radio amateurs to conduct regional emergency communications on a coordinated basis with U.S. radio amateurs. The society noted that many administrations around the world have authorized radio amateurs to use the frequency 5405 kHz.

At the same time, Radio Amateurs of Canada also requested the use of two additional frequencies, 5319 and 5329 kHz, for Canadian domestic use. However, after conducting a review of domestic and international use of 5319 kHz, Industry Canada determined that this frequency is unavailable for use by the amateur radio service in Canada.

The proposal still needs to complete the entire Canadian rule making process. Canadian hams and other citizens have until June 12th to file comments on this matter.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Bill Unger, VE3XT, is Radio Amateurs of Canada's North -East Ontario Regional Director. He says that this has been a long hard go and has taken a lot of time and effort on the part of the national society, doing so on behalf of all Canadian radio amateurs. (RAC)

**

RADIO RELATIONS: HAM RADIO BEING DRAWN INTO DISPUTE OVER OWNERSHIP OF SCARBOROUGH REEF

Ham radio is being drawn into a dispute over the territorial ownership of Scarborough Reef. This as a website pops up claiming correspondence between the Philippine Amateur Radio Association and the ARRL supports mainland China's territorial claim in regard to the land mass that's also known as as Panatag Shoal or Bajo de Masinloc.

The report on the Sina website relating to amateur radio says that back in 1990, the then Philippine ambassador to Germany indicated clearly in his letter to a German radio amateur on February 5th that, Scarborough was not within the Philippine territory and sovereignty. This, according to the National Mapping and Resource Information Authority of the Philippines.

The documents issued by the National Mapping and Resource Information Authority of the Philippines and the Philippine amateur radio organization to the American Radio Relay League on October 18 and November 18, 1994 had also are claimed to confirm that the Philippine territorial limits and sovereignty was stipulated by the Article 3 of the Treaty of Paris way back in the year 1889.

Scarborough Reef is located between the Macclesfield Bank and Luzon Island of the Philippines. Over the years it has seen seen several major DXpeditions and still ranks high as a wanted entity by DXers world wide. .

You can read the entire claim for yourself on-line at tinyurl.com/Scarborough-Reef.

(Sina.com, Southgate)

**

RESTRUCTURING: BELGIUM ENTRY LEVEL HAMS GET POWER UPGRADE

In a very strange turnabout of events, Belgium, which only recently threw a paperwork logjam into the lives of hams with antenna registration based on hours on the air and power output has suddenly

granted a major power increase to its entry level Foundation Class license holders. We have more in this report:

--

On May 4th, the Flemish government's telecommunications regulator B-I-P-T announced power increases that could permit entry level amateur radio Foundation holders to run 100 watt transceivers on the High Frequency bands. Well, more accurately run 100 watt out transceivers at about half power output level.

The new maximum output power for Flemish Foundation class license holders is 50 watts. That's up from the 10 watts out previously permitted.

But its not all good news for the Belgium based ham radio newcomers. This is because that nations Foundation class H-F allocations are being reduced slightly on most bands but the changes are far to many to list here.

There were also some modifications made for holders of higher class Belgium Amateur Radio Licenses. Those along with the major changes for the Foundation class are on line as a .pdf document in the Flemish language at tinyurl.com/belgium-power-upgrade.

And don't rely on Google or any other on-line language translator to convert this document into truly understandable English. Flemish is one of those languages that really require a human being to translate into understandable form.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The change in power level for Belgium Foundation level hams came as the result of a lobbying effort by the Belgium national amateur radio society, the UBA. Meantime there is no word on any hope of easing the antenna paperwork requirement now faced by all classes of Flemish hams. (UBA, Southgate)

RADIO POLITICS: ROSENWORCEL AND PAI CONFIRMED AS FCC COMMISSIONERS

The United States Senate has voted to confirm Jessica Rosenworcel and Ajit Pai as FCC Commissioners and they likely will have been sworn in by the time this newscast goes to air. Rosenworcel is senior communications counsel for the Senate Commerce Committee and also has FCC experience. Pai has worked at the law firm of Jenner and Block since April 2011, and is a former FCC attorney and Senate staffer. Once they take their Commission seats it will bring the agency up to its full complement of five commissioners.

HAM HAPPENINGS: HAMVENTION 2012 OPENS INTERNATIONALLY CONNECTED

As we go to air, the gates at the Hara Arena should be opening for the 2012 Dayton Hamvention. This is the gathering that's considered as being the show of shows in amateur radio.

Michael Kalter, W8CI, is the General Chairman of this 60th anniversary Hamvention and he recently told Hap Holly, KC9RP, of Rain that 2012 is dedicated to the concept that radio amateurs are internationally connected:

--

W8CI: "We have a new committee this year that is working with people that are coming from all over the world that is working to try to make them feel comfortable in Dayton, Ohio, and to be comfortable at Hamvention. They had a welcoming evening at the Mariott Hotel from about 4 to 6. The Mariott is South of Dayton. So we could meet and connect to more of our foreign visitors and make them feel welcome because they certainly are.

--

Kalter also says it looks to be a good year for both merchants and those hams attending Hamvention 2012 to get some new goodies. He says that that inside booth space is close to a sellout:

--

W8CI: "We are doing really well on indoors and if you were to look at our website (www.hamvention.org) and connect to a couple of liks you can see who is where and how many spaces are left. And there sure aren't very many spaces left.

"There are lots of different exhibitors from all over the world.

"We are pleased to have so many back this year and some new ones as well."

--

And what about this years prizes?

--

W8CI: "We are ahead on prizes this year from what we had last year in terms of dollar value. Our Prize Chairman and Prize Committee worked very hard to bring in some major prizes and our hourly prizes that start when Hamvention doors open.

"We have flat screens (displays) around the facility to make it a little bit easier and a little bit sharper to be able to see if your ticket stub has won."

--

If Michael Kalter's predictions are correct, 2012 should be a banner year for the Dayton Hamvention. We'll let you know more in next Weeks Amateur Radio Newsline report.

(ARNewsline(tm), Audio courtsy of RAIN)

**

HAM HAPPENINGS: HAM NATION DAYTON BROADCAST TO BE AIRED BY THE TECH GUY ON THE PREMIERE RADIO NETWORK

And speaking of Hamvention 2012, Bob Heil, K9EID, of Heil Sound tells us that satellite service Via Sat is installing its new Exede high speed internet service on site at the Hara Arena for the entire Hamvention weekend.

Bob that the plan is to initially site the equipment at Tom Medlin, W5KUB's streaming video booth in the Flea Market for all to use.

On Saturday, the 19th Via Sat will move the system outside the doors of the Hamvention's Audio Alley for a live broadcast into Leo Laporte, W6TWT's "The Tech Guy" radio show from around 2 to 3 p.m. Eastern Time. This means that 170 stations on the Premiere Network will have a live report form the Dayton Hamvention with Bob, along with co-hosts Gordon West, WB6NOA and George Thomas, W5JDX, originating from the Ham Nation booth for that broadcast.

Leo Laporte's "The Tech Guy" airs from 2 to 5 p.m. Eastern Time every Saturday. To find a station airing it where you live please visit techguylabs.com on the World-Wide-Web. (K9EID)

**

RESCUE RADIO: THE ROLE OF SOCIAL MEDIA IN REPORTING EMERGENCIES TO THE PUBLIC

"Emergency Management Without Social Media.Fail" is the title of a very interesting op-ed article by author Tim Burrows posted across several social media websites. In it, Burrows looks at both the positive and negative effects on the public that social media can have in attempting to disseminate and update information of a disaster, accident or other event that the public needs to know.

Whether you agree or disagree with Burrows assessment of the role of social media in regard to the accuracy of the information being made public, his article is a very interesting evaluation for anyone involved in the world of emergency communications. You can read the entire story on-line at tinyurl.com/emergency-social-media. (Wordpress.com)

ENFORCEMENT: CONNECTICUT HAM RADIO OPERATOR HELPS LOCATE AND CONVICT PERSON WHO STOLE FROM NATIONAL ARCHIVES

J. David Goldin ,WB1EZA, is being hailed as a hero by the United States National Archives. This after helping to solve exposed what authorities have called one of the most egregious instances of theft of historic materials from where the government preserves its historic documents, photographs and recordings. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

--

According to news reports when J. David Goldin, WB1EZA, saw a recorded interview of baseball great Babe Ruth for sale on eBay he knew something was wrong. That's because there was only one original record of that 1937 interview of Ruth on a hunting trip, and Goldin had donated it to a government archive more than 30 years ago.

So Goldin, who is described as an avid record collector, launched his own investigation that lead directly to uncovering the person now believed responsible for stealing close to 1000 artifacts from the National Archives.

Goldin began his sleuthing by purchasing a different recording from the same on-line seller. When the deal was complete he recognized the name of the seller as being the same National Archives employee who had received the Babe Ruth and other historic recording that Goldin had donated thirty years earlier.

Goldin then took his findings to federal investigators. They in turn obtained a search warrant and raided the home of retired National Archives employee Leslie Waffen. There authorities carted away two truckloads of materials. Now, after pleading guilty, a judge in Maryland has sentenced Waffen, to an 18 month prison term and fined him $10,000.

Before retiring, Waffen had worked at the National Archives for 40 years.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

United Stares Inspector General, Paul Brachfeld, whose office investigated the theft, says that he plans to honor Goldin. He told

the press that there are some people who give tips who are just passive. He said that J. David Golden wasn't like that. He called Goldin a sentinel. (QRZ.com, other media reports)

ENFORCEMENT: TRANSLATOR FINED $10000 FOR IMPROPER OPERATION

Ace of Hearts DJ service and its owner Randy Bennett have been dinged $10,000 by the FCC. This for operating an FM translator near Cape Canaveral, Florida with improper equipment and at more than authorized power levels. Bill Pasternak, WA6ITF, has more:

--

By way of background, in March 2011, the Enforcement Bureau's Tampa office issued a proposed $13,000 fine to Ace of Hearts DJ Service for using an unauthorized transmitting antenna system and operating at more than its authorized transmitter power output. In its investigation FCC agents from the Tampa office measured the field strength for station W277AN at almost twice its authorized level. An inspection showed that the translator was also operating with a two-antenna array rather than the single bay system for which it was authorized. ,

In its reply to the Notice of Apparent Liability, Ace claimed it was now operating within its authorized power levels and with an authorized antenna system. The company asked for the penalty to be waived or reduced, arguing that the higher power levels may have been caused by an unknown third party tampering with the transmission equipment. Also that the antenna issue was the result of a typo on an application.

But the commission was not persuaded that someone tampered with the transmitter and caused the power output to be too high. The commission also said it was up to Ace to have reviewed its license application and make sure it was specifying the proper antenna array.

The FCC did however note that after the original N-A-L was levied, Ace filed an application to modify its license to a two-antenna array so the commission cut the fine by $2,000. Hence the reduction of the fine to the $10,000 level.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles.

--

Bennett and the Ace of Hearts DJ service were given the customary 30 days to pay the fine or to file a further appeal. In addition Bennett was instructed to submit a statement that the translator is now operating consistent with its license authorization. (FCC)

EMERGING TECHNOLOGY: TRACKING MANTA RAYS BY SATELLITE

An international team of researchers have used radio beacon transmitters and satellite technology to track the movements of giant Manta Rays.

According to a Times news report, a team headed by Rachel Graham of the Wildlife Conservation Society in Punta Gorda, Belize, attached transmitters to six Rays off the coast of Mexico's Yucatan peninsula. They reported in the journal PLoS One that they monitored the rays for periods ranging from 27 to 64 days. Their preliminary findings for the Atlantic mantas showed that they traveled as far as 680 miles over a one to two month period searching for food most of the time staying close to the coastline. They also found that Rays spent considerable time in shipping lanes, which rendered them vulnerable to being hit by freighters.

The full in-depth text of this very interesting use of radio tracking can be found on-line at tinyurl.com/manta-ray-tracking (Science Times)

**

HAM RADIO IN SPACE: FM INTERFERENCE TO SSB/CW SATELLITES INCREASING

Interference by terrestrial FM operators to ham radio satellites is a growing problem. This according to Alexandru Csete, OZ9AEC who made this recording of FM interference to the FO-9 ham radio bird on

Saturday, May 5th. A QSO that seemed to revolve around chocolate:

--

Actual interference QSO recorded off FO-29

--

OZ9AEC says that to an FM operator, the spectrum from 145.8 to 146.0 MHz may seem empty, but it isn't. These frequencies are used by weak signal SSB and CW satellite transponders and even a few watts of FM can cause severe interference.

Some FM operators are unaware that if they use these frequencies their local chat across town will be heard thousands of miles away. Nor do they realize that in holding their point to point terrestrial FM chats in this spectrum that they block the satellite from others to use. The use of FM on an SSB/CW linear transponder satellite also reduces the lifetime of both the satellite's batteries and the transponder itself. (OZ9AEC, Southgate)

**

HAM RADIO IN SPACE: THREE MORE HAMS LAUNCH TOWARD THE ISS

If all went as planned, several new ham radio operators should now be on board the International Space Station. NASA Flight Engineer Joseph Acaba, KE5DAR, and his two Russian Cosmonaut crewmates, Gennady Padalka, RN3DT, and Sergei Revin, RN3BS, were scheduled to launch toward the ISS on May 14th.

The new crew members should have arrived at the I-S-S on May 16th. They will join Expedition 31 Commander Oleg Kononenko, RN3DX, Flight Engineer Don Pettit, KD5MDT, and Flight Engineer Andrei Kuipers, PI9ISS.

Padalka, Acaba and Revin will transition to the Expedition 32 crew in July and return to Earth this coming September. (NASA, ESA)

**

WORLDBEAT: SOUTH AFRICA NATIONAL AMATEUR RADIO DAY JUNE 16

In news from around the globe, the South Africa Radio League has selected June 16th as National Amateur Radio Day. This holiday will celebrate amateur radio as a national resource and its diversity as the most exciting of all scientific hobbies.

National Ham Radio Day in South Africa will run from 09:00 to 14:00 local time. The objective is to take amateur radio to the public by exhibiting and doing live demonstrations of the various aspects of the hobby and as such a great and a fun thing to be part of. Both individual hams and clubs in South Africa are invited to take part. (SARL)

**

WORLDBEAT: THE ERIC JAMIESON AWARD CREATED IN VK

The Wireless Institute of Australia Board has accepted the offer of Eric Jamieson, VK5LP, to sponsor awards for first amateur radio contacts on the two meter band spanning the Indian Ocean between Australia and Africa. There will be three honors given. One each for voice, for CW and for the digital modes. More on this is on line at www.wia.org.au. (WIA)

**

WORLDBEAT: GB0BON COMMEMORATES BATTLE OF NASBY

The United Kingdom's Welland Valley Amateur Radio Society will again be hosting amateur radio special event station GB0BON on June 16th and 17th. This is in celebration of the 367th anniversary of the Battle of Naseby and the third anniversary of station GB0BON. QSL this operation as directed on the air. (GB2RS)

**

DX

In DX, word that XX9E is the callsign for the 17th-23rd May DXpedition to Coloane Island, Macau. A large team will be active on 160 through 6 meters using CW, SSB and RTTY with at least three stations. QSL to EB7DX, direct or electronically via Logbook of the World.

VE1AWW is on the air stroke CY0 from Sable Island. He will be there for at least the next two months and operational on 30, 20, 17, 15, 12 and 10 meters. He will also be coming to 6 meters as soon as he completes installing an antenna for that band. QSL to his home callsign, direct or via the bureau.

Lastly, MM0SSG is now operational from Angola as D2SG. While he will be there through the end of October his operating time is limited because he is there on a work assignment on an off-shore oil platform. Operations will only take place when he is on land. If you work him, QSL via GM4FDM, direct or by the bureau.

(Above from various DX news sources)

**

THAT FINAL ITEM: LENORE JENSEN, W6NAZ, PHONE PATCHING TO VIETNAM VIA MARS

And finally this week, a piece of ham radio history that you can enjoy and share with friends. While perusing the latest ham radio videos posted to YouTube, our producer Biull Pasternak, WA6ITF, came across one featuring the late radio, television and film actress Lenore Jensen, W6NAZ, running phone patches to Vietnam.

These phone patches were done through the Military Affiliate Radio System which often used frequencies just outside the regular High Frequency ham bands. Overseas telephone calls were difficult to make decades ago and sometimes impossible depending on location, so for U.S. service men stationed around the world, ham radio filled the void. This was an all with volunteer effort and Lenore Jensen, W6NAZ, was at the forefront of the activity.

--

Audio bite from film

--

The film is titled "A Visit to Mars" and was part of the United States Army produced series "The Big Picture." Bill dates the documentary to the late 60s and notes that the phone patch was obviously simulated for filming. He asks: Did you ever hear noise-free audio on High Frequency DX, or the public always remembering to say "over?"

These details aside, the film appears to be accurate overall. It depicts the way things were done about 50 years ago and is a trip back in time. You can see it yourself on-line at tinyurl.com/LenorePatchingToVietnam. And LenorePatchingToVietnam is spelled as one word. (CGC, ARNewsline(tm))

Relayed from Dayton HamVention - Dayton, Ohio

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network Cordell Expeditions and W2VU for the following DX information.

VK0H, HEARD ISLAND. Dated May 15th: "After 5 months of planning, Cordell Expeditions is pleased to announce a DXpedition to Heard Island, Territory of Australia, in early 2014.We have assembled a core team, arranged for the vessel, and are awaiting the landing permit and radio callsign. Initial team members, collaborating organizations, and other resources will be announced in the near future. The expedition will be multi-disciplinary, with three major activities: Communications, Environmental Science, and Documentation. We will be active on all bands and all modes, implement a variety of innovative real-time communications technologies, and field a variety of scientific projects that are designed to observe and document some of the unique resources on this extraordinary island. We will use the latest version of DXA (www.cordell.org/DXA) for real-time online presentation of log data, images, and video from Heard Island.
This project follows the very successful expedition to Heard Island carried out by this group in 1997. Details of that operation can be seen at <www.cordell.org/HI>. The website for the 2014 DXpedition is <www.cordell.org/HD>.
We invite your participation in this project, as a potential team member, supporter, or eventually as a callsign in our radio log! If you have a particular interest in Heard Island or may be interested in joining the expedition, we invite you to contact us.
For information, please contact the Expedition Leader, Dr. Robert Schmieder at <schmieder@cordell.org>."

NOTE FROM EDITOR: Here at the Dayton HamVention, I learned that a second group is also planning an operation to Heard Island. Hopefully, more details will be forthcoming.....

From the CQ Newsroom...

NEWS RELEASE by Rich Moseson, W2VU, Editor CQ magazine:
EMBARGOED FOR RELEASE FRIDAY MAY 18, 2011, 8 AM EDT

CQ ANNOUNCES 2012 HALL OF FAME INDUCTEES
(Dayton, OH - May 18, 2012) -- CQ magazine today announced its 2012 Hall of Fame inductees, celebrating the 45th anniversary of the CQ DX Hall of Fame with three new members, along with two new inductees into the CQ Contest Hall of Fame and 16 new members of the CQ Amateur Radio Hall of Fame.
The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The 2012 inductees (listed alphabetically) are:

George Badger, W6TC (SK), expert in tubes and tube circuit designs; executive of Eimac and later President of Svetlana

Bill Brown, WB8ELK - "Father" of amateur radio high-altitude ballooning

Robert Brown, NM7M (SK) - Expert on 160-meter propagation, author and retired physics professor

Evelyn Gauzens, W4WYR - Chair of the Miami "Tropical Hamboree" hamfest for 45 years; ARRL Southeastern Division Vice Director, Honorary Vice President

Richard Garriott, W5WKQ • Younger half of first U.S. father-son team to travel in space. (His father is Owen Garriott, W5LFL, the first astronaut to operate amateur radio from space, and a 2001 Amateur Radio Hall of Fame inductee.)

William W. Hansen (no call)(SK), "Father of Microwave Electronics"

Richard Kirby, ex-W0LCT/HB9BOA (SK) - Director of the ITU's International Radio Consultative Committee (CCIR) from 1974 to 1995

Fred Maia, W5YI (SK) - One of the architects of VE program, first FCC-designated VEC; editor/publisher W5YI Report; long-time CQ columnist

Steve Mendelsohn, W2ML - Communications Director, New York City Marathon, 1976-present; former ARRL First Vice President, Director

Larry Mulvehill, WB2ZPI - Photojournalist who has covered major news events around the world for more than 50 years; CQ cover photographer for over 30 years

Rowley Shears, G8KW (SK) - Founder of KW Electronics in UK; helped re-establish amateur radio in Germany after World War II

Mike Staal, K6MYC - Antenna expert, co-founder of KLM and M2 Antennas

Frederick Terman (ex-6FT, W6AE, W6XH) (SK) - Microwave pioneer, partner with William Hansen (see above)

Patrick Tice, WA0TDA - Manager, Courage HandiHam System; for more than 20 years

Louis Varney, G5RV (SK) - Inventor of the G5RV antenna

William A. Wilson, K6ARO (SK) - First U.S. Ambassador to the Vatican after formal diplomatic relations were re-established in 1984 after more than a century

CQ DX and Contest and DX Halls of Fame

The CQ DX and Contest Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways. The CQ DX Hall of Fame, founded in 1967, celebrates its 45th anniversary this year.

The 2012 inductees to the CQ DX Hall of Fame are:

Don Chesser, W4KVX (SK) - Pioneering DXer and DXpeditioner; founder of DX magazine

Glenn Johnson, W0GJ - A leading DXpedtioner, leading many teams, often to very rare countries; personally responsible for restoring amateur radio in Bhutan in 2000

Carl Smith, N4AA - Editor and publisher of DX magazine and the weekly "QRZ DX" bulletin. Also CQ's DX Editor and leader of effort to create Southern Appalachian Radio Museum.

The 2012 inductees to the CQ Contest Hall of Fame are:

Jim Reisert, AD1C - Maintains and constantly updates the country and prefix files that are depended upon by virtually all of the major contest and general logging programs, as well as software for the major DX clusters.

Lothar Wilke, DL3TD (SK) - Leading contester and promoter of contesting in Germany; under his leadership, DA0HQ won the IARU World Championship 11 times.

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled for the Dayton Hamvention.&#65533; More detailed descriptions of inductees will appear in the official announcement in the July 2012 issue of CQ magazine.

-30-

NEWS RELEASE by Rich Moseson, W2VU, Editor CQ magazine (date May 16th):

CQ INTRODUCES INDUSTRY NEWSLETTER: CQ INDUSTRY INSIDER
(Hicksville, NY - May 16, 2012) -- CQ Communications, Inc., today announced the launch of the CQ Industry Insider, an e-mail newsletter for the hobby radio industry. The newsletter will report on news and trends in the amateur radio, scanning and listening marketplace, as well as company news and announcements, marketing tips and an idea

exchange for spotlighting concepts for new products and services. The first issue was sent out this week.

"Our goal in publishing the IndustryInsider is to help businesses in the amateur radio industry thrive and grow," said Publisher Dick Ross, K2MGA, "by sharing industry news and trends, marketing tips and product ideas."

The Editor of the CQ Industry Insider is Jason Feldman, who currently works with both Popular Communications and WorldRadio Online, is Director of Pop'Comm's monitoring registration program, and who came to CQ with considerable experience in producing e-mail trade newsletters. Feldman will be backed up by Ad Manager Chip Margelli, K7JA; Editorial Director Rich Moseson, W2VU; Production Director Dottie Kehrwieder, and the rest of the CQ Communications staff.

The CQ Industry Insider is being distributed initially to companies and individuals already on the CQ advertising department e-mail list. Industry members not on the list who would like to be added should contact Chip Margelli at <ads@cq-amateur-radio.com>.

==> ARRL CENTENNIAL CELEBRATION: ARRL PRESIDENT KAY CRAIGIE, N3KN,
INVITES INPUT FOR 2014 ARRL CENTENNIAL

The ARRL will celebrate its centennial in 2014, and is already making
plans to commemorate the highlights of the League's first century and
looking forward to what the second century may bring. But it's your

League and your centennial. ARRL President Kay Craigie, N3KN,
invites all ARRL members to provide suggestions to help make this
once-in-a-lifetime event truly special. "Centennial theme publications
and special sections of regular publications are in the works," Craigie
noted, "as is an operating event that all members can participate in.
```

We will have centennial merchandise in the ARRL store and artwork you can use to design items for yourself and your club. We'll be drawing on the ARRL's historical collection and the memories of living amateurs." ==> REGULATORY: ARRL RESPONDS TO FCC REQUEST FOR COMMENTS ON IMPEDIMENTS TO AMATEUR RADIO COMMUNICATIONS

On Wednesday, May 16, 2012, the ARRL filed comments in response to the FCC's Public Notice seeking comments on Emergency Communications by Amateur Radio and impediments to Amateur Radio communications. Known as Docket 12-91, the Commission is soliciting comments from the public as it writes the report they were directed to present to Congress as part of Public Law No. 112-96 <http://www.gpo.gov/fdsys/pkg/PLAW-112publ96/pdf/PLAW-112publ96.pdf>.

At the direction of ARRL President Kay Craigie, N3KN, and the ARRL Board's Executive Committee, the document was drafted by ARRL General Counsel Chris Imlay, W3KD, assisted by ARRL Regulatory Information Manager Dan Henderson, N1ND, as well as ARRL Chief Technology Officer Brennan Price, N4QX and several ARRL Headquarters staff members.

Over 1500 e-mails were received at ARRL from amateurs, sharing the details of their various deed restrictions. An additional 350-plus e-mails were also received detailing actual Emergency Communications participation in various events from almost every state in the US as well as several US territories.

"The information provided to the ARRL by its members has provided a strong statement of how the various deed restrictions have negatively impacted the ability of Amateur Radio licensees to maximize their participation in disaster and emergency support communications," said Henderson. "The information provided by the membership not only helps us make the best case to the FCC in this docket, but also begins to lay a good foundation for considering possible rule changes that would enhance Amateur Radio communications beyond this proceeding. I want to thank the hundreds of concerned amateurs who made the effort to provide the ARRL with the facts of their personal set of circumstances. What you shared with us has helped us make a strong argument to present to the Commission," he added.

A copy of the ARRL's filing <http://apps.fcc.gov/ecfs/document/view?id=7021918167> to the FCC may be found on the FCC's Electronic Comment Filing System website.

==> REGULATORY: NEW "PRB-1" LAW NOW IN EFFECT IN OHIO

On May 15, Ohio Governor John Kasich signed a bill into law <http://www.legislature.state.oh.us/BillText129/129_HB_158_EN_N.pdf> granting comprehensive rights to Amateur Radio operators in that state. Several key players in the successful effort to enact a "PRB-1" law in

Ohio were present for the signing, including Section Manager Frank J. Piper, KI8GW; Rick Swain, KK8O; Bill Carpenter, AA8EY; Steve Katz, N8WL,

and Constance Barsky, WD8ODC. ARRL Great Lakes Division Director James Weaver, K8JE, was also at the signing.

Ohio SM Frank Piper provided some background:

"In the past three years, we have had four versions of this bill in the Ohio Statehouse. In the last State Assembly, these bills died in Committee. In this current Assembly, everything lined up for us, and House Bill 158 made the entire journey from Introduction to the Governor Kasich's signature.

"We had to make a few revisions to HB 158 during its travels through committee hearings, but in the end we finished with an Act that places the full language of CFR 47, Part 97.15 into the Ohio Revised Code. In addition, language at the end of the law states: 'Any legislative authority that denies an application for approval of an amateur station antenna structure shall state the reasons for the denial and shall, on appeal, bear the burden of proving that the authority's actions are consistent with this section.' This language removes the burden of proof from the Amateur Radio operator and places it on the legislative authority.

"State Government Liaison Nick Pittner, K8NAP, did a tremendous job over the past several years, staying on top of the status of bills that were running their course on both sides of the Statehouse. Nick knew when to call in key people to testify to Committees, and was instrumental in the process of negotiating the required revisions when requested.

"My thanks go out to all the Amateur Radio operators in the Ohio Section who called, wrote and e-mailed their State Representatives and Senators to support this legislation. Without their grass roots work, this victory would not have been possible."

==> HAMVENTION: DAYTON HAMVENTION STARTS MAY 18

Thousands of ham radio operators from around the world are converging on Dayton, Ohio for this weekend's Hamvention. The theme: Internationally Connected.

==> FCC NEWS: JESSICA ROSENWORCEL AND AJIT PAI SWORN IN AS FCC COMMISSIONERS

On Monday, May 14, Jessica Rosenworcel, and Ajit Pai, were sworn in

by FCC Chairman Julius Genachowski as FCC Commissioners. For the first time in almost a year, the Commission is once again at full strength. Rosenworcel, a Democrat, fills the seat vacated by Michael Copps who retired from the Commission earlier this year; her term runs through June 30, 2015. Pai, a Republican,

replaces Meredith Attwell Baker, who left the FCC in June 2011; his term runs through June 30, 2016. Read more here <http://www.arrl.org/news/jessica-rosenworcel-and-ajit-pai-sworn-in-as-fcc-commissioners>.

==> ON THE AIR: ARRL MICROWAVE BAND PLANNING COMMITTEE RELEASES DRAFT BAND PLANS

The ARRL UHF-Microwave Band Plan Committee has released for comment its draft band plan for 13 cm (2.3/2.4 GHz) and welcomes comments on it. The amended draft band plan for 902-928 MHz (33 cm) has also been released. Read more here <http://www.arrl.org/news/arrl-microwave-band-planning-committee-releases-draft-band-plans>.

==> QST: GET READY FOR THE LAUNCH OF THE DIGITAL VERSION OF QST

We are excited about being able to offer ARRL members access to a brand-new digital edition of QST. We expect to launch the digital edition on or about May 23. If you have checked the Notification box on your Member Profile, you will be notified by e-mail as soon as the digital edition becomes available. As a bonus, ARRL members will also have access to the digital archive -- the digital editions beginning with the January 2012 issue. Our thanks to those who have beta tested the digital edition. Your input has been invaluable as we have worked to improve and enhance the digital edition. For more information, please see the Digital Edition FAQ <http://www.arrl.org/digital-qst-faq>.

==> NOMINATIONS INVITED FOR 2012 PHILIP J. MCGAN MEMORIAL SILVER ANTENNA AWARD

The ARRL is now accepting nominations for the 2012 Philip J. McGan Memorial Silver Antenna Award <http://www.arrl.org/phil-mcgan-award>. This annual honor goes to a radio amateur who has demonstrated success in Amateur Radio public relations and best exemplifies volunteer spirit of the award's namesake, Phil McGan, WA2MBQ (SK). As the first chairman of the ARRL Public Relations Committee, McGan helped to reinvigorate the League's commitment to public relations. Nominations are due at ARRL Headquarters by May 25, 2012.

"Throughout the year, ARRL Public Information Coordinators (PIC <http://www.arrl.org/public-information-coordinator>s), Public Information Officers (PIO <http://www.arrl.org/public-information-officer>s) and other public relations volunteers strive to keep Amateur Radio visible in their communities," explained ARRL Media and Public Relations Manager Allen Pitts, W1AGP. "They do this by publicizing special events, writing press releases and maintaining good relations with local news media. Their efforts benefit us all. Nominating someone -- and recognizing his or her public relations achievements -- is "the perfect way to say 'thank you' for promoting Amateur Radio."

The McGan Award honors achievement in public relations. Pitts pointed out the distinction between public relations -- essentially getting Amateur

Radio's message to the public -- and public service, which is Amateur Radio activity on behalf of the public, such as supporting emergency communication. "If you're considering nominating someone in your area for the McGan Award, please ask yourself if your candidate's work fits the public relations definition," he said.

The McGan Award recognizes those Public Relations activities that include efforts specifically directed at bringing Amateur Radio to the public's attention (and most often to the news media's) in a positive light. These may include traditional methods such as news releases, or less-traditional methods such as hosting a radio show or being an active public speaker.

Unfortunately, McGan never got to see how well his own PR efforts paid off. In his honor, his friends in the New Hampshire Amateur Radio Association joined with the ARRL Board of Directors to pay a lasting tribute to the important contributions he made on behalf of Amateur Radio by establishing this annual award. A committee of volunteers knowledgeable about Amateur Radio public relations will pick the winner, subject to approval by the ARRL Board of Directors. All McGan Award nominees must be a full ARRL member -- not a group -- in good standing and may not be regularly compensated for public relations work involving Amateur Radio, including payment for articles. Nominees may not be a current officer, director, vice director or paid staff member, or a member of the current selection committee.

Nominations must be received at ARRL Headquarters by 5 PM Eastern Time on May 25, 2012. The committee will not consider nominations that arrive after the deadline or without an entry form. Complete details and an official nomination form on McGan Award eligibility and how to nominate someone are available on the ARRL website <http://www.arrl.org/phil-mcgan-award>. Completed entry forms and supporting materials should be mailed to Philip J. McGan Memorial Silver Antenna Award, c/o Allen Pitts, W1AGP, ARRL, 225 Main St, Newington, CT 06111.

==> SOLAR UPDATE

Tad "Unspeakable high processions of Sun and Moon and countless stars above <http://www.youtube.com/watch?v=dWeeK1RlOJ8>" Cook, K7RA, reports: If you look at Spaceweather.com and use their archive feature (check the three drop-down field on the upper right), you can step day-by-day through the past week and see the progression of a considerable number of sunspots in the Daily Sun image on the left side of the page. There was one new sunspot group on

May 10, two on May 11, four more on May 13 and another on May 15. Average daily sunspot numbers for the past week rose nearly 25 points, or about 27 percent, to 117.3. The big day was Monday, May 14, when the

daily sunspot number jumped to 156. This was one day after four new sunspot groups, 1481 through 1484 appeared for the first time. Average daily solar flux rose 12 points to 131, an increase of 10 percent. For the near term, predicted solar flux is 130 on May 17-24, 115 on May 25-31, 120 on June 1, 125 on June 2-3, 130 on June 4, 135 on June 5-9 and 130 on June 10-12. Projected planetary A index is 5 on May 17-22, 8 on May 23, 5 on May 24 through June 4, then 8, 12, 18, 10 and 5 on June 5-9.

Look for more on the ARRL website on Friday, May 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Ralph Vaughan Williams' Sea Symphony <http://en.wikipedia.org/wiki/Sea_Symphony> (IV The Explorers), taken from Walt Whitman's Leaves of Grass <http://en.wikipedia.org/wiki/Leaves_of_Grass> (Book XXVI <http://en.wikisource.org/wiki/Leaves_of_Grass/Book_XXVI>, Passage to India, verse 5).

==> NO ARRL AUDIO NEWS ON MAY 17, WILL RETURN MAY 24

Due to staff travel to the Dayton Hamvention, there will be no ARRL Audio News <http://www.arrl.org/arrl-audio-news> on Thursday, May 17. ARRL Audio News will return on May 24.

==> THIS WEEK IN RADIOSPORT

This week:

- May 19 -- Feld Hell Sprint
- May 19-20 -- His Majesty King of Spain Contest (CW); EU PSK DX Contest; Baltic Contest
- May 21 -- Run for the Bacon QRP Contest
- May 21-22 -- Aegean RTTY Contest
- May 23-24 -- CWops Mini-CWT Test

Next week:

- May 25 -- NCCC Sprint Ladder
- May 26-27 -- CQ WW WPX Contest (CW)
- May 27 -- QRP ARCI Hootowl Sprint (local time); SARL Digital Contest
- May 27-28 -- Michigan QRP Memorial Day CW Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 18-20 -- Dayton Hamvention
<http://www.arrl.org/hamfests/dayton-hamvention-3>, Dayton, Ohio
- June 1-3 -- ARRL Northwestern Division Convention

NZART Headquarters Infoline Issue 251

18 May 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· FMTAG Notes May

· WIQ – Wireless Institute of Queensland 100 year centenary

· 63rd Lake Constance Convention Invitation to IARU member societies.

Debby says…Sorry everyone, I should probably asked you to specify which issue of Break In you may have missed. I seem to be getting a number of members advising they have not received their latest issue. The last issue to be posted was March/April, the next one due out at the beginning of June will be the May/June issue. Obviously this one is yet to be produced, therefore you won't have received it yet.

Just as a reminder, Break In is produced bi-monthly, and dispatched at the beginning of every second month. I.E. March, June, August, October and December.

There is still time for those branches who have yet to return their call book details to me. I did state that close off was the 1st of May, however as Call Book is yet some months away before it will be published, I can now extend that time to 30 June.

Lastly – please remember to send me your Branches voting figures if you require a proxy to present them at the AGM.

Hope to see you at conference!

Talk soon…Debby ZL2DL

FMTAG NOTES FOR HQ INFOLINE 251

Proposal

Branch 24 Motueka has applied for a 7 dB power increase of its 670 repeater at Mount Campbell, located at TOPO50 BP24 876.19 474.92. The repeater transmit frequency is 146.700 MHz and its receive frequency is

146.100 MHz.

Final recommendation to NZART Council

None this time.

NZART Council Revises its Licence Fee Policy

As mentioned in “From the President” (page 3 March/April Break-In), NZART Council has revised its Beacon, Link and Repeater Licence Fee Policy. Here are more details.

Council resolved to encourage the transfer of Repeater, Beacon and Link Licences from NZART to the equipment-owning Branches, and to impose a surcharge of $5.11 per licence, to offset NZART HQ costs, on those licences that remain with NZART.

The MED's Annual Administration Fee, for an Amateur Beacon, Link, or Repeater Licence, is $46.00, if paid by credit card via the MED's SMART website, or $51.11, if paid by cheque to the MED's Business Service Centre. The $5.11 surcharge recognises the cost to the MED of processing a manual payment.

Previously, NZART HQ requested payment of $46.00 from Branches and forwarded the full amount to the MED.

The NZART HQ cost of processing a manual payment are similar to those of the MED and, therefore, NZART Council decided to introduce the same $5.11 surcharge per licence for all Licence Fee payments made via NZART HQ.

As at the 17th of May, the following Branches (and Affiliates) had not yet completed licence transfers:

Northern District

03 Western Suburbs

28 Whangarei

33 Rotorua

38 Taumarunui

51 Eastern Bay of Plenty

55 Waitomo

66 Auckland VHF

67 Kawerau

78 Far North

84 Bay of Islands

85 Mercury Bay

86 Musick Point

Auckland AREC

Central District

23 Marton

42 Titahi Bay

46 Wairarapa

48 Wanganui

82 Southern Wairarapa

87 South Taranaki

Midland District

05 Christchurch

26 Nelson

34 South Canterbury

49 Westland

56 Christchurch West

CARDS

Southern District

08 Eastern Southland

35 South Otago

37 Southland

61 Central Otago

64 North Otago

Branches wishing to avoid paying the $5.11 surcharge for each licence need to arrange transfer of their licences from NZART to the Branch. To start the licence transfer process, please send an email to FMTAG to receive an information pack:

fmtag@nzart.org.nz

NZART Council has confirmed that the revised policy does not apply to National System or International Beacon Licences.

Comments and Applications

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

The current status of Applications can be viewed on the NZART website:

http://www.nzart.org.nz/nzart/fmtag/fmtag-apps-being-processed/

CENTENARY- 1912 ~ 2012

CELEBRATING

“VK100WIQ”

MICHAEL J. CHARTERIS,

VK4QS

CHAIRMAN,

QUEENSLAND CENTENARY COMMITTEE, WIA

To the Radio Amateurs of New Zealand

Two years ago, in the year 2010, “We” as Australian
Amateur Radio Operators celebrated a world first, by way of the fact that our National Body, the Wireless Institute of Australia turned 100

Years of age. Such a milestone eclipsed both the formation of the ARRL in US and the RSGB in the UK. Thus, Australia was the vanguard of organised Amateur Radio in the entire world. During 2010, from what I heard on Air, Australian Amateurs embraced the Centenary of the WIA with gusto. Each night the bands were abuzz with all and sundry striving to contact the special Centenary Station VK100WIA.

This year 2012 sees the Centenary of the Formation of the Wireless Institute in the State of Queensland, the W.I.Q. As such, "We" in Queensland plan to celebrate over the course of the rest of the year with various "Club" based special events and activities. Our Centenary Call Sign "VK100WIQ" will be operational from June 1st 2012 through to July 31st 2012, by way of a Roster System for all the Queensland Radio Clubs to apply for a three day block.

Our Centenary Committee is well founded with the following Amateurs at its helm, Mr. Ewan McLeod, VK4ERM, WIA Director, Mr Trent Sampson, VK4TS, WIA Director, Mr. Al Shannon, VK4SN, QAC, Mr Don Wilschefski, VK4BY, QAC, Mr. Kevin Johnson, VK4UH, QAC, and Myself, Mike Charteris, VK4QS, Chairman QAC. Between us, we hope to encourage and participate in as many of the Centenary events being hosted by various Radio Clubs throughout this great State of ours.

The origins of the celebration stem from a meeting organised by one Mr. Sydney Victor Colville, in the year 1912, with the view to form the Wireless Institute in Queensland. To quote the WIA Book, Volume 1, "WIRELESS INSTITUTE OF QUEENSLAND FORMED BY S.V. COLVILLE (XQF), WHO LATER BECAME THE SECRETARY AND ORGANIZER.

For those unfamiliar with the history of the Q.W.I, or W.I.Q, and what later became the W.I.A.Q, a new website has been developed to give an overview of the men the names and the places that saw the Wireless Institute develop in Queensland. You can find our Website at the following address: www.wiaq.org.au

Please take the time to read the brief histories that have been written, and largely drawn from the wonderful work by Mr. Alan Shawsmith, George Taylor Medallist,VK4SS, SK, in his book "HALCYON DAYS". To seek out and obtain the book, "HALCYON DAYS" is perhaps one of the best ways to understand the pioneering spirit of Amateur Radio Pathfinders and Experimenters in Queensland from the earliest days.

On Sunday, July 22nd, following the President's Centenary Luncheon on the Saturday, the Hervey Bay Amateur Radio Club will be hosting a Free BBQ for all attending Presidents, Members and Guests. This will be held at the Hervey Bay SES Building on Old Maryborough Road, Hervey Bay. On this day Hervey Bay will host the Centenary call sign VK100WIQ, on HF from the SES Building. It is hoped that many will take the opportunity to work our National WIA President Michael Owen, and invited guests on air with the Centenary call VK100WIQ that day.

Throughout the duration of the Centenary Call Sign period, from June 1st through to July 31st 2012, I trust that all Radio Amateurs in New Zealand will avail themselves of the opportunity to work VK100WIQ.There is a Centenary QSL Card as well as a special Centenary Certificate for five different Club contacts with VK100WIQ. The cost structure for the Certificate will be similar to that of the VK100WIA Certificate, around $5-00US.

So come one, come all, my fellow Amateur Radio Operators, as we here in Queensland invite to our Centenary. Come and share in some Queensland Hospitality and Radio Fellowship throughout the Year 2012. We, the Queensland Centenary Committee, look forward to us all celebrating our special One Hundred Year Event with you the Amateur Radio Operators of New Zealand. For history has shown our hands linked across the Tasman from the days of Anzac to now.

Kia Ora

Yours Sincerely

Mike Charteris, VK4QS

On behalf of the Amateurs of Queensland

Ham Radio 2012 Lake Constance Convention

The 63rd Lake Constance Convention and the Ham Radio 2012, both organised by DARC, Germany's most prominent amateur radio club, will take place from Friday, June 22nd until Sunday, June 24th 2012 in Friedrichshafen.

We very much hope that many representatives of the IARU member societies will be able to join us again this year.

As in previous years we have been able to obtain a special discounted rate for you at the “Seehotel”. Further details can be found in the attachment.

You can register and also make a hotel reservation by emailing or faxing the attached reservation form to Mrs. Simone Blümer at DARC.

We would also be very pleased to welcome you at the “Informal International Meeting for Representatives of IARU Member Societies”. We will communicate via separate email the venue and date/time for this meeting in due time.

If you attend Hamvention 2012 in Dayton please also visit our booth in the ARRL EXPO area. We will be next to the RSGB stand on the left side of the ARRL exhibit area.

Looking forward to meeting you in Friedrichshafen.

Vy 73,

Thomas Wrede DF2OO

Secretary International Affairs

Focus South America during WWSA Contest

Posted: 18 May 2012 03:37 AM PDT
http://forums.qrz.com/showthread.php?346629-Focus-South-America-during-WWSA-Contest&goto=newpost

Focus South America during WWSA Contest

Using a very familiar exchange and format, contesters have a prime option from South America during the second weekend of June, with the WWSA CW Contest, sponsored by the Grupo Argentino de Radiotelegrafia (GACW).

The focus is on South America, as the 24 hour contest runs from 1500 GMT on Saturday 9 June to 1500 on Sunday 10June.

We has been trying hard in recent years to get more US and Canadian stations to join in the WWSA CW Contest, and those that tune in during the 24 hour contest period should recognize a very familiar rhythm.

The contest exchange is the same as CQ WW, using a signal report and your CQ zone. Example: 59905, 59911, etc.

Multipliers are also counted the same way, making it a familiar format. Country + CQ zone

Just like CQ WW, contacts between stations in your home country are okay for zone or country multipliers, but have zero point value. Same continent = 1 pt - Different continet = 3 pts.

There is one difference in how your score is totaled, as South American stations are worth extra points - 5 points for stations outside of South America.

It is a kind of a contest in which all the South Americans will play the role of difficult DX since we grant special points.

For this edition, as we did the previous year, we will grant electronic Diplomas to the winners of the most important categories and when the score justifies it.

In our web site you can find multilingual rules, results, pictures and videos, software, etc.

There is a new address for your WWSA 2012 logs = logs@wwsatest.org

WWSA web site www.wwsatest.org

GACW web site http://gacw.no-ip.org

We will be very happy to contact you in the CW HF bands...!!!

FOLLOWING STORIES IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA ARE FOR WEEK COMMENCING MAY 20 2012.

Are you coming to the WIA Annual Conference weekend.

If you are coming then bring your radio, yes your Dstar
Radio -- "way of the future I hear you say", yep that it
sure is !So we will have the WIA portable Dstar repeater set
up in Mildura for the full conference weekend, listen out on
the Dstar repeater frequency 438.150MHz

Now if you haven't yet registered for this action packed
weekend you know, we can still squeeze you in. Now it's only
a week away and we do have well over 170 people coming to
sunny Mildura and we have almost reached the goal of the
Sunraysia Radio Club secretary Noel Ferguson, and his dream
to get 200 people to Mildura for the event.

So just in case you've been listening on some other band for
the last few Sundays, here's a quick recap on what we will be
getting up to next weekend. On Friday night we will be
having a small feast at Settlers Club with some special
entertainment arranged by Noel VK3FI and with special guest

speaker Allan Cameron. On Saturday morning the WIA will run its AGM and Open Forum which will be followed in the afternoon by our tech program "Technology to the Future" with presentations on the very latest in digital ATV transmitters, the latest developments in Chirp Radar systems, a video presentation with Jan King on the history of the AMSAT satellite program and of course, none other than those helium boys from Adelaide the Project Horus team. Then on Saturday night it will be time to unwind and enjoy a sumptuous meal at the Grand Hotel, hey did you know the Grand Hotel is home to Celebrity /Chef/. /Stefano/de Pieri. need I say more, the food is going to be just amazing!

On Sunday morning we will be having that much anticipated launch of the special Horus weather balloon complete with amateur radio payload. And you can install the special tracking software on your laptop feed the laptops audio interface from your radio and see the balloon progress on it's journey to somewhere, you can talk via the balloons on board 2 and 70 repeater or chase the balloon to goodness know where and be the first to recover the payload to win the brand new Yaesu FT1900R transceiver. And for the more sensible folk, do book in on the Paddleboat Mundoo for its scenic riverboat cruise and sumptuous lunch. Now ... for everyone at home, remember, that we will be running a special event HF station from the Paddleboat Mundoo between 11:00 and 15:00 hours Australian Eastern Standard time , so do listen out on the bands (I would suggest 20 or 40) for special event station VK102WIA and remember we will be issuing commemorative QSL cards for all contacts made. And finally, as we mentioned last week, the perfect way to cap off any weekend would be a BBQ at historic Fergus Park, Nicholls Point and that my friends is exactly what we will be doing Sunday night at the historic park with LED lighting.

So, if you haven't got around to registering for this fantastic weekend, jump on the net go to the WIA website home page click on the Conference weekend link and fill out our online registration form.

This is Robert VK3DN on behalf of the Sunraysia radio club, host club for the 2012 WIA Annual Conference weekend.

ACMA releases Five-year spectrum outlook 2012-2016

In another first for the ACMA, its key spectrum management publication, the Five-year spectrum outlook 2012-2016 has been released in a beta electronic magazine (e-mag) format.

The new Outlook is more streamlined and user-friendly and can be viewed using smartphones, tablets and PCs.

'You will be able to share the information it contains through a multitude of social media applications like Facebook, Digg, Google + and Twitter,' said ACMA Chairman Chris Chapman.

Only three months to go to ILLW

As the International Lighthouse & Lightship Weekend approaches in August it is New South Wales that has taken the Australian leadership of the event with its12 entries so far.

Many thanks to the clubs and individuals in more than 30 countries who have entered the 15th year of the fun event, which puts on air the old era of navigation.

In Australia the order is second placed VK7 on eight registrations, followed by VK3, VK4, VK5 and VK6.

Other nations with early high numbers of registration include Germany, USA, England and The Netherlands who are among about 30 countries with 210 entries.

International Lighthouse & Lightship Weekend is on August the 18th and 19th. Check it out and register by visiting the website illw.net

(Jim Linton VK3PC)

BROLGA ON THE AIR

This coming week is Education week in Queensland. The Caboolture Special School Amateur Radio Club station is in the finals of the Educational Queensland 2012 Regional Showcase Awards in the Community or Industry Partnerships category. With an inside look here is Ray VK4CF

The Awards, are to be presented in Maryborough, this Thursday the 24th May at the Brolga Theatre from 1.30 pm -3.30 pm.

In 2007, The Caboolture Special School established its Amateur Radio Club Station (VK4HBU) to build students vocational literacy, numeracy, communication, team, social individual and community capacities and it has been a great success. The students are using amateur radio to improve their oral communication capacity by either in a listening capacity by using a range of radio equipment or by talking on a range of radio equipment in a variety of contexts. They have been able to transfer these skills to other radio and communication contexts including Community Radio 101.5FM, the local Rural Fire Service, Moreton Bay Regional Council Workshop, and a current project is the establishment of a Digital Streaming Radio Station for the Caboolture Historical Village.

The club using the callsign, VK4HBU, will be setting up a portable station in the theatre and using 2 metres and available HF frequencies to show the application of amateur radio to some 200 state school principals, parents and other invited guests. Peter, VK4HOY from the Caboolture special School, Brian, VK4FBAD from the Caboolture Club and myself, Ray, VK4CF, will be manning the station with students from the Caboolture special school.

If you hear the station, could you spend a few minutes talking to the students, or if you are in the local area please call in and meet the crew.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

At the Annual Conference each year the WIA conducts an Open Forum, where those present are invited to raise issues for discussion relating to the WIA and amateur radio in general.

Updates and reports on the WIA's activities are also presented for comment.

This year, taking advantage of our website's new "member's only" access function, the WIA is pleased to present these reports to all members in advance of the meeting. WIA members can access the Reports from the website, using their online password, established by following the steps outlined on our website at https://www.wia.org.au/members/details/

If you have any submissions you would like raised at the Open Forum, but are unable to attend personally, you should contact the WIA Manager, Mal Brooks VK3FDSL, by email by next Tuesday, May 22nd on
malb@wia.org.au

Clubs are the backbone of organised Amateur Radio in any given location.

Although it's entirely possible to live a full and busy Amateur Radio life outside of a club, there are many reasons why joining and participating in a club are beneficial to you.

There is evidence that a person who has social capital will fare better in terms of their enjoyment of life and in their mental health.

What is social capital? It's pretty easy - you've probably worked it out already. It's the things you do together with other people, the clubs and groups that you participate in, and the friends and family that you engage with regularly.

So even before we look at the benefits to Amateur Radio, especially your Amateur Radio career, having social capital puts you in a good position to enjoy a socially healthy life.

Now let's look at clubs. By participating in a club, you get to share your own experiences and knowledge, and at the same time benefit from others sharing the same things.

A group of people working together in a club setting can bring about some great results that individuals would find it hard to achieve.

In these days of increasing restrictions on what we as Amateurs can do in our own backyards, we can look to Clubs to provide a shack and have a decent crop of antennas. Where your Amateur Radio activities may be restricted at home, in the club setting you're back in the good old days.

So there are lots of perfectly acceptable self-centred reasons for being a member of an Amateur Radio Club and a load of other reasons to be part of a sharing community.

So if you've not considered joining a club, or you've fallen away from club membership and wondering why your Amateur Radio life has dulled down, stop awhile and consider or reconsider your local clubs.

The Wireless Institute of Australia supports Amateur Radio Clubs by advertising them on its website, making affordable club insurance available, giving space in the Amateur Radio Magazine for club reports and activities, and the Club Grant Scheme.

I'm Bob VK6POP

HAMS ACROSS AUSTRALIA.

Coffee Mornings

We are told a VERY regular ham meet is informal coffee mornings each Monday and Friday at Friends Cafe in Jimmy's complex of Charles Street, Launceston. Start time is 10.30 and it runs until 11.30am.

WIA - AGM ACTIVITY UP IN THE AIR

Hello, this is Grant, VK5GR for the Project Horus Balloon team, with some news about our forth-coming amateur radio High altitude balloon flight being staged as part of the Wireless Institute of Australia's AGM Convention next Sunday, May 27th.

Lift off is planned for 8-9 ish AEST from Mildura in NW victoria.
The primary payload planned for this flight is a full cross band 2m/70cm voice repeater.

This will be the first time the HORUS balloon repeater is accessible from 5 states and 4 capital cities at the same time. At apogee, the footprint will extend to cover VK1, VK2, VK3, VK5 and VK7, including the cities of Adelaide, Melbourne, Sydney and Canberra. The radio horizon will extend some 800km radius from the balloon covering some 2,000,000 sqkm of SE Australia.

You can access the repeater on 438.9 MHz using a 123Hz CTCSS tone, and you can listen to the downlink on 147.500MHz. APRS will also fly under the callsign VK5ARG-11 as will our standard 300baud RTTY telemetry beacon on 434.075MHz.

Project leader Terry VK5VZI, and all of the Project Horus team hope to hear as many amateurs as possible making use of the repeater during this flight. We also look forward to meeting those who attend the WIA Convention in Mildura at our presentation during the Saturday lecture sessions. You can also find out more about the project by looking at our website

projecthorus.org

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Shenzhen's first Maker Faire

The first Maker Faire to be held in China took place in April, classes teaching soldering proved especially popular.

In recent years there been a massive upsurge of interest in electronic home construction with Hacker Spaces and Maker Faires springing up across the UK, the USA, Japan and even one here in VK.

The phenomena has also spread to China with a Mini Maker Faire being held in the Shenzhen special economic zone last month. The event attracted visitors from overseas as well as the Hacker Space in Beijing.

60 metre consultation

As of May 12th, Industry Canada began the consultation process to see final approval for the use of six channels on the 60 metre band.

As part of the consultation, Industry Canada is seeking input on five items and Radio Amateurs of Canada, the RAC, feels it is important for amateur radio operators to comment on this proposal and indicate their preference for the rules governing the frequencies going forward.

ON 0 EME 1296 MHz Moon bounce Beacon

This is possibly the first amateur radio beacon to beam signals off the Moon. Its aim is to encourage people to try and receive EME signals.

According to a report in "432 and Above, EME News," the idea started in Sweden during the EME meeting in May 2011. After about 11 months of intensive work the beacon ON 0 EME started transmitting on 1296.000 MHz in the direction of the Moon.

ON 0 EME's total EIRP is about half a megawatt.

The antenna is a solid 3.7 m dish and it is active when the Moon is >10°
at its location.

==========

NEWS FROM ARNEWSLINE USA

ANACAPA HIGH ALTITUDE BALLOON SOARS TO NEAR 112000 FEET

We're not sure if it's a new world altitude record for a ham radio equipped high altitude balloon, but members of the Anacapa Near Space Exploration Club at California's Anacapa School are celebrating the recent success of their second near space probe. One that reached an altitude of almost 112,000 feet. Amateur Radio Newsline's Don Carlson, KQ6FM, has the rest of the story:

Balloon launch team: "5 - 4 - 3 - 2 - 1 - Go!!"

That's the sound of a group of teenage near-space adventurers lofting a high altitude balloon that would soon soar above California's central coast and then eastward toward the states central valley.

Called Anacapa Amateur High-Altitude Balloon 2, a student team from the Anacapa School launched two payload capsules tethered to a weather balloon on Saturday, May 5th. Equipped with GPS, atmospheric sensors, high-definition video and still cameras, a television transmitter and a Geiger counter, the payload downlinked live data, video and images during its ascent.

Anacapa Amateur High-Altitude Balloon 2 was designed and built entirely by students that included Alex Carlson, KJ6UGF and Genevieve Hatfield, KJ6UGH. They along with non-hams

Grayson Baggiolini, Julio Bernal and Christian Eckert made up the construction and launch team that was under the supervision of faculty advisor Levi Maaia, K6LCM.

K6LCM: "Two years ago in September of 2010, one of my students, Connor Proctor and I got together and were talking about some of the headlines we had seen on-line about high altitude balloons and decided that it would be a neat project to bring to the Anacapa School in Santa Barbara. So we brought it to the Head Master of the school and said we want to do this. He said what an awesome idea and was behind us 110% as we sought funding for the project and put together a small team of students to spearhead the first launch."

As the balloon climbed through the thinning air, the decreasing atmospheric pressure caused it to expand nearly ten times in diameter. On reaching its apex above California's Central Valley, the balloon burst, sending the payload back to mother Earth under the canopy of a small parachute. By reaching an altitude of 111,814 feet, this flight shattered the record of the group's own first balloon flight by more than 20,000 feet.

Over the coming weeks the students expect to thoroughly document the flight and analyse the collected data. More information, including photos and a condensed version of the in-flight video can be found online at www.anacapaschool.org/ansec

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

And less we forget to mention, the student group has been working on this high altitude ham radio balloon project since September of 2011.

7O6T YEMEN OPERATION APPROVED FOR DXCC OVER PROTESTS OF ISRAELI HAMS

Over complaints that were voiced on QRZ.com and other public websites by some Israeli hams, the ARRL DXCC Awards Desk has approved the current 7O6T operation from Yemen for DXCC credit.

Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with more:

A small but vocal number of Israeli hams have been arguing on-line that the 7O6T from Yemen should not be allowed for DXCC because the operators refused to make contact with 4X and 4Z prefix hams. They note that Israel has no banned countries list and as such refusal of the 7O6T

operators to contact them was at least a
violation of the principals and the spirit of the DXCC program.

While it's true that Israel has no banned
countries list, many of its neighbours consider
themselves technically in a state of war with the
Jewish state and have been since its creation
through partitioning following World War 2. As
such these nations ban hams operating under their
jurisdiction from making contact with their counterparts in Israel.

The 7O6T operation reportedly has the support of
Yemen's Ministry of the Interior, the Ministry of
Information, the Ministry of Radio and the
Ministry of Telecommunications and Information
Technology. As such it is a pretty good guess
that not recognizing Israeli stations was a
decree imposed by Yemen on the 7O6T operating
team and not one of their own choosing.

At airtime, it's not known if any of the
protesting Israeli hams contacted the ARRL DXCC
Desk regarding this issue of if it was just
another of those cyberspace only
arguments. Either way it came to an abrupt end
on Saturday, May 5th. That's when ARRL Awards
Branch Manager Bill Moore, NC1L, issued a news
release stating that the current 7O6T operation
from Yemen along with the earlier 6O3A DXpedition
to Somalia have been granted DXCC approval. As
such, both will be counted for DXCC credit.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

The 7O6T adventure began at 2100 UTC Monday, April 30th and had been causing
massive pile-ups wherever the operators show up. It continued through
2100 UTC on May 15th.

Up until this operation began, Yemen was ranked
as number 5 in the DX Magazine's list of most
wanted entities behind North Korea, plus Navassa, Bouvet and Heard Islands.

WAB awards for Olympic Flame stations

The Worked All Britain Awards Group has organised special awards to coincide
with the passage of the Olympic Flame around the country.

Various clubs around the UK will be operating from locations along the route
used by the Torch Bearers for that particular day. They will use callsigns
G4WAB and G7WAB.

The main call will be G4WAB, the exceptions for this being Shetland and Orkney, Jersey and Guernsey, when both callsigns will be used the same day.

There will be Bronze, Silver and Gold versions of the award, depending on the number of stations worked. Full details of the cost, route and club stations are available on the WAB website.

SPECIAL EVENT STATIONS, DX, BEACON, REPEATER AND NET ADVICE

John VK3KM has advised free scripts to load the WIA repeater list into your VHF/UHF radio are available

Steve Ireland VK2MD has written four useful utilities in VB Script that will load and manipulate the WIA Repeater data file.

The first script simply prints the repeater list to a console window and is meant as a training exercise.

The next one verifies the WIA repeater data file for any consistency.

A third script converts the binary file into a format that can be imported directly into the ICOM ID880 using the free ICOM CS-80/880 Software.

The last one converts the binary file into a format that can be imported directly into the many radios that are supported by Chirp.

A "Read Me" file is included with the downloadable zip file that describes in detail how to run the scripts, and the scripts themselves are fully commented for those who want to write their own utilities. Also included within the zip file are sample output files that are pre-cooked and ready to use.

The scripts will run on most Microsoft Windows operating systems (XP onwards) and can be downloaded from the Repeater Update page on the WIA web site.

(text only edition)

As we heard a lil earlier, ARRL DXCC Manager Bill Moore, NC1L, reported that the current 7 O 6 T DXpedition to Yemen and the February 2012 6 O 3 A DXpedition to Somalia have been approved for DXCC credit.

BUT if you had cards that were recently rejected for the 6 O 3 A operation, please resend an e-mail (dxcc@arrl.org) to the ARRL DXCC Desk."

(arrl letter)

European Football Championship 2012 on the AIR

EFC 2012 is an on-the-air activity which promises to be a great deal of fun, organized by Polish and Ukrainian amateurs affiliated with PZK and UARL.

>From June 1st to July 5th 2012, there will be numerous special event stations active on the air. They will be operating concurrently with the 2012 European Football Championship, which this year is organized jointly by Poland and Ukraine.

There are two awards which can be earned during this period, as well as many interesting QSL cards and prizes.

More detailed information be found on website http://efc2012.pzk.org.pl

(irts)

Brothers ZB3M and ZB2ER are using the special calls ZQ3M and ZQ2ER from Gibraltar through June 10th. This, to celebrate the Queen's Diamond Jubilee.

ZS6RGV is the new radio operator on the Marion Island base. His equipment includes an Icom IC-736 transceiver and FL-7000 amplifier. ZS1HF is going to help him with applying for a ZS8 call and will act as his QSL manager.

RADIO MYANMAR INTERFERENCE ON 40 METERS

The South African Radio League HAMNET reports that Radio Myanmar has been found to be broadcasting illegally on 7,110 MHz. The station is transmitting using full carrier AM from 15:30 UTC every day and is causing interference on the emergency communications frequency.

Steps are being taken to issue a formal objection but this takes time and the correct procedures need to be followed. Meantime, South Africa's Hamnet emergency communications response group has sent an official complaint directly to Radio Myanmar and requested that it move frequency.

MEDIA WATCH
www.cq-amateur-radio.com/WorldRadio.html
VK Club Bulletins http://groups.yahoo.com/group/aarnie/

A bit of a milestone Sunday last in VK2.

A new transceiver replaced the old unit on 20 metres which enabled news call-backs to again be taken after a gap of many years.

It was not pre announced and only mentioned as call-backs were about to be taken that vk2wi would take 20 metre call-backs.

This brought 8 out of the woodwork, interstate as well as local,
1 here in VK3;
1 down in VK7
2 in VK4 all indicating they have an audience beyond the borders.

As an aside, this WIA year we will have our highest ever number of call backs reads etc., 120,000 plus!

Some 40,000 of those are RF check-ins.

SPECIAL INTEREST GROUPS - VHF AND ABOVE

First VK 10GHz EME DIGI Record Established

Rex VK7MO and Alan VK3XPD are pleased to report on completing a QSO on 10 GHz EME with at one end a small portable station as would be used on field days. This result was achieved by taking advantage of predicted low libration spreading so that the narrow bandwidth mode JT65c could be employed, by using a program to automatically correct for Doppler and by using the Deep Search averaging function of WSJT.

Lunar Libration is the slow rocking back and forth of the Moon as viewed from Earth, permitting an observer to see slightly different halves of the surface at different times.

A feature of 10 GHz signals on EME is that while they vary significantly on a short term basis with glints of a second or so the average signal to noise varies only a dB or so between periods, over several periods, and this steady S/N is useful for signal averaging.

Alan VK3XPD's equipment was a 10 ft Dish with linear horizontal polarisation and an 80w travelling wave tube transmitter and a DB6NT receiver pre-amp into an IF receiver - FT817. The transverter, multiplier & GPS Locked Oscillator is a totally Aussie design by Graham - VK3XDK.

Rex VK7MO's equipment was a 64 cm TVRO offset Dish with linear horizontal polarisation and a DB6NT amplifier with 8 watts to the feed. Rex also used a DB6NT pre-amp and transverter. The IF receiver was an IC-910-H

A big congratulation to both Rex and Alan on this great achievement

SOCIAL SCENE 2012

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Olympic Games: Temporary Operating Restrictions:

Posted: 17 May 2012 06:15 PM PDT
http://www.eham.net/articles/28318

The London 2012 Olympic and Paralympic Games will place unprecedented demands on the radio spectrum in locations where there is already significant use of the spectrum resource. The Government has guaranteed to the International Olympic Committee that arrangements will be made to allocate the necessary radio frequencies for the organisation of the Games. Ofcom has worked closely with the Government and other spectrum users to meet the Games requirements with minimum disruption to other users. Ofcom has identified a need to have short term access to certain segments within bands to which Radio Amateurs have secondary access. Ofcom has been working with the Radio Society of Great Britain to ensure that Games requirements can be met in some of these shared bands, while maintaining enough spectrum for Amateurs to continue to use. There are segments within several Amateur bands which Ofcom plans to assign to support the 2012 Games and their preparation; some use will also continue for a short time after the Games to support decommissioning of venues. This use will be in geographically limited areas between 28th June 2012 and 23rd September 2012. The frequencies affected are segments of the 70cm band, and 2.390 - 2.400 GHz and 3.41 3.44 GHz.

//
CQ Announces 2012 Hall of Fame Inductees:

Posted: 18 May 2012 05:48 AM PDT
http://www.eham.net/articles/28317

(Dayton, OH - May 18, 2012) -- CQ magazine today announced its 2012 Hall of Fame inductees, celebrating the 45th anniversary of the CQ DX Hall of Fame with three new members, along with two new inductees into the CQ Contest Hall of Fame and 16 new members of the CQ Amateur Radio Hall of Fame.

CQ announces 2012 Hall of Fame inductees

Posted: 19 May 2012 04:49 AM PDT
http://forums.qrz.com/showthread.php?346753-CQ-announces-2012-Hall-of-Fame-inductees&goto=newpost

CQ announces 2012 Hall of Fame inductees

CQ magazine has announced its 2012 Hall of Fame inductees, celebrating the 45th anniversary of the CQ DX Hall of Fame with three new members, along with two new inductees into the CQ Contest Hall of Fame and 16 new members of the CQ Amateur Radio Hall of Fame.

The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The 2012 inductees (listed alphabetically) are:

George Badger, W6TC (SK), expert in tubes and tube circuit designs; executive of Eimac and later President of Svetlana

Bill Brown, WB8ELK - "Father" of amateur radio high-altitude ballooning

Robert Brown, NM7M (SK) - Expert on 160-meter propagation, author and retired physics professor

Evelyn Gauzens, W4WYR - Chair of the Miami "Tropical Hamboree" hamfest for 45 years; ARRL Southeastern Division Vice Director, Honorary Vice President

Richard Garriott, W5WKQ ☐ Younger half of first U.S. father-son team to travel in space. (His father is Owen Garriott, W5LFL, the first astronaut to operate amateur radio from space, and a 2001 Amateur Radio Hall of Fame inductee.)

William W. Hansen (no call)(SK), "Father of Microwave Electronics"

Richard Kirby, ex-W0LCT/HB9BOA (SK) - Director of the ITU's International Radio Consultative Committee (CCIR) from 1974 to 1995

Fred Maia, W5YI (SK) - One of the architects of VE program, first FCC-designated VEC; editor/publisher W5YI Report; long-time CQ columnist

Steve Mendelsohn, W2ML - Communications Director, New York City Marathon, 1976-present; former ARRL First Vice President, Director

Larry Mulvehill, WB2ZPI - Photojournalist who has covered major news events around the world for more than 50 years; CQ cover photographer for over 30 years

Rowley Shears, G8KW (SK) - Founder of KW Electronics in UK; helped re-establish amateur radio in Germany after World War II

Mike Staal, K6MYC - Antenna expert, co-founder of KLM and M2 Antennas

Frederick Terman (ex-6FT, W6AE, W6XH) (SK) - Microwave pioneer, partner with William Hansen (see above)

Patrick Tice, WA0TDA - Manager, Courage HandiHam System; for more than 20 years

Louis Varney, G5RV (SK) - Inventor of the G5RV antenna

William A. Wilson, K6ARO (SK) - First U.S. Ambassador to the Vatican after formal diplomatic relations were re-established in 1984 after more than a century

CQ DX and Contest and DX Halls of Fame

The CQ DX and Contest Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways. The CQ DX Hall of Fame, founded in 1967, celebrates its 45th anniversary this year.

The 2012 inductees to the CQ DX Hall of Fame are:

Don Chesser, W4KVX (SK) - Pioneering DXer and DXpeditioner; founder of DX magazine

Glenn Johnson, W0GJ - A leading DXpedtioner, leading many teams, often to very rare countries; personally responsible for restoring amateur radio in Bhutan in 2000

Carl Smith, N4AA - Editor and publisher of DX magazine and the weekly "QRZ DX" bulletin. Also CQ's DX Editor and leader of effort to create Southern Appalachian Radio Museum.

The 2012 inductees to the CQ Contest Hall of Fame are:

Jim Reisert, AD1C - Maintains and constantly updates the country and prefix files that are depended upon by virtually all of the major contest and general logging programs, as well as software for the major DX clusters.

Lothar Wilke, DL3TD (SK) - Leading contester and promoter of contesting in Germany; under his leadership, DA0HQ won the IARU World Championship 11 times.

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled for the Dayton Hamvention.® More detailed descriptions of inductees will appear in the official announcement in the July 2012 issue of CQ magazine

Lloyd at the mic-cropped.jpgWould you like to? If your answer is yes, then
you'll want to drop by and see me at Joe, WB2JKJ's booths 1336/1337/1338

www.wb2jkj.org at Dayton Hamvention this weekend so I can tell you all about Quartzfest* 2013 where Fred and the "Zed" P1010004.JPGwill be joining us again next January 15th - 25th.

If there's interest in a Quartzfest* get together in Dayton this weekend, drop me a note " organizer@quartzfest.org " ...or stop by the booth and let's make it happen. At the ARRL Southwestern Division Convention in Yuma this past February, with only about 1 days notice, we were able to throw together an impromptu gathering where 50 HAM's showed up for an evening Weiner roast.

If you're not able to make it to Hamvention this year, please drop by our website www.quartzfest.org and see what Quartzfest is all about.

I'll give you a hint though...it's an educational 10 day long RV campout for Amateur Radio Operators, and, to my knowledge, the only gathering like it in the world. The 10 days are packed full of Seminars about Amateur Radio, RV'ing, Emergency "Solar" back up power, Emergency Communications Operations, and so much more! We annually hold our Off Road Trip, our Infamous "Hobo Stew", Geocaching, Hidden Transmitter hunting, Antenna Shootout, Antenna Walkabout and Solar Walkabout (where we tour the Quartzfest area checking out unique ideas for installation of antenna's and Solar panels on our RV's) and most importantly, VE testing. We have campfires and coffee each morning where eyeball QSO's are held, Campfires each evening along with evening presentations, movies..or just telling stories around the campfire.

YL's aren't left out at Quartzfest either. Each day we have scheduled crafts, or some other activity for those not interested in the HAM or RV Seminars...

I know I'm leaving a bunch of stuff out..but you get the idea. If you want to escape the frigid north during the winter to attend one of the best and most fun Amateur Radio Events in the U.S., make plans now to join us at Quartzfest* 2013.

I hope to see you here this weekend.

73,

Steve KO4QT (Quick Truck)

organizer@quartzfest.org

Malaysian amateur radio league (marl)

Posted: 16 May 2012 09:10 PM PDT
http://forums.qrz.com/showthread.php?346468-Malaysian-amateur-radio-league-(-marl-)&goto=newpost

Malaysian Amateur Radio League (MARL) has been registered yesterday - May 16th, 2012. It is an effort on a body unifying and representing all amateur radio associations in Malaysia. Members are amateur radio associations only. MARL is an organization designed to represent and voice out the interest and opinion of all Malaysian amateur radio assignment holders. It is an approach modeling on Communications & Multimedia Act 1998 requirements on formation of industry forums.

I am pleased to inform that the Protem Committee of MARL are:

President : Y.A.M Tengku Sri Temengung Raja D.K, S.S.M.T, Y.A.M Dato' Seri Tengku Baharuddin Ibni AlMahrum Sultan Mahmud Al Muktafi Billah Shah (9M2TBM)

Vice President : Abdul Aziz Bin Mohd Noor (9M2AU) - MARES

Secretary : Abd lah @ Abdullah Bin Awang (9W2HOZ) - JASRA

Asst. Secretary : Azmeir Bin Zaki (9W2EKP) - JASRA

Administrative Secretary : Ashwar Bin Abdul Aziz (9W2FG)

Asst. Administrative Secretary : Mohd Iqbal Bin Mohd Noor (9M2BAL)

Treasurer : Amrun Bin Mamat (9W2HAV) - SQUAD99

Committee :

i. Fahroradzi Bin Ibrahim (9W2BBS) MARES

ii. Marzuki Bin Saad (9M2MZ) - Kedah HF

iii. Jamaludin Bin Mat Akhir (9W2BDS) - KSRAC

iv. Khairul Asyraf Bin Jaafar (9W2CRO) - MERACC

v. Mohamad Alawi Bin Md Noor (9W2AWQ) - AKRAB

vi. Abu Hashim Bin Nordin (9W2AHJ) - SIK AMATEUR

MARL(english).jpg

Easily access MARL Facebook page, bookmark us at www.facebook.com/MsianAmateurRadioLeague

Two Video Streams from Dayton Hamvention

Posted: 15 May 2012 10:25 PM PDT
http://forums.qrz.com/showthread.php?346354-Two-Video-Streams-from-Dayton-Hamvention&goto=newpost

We made an announcement tonight on Ham Nation.

AmateurLogic.TV and Ham Nation will be streaming live from the Ham Nation booth 106 at Dayton Hamvention thanks to Via Sat. This is our first year to do this so we've got our fingers crossed that all goes well. We have other events at Hamvention to cover so we won't be at the camera full time. We plan to leave the camera up and streaming and do periodic live updates with lot of interesting Hams.

Watch this link for more information about the AmateurLogic.TV / Ham Nation video stream: www.amateurlogic.tv/dayton

Of course Tom Medlin (KB5KUB) will be doing his great annual stream from Dayton as well at www.w5kub.com .

Many thanks to Via Sat for providing the satellite Internet uplink for both streams.

//
30 Meter Mobile Beacon Rides Again

Posted: 15 May 2012 06:11 PM PDT
http://forums.qrz.com/showthread.php?346342-30-Meter-Mobile-Beacon-Rides-Again&goto=newpost

Amateur Radio is a fun hobby to do some weird experimental things with radio. For the second year Amateur Radio Operators Al Gallo WØERE and David Beckler, aka ☐SAP☐ NØSAP will be operating a 30 Meter Mobile Beacon on 10.129.25. This is our second time using a mobile beacon that will give update information on grid squares during our travel.

Our trip begins on Thursday, May 17th at approximately 1300 hrs UTC or eight o☐clock AM CDST. The rig will be a Yaesu FT-817 running 2 watts with a quarter wave trailing wire made of Litz wire. The wire will be about eight feet high off the front end of the SUV (☐SAP☐ Urban-Assault Vehicle). A Hustler mast with a tri-mag mount and a spring mounted at the top is where the Litz wire attachment is made within the spring. At 58 MPH, the wire launches in the air and generally oscillates in a horizontal

plane from left to right. It does not impede the vehicle behind, as most do not notice the wire dancing in their face.

The message will be WØERE/M/B; the MB is for Mobile Beacon, and then the current grid square 2 wts. On our return trip Monday 21st, we will be on the air at the same time of 1300 hrs until we reach the QTH in Nixa, MO.

Al and ☐SAP☐ will be operating SSB on 7.265 and 14.265 plus or minus 3 Kcs. We look forward having you send us signal reports on the beacon from your location with contacts on SSB, emails at erecom@hotmail.com and/or audio files. Hope to see you in Dayton.

772. SARL News in English 19/5/2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-05-19 19:05:21 UTC
From: website@sarl.org.za
Message-ID: <4D9C4168D93B4DAF8B19C0BA3FE4F271@ZAJNBTCSARL01>
Source record: 3039
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 20 MAY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 AND 7,066 MHz from Pretoria, with a relay on 3,695 MHz SSB. (Other news readers change to suit).

To all mothers listening today, we wish you happy mother's day.

IN THE NEWS TODAY:

MORE TIME FOR ZU LICENCEES

WHAT TO DO WHEN YOU DID NOT RENEW YOUR LICENCE AND LOST YOUR CALL SIGN

NATIONAL AMATEUR RADIO DAY

AMATEUR RADIO ON MARION ISLAND

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SOME MORE TIME FOR ZU LICENSEES OVER 25 TO WRITE THE CLASS A EXAM

ZU Licensees (class B) will have more time to study and write the class A examination. In a discussion with ICASA the agency confirmed that the rule that class B licensees will loose their licence if they are over 25 years old will only apply once the corrections to the regulation, which were published, on 31 March 2011, have been promulgated. After that date holder of ZU licences who are over 25 years old will get two years to qualify for the class A licence.

There is no indication when the revisions will be published. The revised regulations are being held up pending court action by one of the spectrum users which may affect one of the regulations. ICASA's legal department believes that by publishing the amateur radio portion of the regulations separately will jeopardise their case in court.

BEST WISHES TO RTA STUDENTS

Students will be sitting the RAE on Thursday evening. We wish them well and look forward to a record new callsigns on the air soon.

DID NOT RENEW YOUR LICENCE AND LOST YOUR CALLSIGN?

Currently if a person has not paid the license fee, the callsign is cancelled. To reapply ICASA charges the application fee plus any outstanding amount on the account. This is not negotiable unless the person can prove that he/she cancelled the license in writing. A copy of the letter is needed.

The SARL has taken this matter up with ICASA. The Agency confirmed that they are reviewing the process. This may take several weeks. If you in the position that you let your licence lapse, the above procedure is the only one to follow.

RADIO ZS IN THE MAIL

The March - April Edition of Radio ZS is in the mail and available on the web for download by members of the SARL. The edition was delayed due to a change in printer. The printer who has been printing RADIO ZS for the past few years decided to retire and close the business.

The edition is packed with interesting articles. Read about "An Easy HF Field Day Station" by Rob Parkinson, ZS1RAP. Ean Retief ZS1PR's article "Deeltiteleiendomme - Antennas in die solder" will be of great interest for Amateurs living in complexes. Read about "New Amateur Radio Shack at the Institute for the Blind in Worcester". Hannes Coetzee, ZS6BZP, writes about "The ZS-Dipole, a compact, efficient, wide band dipole for 40 m and up and Sydney Smith, ZS1TMJ, takes us back to the valve days with "The BH-NHS 'Rat Trap' Regenerative Receiver".

Dennis Green, ZS4BS, brings us up-to-date with "Amateur Radio on the iPad", a small sample of some of the apps available for the iPad, iPhone and iPod.

Enjoy reading!

If you are not yet a member of the SARL, take up our special offer and get May and June free. For full details call Mariska on Monday at 011 675 2393.

You can also ask for a sample copy of Radio ZS by sending an email to artoday@sarl.org.za with RZS in the subject line.

SHARE YOUR PASSION OF AMATEUR RADIO

Share your passion of amateur radio for two special programmes to be transmitted on National Amateur Radio Day on 16 June. If you are an old timer in Amateur Radio we would like to hear your story and record it for the programme. All you need to do is to send your telephone number (Landlines only) to artoday@sarl.org.za and Hans, ZS6AKV, will call you to record your views on why amateur radio is great.

The second programme is about how young persons experience amateur radio. If you under 25 years old send your telephone details to artoday@sarl.org.za, Hans will call you. Recordings will be done on Thursday evening this week so please respond today or tomorrow.

YOUTH DAY SPRINT

The annual Youth Day Sprint will be held on Saturday 16 June from 10:00 - 12:00 CAT. There are many prizes to be won in this 2 hour 40 metre fun event. Radio Amateurs are encouraged to invite young persons to enjoy the event from their station and top give youngster a hands-on experience of amateur radio. The youth day Sprint is part of the 2012 National Amateur Radio Day. Visit www.sarl.org.za for more details.

AMATEUR RADIO ON MARION ISLAND

Rory Meyer, ZS6RGV, is the new radio technician at Marion Island base, the Daily DX reports. It may be sometime before we hear Rory because he is very busy now helping with the change over from the old team to the new team on the island. Rory has an IC-736 and FL-7000, but does not yet have a ZS8 call sign. Pierre, ZS1HF (ex ZS8M) will be supporting Rory with obtaining a ZS8 call sign and Pierre is planning to be the QSL manager.

DIGITAL MODES ON 40 METRES

The SARL has received a complaint of a ZS6 radio amateur operating DominoEx-4 between 7 058 and 7 060 kHz. Stations using this digital mode must operate between 7 040 and 7 050 kHz. SSB operation starts at 7 053 kHz.

DAYLIGHT METEOR SHOWERS ARE HERE

If you have never experienced any meteor scatter signals on VHF before, then now is your chance to learn something about it. Starting this week the Earth is passing through two intense daylight meteor showers, the Arietids and the Zeta Perseids with hourly rates of 54 and 20 respectively. The first step is to listen for meteor signals from the VHF beacons on 50 MHz, 70 MHz and even on 144 MHz, as the meteor bursts should be audible thoughout the day. Once you can hear the beacon signals then concentrate on 50,200 MHz SSB for any long distance contacts that may peak up to S9, alternatively you could also monitor 70,200 MHz FM. These showers will continue throughout June until beginning of July 2012.

THE SARL ZS4 SPRINT.

This is a fun activity to promote contacts between radio amateurs in the Free State and radio amateurs in Southern African countries. The Sprint is run from 14:00 to 15:00 UTC on Sunday 20 May 2012 and is a phone and CW contest in the 40-metre band.

ZS4 stations will give a RS(T) report and the town name or abbreviation, while other stations will give a RS(T) report and their provincial or country abbreviation. Earn 2 points for working a ZS4

station and one point for a QSO with any other station. ZS4 stations will earn one point for a QSO with a ZS4 station and 2 points per contact outside ZS4. Contacts with the Bloemfontein RAC, ZS4BFN, Vrystaat Radioklub, ZS4B or the Sasolburg ARC, ZS4SRK is worth 5 points each, only one contact per station is allowed

Log sheets shall be submitted by 4 June and can be sent to The Sasolburg Amateur Radio Club, ZS4SRK, PO Box 28194, Sonlandpark, 1944 or by e-mail to riaanzs4pr@gmail.com and copy fwolff@global.co.za

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is at moderate levels. The sun's surface is peppered with sunspots and a new sunspot is emerging on the western limb.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 80.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today is National Museum Day: Zululand Radio Amateurs will broadcast from the Nongqayi Fort under callsign ZS5ZLB. The SARL ZS4 sprint from 14:00 to 15:00 UTC. 28 May - Logs for AWA Valve QSO party to be in to andyzs6ady@vodamail.co.za or AWA of Southern Africa, P O Box 12320; Benoryn 1504. 4 June - Logs for the ZS4 Sprint to be in to to The Sasolburg Amateur Radio Club, ZS4SRK, PO Box 28194, Sonlandpark, 1944 or by e-mail to riaanzs4pr@gmail.com and copy fwolff@global.co.za. 16 June - National Amateur Radio day between 09:00 and 16:00 and Youth Day Sprint 10:00 - 12:00 CAT.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Johan Marais, ZU1JM, and edited by George, ZS6NE.

Thank you for listening, 73.

/EX

Ham Radio Operators Prepare for the Big One:

Posted: 18 May 2012 05:38 PM PDT
http://www.eham.net/articles/28325

ASTORIA, Ore. (AP) -- The Big One is on Nathan Lee's mind. More than four years after the Great Coastal Gale of 2007, and in the wake of the 2011 Japanese earthquake and tsunami, Lee and a small cadre of amateur radio junkies are preparing for the worst and having a great time doing it. With concerns growing over the dangers posed by the Cascadia Subduction Zone, where shifting tectonic plates pose the risk of creating huge earthquakes along the western seaboard, Lee figures that when the inevitable strikes, people can either be part of the solution or part of the problem. Guess which he is? His Jeep is a mobile radio station for the survivalist set. Resting inside a locked metal briefcase, like a Russian nesting doll, is another locked metal box, all of which is chained to the back seat. Inside is a "terminal node controller," a thin rectangular box that looks like a standard car radio but is actually a special piece of amateur radio equipment used to transmit signals around the globe. His radio-outfitted rig ensures that when Mother Nature turns tempestuous, he and the other members of the Clatsop County Amateur Radio Emergency Service (ARES) will have the county covered.

//
Weather Emergencies Help Fuel Ham Radio Growth:

Posted: 18 May 2012 05:33 PM PDT
http://www.eham.net/articles/28324

The number of licensed amateur radio operators in the U.S. is at an all-time high, in part because of ham radio use during and after severe weather, experts said. The number of amateur radio operators topped 700,000 for the first time in October 2011, according to the American Radio Relay League, a national amateur radio association. New license applications for 2012's first quarter were up 30 percent compared to that period in 2011, the league said.

//
Dayton Goes 'Radio Active' This Weekend:

Posted: 18 May 2012 08:43 AM PDT
http://www.eham.net/articles/28323

DAYTON, Ohio, (WDTN) - Some 20,000 visitors are in Dayton this weekend to attend Hamvention, the largest gathering of amateur radio operators in the world. The only impact on Miami Valley residents may be they notice a few more cars with "extra" antennas on the road, but the event is expected to give a $10 million boost to the local economy. Amateur radio operators, or Hams, flock to Dayton from all parts of the world to attend the event where many manufacturers debut their latest and greatest products. "I came all the way from Spain," said Oriel, who did not wish to give his last name, 'I am here to see the new radios and maybe take one home on the airplane." Hundreds of Hams lined up before the event opened Friday, signaling they are not only diehard hobbyists but also their dedication to the Dayton event. But, with the addition of cell phones, portable tablet devices and widespread internet availability, surly the hobby must be on its way out. "Amateur radio is far from dead," said Allen Pitts with the Amateur Radio Relay League, the national membership organization of amateur operators, "It's not your grandfather's anymore." Pitts says with the addition of digital radio modes and the internet, the hobby has new avenues of expansion. In fact, the Federal Communications Commission, who issues the necessary licenses to Hams, reports it is issuing thousands of licenses each year.

Amateurs Asked to Listen for HORYU-2 Satellite:

Posted: 18 May 2012 08:46 AM PDT
http://www.eham.net/articles/28322

The Japanese HORYU-2 research satellite was launched May 17 at 1639 UTC as part of a mission that included the JAXA climate observation satellite Shizuku. HORYU-2 was built by students at the Kyushu Institute of Technology
(KIT) and it carries the call sign JG6YBW. The satellite will conduct a variety of experiments including high-voltage power generation and space debris measurements.

//
Propagation Forecast Bulletin #20 de K7RA:

Posted: 18 May 2012 08:44 AM PDT
http://www.eham.net/articles/28321

Look at the archive on spaceweather.com. On the upper right side of the page, it is accessed by selecting a date on the three drop-down fields. Now step day-by-day through the past week to see the progression of a considerable number of sunspots. The spots are in the Daily Sun image on the left side of the page. There was one new sunspot group on May 10, two on May 11, four more on May 13, and another on May 15.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 20th May 2012

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 28th June at 2 p.m. in the ComReg Offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form. Please note over half the available places have already been allocated.

South Eastern Amateur Radio Group

The Geoparks communications weekend this year takes place on Saturday 26 and Sunday 27 May. South Eastern Amateur Radio Group will again operate from Tankardstown on the Copper Coast Geopark in Co. Waterford. The callsign is EI2GEO (pending approval). Activity will mainly be on HF. Anyone wishing to get involved should contact the club on info/at/searg.com or phone Mark Wall on 087 630 2026 . For more information about the Geopark, visit www.coppercoastgeopark.com

---

North Cork Radio Group

North Cork Radio Group are pleased to announce another 1st time CASHOTA activity. This time we will be activating Barryscourt Castle, East Cork. Barryscourt Castle is the 16th century seat of the Barry family. The present castle, with its largely intact bawn wall and corner towers, is a fine example of an Irish tower house.

We are looking forward to operating from this site on Sunday, 20th May 2012 from 11am to 5pm approximately. As the castle is closed to the public until 24th May, this is a closed event but we look forward to working you on the day.

CASHOTA Activity Weekend 19th & 20th also 26th & 27th May 2012

This annual event is held over 2 weekends to allow individuals to activate or chase castles and stately homes, as well as other historical locations. It is open to any individual, group or club who wish to participate, with both activators and chasers being able to claim their award certificate. Irish castles will count towards the main UK CASHOTA award. The CASHOTA IRELAND AWARD is for working Irish castles in both EI and GI. Anyone intending to work a castle in EI should contact Steve EI5DD to obtain a designated number for the Castle. See requirements an details listed on other pages of this site.

DX News

A multi-national group will operate from the Kingdom of Bhutan from 24 May until 6 June. The callsign will be A5A. They will be active on all bands 80-10m and will take part in the WPX CW Contest during the weekend of 26/27 May.

Freddy, who holds the calls F5IRO and J28RO, is now working in Uganda for several weeks. He has been issued with the local call of 5X5RO and has already been heard on several bands. QSL info is via F8DFP.

Craig MM0SSG is now QRV from Luanda in Angola until around the end of October. . Workwise he is employed on an offshore oil platform but he is active as D2SG when back on land. His QSL manager is GM4FDM.

The well known DX traveller Vlad UA4WHX, who was active earlier this month as JY8VB from Jordan, is now in Palestine. He appeared recently as E40VB but the length of his stay there is unknown.

The DXpedition on Socotra Island (IOTA AF-028) in Yemen went QRT on Tuesday last, with 162,000 QSOs in the log. With Yemen high on the list of most-wanted DXCC entities and the added attraction of a very rare IOTA reference, the pile-ups were huge. There are just over 100 EI call signs in the log: in the lead is John EI7BA with 19 band slots, followed by Thos EI2JD with 16 band slots.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

HAMFEST: Carnival to focus on search and rescue ops: KUALA LUMPUR: WHAT do you do when natural disasters like earthquakes, landslides or floods strike? What if the power is down and all communication is cut off? At the Hamfest festival, an amateur radio opportunity, visitors will be exposed to how to use amateur radio for search and rescue operations in case of an emergency as well as interacting with other amateur radio enthusiasts worldwide. "We want to create awareness of this communication tool and its usefulness. "It becomes the last frontier when other communications are down and the public can learn it when they attend this festival" said event organiser, Azli Paat.

http://www.eham.net/articles/28328

TROTWOOD, Ohio -- Amateur radio operators from around the world have made their pilgrimage to Hara Arena again this weekend for the 61st Annual Dayton Hamvention. Organizers said that before the event closes its doors Sunday night, over 20,000 people will have stopped at Hara Arena. They said that attendees are expected to spend millions of dollars in the Dayton area over the weekend.

Techies In Town for Hamvention:

Posted: 19 May 2012 05:00 PM PDT
http://www.eham.net/articles/28327

TROTWOOD, Ohio (WDTN) - This weekend is the biggest of the year for ham radio fans. Hamvention is one the area's top attractions every year and this year is no different. Thousands of "techies" don their antenna hats and electronic gadgets for a week of networking and buying up radio goodies. One walk around the grounds of Hara Arena and you can feel the waves of radio excitement. There is amateur radio equipment on display, PA systems, handheld radios, hard drives, laptops, you name it it's there.

GB2RS NEWS

Sunday 20th May 2012

The news headlines:

* RSGB appoints new General Manager

* Poland gains two amateur bands

* British amateurs inducted into CQ Hall of Fame

Graham Coomber, G0NBI has been appointed as General Manager of the Radio Society of Great Britain. His role will be to work with the Board to develop and implement the strategic vision and the changes needed to create a financially sound, membership responsive, Society. Graham is an active radio amateur, with interests in both the DX and contesting arenas. He has also worked for RAIBC and has an interest in WAB. He also holds the call SV0XBA.

Poland will soon join the growing number of countries with access to the 70MHz and 3.4GHz bands. From 2200UTC on 31 May, Polish amateurs will have access on a secondary basis to 70.1-70.3MHz and 3400-3410MHz, subject to a 20 watt EIRP power limit.

CQ magazine has announced its 2012 Hall of Fame inductees, celebrating the 45th anniversary of the CQ DX Hall of Fame. The CQ Amateur Radio Hall of Fame honours those individuals, whether licensed or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The 2012 inductees include Richard Garriott, W5WKQ, the younger half of first US father-son team to travel in space. He worked Budbrooke Primary School in the UK from the ISS in 2010. Later that year, he visited the school to meet the pupils involved in the contact. Also honoured are British amateurs Rowley Shears, G8KW, silent key, founder of KW Electronics, who helped re-establish amateur radio in Germany after World War II and Louis Varney, G5RV, silent key, inventor of the G5RV antenna.

Would you like to see your children or grandchildren taking an interest in amateur radio? Then the volunteers of the Direction Finding committee have come up with an event that might interest you. For a child in the age range 8-15, or thereabouts, racing round a forest with a directional radio receiver hunting down hidden transmitters has an exciting appeal. On Sunday 24 June at Swinley Forest, Bracknell, the

ARDF Committee will be running an introduction to DF for young people. The day will comprise some instruction on the use of a DF receiver, the sounds that the hidden transmitters emit and how to measure the bearing of the transmitter and plot this on a map. There will then be a group of four very low power transmitters to locate in a fairly small area by way of practice. This is followed by a full scale course over a distance of 2 to 3km in the beautiful Swinley Forest, part of the Crown Estate. More details were published in the May RadCom. There is a fee of £5 per child. To sign up go to the RSGB shop at www.rsgb.org/YoungPersonsEvent. At the checkout stage the name of an accompanying responsible adult has to be provided, along with contact details for more detailed information.

The Worked All Britain Awards Group has organised a special award to coincide with the passage of the Olympic flame around the country. Various amateur radio clubs around the UK will be operating from locations along the route used by the Torch Bearers for that particular day. They will use the callsigns G4WAB and G7WAB. The main call will be G4WAB, the exceptions for this being Shetland and Orkney, Jersey and Guernsey, when both callsigns will be used on the same day. There will be three versions of the award, depending on the number of stations worked: Bronze, Silver and Gold. The award will be issued as a PDF as standard, with the option of a paper version for those that require it. Full details of the cost, route and club stations are available on the WAB website, www.worked-all-britain.co.uk.

Amateur radio satellite HORYU-2 was successfully launched on 17 May at 1639UTC and its signals have been received around the world. The satellite's callsign is JG6YBW and radio amateurs are asked to listen for the telemetry downlink at 437.375MHz, plus or minus 9kHz Doppler shift. Telemetry is sent using 20wpm Morse or 1200bps AX25 FSK packet. There will be a monthly competition for those who send data received from the telemetry to the KIT server, via the free HORYU-2 telemetry analysis software. Details of the competition and software can be downloaded from http://kitsat.ele.kyutech.ac.jp/ by clicking on the English button. And now for the details of rallies and events for the coming week

The Dunstable Downs Radio Club Boot Sale takes place today, 20 May, at Stockwood Park, Dunstable. Entrance and car parking is £2 and the event opens at 9am. More information is at www.ddrcbootsale.org.

Advance notice now for the Central Scotland Mini Ham Radio Convention on 2 June. It will be held at Crofthead Farm Community Education Centre, Templar Rise, Livingston EH54 6DG. Doors open at 10am, and there will be trade stands, a Bring & Buy as well as lectures and an RSGB bookstand.

On 3 June, the Spalding & District Annual Rally will take place at The Sir John Gleed Technology School, Halmer Gardens, Spalding PE11 2EF. Doors open at 10am and there will be trade stands, free car parking and

catering facilities at the event. More details from John, G4NBR, on 07946 302 815.

Now for the news of special events

The Geoparks communications weekend this year takes place on 26 and 27 May. South Eastern amateur radio group will again operate from Tankardstown on the Copper Coast Geopark in Co Waterford. The callsign should be EI2GEO and activity will mainly be on HF.

GS5NB will be on the air from Ness Battery, Stromness, Orkney until 2000UTC on 21 May using the 10 through to 80m bands, operating SSB, CW RTTY and PSK. Run by Orkney Amateur Radio Club, it celebrates the official opening of this Scheduled Ancient Monument to the public after its restoration by Scapa Flow Landscape Partnership. QSL is direct only via GM0WED and LoTW. Full details are online at http://eu009.webplus.net and qrz.com.

Coventry Amateur Radio Society will put GB50CCC on the air on 23 May to 19 June for the Coventry Cathedral Celebration.

The Royal Naval Amateur Radio Society will run a special event station at the HMS Collingwood open day on 26 May. It is expected that the call sign GB6COD will be used again. The station will be operational on all amateur bands from 1.8 to 430MHz. The Society headquarters station will be open to the public from 0930 to 1800 on the day. A number of demonstrations will be taking place using amateur radio and amateur television.

GB60VUL will be on the air from ex RAF and USAF Greenham Common today, 20 May. On 25 May, the callsign will be on the air as part of the birthday weekend for XH558 at 211 Squadron ATC in Newbury. On the air until 27 May, there will be an open weekend with a Vulcan exhibition and the GB60VUL special event station.

And now the DX news compiled from 425 DX News and other sources

Andr�, GM3VLB is returning to the Orkney, EU-009 group, beginning 21 May. He plans to activate 5 islands, Muckle Green Holm, OI20, Linga Holm, OI21, Eynhallow, OI24, Faray, OI28 and Calf of Eday, OI29. Some are quite difficult to approach and to land on as well as being subject to very strong tidal current.

A group of operators from the Charente DX Group will be active as TM0CI from the Chausey Islands, which is IOTA reference EU-039, on 19 to 25 May. QSL via F5EOT, direct or bureau, see qrz.com.

The Castres DX Gang will be active as TM5FI from Ratonneau Island, which is IOTA reference EU-095, from 23 to 30 May. QSL via F5XX.

Until 23 May, XX9E is the callsign for the DXpedition to Coloane Island, Macau, which is IOTA reference AS-075. A large team will be active on 6 to 160 metres using CW, SSB and RTTY with at least three stations. QSL via EB7DX and LoTW. Further information at

www.adxg.org/xx9/. Now the contest news

This weekend, 19 and 20 May, there are overlapping events. The 144MHz May Contest takes place for 24 hours finishing at 1400UTC today, 20 May. The First 144MHz Backpackers overlaps the final three hours of it and then continues for another hour on its own, until 1500UTC. The exchange for the 144MHz contest is signal report, serial number locator and postcode, whilst the Backpackers exchange is signal report, serial number and locator.

Two events take place on Tuesday 22 May. The 50MHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator. The SHF UK Activity Contest takes place at the same time, 1900 to 2130UTC. Using all modes on the 2.3 to 10GHz bands, the exchange is signal report, serial number and locator.

The CW leg of the 80m Club Championships takes place on 24 May from 1900 to 2030UTC. The exchange is signal report and serial number.

Next weekend, on 27 May, the third 70MHz Cumulative contest takes place from 1400 to 1600UTC. Using all modes on the band the exchange is signal report, serial number and locator.

The CW leg of the WPX Contest takes place for the entire 48 hours of the weekend of 26 and 27 May. There are numerous entry categories, single/multi-band, single/multi-op, QRP/low/high-power, etc. Exchange a report and serial number.

And now the solar factual data for the period from Friday the 11th to Thursday the 17th of May, compiled by Neil Clarke, G0CAS on Friday 18th of May.

The large solar flare producing the sunspot region mentioned in last week's report remained visible till the 17th, when it rotated out if view. The group showed gradual decay from the 11th and produced several C class solar flares every day until early on the 17th, when it produced a M5 proton solar flare. A large coronal mass ejection also took place. Solar flux levels declined from 136 units on the 11th to 129 by the 15th. The average was 132 units. The 90 day solar flux average on the 17th was 115 units, that's two units up on last week. X-ray flux levels declined slightly from B6.1 units on the 11th to B4.3 by the 14th. The average was B5.1 units. Geomagnetic activity started at unsettled levels due to a coronal hole disturbance. The 13th was the most disturbed, with an Ap index of 14 units. From the 14th onwards, activity had declined to quiet levels. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 650 kilometres per second on the 11th to 340 by the end of the period. Particle densities were low every day. Bz varied between minus 7 and plus 10 nanoTeslas on the 17th and between minus 2 and plus 3 nanoTeslas on the quietest day, the 14th. Sporadic-E took place most days on bands between 28 and 70MHz with reflections up to 100MHz on

occasional days, but there are no reports yet of anything on 144MHz.

And finally the solar forecast. This week, the quieter side of the Sun is expected to be rotating into view. Solar activity is expected to be at low levels but, on occasions, there may be a small chance that activity could increase to moderate levels. Solar flux levels should decline and be around 110 units later in the week. Geomagnetic activity is expected to start at quiet levels but around midweek a recurring coronal hole disturbance is expected. This disturbance should be over by next weekend. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 13MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 0900 and 1200 hours. Interestingly, the long path will be at its best around 2200 hours and the MUF could be up to 24MHz. Sporadic-E is expected on most days, with openings up to 70MHz on some days. If any intense openings take place then 144MHz could be reached.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Friskney and East Lincolnshire Communications Club has a club net on 144.165 USB, vertical polarization, from 7pm on Monday 21 May. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. On Friday 25 May there is a club HF net is on 3.748MHz from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

Gloucester Amateur Radio & Electronics Society is having a newcomers' informal night on Monday 21 May. On Thursday 24 May they are participating in the Worked All Britain event in conjunction with the passage of the Olympic Torch. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

Lincoln Short-Wave Club is holding a committee meeting on Monday 21 May. On Tuesday they are participating in the 50MHz UK Activity Contest, and Wednesday sees a formal meeting at the BSA Club. On Thursday 24 May there is a simplex club net on 145.375MHz from 20.00, and then it's Saturday in the Shack from 9am. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is holding a committee meeting on Monday 21 May. On Thursday 24 May there are training classes with Dave Murphy, G8OWL, and Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Worcester Radio Amateurs Association is having a construction evening on Tuesday 22 May, then on Saturday 26 May they are installing an antenna at the Rainbow Hill club shack. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

Wythall Radio Club is taking a trip to Dunstable Downs Rally on Sunday 20 May. The Intermediate course continues on Monday, and there's a social evening at the club on Tuesday. On Saturday 26 May Wythall Radio Club commences its Plug 'n' Play weekend at Wythall Park. Details from Chris, G0EYO, on 07710 412 819.

Now we return to the traditional listing in date order. On Monday 21 May Aldridge & Barr Beacon Amateur Radio Club is having CW tuition and a general discussion. Contact Albert, G0KFS, on 01922 614 169.

On Monday 21 May Welland Valley Amateur Radio Society is looking at computer rig interfacing. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 22 May Derby & District Amateur Radio Society is having a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 22 May Loughborough & District Amateur Radio Club is having a hands-on session operating the club equipment. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 23 May Midland Amateur Radio Society is holding training classes and a field day planning meeting. Details from Norman, G8BHE, on 07808 078 003. On Wednesday 23 May Telford & District Amateur Radio Society is having a surplus equipment sale. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 24 May Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop- ars.org.uk.

On Friday 25 May Coventry Amateur Radio Society is holding a wine & cheese evening. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND On Sunday 20 May North Cheshire Radio Club is holding training classes at 7.30pm in its Wilmslow HQ, followed by its Annual General Meeting at 9pm. All members are asked to try and attend. Contact Gordon, G3LEQ on 01565 652 652.

On Monday 21 May Angel of the North Amateur Radio Club is having a talk by Ed Aksamit on UHF and wind farms. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 21 May Sheffield Amateur Radio Club is holding its annual construction competition for the G4EJL Trophy. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 22 May Chester & District Radio Society is conducting outdoor operations. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 22 May Morecambe Bay Amateur Radio Society is having a talk on GPS by Andrew. Contact Sheila, on 07867 516 836.

On Wednesday 23 May Denby Dale Radio Club is on the air from 1930 on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Thursday 24 May Ripon & District Amateur Radio Society is having a curry night. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 24 May Sheffield Amateur Radio Club is taking part in the RSGB 80m Contest CW from club station G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday 24 May South Manchester Radio and Computer Club is holding its AGM. Details from Ron, G3SVW, on 01619 693 999.

On Friday 25 May East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 25 May Tynemouth Amateur Radio Club is having a talk on digital photography by M6MPB. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 26 May Sheffield Amateur Radio Club is holding an open day in its new home for Friends of Parkwood and local residents. The proposed new club site will have a marquee with GX3RCM on air a static display of posters and photos plus amateur radio videos on a large TV screen. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 22 May Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 23 May Glenrothes & District Radio Club is having a presentation and demonstration by John, GM4AQO of simple to construct and operate aerials for VHF. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Wednesday 23 May Lothians Radio Society is having a DF Hunt with Peter Dick, GM4DTH. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 24 May Aberdeen Amateur Radio Society is holding a VHF fox hunt. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 24 May Paisley Amateur Radio Club is holding its AGM. Contact Bill Anderson, 2M0BZZ, on 01505 613 633.

On Sunday 27 May the Scottish Borders Repeater Group is holding its AGM at 2pm in the Focus Centre, Livingstone Place, Galashiels. Details are on the web at www.sbrg.co.uk.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Mid-Sussex Amateur Radio Society is visiting Aspidistra with Mike, G8KMP on Sunday 20 May. On Friday 25 May they are having a radio night and testing equipment for their NFD event. Details from Rob, 2E0RJA, on 01444 232 129.

Norfolk Amateur Radio Club Norfolk Repeater Group is holding its AGM and preparing for its next fox hunt on Wednesday 23 May. On Thursday they are taking part in the RSGB 80m Club Championship CW. Details from Chris Danby, G0DWV, on 01603 898 678.

Radio Society of Harrow is having a talk on Friday 25 May, then commencing its weekend F6KRK visit on Saturday 26 May. On Sunday 20 May they are operating GX3EFX/P at Old Redding. More information from Linda, G7RJL, on 02083 868 586.

Now we return to the traditional listing in date order. On Sunday 20 May Bedford and District Amateur Radio Club is visiting Dunstable Downs Boot Sale. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Sunday 20 May Bromley & District Amateur Radio Society continues its Intermediate course. Details from Andy, G4WGZ, on 01689 878 089.

On Monday 21 May Braintree & District Amateur Radio Society is holding its AGM. For more information contact John, M5AJB, on 01787 460 947.

On Monday 21 May Burnham Beeches Radio Club is having a talk on receiving amateur satellites by Dave, G8XCK. Contact Dave, G4XDU, on 01628 625 720. On Monday 21 May East Kent Radio Society is holding a committee meeting and natter night. Details from Karl Davies, M1DFM, on 01227 710 120.

On Tuesday 22 May Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 22 May Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 22 May Dorking & District Radio Society is having a talk on receiver noise reduction by Graham Somerville of bhi. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 22 May Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Wednesday 23 May Chesham & District Amateur Radio Society is on the air. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 23 May Darenth Valley Radio Society is having a talk on the RSGB by Keith Bird. Contatct Bob, M0RAW, on 01322 663 804.

On Wednesday 23 May Hastings Electronics and Radio Club is having a construction evening at the Taplin Centre. Details from Gordon, on 01424 431 909.

On Wednesday 23 May Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222 111.

On Wednesday 23 May Home Counties ATV Group is having an update on Suzy Radio by Dave, G8ADM and/or John, G8MNY. Contact Pete, G8FRC, on 01189 695 697.

On Wednesday 23 May Newbury & District Amateur Radio Society is holding its AGM. Contact Rob, G4LMW, on 01635 862 737.

On Thursday 24 May Echelford Amateur Radio Society is holding a Bring & Buy, natter night and CW practice. Contact John, G4GSC, on 01784 451 898.

On Thursday 24 May Edgware & District Radio Society is holding its Constructors Cup competition. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 24 May King's Lynn Amateur Radio Club is having a club night. Contact Ray, G3RSV, by email to ral- g3rsv@supanet.com.

On Thursday 24 May Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 24 May Reading & District Amateur Radio Club is having part 2 of the talk on automatic number plate recognition by Paul Palmer of Surrey Police. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 24 May Shefford & District Amateur Radio Society is having a talk by Roger Castle-Smith on the history of Foreign Office Overseas Broadcasting. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday 24 May Sutton & Cheam Radio Society is holding its AGM. Details from Darren, M0PRV, on 07525 753 702.

On Thursday 24 May Vange Amateur Radio Society is having a natter night. Details from Steve, G0KVZ, on 01268 552 606.

On Friday 25 May Cambridge & District Amateur Radio Club is having a talk on military equipment and green radio by John, M0JWS. Contact Ron, G3KBR, on 01223 501 712. On Friday 25 May Fort Purbrook Amateur Radio Club is having a presentation on propagation by John Noden, G8IOK. Details from Mick Ponsford, M0GWD, on 02392 366 699.

On Friday 25 May Itchen Valley Amateur Radio Club is holding a members forum on the club contests. Details from Liz, M0ACL, on 02380 254 599.

On Friday 25 May Wimbledon & District Amateur Radio Society is on the air. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday 26 May Loughton & Epping Forest Amateur Radio Society commences its field weekend. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Sunday 27 May Waterlooville Amateur Radio Club is having a chat night. Details from Rich, G4IBW, on 0772 225 002.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society is holding an HF net on 3.655MHz from 19:45 on Monday 21 May, then a 2m club net on 145.575MHz at 19:45 on Tuesday. Thursday 24 May sees the club 4m net on 70.425MHz at 19:00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Sunday 20 May Plymouth Radio Club is running a Worked All Britain special event station for the Olympic Torch relay from the Club House at the Cherry Tree Pub. Details from Rob James, 2E0ONO, via email to Robert- james@virginmedia.com.

On Monday 21 May Appledore & District Amateur Radio Club is having a talk on the David Rundle Trust by Deri Rundle. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Monday 21 May Weston Super Mare Radio Society is having a show & tell evening. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 23 May Thornbury & South Gloucestershire Amateur Radio Club is on the air for the Worked All Britain Olympic Torch relay event. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 24 May South Bristol Amateur Radio Club is holding a DX Challenge. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 24 May Swindon & District Amateur Radio Club is holding its AGM. Contact Den, M0ACM, on 07810 317 750.

NEWS FOR WALES On Monday 21 May Dragon Amateur Radio Club is planning for NFD and the Olympic Torch Worked All Britain event. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

Special event station PA300BPM

Posted: 20 May 2012 11:42 AM PDT
http://forums.qrz.com/showthread.php?346913-Special-event-station-PA300BPM&goto=newpost

This station PA300BPM is in honor of the 300th Buitensluisse Paarden Markt
(Horse fair) in Numansdorp June this year.

This station will be active from the 1th of June until the 28th of June
2012.

You may receive a special QSL card by the Dutch QSL Bureau (DQB) or by post
(direct).

Regarding direct QSL this will be answered direct if you add a SASE and 2 $
bills (greenstamps) otherwise it will be returned by the bureau if possible
to your country.

//
W7W QSL Info: February 25, 2012

Posted: 20 May 2012 11:19 AM PDT
http://forums.qrz.com/showthread.php?346909-W7W-QSL-Info-February-25-2012&goto=newpost

The Superstition ARC ran a special event on February 25, 2012, using the
call W7W, celebrating the Arizona Centennial and the Legend of the Lost
Dutchman from a museum near Apache Junction, AZ.

The QSL cards are designed and printed. At last. And I have answered all
the cards I found when they were turned over to me at the May meeting of
the club. Just in case some got lost somewhere along the way, please check
the club web site: http://wb7tjd.org/ Or look up WB7TJD on QRZ and check
out the bio there for the web address if it got tossed in this message.

I was of the understanding that we had more than seven cards in our PO box,
but seven was all I had to work with.

I have waived the April deadline where I asked for all cards to be received
in time for the April club meeting, and have asked that if your call is not
listed and you sent us a card, then to please resend a card and a return
envelope, and I will cover the postage.

Thank you for your patience.

This is for only a February 25, 2012 contact with W7W. Another local club ran another special event in the same month of February for Arizona's centennial, using the same call.

-- Larry, WB7C -- W7W

GB3MCB Beacons

Posted: 20 May 2012 02:27 AM PDT
http://forums.qrz.com/showthread.php?346848-GB3MCB-Beacons&goto=newpost

Once again, we are planning to undertake the work on the beacons Saturday 26th May 2012, therefore expect some disruption in service. As always we are at the mercy of the weather, so fingers crossed for fine weather and the new antanna's and feeders will be installed.

The following beacons are effected:

50 Mhz

70 Mhz

144 Mhz

432 Mhz

Yaesu's Latest Transceiver

Posted: 18 May 2012 10:53 PM PDT
http://forums.qrz.com/showthread.php?346730-Yaesu-s-Latest-Transceiver&goto=newpost

Yaesu's Latest and greatest for 2012

Visit us at the Fox Tango International FTdx3000 Users Group

http://groups.yahoo.com/group/Yaesu_...0_Users_Group/

FTdx3000 HF/50 MHz transceiver

Description: HF/50 Mhz 100 watt Transceiver Although the FTDX3000 has only one receiver, a high speed Spectrum Scope is

built into the radio. When in the Auto Mode, the Spectrum Scope display is updated in real time.

The Down conversion 9 MHz 1st IF frequency receiver construction, can realize narrow 300 Hz (optional), 600 Hz and 3 kHz bandwidth roofing filters. The 3.5-inch wide color LCD displays the operating information and the status of the transceiver functions, with high resolution (480 x 272 dots) on the screen. As of this date, May 19, 2012 the FT-DX3000 has NOT been approved by the FCC for

sale. Once the radio has received FCC approval and pricing has been announced,

you will be advised right here on the Fox Tango Users Group.

Thank you for your interest in the Yaesu Ftdx3000 and the Fox Tango Users group.

Regards

RAC Bulletin 2012-028E - 60 metre consultation - additional information*
2012-04-21

As you are aware, the consultation paper regarding the addition of 60m frequencies was gazetted this past Saturday. I wanted to ensure that the comment period timeline is clear as the wording on our website and that of the Canada Gazette are slightly different and can lead to confusion. We are working to have the text on both sites be identical, but we wanted to make sure that the actual comment deadline was clear.

To ensure consideration, parties should submit their comments no later than June 12, 2012.

It would be appreciated if you could please circulate this information to the amateur community.

For your reference, here is the consultation paper on our website. This would have the most accurate information.

# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
14 - 20 May 2012

Solar activity ranged from very low to moderate levels. Region 1476
(N09, L=180, class/area Fkc/1050 on 09 May) continued to be the
major contributor of x-ray flare activity throughout the week. It
produced 13 C-class flares and an M-flare. Region 1476 began the
week as an Fko type group with a beta-gamma configuration. As it
rotated off the west limb on 17 May, the region produced an M5/1f
flare at 17/0147 UTC. This event was accompanied by a 22 minute 10cm
Radio Burst (600 sfu) at 17/0142 UTC, Type II (645 km/s) and Type IV
radio sweeps, and a partial halo CME. The CME was first observed by
the SOHO/LASCO C3 spacecraft beginning at 17/0206 UTC with an
estimated plane-of-sky speed of approximately 1200 km/s. The
majority of the ejecta was directed off the west limb. Region 1476
continued to produce C-class flares as it rotated off the visible
disk on 18 May. A filament eruption produced a CME that was observed
in STEREO A COR 2 imagery (plane-of-sky speed approximately 482
km/s) beginning at 18/0709 UTC on 18 May. The ejecta was slightly
north of the ecliptic plane, however a glancing blow is possible
from that event.

A greater than 10 MeV and greater than 100 MeV proton event at
geosynchronous orbit was observed associated with the 17 May M5
flare. The greater than 10 MeV proton event began at 17/0210 UTC and
reached a peak flux of 255 pfu at 17/0430 UTC, ended at 18/1620UTC.
The greater than 10 MeV proton event crossed the 100 pfu threshold
(S2) at 17/0245 UTC and fell below 100 pfu at 17/0945 UTC. The
greater than 100 MeV proton event began at 17/0200 UTC and reached a
maximum of 20 pfu at 17/0230 UTC, ended at 17/1725 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate to high levels from 14 through 16 May. Moderate levels were
observed from 17 through 20 May.
```

Geomagnetic field activity ranged from quiet to active levels. Quiet levels were observed on 15, 17, and 19 May. Quiet to unsettled levels were observed on 14 and 18 May. Quiet to unsettled levels with isolated active periods were observed on 16 and 20 May. On 16 May, an extended period of the southward Bz component of the interplanetary magnetic field caused an isolated active level during the 16/2100 - 2400 UTC period. At approximately 20/0136 UTC, the ACE satellite ovserved an interplanetary shock passage with a corresponding weak sudden impulse observed in the Boulder magnetometer (15 nT) at 20/0215 UTC. The shock passage was likely associated with the 17 May CME. The geomagnetic field responded with an isolated active period during the 20/0300 - 0600 UTC period.

Forecast of Solar and Geomagnetic Activity
21 May - 16 June 2012

Solar activity is expected to be at very low to low levels with a slight chance for M-class flares through 31 May and again from 14 June through the end of the forecast period. Low to moderate levels are expected from 31 May through 13 June due to the return of old Region 1476.

A chance for a greater than 10 MeV proton event at geosynchronous orbit exists from 31 May through 13 June due to the return of old Region 1476.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal levels on 21 - 23 May, 30 May - 05 June, and again on 13 - 16 June. High levels are expected on 24 - 29 May and again on 06 - 12 June. High levels are in response to recurrent coronal hole high speed wind streams.

Geomagnetic field activity is expected to be quiet to active on 22 - 23 May as the arrival of the 18 May CME as well as a coronal hole high speed stream become geoeffective. Quiet to active conditions are also expected on 06 - 09 June as another recurrent coronal hole high speed stream moves into geoeffective position. Mostly quiet to unsettled conditons are expected for the remainder of the forecast period.

Amateur Radio Group Celebrates Anniversary:

Posted: 20 May 2012 07:04 PM PDT
http://www.eham.net/articles/28336

Most East Texans may not think much about the role amateur radio operators play -- or can play -- in their lives. But in the blink of an eye, when a natural or manmade emergency arises with the potential to send traditional lines of communication tumbling, ham radio operators provide vital links of communication, according to Gary Lewis, president of the Longview East Texas Amateur Radio Club. The group celebrated its 25th anniversary Saturday with an open house in newly renovated space on the second floor of the Longview Red Cross building.

//
Amateur Radio Emergency Group Volunteers Services:

Posted: 20 May 2012 07:02 PM PDT
http://www.eham.net/articles/28335

ST. GEORGE - The Washington County Commission approved a memorandum of understanding Tuesday with a group of amateur radio operators who are helping to ensure communications don't go down during a community-wide emergency. "At the Big Shakeout (statewide earthquake drill) that we had a few weeks ago ... one of the big things that came out when they had their meeting on what they learned was how important communications are going to be, should there be some kind of a disaster," said Norm Smith, the spokesman for the Washington County Amateur Radio Emergency Service. WCARES is a corps of trained amateur radio operators organized to assist emergency service providers when the fundamental communications systems society takes for granted aren't available because of power outages or other situations that may be incident to a large-scale disaster.

//
Blind Entrepreneur Rolls Out Radio Busin

Posted: 20 May 2012 06:59 PM PDT
http://www.eham.net/articles/28334

SAGLE -- On the phone, Dwain Miller's voice has all the resonance and distinctive character of a radio announcer. Not surprising, really, since he spent some time in the broadcast booth and on the air. These days, Miller's involvement in the radio world is focused on selling CB and

amateur "Ham" radio equipment and accessories. When potential customers call his home-based business, they get expert counsel -- with that broadcaster's voice at no extra charge -- from a man who can get them set up with the right kind of system or help them troubleshoot just about any kind of radio-related issue.

http://www.emelogger.com/uganda

6O, Somalia
Darko, J28AA/E70A, will be QRV as 6O3A from Hargesia again, between
May 25th and 31st. Activities will be on HF in SSB and RTTY, as well
as on 50 MHz. QSL via E77E or K2PF.
http://bhcc.ba/

6W, Senegal
Vlad, RK4FF, will take part as 6V7S in the SOAB category of the CQ WW
WPX CW Contest. QSL via Homecall.

6Y, Jamaica
Sergey, UT5UDX, starting May 30th, will be active as 6Y/UT5UDX. For
the CQWW WPX CW Contest, he will use the callsign 6Y3W. QSL via RA4LW.

A5, Bhutan
Zorro, JH1AJT (A5A, A51A), Ted, JJ1LIB (A52F), Aki, JA4EKO (A52GO),
Kazu, JH1OGX (A52KF) and Jon, KL2A (A52X), of the "Foundation for
Global Children" DX group will be QRV as A5A between May 24th and
June 6th. Planned activities are from 80 m - 6 m in SSB, CW, and

RTTY with 3 stations in parallel. They're hoping to provide many
DXers with this rare DXCC. QSL A5A via JH1AJT.
http://bhutan2012.com/

D2, Angola
Mike, UA1QV, is active on 20 m SSB as D3AA from near Lunda-Sul,
and plans to activate all bands including 160 m eventually.
There's currently no information about the intended duration of
his activities. QSL via Homecall.

EI, Ireland
The "South Eastern Amateur Radio Group" will be QRV during the "Geo
Parks Communication Weekend" (26th/27th of May) from the
"Tankardstown on the Copper Coast Geopark" using EI2GEO on the HF
bands. QSL via EI7IS.

G, England
Amateur radio stations from all over the world will exchange greetings
with GB6GEO on the "Geo Parks Communication Weekend". The station is
located at the "English Riviera Global Geopark" in Torquay and will
be active on 3.680 MHz, 7.080 MHz, 14.180 MHz, 21.180 MHz, and
28.180 MHz. QSL via bureau oder direct to G3VOF.

HB0, Liechtenstein
Johannes, DF5AU, will be active between May 21st and 27th from near
Triesenberg at 1250 m ASL as HB0/DF5AU. He will be active on the
HF bands in CW and SSB, with a focus on the highbands, where he uses
a 5-band Spiderbeam and a K3/Acom1000. QSL via Homecall, LoTW.

I, Italy
Ivo, E73A/9A3A will take part in the CQWW WPX CW Contest as 4U1GSC
from the "United Nations Global Service Center" in Brindisi, in the
SOAB HP category. QSL via 9A2AA.

JT, Mongolia
Mike, UA4NW, was heard as JT5NM on 20 m and 15 m in CW.
There's currently no information about the intended duration of
his activities. QSL via Homecall, direct only.

KH2, Guam
David, N2NL, will activate the callsign NH2T from Guam (OC-026,
USi GU003S, WFF KFF-110, WLOTA 0064) in the CQ WW WPX CW Contest
in the SOABHP category. QSL via W2YC, direct only, LoTW.

KH8, American Samoa
Yuri, N3QQ and Dick, N7RO are planning to be on the air from
Pago Pago on Tutuila (OC-045, USi AS007S, WLOTA 4385) for a week in
late May / early June. Activity will be limited to their free time,
using the call sign KH8/KL7RRC on 10 - 40 m.
During their stay they will explore the feasibility of an activation
of Rose Atoll (OC-190, USi AS004S), which could take place in
December / January. They're still looking for operators interested
in taking part in the Rose Atoll DXpedition; please contact N3QQ.

QSL via N7RO.

KP2, US Virgin Islands
Phil, KT3Y, Fred, K9VV, and Tine, S50A, will take part in the CQWW WPX CW Contest as KP2M from the Radio Reef Contest Station on St. Croix (NA-106, USi VI002S, WLOTA 2477, St. Croix County), most likely in the Multi-Single category. QSL via LoTW. http://www.radioreef.com

Yuriy, N2TTA, will take part in the same contest with the callsign KP2MM, two more dashes, as SOAB-LP. QSL via LoTW. http://www.n2tta.info

LX, Luxemburg
A team will activate LX7I in the CQ WW WPX CW Contest in the M/S category. QSL via LX2A. http://www.lx2a.com/

P4, Aruba
Andrew, AE6Y, will be P49Y in the CQWW WPX CW Contest, from Pos Chiquito on Aruba (SA-036, WLOTA 0033, WW Loc. FK52al). Operation will be in the SOAB HP category. QSL via AE6Y, LoTW.

PZ, Surinam
Serge, RX3APM, will be PZ5P once again, between May 24th and 29th, including a participation in the CQWW WPX CW contest. QSL via UA4LU, LoTW.

SP, Poland
The special station HF2012FLO will be on the air to celebrate the "Air Festival" in Ostrow until May 28th. QSL via SP3POW.

ST, Sudan
Robert, S53R, will be QRV from Sudan as ST2AR in the CQWW WPX CW Contest. QSL via Homecall, LoTW.

SV9, Crete
Alex, SQ9UM, is currently active as SV9/SQ9UM from Crete. His activity is focused on CW and RTTY. He'll take part in the CQWW WPX CW Contest in the SOABLP category and operate until May 28th. QSL via Homecall.

TA, Turkey
Dmitry, R3GM, will be TC7C in the CQ WW WPX CW Contest, SOAB. QSL via RA1QQ.

V2, Antigua
Darrell, AB2E, will sign V26E from Antigua (NA-100, WLOTA 1118, WW Loc. FK97bc) starting May 23rd. He plans to take part in the CQWW WPX CW Contest in the SOABLP category, where he placed 2nd world wide and #1 North America last year. Before and after the contest he will be looking for QSOs on the WARC and lowbands. For the first time, activities in RTTY are planned. He's QRV until May 30th. QSL via Homecall, direct only, LoTW.

V3, Belize
Colin, KU5B, will be QRV as V31UB once again between May 23rd and

29th from Belize. Activities are planned on all bands from 160 to
6 m in CW, SSB and RTTY, including an all-band effort in the CQWW
WPX CW Contest. QSL via Homecall, direct only, LoTW.
http://ku5b.com/

V6, Micronesia
Sho, JA7HMZ and Akio, JA7ZP will work as V63DX and V63ZP respectively
from Pohnpei island (OC-010, WW Loc. QJ96) from May 25th to 29th.
They will be QRV from 40 m to 6 m in all modes and take part in the
CQWW WPX CW Contest as V6A. QSLs V63DX and V6A via JA7HMZ,
V63ZP via JA7ZP, both direct only.

VK9L, Lord Howe Island
Pat, VK2PN, and Miro, OK1NG, will, between May 23rd and 30th, activate
Lord Howe Island (OC-004) as VK9PN. Chris, VK3FY will join the team
for the CQWW WPX CW Contest. Chris is visiting the island for work
reasons between May 27th and June 2nd, therefore he can only spend
time on the air in the evenings. After the contest he plans to be
active as VK9LHI on the HF bands in CW, SSB and a little RTTY.
QSL via VK3HF. http://www.southpacificcontestclub.com/

VP5, Turks and Caicos
JH1BXH and JA1EAX will continue their activity until May 24th with
VP5/ prefixes, from 80 - 6 m in CW and SSB. QSLs via JH1BXH.

W, USA
The "San Francisco Amateur Radio Club" (W6PW) will, in cooperation
with the "California Historical Society" celebrate the 75th
anniversary of the Golden Gate Bridge from May 26th to 27th.
The special callsign W6G will be activated in SSB and CW on 28375,
24975, 21275, 18125, 14275, 7175 and 3750 kHz. An award will
be issued for 5-band-QSOs. QSL and award via KM6DA.

VU, India
Until July 8th, Taj, VU2DJ, Sabu, VU2ELJ, Sree, VU2OB, Prabin,
VU2POL, Peeter, VU2PJP, Murali, VU2FWW, Thomas, VU2VJT, Sunil,
VU2ATB, Ashraf, VU3MTY, Mujeeb, VU3WII and Sanal, VU3SIO, will
activate the special call sign 8T1M from 160 - 2 Meter in CW, SSB,
PSK, RTTY, FM and D-STAR. QSL via VU2MLQ.
http://www.malabarradiohams.org/

XE, Mexico
XF3LH is the callsign of PT2OP, XF3PAS and XE3N. They are active
until May 24th Cozumel island (NA-090) from 80 - 10 m.
QSL via PT2OP.

YA, Afghanistan
Eric, T6MO, will take part in the CQ WW WPX CW Contest in the
SOAB-LP category. He's active on 40, 20, 15 and 10 m only with
an OCF dipole at 12 m AGL and 100W. QSL via K9GY. (B)

YB, Indonesia
YB0AKM, YB0ECT, YB0JS, YB0KVN, YB0AZ, YC0KVM, YC0TSU, YC0MXV, YC1LLY,

YC0VKI, YB1CCF, YD1JZ, YB1KAR, YC1KAF and YD1GCL, will use the call YE0X for the CQ WW WPX CW Contest in the M/2 category. QSL via YB0ZZ.

Announced:
A DXpedition to Heard Island was announced for early 2014.
Stay tuned: http://www.heardisland.org/ http://www.cordell.org/

Intruder watch
---
by Ulrich Bihlmayer, DJ9KR of the DARC intruder watch.

Chinese OTHR (over the horizon radaes) and Codar Sea radars are ubiquitously found on the 40m band in great quantities, disturbing radio amateurs mostly in IARU Region 3 and on the US West coast. At times, as much as half of the spectrum of the 40m band is covered by interference of radars and thus unusable for radio amateurs in those regions. In Germany those interferers are mostly not audible. A Codar (sea radar), most likely located in Indonesia, was observed over the last weeks between 14070 and 14125 kHz, audible in Germany after 15 UTC. It has been reported to the German BNetzA and the Swiss BAKOM. The bands between 17 m and 10 m are often suffering from strong interference from OTHRs from Turkey and the Royal Air Force from Cyprus. 15 m in particular is covered by strong radar interference for hours every day, sometimes both OTHRs are active at the same time. The intruder watch received 104 reports for unknown radars on 15 m, 61 on 10 m. Due to improved sporadic E conditions on 10 m, the number of reported intruders increased significantly. Intruders which may have been active for years already now became audible on a regular basis: Taxis from Russia, Ukraine, Belarus, Tajikistan and Usbekistan on FM in Russian language, and radio pirates from many different countries can be observed in AM, FM and SSB. An Intruder Watch meeting takes place on June 23rd at 10am on this year's Ham Radio in Friedrichshafen (meeting room "Schweiz"). Guest speaker Peter Jost, HB9CET of the Swiss intruder watch will talk about "Digital Intruders on our bands - from freeware to high-tech".

Satellite reports wanted

Radio amateurs are asked to listen to the telemetry transmissions in Morse code and AX.25 of the Japanese research satellite HORYU-2 (JG6YBW) on 437.375 MHz. All reports are appreciated.
Software and details: http://kitsat.ele.kyutech.ac.jp/index_e_new.html

Hall of Fame

This year, George Badger, W6TC, Bill Brown, WB8ELK, Robert Brown, NM7M (sk), Evelyn Gauzens, W4WYR, Richard Garriott, W5WKQ, William W. Hansen (no call, sk), Richard Kirby, ex-W0LCT/HB9BOA (sk), Fred Maya, W5YI (sk), Steve Mendelsohn, W2ML, Larry Mulvehill, WB2ZPI, Rowley Shears, G8KW (sk), Mike Staal, K6MYC, Frederick Terman, ex-6FT, W6AE, W6XH, (sk), Patrick Tice, WA0TDA, Louis Varney, G5RV (sk), and William A. Wilson, K6ARO (sk), were introduced into the

CQ Hall of Fame. The new members of the CQ Contest Hall of Fame
are Jim Reisert, AD1C and Lothar Wilke, DL3TD (sk), the CQ DX Hall
of Fame now includes Don Chesser, W4KVX (sk), Glenn Johnson, W0GJ,
and Carl Smith, N4AA.

Queen's Diamond Jubilee Special Prefixes List

Alan, 5B4AHJ compiled a comprehensive list of stations with
2Q, GQ and MQ prefixes operating outside of England.
http://www.clublog.org/docs/dashboard.action

OPs wanted

Derek, G3KHZ, and Hans, SM6CVX, are planning their 7th DX-Pedition
to P29. They are looking for operators who are interested in
joining them for three weeks in October. If you are interested,
please get in touch with G3KHZ.

SILENT KEY

The former ARRL Vice director of the Atlantic Division, James
M. Mozley, W2BCH, passed away on May 13th, aged 89.
Our condolences to his family and friends. We don't want to be sad
that we lost him; we want to be thankful that we had him as a friend.
We will always remember him.

Upcoming Contests

26.5. Rheinland-Pfalz-Aktivitaetsabend
26./27.5. CQ WW WPX Contest
26./27.5. Bayerischer Bergtag

Krasimir, LZ1GL, informs about the LZ Open and the LZ Open SES
(Simulated Emergency Situation) contests:
http://www.lzopen.com
http://www.lzopen.com/lzopenfield20/index.htm

IOTA: Compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:

AF-004; EA8; Canary Islands: EE8X is the callsign of Luis/EA8AY in the
CQWW WPX CW (SOAB). His QTH is Santa Cruz, Teneriffa (DIE
S-012, WLOTA 1276, EAA TF). QSL direct via W2GR.
More information: http://www.ea8ay.com/ef8x/

EU-001; SV5; Dodecanese: From May 23 to 28, Jeff/N6GQ is QRV from
Rhode (GIOTA DKS-006, MIA MGD-028, WLOTA 0045) as SV5/N6GQ.
He'll take part in the CQWW WPX CW as SOAB-QRP.
QSL only direct via N6GQ.

EU-001; SV5; Dodecanese: From Kos island (GIOTA DKS-043, MIA
MGD-016, WLOTA 1730; LOC KM36OV), Bob/OK2BOB, Vilda/OK2BC

and Jindra/OK1AMM will sign SV5/homecall between May 22nd
and June 1st. They are QRV from on all bands including 6 m
mostly in CW with a little SSB. QSL via Homecall (d/B)

EU-013; GJ/MJ; Jersey: CQWW WPX CW will also see Kazu/JK3GAD active as
MJ0CFW. He's QRV from the S/W coast of the island (WLOTA
0818, WW Loc. IN89ve) in der SOAB-LP category. QSL via LoTW
or direct via M0CFW.

EU-023; 9H; Malta group: Zoli/HA5PP will be QRV in the CQWW WPX CW from
Qawra (MIA MM-001, WLOTA 1113, LOC JM75fw) as 9H3PP either on 10 m
or on 15 m in the SOSB category. After the contest he's planning
activities on 6 m and 12 m. QSL via HA5PP (d/B)

EU-049; SV; North Aegean Islands &
EU-052; SV; Ipeiros / Dytiki Elass Region group: After the CQWW WPX CW,
Jeff/N6GQ will visit some islands of EU-049 and EU-052, between
May 28th and June 17th. In "holiday style", he will be on the air
as SV8/N6GQ on the HF bands. QSL only direct via N6GQ.

EU-084; SM5/SM0; Uppsala / Stockholm County group: The first activation
of Rindo island will take place on May 26th by 8S0DAY. They will
be on the air from a former military fortress which was built between
1853 and 1863. QSL via SM0MPV (d/B). More at: http://www.sk0mt.net

EU-095; F; Provence-Cote D'Azur (Bouches-du-Rhone) Region group: Members
of the Castres DX Gang will be QRV as TM5FI from Ratonneau island
(DIFM ME003, MIA MF-024) from May 23rd till 30th. QSL via F5XX (d/B)

EU-125; OZ; Jylland West group: The team of OZ1RDP will visit the
scout camp in Kongsmark/Roemoe (DIA NS-001; OZFF-004) from May 25th
through 29th. They will work on 80 - 20 m in SSB, possibly some 160 m.
QSL via DL9BCP (d/B)

EU-145; CT; Algarve Province group: CT1EPV, CT1GFK, CT1GPQ, CT1IUA and
CT3FN take part in the CQWW WPX CW as CS2W from Culatra (WLOTA 0144).
QSL via HB9CRV, LoTW.

EU-174; SV; Makedonia / Thraki Region group: Samothraki island
(GIOTA NAS-032, MIA MG-100, WLOTA 4166) will be activated by
Boyko/LZ1QN, using his contest call SW8A, in the CQWW WPX CW.
QSL via LZ1QN (d/B)

EU-174; SV; Makedonia / Thraki Region group: From May 24th to June 3rd,
Laci/HA0HW is QRV from Thassos island (GIOTA NAS-037, MIA MG-124,
WLOTA LH-4186, LOC KN20hs) as SV8/HA0HW. His favorite mode is CW, but
he'll also work some QSOs in SSB, RTTY and PSK31.
With a FT840/IC-706, a 300W PA and GPs / Dipoles he'll be QRV on
40/30/20/17/6m. In the CQWW WPX CW he will sign as J48HW in the
SOABHP category. QSL via HA0HW (d/B)

NA-018; OX; Greenland: Henning/OZ1BII will activate XP2I in the CQWW WPX
CW at the QTH of Jesper/OX3KQ in Kangerlussuag/Groenland (WFF OZFF-006,

WLOTA 0072, LOC GP47pa), using low power on all bands.
QSL via OZ1BII (d/B) http://www.oz1bii.dk/qsl-info.htm

NA-090; XE3; Quintana Roo State Centre group: From May 22nd to 24th,
PT2OP, XF3PAS and XE3N will activate the Cozumel island group (Island
of Swallows; WLOTA 1905) as XF3LH. QSL via PT2OP (d/B)

US-Island - FL479S: On May 26th/27th the Jupiter Tequesta Repeater
Group plans to be active from Peanut island (FL479S) as W4JUP.
Primary frequencies: Phone (+/-) 3.830, 7.180, 14.240, 18.130,
21.280, 28.400. PSK31 - 3.582.70, 7.037.70, 10.142.70, 14.072.70,
18.102.70, 21.072.70, 28.122.70. QSL via W4JUP (d/B)

Lighthouse activities

6Y3W LH 0214 26.05. - 27.05.
KP2M LH 2477 26.05. - 27.05.
KP2MM LH 2477 26.05. - 27.05.
KP2/K9VV LH 2477 23.05. - 29.05.
KP2/KT3Y LH 2477 23.05. - 29.05.
KP2/S50A LH 2477 23.05. - 29.05.
NH2T LH 0064 26.05. - 27.05.
P40H LH 0033 26.05. - 27.05.
P49Y LH 0033 26.05. - 27.05.
V26E LH 1118 23.05. - 30.05.
YE0X LH 1660 26.05. - 27.05.

WFF activities

YOFF: Members of the "Radioclub QSO Banat" (YO2KQT) will, from May
25th to 27th (during the 3rd Hercules Marathon) activate YP0WFF
from Domogled-Valea Cerne (YOFF-008). QSL only direct via YO2KQT.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

791. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2012-05-22 06:05:01 UTC
From: rram@panix.com

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

75th Anniversary of the Golden Gate Bridge

Posted: 21 May 2012 09:01 PM PDT
http://forums.qrz.com/showthread.php?347115-75th-Anniversary-of-the-Golden-Gate-Bridge&goto=newpost

N6G, Special Event station, celebrating the 75th Anniversary of the opening of the Golden Gate Bridge.

Event Details: May 26, 27 2012, 00:00 - 23:59, or later if needed. Phone only. Frequencies of 21.265, 14.265 and 7.265 +/- QRM. (Also possibly 10 and 80 meters added) QSL direct via AE6YB.

The Golden Gate Bridge is one of the most internationally recognized symbols of San Francisco, California, and of the United States. Construction began on January 5, 1933 and the project cost more than $35 million. When completed in 1937, the Golden Gate Bridge had the longest suspension bridge main span in the world, at 4,200 feet (1,280.2 m). The total length of the Golden Gate Bridge, including approaches from abutment to abutment, is 8,981 feet (2,737 m). At 692 feet (211m) (above water), the Golden Gate Bridge also had the world's tallest suspension towers when built. The color of the bridge is officially an orange vermillion called international orange.

Hope to hear you on the air for our Special Event!

73,

Will, AE6YB

'Promote Use of Amateur Radios in Rescues':

Posted: 21 May 2012 05:23 PM PDT
http://www.eham.net/articles/28337

KUALA LUMPUR: Amateur radios could be the key to communicate with people in distress and, therefore, collaboration between government agencies and amateur radio users should be intensified. Information Department director-general Ibrahim Abd Rahman said integration between the two should be encouraged as it helped the agencies to build good rapport and teamwork spirit. He said agencies like the Fire and Rescue Department, Civil Defence Department (JPA3), police, Malaysian Red Crescent Society (MRCS), hospitals, Royal Malaysian Air Force and the Department of Civil Aviation should work together with amateur radio users. "Working together will ensure search and rescue (SAR) missions are carried out more efficiently and professionally," he said at the opening of Hamfest Malaysia 2012, while representing deputy Information, Communications and Culture Minister Datuk Maglin Dennis D'Cruz.

798. The ARRL Contest Update for May 23, 2012

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

May 23, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Dot Dash Disportation - CQ WPX CW
- Lunaphilic Loquaciousness - Worldwide EME Contest
- New Call Sign Compendia
- Two Views of Wireless History
- Friendship 7 - One Half-Century Ago
- Meet the New Results Authors
- iFixit - No, Really!
- World of Webinars
- A Happy Blur

NEW HF OPERATORS - THINGS TO DO

The CW weekend of the CQ WPX (Worked PrefiX) Contest will be held in
what looks to be good late-spring conditions - keep your fingers
crossed and the prefix table handy! Digifest is a relatively new
contest that exercises the growing number of digital modes in a single
contest. It also calculates contact point value according to the
distance between stations.

BULLETINS

Dayton contest festivity-goers, Contest University attendees, and those
who watched at home will be sad to learn that the guy who made the
Internet audio-video feeds sing - Tom Samacicio KB4HQA - was in a
serious automobile accident on his way home from the Hamvention and
suffered significant injuries. Cards to Tom's home address (3740 Wake
Robin Way, Cumming, GA 30040) or email <kb4hqa@hqaradio.com> messages
are welcome. Your editor and members of the Spurious Emissions band in
particular wish him a speedy recovery along with the readership of the
Contest Update. Online posting of the Dayton contest activity videos
are a far lower priority than Tom's recovery. (Thanks, Tim K3LR)

The weekly SNS and NS CW Sprints <http://www.ncccsprint.com/rules.html>
are now preceded by a short RTTY sprint, as well! (Thanks, Ed W0YK)
```

BUSTED QSOS

Penalty points have been taken from your editor's score for the typo changing SM3EVR's call sign to SM5EVR - Sorry, Tord! (Thanks, Trey N5KO and Glenn K6NA) And the photos of WG0AT's operations should be credited to WG0AT. (Thanks, John AE5X)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

May 26-27

- Worldwide EME Contest
- CQ WW WPX Contest--CW
- QRP ARCI Hootowl Sprint--CW (May 28)
- MI QRP Memorial Day CW Sprint

Jun 2-3

- Ten-Ten Open Season--Digital
- Digifest--Digital
- LZ Open 20 Meter Contest--CW
- Maritime (Canadian) QSO Party
- SEANET Contest
- UKSMG Sporadic E Contest
- IARU Region I Field Day--CW
- Alabama QSO Party
- DARC 10 Meter Digital Contest
- OK1WC Memorial Contest (Jun 4)
- ARS Spartan Sprint--CW (Jun 5)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

New releases of the HF Super Check Partial <http://www.supercheckpartial.com> (SCP) and the VHF Super Check Partial and Prefill <http://www.k3lr.com/w9zrx/> database files are now available. From the HF release notes we learn that the file is based on more than 40,000 calls and for the RTTY file, just over 11,000 calls. That's a lot of active stations! To check the version of the HF SCP files you are using, look for a call beginning with "VER". Every SCP file includes the version number in the list of calls as "VERYYYYMMDD". On the VHF side, the release version number is 20120513_00. Only 2011 plus Jan 2012 Logs were used in building the 2012 release of the VHF file. For either HF or VHF, W9ZRX notes, "...these files are intended for use ONLY as an OPERATING AID. Their availability does not mitigate the responsibility of the user to COPY and ENTER the exchange given to them during a contest." Even with computing power applied, the contest remains a test of operator skill! (Thanks, Bob WA1Z and Dave W9ZRX)

WRTC2014, Inc. has announced that a draft of the competition rules <http://www.wrtc2014.org/contest/wrtc-rules/> has been made available for review. These are the rules that will be followed by the onsite competitors. There will be a 30-day open review period. Comments,

suggestions, and corrections are welcome during the comment period and should be sent by email <rules@wrtc2014.org>. The comment period will close on June 18, 2012 and the final rules will be released before July 1, 2012. The rules are very similar to those used at WRTC 2010 in Russia. The most significant change is to rule 16.2.4 that allows both radios to transmit at any time. (Thanks, Andy N2NT)

Kenwood has released a new HF transceiver, the TS-990S. Roving Contest Update reporter Bob N6TV took the photo at right and observed, "The 57-pound TS-990S was displayed under glass with the rear panel completely covered so it is still quite the mystery box. The sub-receiver performance is claimed to be equivalent to a TS-590S." Bob was not sure whether it would support phase lock between the two receivers for true diversity reception. Bob also asked about including a waterfall display as part of the spectrum display like the Elecraft P3 but no news will be available until the Friedrichshafen hamfest. The price is in the $5,000 to $10,000 range and the radio is expected to be available by November.

The 2012 inductees to the CQ Contest Hall of Fame were celebrated at the Dayton Contest Dinner. The first was Lothar Wilke, DL3TD (SK), a leading contester and promoter of contesting in Germany. Under his leadership, DA0HQ won the IARU World Championship 11 times. It was good to see a number of German hams there to honor his memory and the full ceremony will take place at the Friedrichshafen hamfest <http://www.hamradio-friedrichshafen.de/>. The second inductee was on-hand to receive his honor -- Jim Reisert, AD1C - he maintains and constantly updates the CTY country and prefix files on which all of us depend for proper operation of our logging software. Jim is also an active contester with a lot of top scores under his belt. In addition, Gail Sheehan, K2RED, Managing Editor for CQ magazine also received an award of recognition for her 30 years of service to the CQ WW and WPX Contest Managers and the contest community.

On this anniversary of the Joplin tornado, it is a good idea to remind US hams to have the NOAA/NWS weather station frequencies programmed into their handheld VHF radio memories.
162.400/425/450/475/500/525/550 MHz
Your editor has them programmed into the "top" seven channels - meaning the memories with the highest numbers. With the "usual" channels (favorite repeaters, simplex frequencies, etc) beginning at memory 1, the WX channels are never more than a few clicks away. This can be very handy when the clouds roll in.

Web Site of the Week - Dave W6NL turned up a great website "QSL Cards from the Past <http://oldqslcards.com/>" by W8JYZ featuring many old QSL cards, including many of famous hams, such as a 1929 card from David Packard 9DRV <oldqslcards.com/9DRV.pdf> before he founded Hewlett-Packard. Dave also recommends "The History of Wireless: How Creative Minds Produced Technology for the Masses <http://www.amazon.com/dp/0980038308/amateurradio-20>" by Ira Brodsky.

The book begins with critical elements of research by scientists like Volta and Hertz, moving along through subsequent developments right up to the present day - and beyond.

==> WORD TO THE WISE

Contest University Glossary - Pat N9RV did a lot of leg work and created an extensive glossary of all the contest jargon we take for granted. Presented to the Contest University <http://contestuniversity.com> students at the Dayton Hamvention, you too can use it as soon as it is posted on the ARRL Contest website <http://www.arrl.org/contest-glossary>.

==> SIGHTS AND SOUNDS

>From AMSAT <http://www.amsat.org> bulletin ANS-141, "51 years ago on May 5, 1961, NASA launched the Mercury-Redstone 3 rocket carrying Alan B. Shepard, Jr. aboard the Freedom 7 capsule. Shepard successfully became America's first man in space, making a brief but historic suborbital test flight that propelled American astronauts into the space race of the 1960s. NASA has compiled a video <http://www.universetoday.com/95016/the-view-from-freedom-7/> from from photographs taken by a film camera mounted to the Freedom 7 spacecraft. Compare the view in 1961 with the latest generation of space video we routinely receive from the ISS!

The "falling derrick" technique of raising medium and small towers seems to be catching on as in this YouTube video <http://www.youtube.com/watch?v=F_oYsijKlSg>. I'm not sure the human counterweight is a very good idea but the video does illustrate the idea pretty well. (Thanks, Steve N2IC)

If you had a good time at the Dayton Hamvention, you might also enjoy the latest music video <http://www.youtube.com/watch?v=6RzD7N-5zJI&feature=share> from Andrew and Lissa of the Ham Band. In fact, there seem to be three Lissas in this one! Bela Fleck of banjo fame is featured, too. (Thanks, Doug K1DG)

Wouldn't this <http://www.instructables.com/id/Gas-powered-pencil-sharpener-for-students-that-sp/>have been just the thing for a pre-computer logging multi-multi or maybe your next Field Day operation?

==> RESULTS AND RECORDS

Great contest result writeups from two new authors will be on-line <http://www.arrl.org/results-records-and-awards> by the end of this week for the 2011 ARRL 10 Meter Contest (Scott K7ZO) and the 2012 January VHF Sweepstakes (Kevin W9GKA). Featuring a lot of graphics and in-depth analysis, you'll definitely want to read these. The 6 meter "play-by-play" maps developed by John K9JK will really whet your appetite for the upcoming ARRL June VHF QSO Party. Ken WM5R has also

updated the 10 Meter Contest records which have a lot of new call signs! Section records for the September VHF QSO Party have been updated to 2011. Comments and corrections are welcome (although we already know about a minor problem with the million-plus scores in the Multi-Op table). (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The results of last year's CQ-M contest <http://www.srr.ru/CONTEST/cqm_2011_res.php> are now available online. You'll find the rules there, too. (Thanks, Henk PA5KT)

The Kansas City DX Club hosted the annual CW Pileup Contest <http://www.srr.ru/CONTEST/cqm_2011_res.php> at the Dayton Hamvention again this year. For the past couple of years Chuck NO5W's "horse race" display of real-time action (seen at right) has drawn lots of viewers and 2012 was no different. The winner was Dave K5GN with 76 calls out of the possible 100 - a very high score, indeed! Dave last won the contest during his last visit to the KCDXC hospitality suite - 30 years ago! First prize was a Yaesu FT-450 - we think Dave will come back next year to defend his title.

Kevin W9GKA writes, "Congratulations to Zack W9SZ for being awarded the 2012 June gavel last night at the Society of Midwest Contesters <http://www.w9smc.com/> hospitality suite in Dayton ! Zack has done a great job over the years at activating everything up through 24 GHz and most of the time in portable conditions with only a few watts and using equipment he scratch built."

OPERATING TIP

Study propagation for the summer contests - it's changing rapidly. Propagation for the end-of-May WPX CW contest is very different than for the end-of-March WPX SSB contest. Adjust your strategy or pick your categories accordingly!

==> TECHNICAL TOPICS AND INFORMATION

Steven K9IER writes, "For years, I've enjoyed reading iFixit without ever thinking about its applicability to our needs, especially a new ham wanting to build stuff and needing electronic skills <http://www.ifixit.com/Guide/Electronics-Skills-101/6190/1>. In addition, they offer a supply of tools and things that support the interests of a repair person or just any curious ham."

The slim new book, "The ABCs of Software Defined Radio <http://www.arrl.org/shop/The-ABCs-of-Software-Defined-Radio/>" by Martin Ewing, AA6E is an excellent introduction to the practical characteristics and use of SDRs. Avoiding the usual math-heavy treatments of SDR and DSP, the book includes a few block diagrams but focuses on what SDR does and how it affects operating. With nearly every new radio incorporating digital technology to greater and greater extents, this is a good first read to start you down the on-ramp to the SDR highway.

Two recent articles on the Electronic Design web site make good
reference reading. The first explains the difference between voltage
feedback and current feedback op amps
<http://electronicdesign.com/print/power/whats-difference-voltagefeedback-currentfeedback-op-amps-73839>.
A second goes through all of the new (and old) amplifier operating
classes
<http://electronicdesign.com/print/analog-and-mixed-signal/understanding-amplifier-operating-classes-73619>,
explaining the differences.

Jim K9YC has discovered a line-loss modeling program called SimSmith
<http://www.ae6ty.com/Smith_Charts.html>, a Java application written by
Ward AE6TY with documentation available from the program's website. One
application is translating impedance measured at the shack end of a
feed line to impedance at the antenna. The resulting SWR data can then
be used to design matching networks, for example.

Technical Web Site of the Week - Microwave Journal
<http://www.microwavejournal.com> offers a number of live and archived
webinars in association with Besser and Associates. The most recent
entry is Mixers and Frequency Conversion
<https://mwjournalevents.webex.com/mw0307l/mywebex/default.do?nomenu=true&siteurl=mwjournalevents&service=6&rnd=0.8198823829641093&main_url=https%3A%2F%2Fmwjournalevents.webex.com%2Fec0606l%2Feventcenter%2Fevent%2FeventAction.do%3FtheAction%3Ddetail%26confV>
and an extensive archive of previous material is available from the
Events page.

==> CONVERSATION

A Happy Blur

The Dayton Hamvention generally goes like this for me:

- Step One - preparation
- Step Two - panic as preparation falls behind
- Step Three - leave for Dayton anyway
- Step Four - engage in several days of high-bandwidth hamming
- Step Five - drive home wondering "What just happened?"

This year was no different. There is so much to see and so many
friends to greet that you just have to forget about doing it "all". I'm
not even sure anyone knows what "all" is, anyway! Sometimes I feel like
a dog with its head outside the car, ears flapping in the wind, happily
barking at anything and everything - "Hey! Hey! Hey!" (as well as
asking, "You gonna eat that?")

I really enjoy the Visalia International DX Convention, too - it's like
Sweepstakes in that you can find and work every multiplier - but the
Dayton Hamvention is like the CQ World Wide. There's no way you'll even
hear every mult, much less work them! If you go, be prepared to come
back having left more than a few things undone and faces unseen.

Just wandering around listening to the sounds was very cool - over here was the chatter of antique telegraph sounders. Around the corner was the busy stitching at one of the several embroidery booths as another call sign went on another new baseball cap. Audio Alley sported lots to listen to - every time I went by one of the Ham Nation <twit.tv/hn> hosts was busy giving an interview or telling a story. Radio noise and conversations were everywhere. It is possibly the one place left on Earth where conversations on handhelds outnumber those on mobile phones.

And thanks to the Dayton Hamvention committee, led by Mike Kalter W8CI, for a lot of hard work that paid off over the weekend. The weather could not have been better and attendance seemed to be very good with a big Friday turnout, especially. Putting on such a big show is a lot of work and takes a lot of time that might be put to other uses, such as ham radio operating. We appreciate it!

I'll be posting photos from Dayton throughout the next couple of issues - some of people, some of gear - it was all good. Support your local hamfest(s) this year - you won't regret it. Maybe even serve on the planning committee or volunteer your time at an information booth or in the parking lot. And do put Dayton on your "bucket list" if you haven't been there yet.

73, Ward N0AX

==> CONTESTS

23 May through 5 June 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CQ WW WPX Contest--CW, from May 26, 0000Z to May 27, 2400Z. Bands (MHz): 1.8-28. Exchange: RST and serial. Logs due: Jun 20. Rules <http://www.cqwpx.com>

QRP ARCI Hootowl Sprint--CW, from May 27, 8 PM to May 27, Midnight. Bands (MHz): 3.5-28. Exchange: RST, S/P/C QRP number or power. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

MI QRP Memorial Day CW Sprint--CW, from May 28, 2300Z to May 29, 0300Z. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, MI QRP number or power. Logs due: 30 days. Rules <http://www.miqrp.org>

Ten-Ten Open Season--Digital, from Jun 2, 0000Z to Jun 3, 2400Z. Bands (MHz): 28. Exchange: Call, name, S/P/C, member numbers. Logs due: 15 days. Rules <http://www.ten-ten.org>

Digifest--Digital, from Jun 2, 0400Z to see website. Multiple operating periods. Bands (MHz): 3.5-28. Exchange: RST and grid square. Logs due:

7 days. Rules <http://www.mixw.net/misc/DigiFest/index.html>

LZ Open 20 Meter Contest--CW, from Jun 2, 1100Z to Jun 2, 1500Z. Bands (MHz): 14. Exchange: 6-digit serial and serial from previous QSO. Logs due: 10 days. Rules <http://www.lzopen.com>

Maritime (Canadian) QSO Party--Phone,CW, from Jun 2, 1200Z to Jun 3, 0300Z. Bands (MHz): 1.8-28, 50,144, Frequencies: 25 to 50 kHz from band edge. Exchange: Maritime county or S/P/C. Logs due: 1 month. Rules <http://www.maritimecontestclub.com>

SEANET Contest--Phone,CW,Digital, from Jun 2, 1200Z to Jun 3, 1200Z. Bands (MHz): 3.5-28. Frequencies: CW--3.525, 7.025, 14.025, 21.025, 28.025, SSB--3.540/3.790, 7.090, 14.320, 21.320, 28.320. Exchange: RS(T), serial. Logs due: Jul 31. Rules <http://2012sea.net>

IARU Region I Field Day--CW, from Jun 2, 1500Z to Jun 3, 1459Z. Bands (MHz): 1.8-28. Exchange: RST, serial. Rules - see IARU society websites

Alabama QSO Party--Phone,CW, from Jun 2, 1600Z to Jun 3, 0400Z. Bands (MHz): 1.8-28. Frequencies: CW--1.810, 3.545, 7.045, 14.045, 21.045, 28.045; PH--1.865, 3.855, 7.230, 14.250, 21.300, 28.450. Exchange: RS(T) and AL county or S/P/C. Logs due: 30 days. Rules <http://www.alabamaqsoparty.org>

DARC 10 Meter Digital Contest--Digital, from Jun 3, 1100Z to Jun 3, 1700Z. Bands (MHz): 28. Exchange: RST, serial number. Logs due: 14 days. Rules <http://tinyurl.com/3o3kobs>

OK1WC Memorial Contest--Phone,CW, from Jun 4, 1600Z to see website. Bands (MHz): 3.5, 50, 144, Frequencies: First through fourth Monday of each month; see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

ARS Spartan Sprint--CW, from Jun 5, 0200Z to Jun 5, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com>

VHF+ CONTESTS

Worldwide EME Contest--Phone,CW, from May 26, 0000Z to May 27, 2400Z. Bands (MHz): 1.2G. Exchange: TMO/RS(T) and "R". Logs due: Jun 25. Rules <http://www.dubus.org>

UKSMG Sporadic E Contest--Phone,CW,Digital, from Jun 2, 1300Z to Jun 3, 1300Z. Bands (MHz): 50, Frequencies: No QSOs below 50.080 or from 50.100-130 MHz. Exchange: RST, member nr, 6-char grid locator. Logs due: Jul 1. Rules <http://www.uksmg.org>

OK1WC Memorial Contest--Phone,CW, from Jun 4, 1600Z to see website. Bands (MHz): 3.5, 50, 144, Frequencies: First through fourth Monday of each month; see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

==> LOG DUE DATES

23 May through 5 June 2012

Found this on the FT-817 list, the response is from the Yaesu guy
taking questions after the FTdx3000 and FT1D presentation:

"I also asked a crucial question about their new digital HT, the FT-1D,
and that being is it P-25 compatible. The rep flat out said 'NO', it is
not P-25 compatible, nor is it D-Star or MotoTRBO compatible - it is
strictly C4FM. This has turned MANY people off because it is not
compatible with any other digital modes and there are no plans at this
time to manufacture any mobiles or repeaters. Its pretty much like
standing in the desert with a cellphone and no cell service. All you
can do is talk to another FT-1D unless you switch it to analog. The
fact that its also an APRS rig wont even help because you can get a
VX-8 for a fraction of the expected floor cost of the FT-1D. This could
be a disaster for Yaesu"

Totally, do they think that coming in this late with yet another
standard is going to do them any good?

But looking on the bright side, it is digital!!!!!!!!

I suppose the problem is that radio amateurs are not what you would
call a very together customer base when it comes to what they want
in a product.

You are correct about amateurs, so I would have thought that a manufacturer would produce equipment that would at least work with some of the new modes, rather than produce yet another one of their own. Fine if you are the first, OK, we don't all like Dstar, but at least it was a first. Then professionally came DMR, so now we have 2 main modes available to amateurs, WTF didn't Yaesu produce something to work with these modes? Or even P25. Then at least it would be useful.

I really don't know, perhaps it's a cost of licensing and patent fees?

I thought DMR was an open spec' ? We all know about dstar, not sure
about P25, I'm sure someone better informed will be along soon to put us
right.

I can't believe that Motorola would introduce something that wasn't
fairly proprietary...

They have, their capacity plus, sort of trunking, and their text
messaging is propriety. But the back bone, DMR, is not. So you get
the situation where you can have Hytera and Motorola radios working and
talking to one another on the same system, just with limited facilities.

VK4ILH Cape Moreton Lighthouse, Moreton Island

Posted: 23 May 2012 02:14 AM PDT
http://forums.qrz.com/showthread.php?347301-VK4ILH-Cape-Moreton-Lighthouse-Moreton-Island&goto=newpost

For this years ILLW a team of 8 operators will take off to Cape Moreton Lighthouse AU0009 / WLOTA Ref: LH2987 located on Moreton Island IOTA OC-137.

Approval was received 2 days ago from the Queensland Parks & Wildlife Service and now everything is in full swing.

We look forward to working other Lighthouses around the globe plus the Lighthouse and IOTA Chasers.

As an added bonus we will have an experienced CW op onboard who will be active all bands 80-10

Further info and updates available on the website at www.capemoreton2012.com and on our qrz.com profile

N5E, Activation of the Tall Ship Elissa for Museum Ships Weekend

Posted: 22 May 2012 02:47 PM PDT
http://forums.qrz.com/showthread.php?347230-N5E-Activation-of-the-Tall-Ship-Elissa-for-Museum-Ships-Weekend&goto=newpost

Hello:

We will be activating the Tall Ship Elissa for Museum Ships Weekend. The Elissa is one of the oldest ships a float, and operational, in the world. She is berthed on Galveston Island, NA-143. Operations will be approximately 09:00 - 17:00 local on June 2 and 3, 2012. To our knowledge, this is the first time the Elissa has been activated.

For more information, please see N5E here on QRZ.com.

Hope to hear you in the pileup.

73

Leslie, ad5wb

Galveston Island, Texas

New transatlantic 144MHz beacon GB3WGI

Posted: 23 May 2012 04:23 AM PDT
http://forums.qrz.com/showthread.php?347307-New-transatlantic-144MHz-beacon-GB3WGI&goto=newpost

New transatlantic 144MHz beacon GB3WGI

On the 18th of May, 2012, the UK regulator Ofcom issued a NoV for another propagation beacon to test the possibility of a 144MHz transatlantic path from the UK.

Located at Lough Navar Forest in Co Fermanagh, Northern Ireland OSI 06599 57718, 349m asl level with a clear take off over the sea, GB3WGI ("West GI" will radiate on 144.487MHz towards North America, initially with an ERP of 100 Watts relative to a dipole, with plans to increase this if licensing allows.

This beacon was made possible due to the generous donation of a transmitter by Brian Justin, WA1ZMS, the man behind the US 70MHz beacon, and NoV holder, Gordon Curry GI6ATZ who is providing the site and site services.

This NoV is particularly welcome from Ofcom in what is clearly a busy Olympic year, and the VHF weak signal community in the US and the UK thank them for their efforts.

No date is yet fixed for the installation of the beacon, but plans are well under way and an announcement will be made in due course

Digital QST <http://www.nxtbook.com/nxtbooks/arrl/qst_201206/>

Digital QST

Dear ARRL Member,June 2012 QST - Digital Edition
<http://www.nxtbook.com/nxtbooks/arrl/qst_201206/>

In addition to the print edition of /QST/, all ARRL members have access
to the convenient, new digital edition of /QST/ at no additional cost.
The current edition of /QST/ is available now: June 2012 /QST/
<http://www.nxtbook.com/nxtbooks/arrl/qst_201206/>

Special ARRL Field Day Issue/First Digital Edition...

* ARRL COO Harold Kramer, WJ1B provides background on the new digital
edition
* A telescoping multiband vertical whip for Field Day (or any other day)
* Plan ahead to avoid Field Day mishaps
* The first South Sudan (STï¿½) DXpedition
* ...and more!

Digital-Only Features...

* Video from President Kay Craigie, N3KN introducing the first digital
edition
* Video overview of the portable generators reviewed in this issue
* Review of the new ham-centric mystery novel by Ward Silver, Nï¿½AX
* Video example of a 43 foot vertical antenna installation with a
remote tuner for multiband use
* ...and more!

Every issue of /QST/ is filled with the news and features you need to
keep active in Amateur Radio. After you read through it, visit the
Digital /QST/ Feedback Form
<http://www.arrl.org/digital-qst-feedback-form> and tell us what you
enjoyed!

73,

Steve Ford, WB8IMY
Editor

What is a digital edition?
The digital edition of /QST/ is a web-based edition of the journal...a way to read and interact with the current issue of /QST/ anytime, anywhere. It simulates the look and feel of our printed version, complete with page flipping, indexing and easy ways to move around to get to the content you want. You can choose to read it online, or download the entire issue to your laptop. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.

How do I access the digital edition?
Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst <http://www.arrl.org/qst>.

To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.

Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.

Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions. Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

Go Green. Go Digital-Only.
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue.
* Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

OH8K/0 will be qrv from JP90SF during the Nordic VUSHF-Meeting 2012

LATEST NEWS by Jussi, OH6ZZ, dated 2012-05-22:

All is prepared for the trip. QRGs are 144131 MHz for EME (JT65B) and
144353 MHz for MS (FSK441).
Both will try to setup their MMMonVHF DXBlog to spread latest News.

The plan from Jussi, OH6ZZ and Sami, OH9GDT will be to join the
Nordic VUSHF-Meeting at Island Aland during 24-27 Mai 2012
(http://vushf.rats.fi/)
They try to be qrv as OH8K/0 on 2m FSK/EME on 25-27 May.
QRG and more details will be spread later...

Moonbounce from Uganda, 5X1EME, KJ60GH

Hello MMM

It was a very successfull day. Today we started building up the shack
and the antennas. After a few hours (Atleticoteam has some experience) we
were ready. A big thunderstorm destroyed our preamp so we had to use a spare one.
However we finally could get started two days earlier than announced before.
We have our house the last 20 degrees in front of our moonset, we can't help that.
At the end of the half moonpass we had 53 inits in our log. Not bad considering
the fact that we had no full passage.

Moonbouncing is a hard job (but someone has to do it). Doing all the necessary work
in our house here is impossible for just two DX-ers. So we hired a maid.
She makes breakfast, does the dishes, buys groceries and does wash our clothes
and all other work that has to be done. In this way we will be able to make more
Miles on the moon.

We will be QRV tomorrow from moonrise to moonset 144.134 MHz, 5X1EME always first.

SOURCE:Rene PE1L & Eeltje PA3CEE direct to MMM

After some very successfull DXpeditions to the Gambia past year
(C56EME with 361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz),
Bonaire (PJ4X) and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya (5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near Kampala on the equator.

The plan is to leave May 21st and build up the station before the weekend. It's just
the two of us but we know what we are doing. It's a hard job to get the license there.
Callsign is still a bit insecure but we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a update via MoonNet,
MMMonVHF and our mailinglist.
If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood.
We have to come back as often as possible. We can't resist....

SOURCE: Rene PE1L and Eltje PA3CEE direct to MMMonVHF

** DXCC: F: France ; square JN14; start 2012-06-02 **

F/PA2CHR/p qev from JN14BU begin of June

During my summer holiday I will be QRV on Saturday 2
June and (if good activity) Sunday 3 June from a
hilltop in Southern France.
This is not a real DX-pedition, just some hours fun.
If you need JN14 locator pse let me know, maybe we
can arrange a sked.

Station 144 MHz: FT857, 150W. PA and 10el.
Station 432 Mhz: FT857, 100W. PA and 21el.

Best 73's

SOURCE: tnx to Chris, PA2CHR, direct to MMMonVHF

EME-DXpedition 2012 de DL1YMK

here is web update http://www.ok1dfc.com/Peditions/ymk2012/dl1ymk2012.htm

GL and 73 Zdenek - OK1DFC

The M&M-team is preparing the next EME-DXpedition, taking place in May 2012. We will set out for our destination just after having returned from the Swedish EME Meeting, organised by Lars, SM4IVE, on the weekend 12./13th of May in Oerebro. We hope to reach our destination in time and to get QRV on Thursday, 17th of May (bank holiday in Europe) on 23 cm, followed by 70 cm on 18.05. On Saturday, 19.05., we will be on 13 cm and on Sunday again on 23 cm. 13 cm will be run with a significant increase in power and full 2424 MHz coverage. For the first time during an EME- DXpedition, we intend to get also operational on 6 cm with our old, but proven stressed dish and a new superb feed made by our friend Tommy, WD5AGO. 6 cm will have an experimental character despite some 100 W out, as we could not test so far, if the under-illuminated dish will work up that high in frequency, so keep your fingers crossed!! Our plan is to give it a try on Monday, 21th May. Also, we intend to get active on 3 cm with a separate solid dish, which of course is a lot smaller. Last weekend we made the first test with LX1DB, having installed the dish in our garden place. The tests were not yet satisfying, so our friend Willi right now is trying to help us out with some substantial development aid!
During the DUBUS contest 26./27th of May, we will of course be active on 23 cm in order to boost activity in the moonbounce contest of contests. Our last day of operation will be Thursday, 31st of May. A detailed schedule for the days from 21th May onwards predominantly will depend on the progress with 10GHz in the meantime. Further details to be published soon!! This years DXpedition will be the 9th EME-DXpedition in a sequence for us. We hope to have fun all together as experienced during past years DXpeditions.but this largely depends on you.
Needless to say that it will be again a CW random event, although doodle mode technically is possible (with a new laptop computer) on request. We have no idea yet to what extent (if at all) i-net access is feasable, though.

Vy 73, Michael and Monika

SOURCE: Moon mailing list ; Moon@moonbounce.info

** DXCC: 4X: Israel; square KM72; start 2012-05-17 **

2012 sees the first DXpedition by the group of Dutch radio amateurs
listed below to Israel, who, apart from making QSO's, look forward
to meeting local hams and visiting places of cultural and historical interest.
We will be active from May 17th until May 30th
The first 6 days we will stay in Nes Ammim in the Northwest between Nahariya
and Akko in KM72nx. From there we will travel to Rishon LeZion in KM71jw.

The members of the team during May 2012 are Jaap PA7DA, Loek PA9LUC and XYL,
Hans PA0JBB and SWL Aad van den Nieuwendijk.
At this moment we don't have a 4X callsign and will be QRV according CEPT-regulations with
4X/PA7DA and 4X/PA9LUC. We will operate mainly on 10, 6 and 2m.

More information on the PA7DA website!

Former ARRL First Vice President Steve Mendelsohn, W2ML (SK):

Posted: 23 May 2012 06:46 AM PDT
http://www.eham.net/articles/28355

After a courageous battle with pancreatic cancer, Steve Mendelsohn, W2ML, of Dumont, New Jersey, passed away May 23. He was 67. An ARRL Life Member, Mendelsohn began his time with ARRL in 1983 when he was elected as Vice Director of the Hudson Division. After two terms as Vice Director, he was elected as Hudson Division Director in 1987. In 1996, the ARRL Board of Directors elected Mendelsohn as its First Vice President, where he served until 2000. The next year, he was again elected as the Hudson Division Vice Director, serving through 2004.

//
ARRL Spring Section Manager Election Results Announced:

Posted: 23 May 2012 06:10 AM PDT
http://www.eham.net/articles/28346

Of the nine Section Manager elections this spring, two were decided by member balloting. Ballots were counted on May 22 at ARRL Headquarters. Terms for these ARRL Field Organization officials begin July 1.

//
Don Keith, N4KC Publishes New Novel; Movie Based On Book In Pre-Production:

Posted: 23 May 2012 06:06 AM PDT
http://www.eham.net/articles/28345

Active amateur radio operator Don Keith, N4KC, will publish his latest novel and 24th book July 4, 2012. FIRING POINT (Signet/Penguin, 704 pgs.) is a taut, fast-paced thriller, set in Russia and beneath the polar ice pack, and tells the story of an American nuclear submarine crew and a team of Navy SEALs who are called upon to rescue the kidnapped Russian president. In the process, they will attempt to avert World War III.

Sunraysia Radio Club Secretary Noel Ferguson VK3FI Interviewed On ABC Radio

Posted: 22 May 2012 05:05 PM PDT
http://www.eham.net/articles/28342

As we approach this weekend with over 180 people making their way to the WIA Annual Conference being held in sunny Mildura, club Secretary for the Sunraysia Radio Group, Noel Ferguson VK3FI has been interviewed by local ABC radio Breakfast Show Producer Deb Banks, the interview took place on Monday the 21st of May.

//
Stephen Mecsery, WZ1Y (SK):

Posted: 22 May 2012 05:03 PM PDT
http://www.eham.net/articles/28341

GREENWICH, Conn. -- Stephen Mecsery of Old Greenwich died on May 14. He was 89. Mecsery founded Cos Cob Radio and television in 1945, selling and repairing the first televisions in town. Born on Sept. 12, 1922 in Palmerton, Pa., he was the son of Agnes and Stephen Mecsery. The family moved to Stamford shortly after. Mecsery was a World War II veteran, serving in the Navy in the Normandy campaign. An avid ham radio operator from the age of 15, he was a member of the Stamford Amateur Radio Association. He enjoyed mentoring new amateur radio enthusiasts. Mecsery also enjoyed racing his Bricklin race car at a racetrack in Lime Rock, Conn. He collected antique cars, radios and televisions and loved repairing them.

//
Radio to the Moon:

Posted: 22 May 2012 05:01 PM PDT
http://www.eham.net/articles/28340

Amateur radio has taken Mildura-based enthusiast Noel Ferguson to the moon and back. Known in wireless radio circles as V-K-3-F-I, Mr Ferguson believes the next great frontier for wireless radio is space. "I happened to be sitting one day listening to the international space station going past and all of a sudden, a very Russian sounding voice was calling and I

realised he was calling for one of his friends on a boat as he was going over Melbourne. "So I had brief contact with him; his English was as good as my Russian!" he laughs. "A lot of (the astronauts) have very good English, most of them; or they're Americans," he explains. "The international space station does have a lot of contact with amateur radio operators and they also run a school program. "A friend from Kingston-on-Sea goes and sets up a dish and the equipment at a school; the schools will ask the astronauts questions over a period of ten minutes as the international space station goes over." Mr Ferguson says amateur radio operators have been communicating with each other around the world for many years and in emergency situations. "You're always prepared for an emergency, in fact at the moment I'm pulling together some backup power supplies - but we always hope of course that it won't happen," he says.

WIANEWS WEEK COMMENCING MAY 27 2012.

TRANSIT OF VENUS APPROACHES

EAST GIPPSLAND MAKER SPACE

Shortwave Gathering Identifies Broadcast Opportunities

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAY 27 2012.

Hello, this is Grant, VK5GR for the Project Horus Balloon team, with some
news about today's amateur radio High altitude balloon flight being staged
as part of the Wireless Institute of Australia's AGM here in Mildura.

By the time you hear this, the balloon repeater, designated flight HORUS 26,
will be in the air (launch was planned for 8am AEST) and climbing on it's
way to more than 30km altitude and more than 100km north east of Mildura.

At apogee, the footprint is predicted to cover the cities of Adelaide,
Melbourne, Sydney and Canberra simultaneously. The radio horizon will extend
approximately 800km from the balloon, covering some 2,000,000 sqkm of
SE Australia.

You can access the repeater on 438.9 MHz using a 123 Hz CTCSS tone. You will be able to hear the downlink from the balloon on 147.500MHz. APRS is also active under the callsign VK5ARG-11. There is also a 300 baud RTTY telemetry beacon on 434.075MHz.

Now, in addition to the repeater balloon, the team is also intending this morning to launch a second balloon (which may by now also be in the air - the intended launch time was 9am AEST). This flight, designated HORUS 27, is primarily carrying a camera payload, RTTY beacon and another APRS transmitter this one designated VK5ARG-12. Predictions earlier in the week looked ideal to attempt to fly this experimental camera payload, so we will see whether it pans out.

Our Project leader, Terry VK5VZI, and all of the Project Horus team hope to hear as many amateurs as possible making use of the repeater during this flight. The group also wishes to say thank you to the WIA for inviting us to participate in this year's AGM.

You can also find out more about the project by looking at our website projecthorus.org

73's from Grant VK5GR for Project Horus

D-Star Up

WIA'S portable Dstar repeater is set up in Mildura for the full conference weekend, listen out on the Dstar repeater frequency 438.150MHz

ABC WIRELESS INTERVIEWS VK3FI

This weekend with over 180 people making their way to the WIA Annual Conference being held in sunny Mildura, club Secretary for the Sunraysia Radio Group, Noel Ferguson VK3FI has been interviewed by local ABC radio Breakfast Show Producer Deb Banks.
Listen in on the link on the story on WIA FRONT PAGE NEWS wia.org.au

The world's most successful solar cell breaks the 20% barrier

Aussie researchers team with Sun-tech Power to create Pluto Technology

World-class Australian solar research has produced new photovoltaic solar cells that recently broke the 20% barrier for efficiency in capturing the sun's energy, the highest ever efficiency for a low-cost commercial silicon solar cell.

The solar cells reached a production capacity last year of 0.5 gigawatts, worth more than US1billion a year. This is enough to power 300,000 average homes that typically have eight solar panels on them for at least 25 years.

Pluto technology, as it is patented, was developed by Professors Martin Green and Stuart Wenham at the ARC Photovoltaic Centre for Excellence in close collaboration with the world's largest solar cell manufacturer, Suntech-Power.

The Pluto Technology won a 2012 Collaborative Innovation Award Wednesday night at the Cooperative Research Centres Association conference in Adelaide.

Transit of Venus Special Event June 6, 2012

*** TAKE ALL IMPORTANT SAFETY PRECAUTIONS WHEN VIEWING THE SUN!!! ***

For the 7th time in human history and last time this century, Venus will pass in front of the sun on June 6. WB4APR is encouraging radio hams to join up with astronomers and observers in public places to share in this event

It is observable worldwide except the centre of the Atlantic (eastern S.America and western Africa) Everywhere else can see parts of it. It lasts 5+ hours and is fully visible around the Pacific Rim.

All previous centuries were before the discovery of radio and so sailing ships were dispatched around the globe to time the event. From these times, the size of the Solar System could be calculated. It took months if not years to get the data back. Now we can do it in 0.05 seconds with Ham radio.

See if you can contact hams at other Transit of Venus sites from your public observing site. Here are the suggested calling frequencies.

We don't want contest-style pileups nor home stations. We just want a place where similar public setups can contact like-minded other public viewing sites via ham radio and make their reports.

See the web page: http://aprs.org/VenusTransit2012.html

We are suggesting these calling frequencies:
40 Meters - 7180 KHz
20 Meters - 14240 KHz
17 Meters - 18140 KHz
15 Meters - 21240 KHz
12 Meters - 24940 KHz
10 Meters - 28340 KHz

VHF - APRS on the local national calling channel.
Send APRS messages as noted on the web page.

*** TAKE ALL IMPORTANT SAFETY PRECAUTIONS WHEN VIEWING THE SUN!!! ***

Bob Bruninga, WB4APR (will be observing in Japan with a Japanese (TBD) callsign)

Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Greetings Everyone.

Don't we have an extraordinarily diverse hobby in Amateur Radio?

When you sit back and think about it there is some facet of the hobby that can appeal to everyone and one or more of those facets are maybe what attracted you and others to the hobby in the first place. Electronics, radio and the associated knowledge continues to expand exponentially which makes it hard to keep up with advances and can eat up a lot of our time; which others close to us may think we could spend on more 'worthwhile' activities.

While the personal interest and search for knowledge is important for our own development we can end up isolated, like a shag on a rock, if we forget to support our hobby of Amateur Radio. So, what is support?

It surely means different things to different people but I suggest simply paying your club dues and WIA membership (and thank you to those who do) is only addressing one or two support needs.

Turning up to regular club meetings to rag chew while enjoying tea, coffee and biscuits is a form of support but unless we get involved in the Amateur Radio doings of our clubs or groups, in whatever way we can contribute, can we really claim to be supporting our club or group and hence Amateur Radio?

Similarly, one tier up, do clubs within regions co-operate by sharing skills and resources to support our hobby? Really, there is no place for an 'us and them' mentality within our hobby of Amateur Radio and it does no harm to promote the activities of other clubs physically or by joining in their on-air activities. It can be very disheartening when a club develops and promotes an activity or on-air event or contest only to have a modicum of interest. How many of us have been in this situation and felt rather 'cheesed off' to put it politely? Too many, I suggest, if I was able to count the nodded heads and raised hands of those listening.

So, what can we do about these unhelpful issues of dynamic apathy apparent in support of our hobby? It is simple really; get off our tails, get in and do, get in and support club, state and national events and celebrations. No matter how small our individual contributions may seem to us the sum of them all contributes to success and support of our great hobby.

Consider yourself to be another brick in the wall supporting Amateur Radio on all levels.

This has been Ewan VK4ERM for the WIA Board asking 'How do you support our hobby?'

John VK3KM has advised free scripts to load the WIA repeater list into your VHF/UHF radio are available

Steve Ireland VK2MD has written four useful utilities in VB Script that will load and manipulate the WIA Repeater data file.

The first script simply prints the repeater list to a console window and is meant as a training exercise.

The next one verifies the WIA repeater data file for any consistency.

A third script converts the binary file into a format that can be imported directly into the ICOM ID880 using the free ICOM CS-80/880 Software.

The last one converts the binary file into a format that can be imported directly into the many radios that are supported by Chirp.

A "Read Me" file is included with the downloadable zip file that describes in detail how to run the scripts, and the scripts themselves are fully commented for those who want to write their own utilities. Also included within the zip file are sample output files that are pre-cooked and ready to use.

The scripts will run on most Microsoft Windows operating systems (XP onwards) and can be downloaded from the Repeater Update page on the WIA web site.

For the information of Foundation Licence trainers and WIA members, Ron Bertrand VK2DQ has developed an on line video training program covering the Foundation course material.

The course is free and available at Radio & Electronics School web site http://www.radioelectronicschool.net/

Police Roundup http://www.vicpolicenews.com.au/

East Gippsland Maker Space in Bairnsdale, Victoria is now open and the possibilities are exciting. New members very welcome. Ian vk3TCX says they have an entire wing of the old Bairnsdale hospital with space allocated for many diverse interests including Radio Shack, lab with power, broadband internet and heaps of space for antennas.

"Last week's news spoke of the first Maker Fair held in China, well Bairnsdale in Eastern Victoria may have taken its first steps in this direction with the formation of its own Makerspace, a community based workshop whose aim is to provide cheap access to tools, training and resources to enable it's members to learn practical skills and explore art, technology and creativity by sharing the expertise of other community members.

We have leased a wing of an old disused hospital in Bairnsdale, and already it is being divided up into workshops for, among other things computing, photography, machine shops, electronics, robotics and of course amateur radio. Several local amateurs have already become members, we have dedicated room space for a radio shack/lab, access to tools, machinery, broadband internet and the space and facilities to construct and experiment, and hopefully expose more of the community to amateur radio and the fun of electronics.

We are self-funding, non-profit and are gratefully accept support both materially and from anyone with expertise to share.

Please have a look at what we hope to achieve by going to
www.egmakerspace.org

I'm Ian, vk3tcx for the East Gippsland Makerspace"

Check them out at egmakerspace.org for a video walkthrough

(Ian vk3tcx)

The annual Winter expedition into the snowy wilderness of the Bogong High Plains is coming up again and is led by Stephen, VK3SN and Gerard, VK3GT.

A team of keen skiers' will head away from civilisation on Monday 6th of August for four days to snow camp on the roof of Victoria. Staying around 1800 metres above sea level, the group will spend each day exploring the icy beauty of this amazing region within the Australian Alps.

When setting up camp each afternoon they will deploy solar powered portable QRP gear to call CQ on 40 and 80 metres into the evening. They will also be on 2m and 70 cm FM simplex and various repeaters to liaise across the high country of North-East of Victoria, and local amateurs are invited to say hello on these frequencies.

Listen out for the guys as they work their way across some of Victoria's most spectacular mountain ranges- here's hoping for decent snow!'

(Stephen VK3SN)

It is almost that time again: GippsTech 2012 will be happening on the weekend of the 7th and 8th of July, at Monash University Gippsland Campus in Churchill, Victoria, about 170 km east of Melbourne.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, AR Victoria and the WW sources of the WIA.

Yaesu FT1D Digital Handheld

One of the most eagerly awaited products at Dayton Hamvention last weekend was the new Yaesu FT1D digital and FM handheld.

It has, for an Amateur Radio rig, a number of innovations:

A microphone that uses a mini-USB plug and built-in camera
An 80 character group short messaging facility
9600 bps data transfer
Micro-SD card slot
E-GPS facility

Kiosk mobile data extraction to be used by London Police

The Metropolitan Police, the police force responsible for Greater London, has announced that it will begin using a mobile device data extraction system that will give its officers the ability to extract data from a mobile device in a matter of minutes. The said system will use Radio Tactics' ACESO Kiosk, a touchscreen device that will be deployed in the city.

According to Radio Tactics, the ACESO Kiosk has the capability to extract data including call history, photos, videos, and email and social networking info from a phone at an average time of 20 minutes.

Essentially, the device features an intuitive, fully-guided touchscreen desktop data acquisition tool. Radio Tactics promises the device to pull data from the any mobile phone as well as from any memory or SIM card it carries. The company claims that it also works with USB flash drives and portable GPS units too. The system will be used on phones that are suspected of having been used in criminal activities.

According to Computerworld UK, more than 300 Police employees will be trained to use the device.

Milestone for Wi-Fi with 'T-rays'

BBC News report that researchers in Japan have smashed the record for wireless data transmission in the terahertz band, a mainly uncharted part of the electro-magnetic spectrum.

The data rate is 20 times higher than the best commonly used Wi-Fi standard.

As consumers become ever more hungry for high data rates, standard lower-frequency bands have become crowded.

The research, published in Electronics Letters, adds to the idea that this "T-ray" band could offer huge swathes of bandwidth for data transmission.

The band lies between the microwave and far-infrared regions of the spectrum, and is currently completely unregulated by telecommunications agencies.

Despite the name, the band informally makes use of frequencies from about 300 gigahertz (300GHz or about 60 times higher than the current highest Wi-Fi standard) to about 3THz, 10 times higher again.

NEWS FROM ARNEWSLINE USA

FM INTERFERENCE TO SSB/CW SATELLITES INCREASING

Interference by terrestrial FM operators to ham radio satellites is a growing problem. This according to Alexandru Csete, OZ9AEC who made this recording of FM interference to the FO-9 ham radio bird on Saturday, May 5th. A QSO that seemed to revolve around chocolate:

--

Actual interference QSO recorded off FO-29

--

OZ9AEC says that to an FM operator, the spectrum from 145.8
to 146.0 MHz may seem empty, but it isn't. These
frequencies are used by weak signal SSB and CW satellite
transponders and even a few watts of FM can cause severe interference.

Some FM operators are unaware that if they use these
frequencies their local chat across town will be heard
thousands of miles away. Nor do they realize that in
holding their point to point terrestrial FM chats in this
spectrum that they block the satellite from others to use.
The use of FM on an SSB/CW linear transponder satellite also
reduces the lifetime of both the satellite's batteries and
the transponder itself.

Active on all bands 80-10m and are taking part in the WPX CW Contest during this weekend, 26/27 May.

BROADCAST MONITORING SWL AND SCANNER NEWS

Shortwave Gathering Identifies Broadcast Opportunities

A large portion of presentations at the National Association of Shortwave Broadcasters meeting, held in Washington in May cantered on the idea how shortwave radio • dismissed by some as in its last throes, a relic of the Cold War era disappearing under the shadow of digital • can find a place in the 21st century.

As many of the conference's speakers argued, that answer may reside in areas with little electricity, where shortwave is seen as an effective means of relaying information to countries with repressive regimes. Presenting the results of a study on which audiences were tuning into shortwave across the globe, Dr. Kim Andrew Elliott, an audience research specialist at IBB, pointed out that in countries like Nigeria and Zimbabwe, people tended to own more radios than televisions.

In impoverished, politically tumultuous Zimbabwe, in fact, 32% of those who were surveyed, in a face-to-face, door-to-door method, own shortwave radios, according to Elliott.

Because shortwave radio is harder to interrupt than, for instance, the Internet, Radio Free Asia, the conference host, broadcasts to the highly censored areas like North Korea

YOU CAN'T WATCH MEDIA WITHOUT A GOOD REMOTE!

Inventor of the remote control dies

Eugene Polley, who invented the TV remote, died Sunday at age 96.

In 1955, he created what would become the couch potatoes dream: the TV remote control.

Eugene's "Flash-Matic" remote control, offered the world the first cordless TV remote.

Flash-Matic operated with four photo cells, one in each corner of the screen. The viewer used a highly directional flashlight to activate the four control functions, which turned the picture and sound on and off and changed channels by turning the tuner dial clockwise and counter-clockwise.

highest for a single station is 3,594 for the Perth VK6RAP repeater, morning and night combined followed by the single transmission of VK5RAD with a massive 3,117 for their Sunday Morning broadcast

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

How a Tiny Satellite Could Find Another Earth

Time Magazine carried a report on the work of radio amateur Sara Seager KB1WTW who is developing a CubeSat called ExoplanetSat, that will search for new planets.

Time reports that unlike the massive and expensive Kepler probe used by NASA the ExoplanetSat is a tiny satellite, just 10x10x30cm.

They say:
"What makes ExoplanetSat even more un-NASA-like is that it began as a class project • although admittedly, the class was at MIT. It was a design-and-build course, which the university's engineering students have to take in order to graduate. In a recent semester, the class was co-taught by Sara Seager [KB1WTW] an astrophysicist who has done ground-breaking research studying how the atmospheres of planets orbiting distant stars might look like from earthly telescopes. Seager recruited five science undergrads to join her engineers, on the theory that out in the real world, they'd eventually have to work with engineers anyway."

The group lead by Sara KB1WTW is developing the prototype ExoplanetSat capable of monitoring a single, bright, sun-like star for two years.

Planned to launch late 2012 or 2013 it is hoped it will open the gates for ExoplanetSat interest and funding. Once the funding doors are opened, then the fleet of ExoplanetSats can be launched. The fleet may contain as many as a hundred of these small satellites, each focused on its own star.

Listen to HORYU-2 on the Web

Andrei YO8SSQ and Cezar YO8TLC have made available a web based receiver to enable listeners to hear the new amateur radio satellite HORYU-2 when it's within range of Romania.

The WebSDR receiver is located at the Astronomical Observatory Department of "Stefan cel Mare" University in Romania.

Latitude 47.6417N Longitude 26.2453E, grid locator KN37cp, height ASL is 350m.

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

IOTA 800 Islands Award

a notable first VK award goes to a local VK7 amateur!

Frank VK7BC has just received the "IOTA 800 islands award" from the Radio Society of Great Britain.

Frank's is the first to be claimed by a VK station and one of only two going to Oceania, the other being a station on Hawaii AH6HY.

Not one to rest on his laurels, Frank was also issued with the "W.A.D.A" or Worked All Antarctic Directory Award for achieving the notable milestone of having worked for 28 Antarctic bases.

This award is only the second to be awarded to a VK station, the first being to Mal VK6LC a few years ago.

Well done on two very notable achievements Frank!

For the rest of us, it just goes to show that CW can indeed be useful from time to time, so maybe we should all dig out our keys and get in some practice.

Italian radio amateurs help out after quake

An earthquake measuring 6.0 on the Richter scale shook Italy's industrial and densely populated northeast Sunday last, killing at least 6 people, felling homes and factories and bringing down historic church steeples.

Occurring in the middle of night it saw emergency services swing into action with many injured across the Emilia Romagna region.

It has been called the region's worst quake since the 1300s, striking at 4.04 am local time with its epicentre about 35 kms north of Bologna at a relatively shallow depth of 5kms.

The IARU Region 1 reports that Italian radio amateurs responded.

A number of strong aftershocks continue to affect the area.

The voluntary group RNRE reports that communications in the area are currently good but the RNRE has been requested to make one or two mobile units available to respond, if needed, due to the continuing seismic activity.

No HF frequencies are in use at this time.

(Jim Linton VK3PC. Chairman IARU Region 3. Disaster Communications Committee, acknowledging the input and Greg Mossop G0DUB IARU Region 1 Emergency Communications Co-Ordinator)

Sunday High Performance Radio

As the wia news goes to air this morning some Townsville Club radio operators are out on the Mount Stuart Road providing Time Control Communications Support plus some circuit marshal, time keeping and safety communications support for the second round of the King of the Hill Auto sports Hill climb.

The operators have been on site since 7-30am and competition started from 9am. Communications has primarily been on VHF for Time Control and UHF CB for marshal liaison and safety. That free "auto sports burger" is looking really good at lunchtime and the operators should complete operations by 4pm this afternoon, Sunday 27 May.

This Southgate page says:
~~~~~~
The ability to print the magazine means you can use free utilities, such
as CutePDF Writer, that appear as a printer to create PDF's, however,
the quality isn't that good.
~~~~~~

I don't know the basis of that statement. Is the original PDF poor, or
is CutePDF deficient in rendering it? If the latter, whoever wrote this
should do a little homework. CutePDF is capable of *excellent* results,
but you have to work for it. The CutePDF *default* settings will give
you a poor result, but when you've optimised the settings you will not
be disappointed. And it's much better than Adobe!

And if you don't like Cute, there's a dozen other free PDF printers you
can use (non-commercially). My personal preference is Bullzip or doPDF.
[From memory, one of them doesn't need Postscript to work.] But in all
of them, it's a compromise between quality and filesize. I expect even
Adobe can be made to work well too!

ORIGINAL 13 COLONIES INDEPENDENCE WEEK SPECIAL EVENT

July 1st-5th 2012*

* Bonus Day 30 June 2012

NY-NJ-RI-GA-PA-NH-SC-VA-CT-DE-MD-MA-NC

The 2012, 13 Colonies stations will operate from 12:01 AM Eastern (0401Z),on July 1st, (That's one minute after midnight, early Sunday morning, July 1st) to 11:59 PM Eastern (0359Z July 6) ending on July 5th (One minute to midnight, late Thursday night, July 5th).

Recognizing that the 4th comes in the middle of the week (Wednesday) and that some operators will be going to their work on the 2nd, 3rd and 5th, we will add a BONUS DAY on Saturday, 30 June 2012!! Stations will operate from 09:00 AM Eastern (1300Z) right through until the 5th. Keep in mind that there may be fewer operators available on the work days so, PLEASE BE PATIENT!

There will be at least two S.E. stations per colony state. Also included will be Super contest stations, multi-operator Club stations & OM & XYL teams.

The theme for 2012 is "Colonial Era US Navy Tall Ships". Old Ironsides adorns the 2012 certificate , printed on heavy card stock - very cool.

You can work one state or, all 13 and, be eligible for the certificate. A "Clean Sweep" indicator will also be affixed, for those lucky enough to "Q" all 13.

Special Texas Navy Certificate for Museum Ships Weekend 2012

Posted: 23 May 2012 08:00 AM PDT
http://forums.qrz.com/showthread.php?347342-Special-Texas-Navy-Certificate-for-Museum-Ships-Weekend-2012&goto=newpost

Houston, TX, May 23, 2012: Houston area based Brazos Valley Amateur Radio Club will celebrate its fifth year of participation in the annual Museum Ships Weekend Event, June 2-3, 2012 by offering a special commemorative certificate to amateur stations who contact all five Texas Based Museum ships during the event. The five museum ships and their call signs include the Submarine USS Cavalla and Destroyer Escort USS Stewart (KK5W) in Galveston, Texas, The Battleship USS Texas (NA5DV), in La Porte Texas, The Tall Ship Elissa (N5E) also in Galveston and the Aircraft Carrier USS Lexington (W5LEX) in Corpus Christi, Texas.

To earn the Texas Navy Certificate, amateur stations must submit proof of contact with all five Texas Museum ships to QSL Manager, KK5W along with a #10 SASE. The address is in QRZ.com.

Museum Ships Weekend is an annual operating event sponsored worldwide by the Battleship New Jersey Amateur Radio Station with more than 90 ships participating this year. ☐We decided to put in a special Texas twist to the event to commemorate our five years of taking part☐, said Ron Litt, K5HM, one of the Event Coordinators.

The Texas Navy Certificate is a cooperative effort between four different area clubs, In addition to the Brazos Valley club, members of the Battleship Texas Amateur Radio Station, The Tidelands Amateur Radio Society and the South Texas Amateur Radio Club are participating as well.

For more information contact:

Cuba's Radio Hams get new Digimodes

Posted: 24 May 2012 12:42 AM PDT
http://forums.qrz.com/showthread.php?347439-Cuba-s-Radio-Hams-get-new-Digimodes&goto=newpost

Cuba's Radio Hams get new Digimodes

With great pleasure I inform to the world community of amateur radio that
after a national debate and then follow the legal avenues has been approved
by the department authorized by the goverment the use of new digital modes
for all Cuban hams.

The last legislation only allowed us to work in PSK31, QPSK31, AMTOR,
PACKET and RTTY.

We can now work in Domino Contestia, Olivia, MFSK, JT65, almost all
variants of PSK (BPSK, QPSK, PSK-R) among others.

And more importantly, it has set up a mechanism to apply for new digimodes
by any hams, I have asked already some who were not authorized, including
WSPR, JT6M, HSMM, PACTOR II and III, FSK441, among others.

Another important step is that they have authorized access to the FRC's
internal network using packet radio nodes, and have authorized the use of
packet gateways in cross bands (HF / VHF, etc.)

Cuban radio amateurs are pleased with this approval that puts us on a par
with colleagues anywhere in the world.

73 from CO7WT

CU on HF on Digimodes !!!

KB6NU releases 21 Things to Do After You Get Your Amateur Radio License

21 Things to Do After You Get Your Amateur Radio License is now available
for the Kindle and Nook.

Written for the new ham□or the ham that hasn't really been all that active
lately□its 21 chapters include:

Join a club, Join the ARRL, Find an Elmer, Buy a radio, Get on the air, Set
up a shack, Buy some tools, Buy a digital multimeter (DMM), Build an
antenna, Build a kit, Go to a hamfest, Learn the lingo, Subscribe to
mailing lists, blogs, and podcasts, Upgrade to General, Go to Field Day,
Learn Morse Code, Get to know your (ham) neighbors, Buy QSL cards, Join
SkyWarn, ARES, or RACES, Participate in a contest, and last but not least,
HAVE FUN!

New York City communications team presents ham radio to Harlem kids at expo

Posted: 21 May 2012 11:44 PM PDT
http://forums.qrz.com/showthread.php?347135-New-York-City-communications-team-presents-ham-radio-to-Harlem-kids-at-expo&goto=newpost

On May 19, 2012, the New York City Amateur Radio Emergency Communications Service (NYC-ARECS) participated at the Super Saturday Science, Technology, Engineering and Math Expo. Super Saturday is an annual expo designed for New York City youth and their families. The event features hands-on Science, Technology, Engineering and Math activities and demonstrations for Harlem public school students up to Grade 12. NYC-ARECS's tables presented the theme "How to talk Across the World Without a Cell Phone."

There are many photos and details here:

AMSAT NEWS SERVICE

ANS-141

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor at amsat.org

In this edition:

* AMSAT Satellite Education Focus at Dayton

* Reminder - One Month to Field Day - AMSAT FD Rules On-Line

* Japan Amateur Radio Satellite Launch May 17 - Telemetry on 437.375 MHz

* Three Hams Arrive at ISS & Prepare for SpaceX Dragon Arrival

* CubeSat Article in Time Magazine

* Promising Future of CubeSat Missions in UK Metro Newspaper

* Satellite Shorts From All Over

AMSAT Satellite Education Focus at Dayton

This weekend marked the annual Dayton Hamvention. AMSAT was present and active inside at the booth in the Ball Arena of the Hara Center and outside at the Satellite Demonstration area. AMSAT Vice President for Educational Relations Mark Hammond, N8MH said, "This year, we had a focus on trying to get youth and first time operators ON THE AIR!" The Satellite Demonstration area gave students, educators, and first time hams the opportunity to come to the microphone and make a satellite contact. Between passes equipment and experienced operators were available for discussions and answers to questions. Differences in operating techniques between FM and linear satellites were demonstrated. Also differing levels of equipment ranging between very simple and portable stations to a full station with computer control were operating.

Dayton also gave AMSAT and ARRL the opportunity to recruit new ARISS (Amateur Radio on the International Space Station) Technical Mentors and Ground Station Operators. Mark, N8MH took advantage of the ARRL Stage on Friday and Saturday to explain the roles of ARISS Technical Mentors who serve as an advising and coordinating liaison between NASA, the school or group making the ARISS contact, and the Ground Station Operators, who set up the satellite station at the contact location.

The AMSAT Forum at Dayton, moderated by Alan Biddle, WA4SCA also included Mark's presentation on the current and future education work. He described specific needs, especially in area of writing K-12 lesson plans (in science and math) using amateur satellite telemetry. Educators who are satellite operators should contact him directly at n8mh@amsat.org and are encouraged to join the AMSAT-EDU mailing list to learn how they can help with our educational outreach.

AMSAT's university level mentorship of CubeSat development projects was presented by Alex Harvilchuck, N3NP as he discussed CubeSats at Pennsylvania State University-Erie.

Also, at the AMSAT Forum, AMSAT Engineering VP, Tony Monteiro, AA2TX discussed Project Fox - AMSAT's First CubeSat which was accepted for launch by Project ELaNa, NASA's "Educational Launch of NanoSat". Fox-1 was selected to join the NASA ELaNa program on merit in support of NASA strategic and educational goals. The "Running With Fox" theme at the AMSAT booth featured a model of the Fox-1 cubesat.

[ANS thanks Gould Smith, WA4SXM, and Mark Hammond, N8MH for the above information]

Reminder - One Month to Field Day - AMSAT FD Rules On-Line

AMSAT Director Contests and Awards, Bruce Paige, KK5DO reminds you that time of year is once again approaching - Field Day!

Each year the American Radio Relay League (ARRL) sponsors Field Day as an emergency preparedness exercise. The event takes place during a 24-hour period on the fourth weekend of June. For 2012 the event takes place during a 27-hour period between 1800 UTC on Saturday, June 23, 2012 and 2100 UTC on Sunday June 24, 2012. Those who set up prior to 1800 UTC on June 23 can operate only 24 hours.

The Radio Amateur Satellite Corporation (AMSAT) promotes its own version of Field Day for operation via the amateur satellites, held concurrently with the ARRL event.

With the loss of AO-51 and SO-6ay this y ear is going to be most challenging. If you are considering ONLY the FM voice satellites like AMRAD-OSCAR-27 or SaudiSat-Oscar-50 for your primary AMSAT Field Day focus: Don't, unless you are simply hoping to make one contact for the ARRL rules bonus points.

The congestion on FM LEO satellites was so intense in prior years that we must continue to limit their use to one-QSO-per-FM-satellite. This includes the International Space Station. You will be allowed one QSO if the ISS is operating Voice. You will also be allowed one digital QSO with the ISS or any other digital, non-store-and-forward, packet satellite (if operational).

If you have worked the satellites on Field Day in recent years, you may have noticed a lot of good contacts can be made on some of the less-populated, low-earth-orbit satellites like VUSat OSCAR-52,Fuji-OSCAR 29 (may or may not be operational), AMSAT-OSCAR 7. During Field Day the transponders come alive like 20 meters on a weekend. The good news is that the transponders on these satellites will support multiple simultaneous contacts. The bad news is that you can't use FM, just low duty cycle modes like SSB and CW.

The AMSAT Field Day 2012 event is open to all Amateur Radio operators. Amateurs are to use the exchange as specified in ARRL rules for Field Day. The AMSAT competition is to encourage the use of all amateur satellites,

both analog and digital.

For the complete listing of the AMSAT Field Day Rules please refer to

the documents posted on-line at:

http://www.amsatnet.com/fd2012.doc

http://www.amsatnet.com/fd2012.pdf

Links are also accessible from http://www.amsat.org front page.

[ANS thanks AMSAT Director Contests and Awards, Bruce Paige, KK5DO for the above information]

Japan Amateur Radio Satellite Launch May 17 - Telemetry on 437.375 MHz

The May 17 launch from Japan of the H-IIA rocket delivered a JAXA climate observation satellite SHIZUKU (GCOM-W) and a South Korean earth observation mission KOMPSAT-3 into orbit also launched an amateur radio satellite HORYU-2, built by students at the Kyushu Institute of Technology (KIT).

The HORYU-2 Cubesat includes several experiments:

300 volt power generation in LEOCOTS technology demonstration of surface potential measurementOrbital debris observationEarth photography

The satellite callsign is JG6YBW and radio amateurs are asked to listen for the 437.375 MHz telemetry downlink. The CW data is composed of an 11 character callsign "JG6YBW HORYU" followed by 15 characters of telemetry data. Details of the telemetry format are available via a link on the AMSAT-UK web.

More information is available on the web:

Horyu website in Google English: http://tinyurl.com/HoryuSatellite

http://www.uk.amsat.org/6638

http://www.uk.amsat.org/4279

http://www.uk.amsat.org/7404

http://www.uk.amsat.org/7540 (showing Horyu-2 separation on-orbit)

Initial TLE set can be found on-line at:

http://kitsat.ele.kyutech.ac.jp/Docu...tation/TLE.txt

The 437.375 MHz telemetry downlink also transmits 1200 bps AX.25 packet radio. There is a monthly competition for those who send data received from the telemetry to the KIT server, via the HORYU-2 telemetry analysis software which can be downloaded from the Kyushu Institute of Technology web.

Day 1 Initial Reception Reports

The CW signal from HORYU-2 was copied in South America by LW2DTZ on 437.375 MHz on May 17 on a 10 degree elevation pass using 7 element yagi antenna. A strong downlink CW beacon signal was heard in Sudan by ST2NH. GW1FKY reported a strong signal was heard in Wales, UK. JE9PEL captured downlink telemetry from Japan.

[ANS thanks the Horyu-2 team and AMSAT-UK for the above information]

Three Hams Arrive at ISS & Prepare for SpaceX Dragon Arrival

The three crew members who are licensed amateur radio operators were successfully launched on Monday aboard a Russian Soyuz TMA-04M space craft from the Baikonur Cosmodrome in Kazakhstan and have arrived at the International Space Station. The three ham crew consists of NASA Flight Engineer Joseph Acaba, KE5DAR, and two Russian crewmates, Soyuz Commander Gennady Padalka, RN3DT, and Flight Engineer Sergei Revin, RN3BS.

Their arrival brings the crew roster up to six as they join Expedition 31 Commander Oleg Kononenko, RN3DX, of the Russian Federal Space Agency, Flight Engineer Don Pettit, KD5MDT, of NASA and Flight Engineer Andrei Kuipers, PI9ISS, of the European Space Agency, who have been aboard the ISS since December 2011.

NASA reported on the events after arrival of the crew in their ISS On-Orbit Status report. The NASA ISS daily status report for May 18 notes that Joe, KE5DAR also powered on the ham radio station in the Russian Service Module. A NASA video report of the ISS crew activities describes the activities.

The new crew members will begin preparations for the arrival of an unmanned Dragon cargo ship built by SpaceX. Originally scheduled for launch on May 19, a faulty check valve on an engine caused an abort. SpaceX is replacing the failed valve. The next launch attempt is at present planned for Tuesday, May 22 at 3:44 AM EDT (UTC-4).

Dragon will deliver about 1150 pounds of food, clothing and other low-priority items. The capsule then will be repacked with around 1455 pounds of trash and no-longer-needed components and detached from the space station on May 31. SpaceX plans to guide the craft back to Earth for a parachute descent to a Pacific Ocean splashdown to complete the test flight. If the test flight goes well, SpaceX hopes to begin routine cargo delivery missions in August, 2012. The Dragon capsule will also deliver 15 student experiments from the Student Spaceflight Experiments Program (SSEP).

Soon after Dragon a Russian Progress vehicle will arrive. In July a Japanese HTV cargo ship will arrive. The crew will also be managing over 215 scientific investigations affecting over 400 scientists on the ground.

An on-line Expedition 31 Mission Status page can be found at:

http://spaceflightnow.com/station/exp31/status.html

For additional details of the Soyuz launch see:

http://spaceflightnow.com/station/exp31/120514launch/

Archived video of the Soyuz launch can be viewed on-line at:

http://www.universetoday.com/95174/e...31-blasts-off/

[ANS thanks SpaceFlightNow.com and UniverseToday.com for the above information]

CubeSat Article in Time Magazine

In an article titled, "How a Pocket-Size Satellite Could Find Another Earth", Time Magazine reports that unlike the massive NASA Kepler probe the next mission to search for new planets will be a tiny CubeSat called ExoplanetSat.

Time says: What makes ExoplanetSat even more un-NASA-like is that it began as a class project □ although admittedly, the class was at MIT. It was a design-and-build course, which the university□s engineering students have to take in order to graduate. In a recent semester, the class was co-taught by Sara Seager [KB1WTW] an astrophysicist who has done groundbreaking research studying how the atmospheres of planets orbiting distant stars might look like from earthly telescopes. Seager recruited five science undergrads to join her engineers, on the

theory that out in the real world, they□d eventually have to work with engineers anyway.

The group is developing a prototype ExoplanetSat capable of monitoring a single, bright, sun-like star for two years. Planned to launch late 2012 or 2013 it is hoped it will open the gates for ExoplanetSat interest and funding. Once the funding doors are opened, then the fleet of ExoplanetSats can be launched. The fleet may contain as many as a hundred of these small satellites, each focused on its own star.

In a 2011 visit to Cambridge, UK, Sara said □The reason why we□re excited is because we think that this is a really huge thing. Hundreds and thousands of years from now, people will look back and ask, what are the significant accomplishments of our society in the early twenty-first century? One of them will be that we were the first to discover other worlds and other worlds that might be like Earth. When you think back four hundred years, what do you remember? You think about Christopher Columbus and Lewis and Clark. It□s the exploration□finding things that were new to our culture. And that□s why we□re excited.□

Read the Times Magazine article at

http://www.time.com/time/health/arti...114158,00.html

MIT paper on ExoplanetSat

AMSAT-UK article at: http://www.uk.amsat.org/7348

[ANS thanks AMSAT-UK for the above information]

Promising Future of CubeSat Missions in UK Metro Newspaper

The May 14, 2012 edition of the Metro newspaper carried a story by Ben Gilliland, "The next space age: Cuberty", on pages 26-27 about CubeSats. Among those mentioned is the UK amateur radio Android smartphone CubeSat STRaND-1 which is being built by volunteers at the Surrey Space Centre (SSC). You will be prompted for an email address but anything that looks like an email address will keep the prompt happy and you can then read the newspaper.

Ben Gilliland□s article is also available on the CosmOnline website. See also: http://www.uk.amsat.org/7395

[ANS thanks Trevor, M5AKA and AMSAT-UK for the above information]

Satellite Shorts From All Over

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK. The AMSAT front page news at http://www.amsat.org has the instructions to submit your nominations.The 2012 AMSAT Annual Meeting and Symposium will be held at the Holiday Inn, Orlando (Florida) Airport on October 26-28, 2012. The First Call for Papers has been issued. The Symposium Team requests a tentative title of your presentation as soon as possible, with final copy to be submitted by October 1 for inclusion in the printed proceedings. Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv at amsat.org. Watch for the latest 2012 Symposium information to be posted on the AMSAT web.While the AMSAT on-line store is closed due to technical issues you can place an order through the AMSAT office. The hours are 10:00 AM - 6:00 PM EDT. Our phone number is 301-589-6062. Martha is looking forward to hearing from you!Clint Bradford, K6LCS and Rich Arland K7SZ collaborated on an article, "Learning Curve - Working the Birds" which was just published in the May, 2012 Dayton Special issue of CQ magazine.The future plans of the QB50 network of 50 CubeSats in a 'string-of-pearls' configuration that will be launched together in the first half of 2015 by a single rocket has caught the attention of the press. The UK Daily Mail published an article how the network of 50 satellites aims to find out what happens INSIDE the northern lights and hopefully 'forecast' solar weather.A Video showing a time lapse view of Earth's Northern Hemisphere from Russia's Electro-L Weather Satellite is posted on-line.+ Two videos, one of the Aalto-1, about Finland's first satellite project, showing their new groundstation and an animation of the mission is posted on the AMSAT-UK web.+ Though likely no operation on amateur radio satellites at this time, the re-planned TX5, Clipperton Island DXpedition has a plan to utilize satellites. The Cordell Expeditions is pleased to announce a DXpedition to Clipperton Island in early 2013. The team of 24 will sail from San Diego on February 19, 2013, and will be active from Clipperton for 10 days starting around March 1. They will be active on all bands and all modes, and will use DXA, the satellite-linked system that displays near-real-time log data on any Web

browser. They state, "We invite your participation in this project, as a team member, supporter, or callsign in our log!"

Clipperton Island Web page: http://www.cordell.org/CI/index.html

Details of DXA satellite program: http://www.cordell.org/DXA/

The DXA program is also planned to be used on a Cordell Expeditions trip to VK0H, Heard Island in early 2014. (via Ohio/Penn DX Bulletin #1062, and #1062.2)+ 51 years ago on May 5, 1961, NASA launched the Mercury-Redstone 3 rocket carrying Alan B. Shepard, Jr. aboard the Freedom 7 capsule. Shepard successfully became America□s first man in space, making a brief but historic suborbital test flight that propelled American astronauts into the space race of the 1960s. NASA has compiled a video from from photographs taken by a film camera mounted to the Freedom 7 spacecraft. Compare the view in 1961 with the latest generation of space video we routinely receive from the ISS.+ Tom Doyle, W9KE posted a video demonstrating a feature he hoped to turn into a SatPC32 Add-On. It provides a "Look Down" perspective as if you were a passenger aboard the satellite. The video is HD and looks best viewed full screen in 720p.+ Check out the view of the Big Dipper from 290 million km away taken by NASA's Juno spacecraft en route to Jupiter.

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that please keep in mind if you were to take all of the water on Earth, all of the fresh water, sea water, ground water, water vapor and water inside our bodies, take all of it and somehow collect it into a single, giant sphere of liquid, it would make a ball 860 miles (1,385 km) in diameter, only about as wide edge-to-edge as the distance between Salt Lake City to Topeka, Kansas. That's it.

73,

This week's ANS Editor,

JoAnne Maenpaa, K9JKM

K9JKM at amsat dot org

If you're an ARRL member, you now have access to the new digital
edition <http://www.nxtbook.com/nxtbooks/arrl/qst_201206/index.php> of
the June 2012 issue of QST. It is available to all ARRL members at no
cost. All you need to do is log on to the ARRL website. Also available:
digital editions of the January through May 2012 issues. You will find
links to all the digital editions on our website
<http://www.arrl.org/qst/>. But wait -- there's more! All ARRL members
```

now also have access to every issue of QST via the Periodicals Archive <http://www.arrl.org/arrl-periodicals-archive-search> -- from the first issue, published in December 1915, through the December 2011 issue. You'll find more information about the digital edition in the FAQ <http://www.arrl.org/digital-qst-faq> (frequently asked questions) section. We hope you enjoy the new digital editions of QST. Unless you have chosen to opt out <http://www.arrl.org/QST-Print-Edition-Opt-Out-Form> of the print edition, you will continue to receive QST in the mail each month.

==> + DAYTON HAMVENTION®: THOUSANDS OF HAMS GET "INTERNATIONALLY CONNECTED" IN DAYTON

When Hara Arena -- home of the Dayton Hamvention for the past 48 years -- opened its doors at 9 AM on Friday, May, 18, thousands of hams swarmed in, eager to see the latest and greatest that Amateur Radio has to offer. And they weren't disappointed! With the introduction of three new transceivers this year, as well as hundreds of vendors inside and in the world-famous flea market, there was a definite buzz in the air, especially within the ARRL EXPO

ARRL EXPO -- located in the Ball Arena Hall of the large Hara Arena -- included more than 20 exhibits staffed by ARRL program representatives. Among the new booths for 2012 was an exhibit introducing the new digital edition of QST, ARRL's membership journal. There were laptops, tablets and iPads on hand at the booth so hams could explore the online edition of QST. All ARRL members now have access to this exciting new member benefit.

Visitors to the ARRL EXPO saw a lot of activities relating to DX, including DXCC card checking and a chance to drop off QSL cards for the ARRL Outgoing QSL Bureau. Representatives from the International Amateur Radio Union and IARU Member-Societies, including the Deutscher Amateur Radio Club, the Japan Amateur Radio League, the Qatar Amateur Radio Society and the Radio Society of Great Britain were on hand within the ARRL EXPO. "The theme of the 2012 Hamvention was Internationally Connected," explained ARRL Marketing Manager Bob Inderbitzen, NQ1R. "What better way to get connected than meeting with fellow radio amateurs from around the world?" Read more here <http://www.arrl.org/news/thousands-of-hams-get-internationally-connected-in-dayton>.

==> + SCOUTING AND AMATEUR RADIO: ICOM TO SUPPORT BOY SCOUTS AT NATIONAL JAMBOREE AND AT LOCAL COUNCIL LEVEL

Against the backdrop of the 2012 Dayton Hamvention® -- the largest gathering of radio amateurs in the US -- ICOM America announced a sponsorship agreement with the Boy Scouts of America for the organization's 2012 National Scout Jamboree. As the BSA's official Amateur Radio transceiver supplier for the jamboree, ICOM will provide equipment and technical support for the K2BSA radio operation, the Radio merit badge and Jamboree on the Air. Read more here

<http://www.arrl.org/news/icom-to-support-boy-scouts-at-national-jamboree-and
-at-local-council-level>.

==> CQ ANNOUNCES 2012 HALL OF FAME INDUCTEES

CQ magazine announced its 2012 Hall of Fame inductees on May 18, welcoming 16 new members into the CQ Amateur Radio Hall of Fame, two new members of the CQ DX Hall of Fame and two new members of the CQ Contest Hall of Fame. The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to Amateur Radio, as well as those amateurs who have made significant contributions either to Amateur Radio, to their professional careers or to some other aspect of life on our planet. The CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of Amateur Radio but who also "give back" to Amateur Radio in outstanding ways. Read more here <http://www.arrl.org/news/cq-announces-2012-hall-of-fame-inductees>.

==> + NEW "PRB-1" LAW NOW IN EFFECT IN OHIO

On May 15, Ohio Governor John Kasich signed a bill, granting comprehensive rights to Amateur Radio operators in that state. HB 158 codifies the federal restrictions on the local zoning of amateur station antenna structures, thereby preserving Amateur Radio Service communications as a Homeland Security resource, placing the burden of proof for compliance on the zoning authority. According to ARRL Ohio Section Manager Frank Piper, KI8GW, this places the full language of Section 97.15 <http://ecfr.gpoaccess.gov/cgi/t/text/text-idx?c=ecfr&sid=b95e71ef3fb3aac663d8913d35a596f0&rgn=div8&view=text&node=47:5.0.1.1.6.1.157.8&idno=47> into the Ohio Revised Code: "This new law law states that 'Any legislative authority that denies an application for approval of an amateur station antenna structure shall state the reasons for the denial and shall, on appeal, bear the burden of proving that the authority's actions are consistent with this section.' This language removes the burden of proof from the Amateur Radio operator and places it on the legislative authority." Read more here <http://www.arrl.org/news/new-prb-1-law-now-in-effect-in-ohio>.

==> SECTION MANAGER ELECTIONS: ARRL SPRING SECTION MANAGER ELECTION RESULTS ANNOUNCED

Of the nine Section Manager elections this spring, two were decided by member balloting. Ballots were counted on May 22 at ARRL Headquarters. Terms for these ARRL Field Organization officials begin July 1. Lou Everett Sr, WA5LOU, of Indianapolis, was elected as the new Indiana Section Manager, and Paul Eakin, KJ4G, of Panacea, was re-elected as the North Florida Section Manager. Read more here <http://www.arrl.org/news/arrl-spring-section-manager-election-results-announced>.

==> + FCC DISMISSES TEXAS HAM'S FOURTH PETITION, CALLS IT "REPETITIVE"

For the fourth time in six years, the FCC has rejected a Petition for Rulemaking filed by Glen Zook, K9STH. In each of his Petitions, (2006, April 2009, 2011 and a Petition for Reconsideration in December 2009), Zook has asked the FCC to change its station identification rules as set forth in Section 97.119(a). His 2011 Petition was no different: Zook told the FCC that since "[v]irtually every amateur station does not identify at the end of the communication," he requested that the station identification rule be amended to provide that if an amateur station transmits its call sign during its first transmission, that station need not transmit its call sign at the end of the transmission, provided that the transmission is less than three minutes. Zook called this the "3-minute rule." Read more here <http://www.arrl.org/news/fcc-dismisses-texas-ham-s-fourth-em-petition-em-calls-it-repetitive>.

==> SOLAR UPDATE

Tad "Greater than stars or Suns <http://www.youtube.com/watch?v=dWeeK1RlOJ8>" Cook, K7RA, reports: The average daily sunspot numbers declined seven points over the past week, to 110.3, while the average daily solar flux dropped 3.3 points to 131. These unsettled geomagnetic conditions over the past few days most likely resulted from an interplanetary shock wave due to a solar flare on May 20. The predicted planetary A index is 12, 5 and 8 on May 24-26, then 5 on May 27-28, 8 on May 29, 5 on May 30-June 4, then 8, 12, 15, 10 and 8 on June 5-9, followed by 5 on June 10-11, 8 on June 12-13, 5 on June 14-16, then 8, 15, 10 and 8 on June 17-20, and 5 on June 21-25. The predicted solar flux is 115 on May 24-25, 110 on May 26, 105 on May 27-30, 115 on May 31, then 120, 125, 125 and 130 on June 1-4, and 135 on June 5-9. Four new sunspot groups arose in the past week, on May 18, 20, 22 and 23. Until June 4, the predicted solar flux values are below the average for the past week, at 127.7. Look for more on the ARRL website on Friday, May 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Ralph Vaughan Williams' Sea Symphony <http://en.wikipedia.org/wiki/Sea_Symphony> (IV The Explorers), taken from Walt Whitman's Leaves of Grass <http://en.wikipedia.org/wiki/Leaves_of_Grass> (Book XXVI <http://en.wikisource.org/wiki/Leaves_of_Grass/Book_XXVI>, Passage to India, verse 8).

==> + SILENT KEY: FORMER ARRL FIRST VICE PRESIDENT STEVE MENDELSOHN, W2ML (SK)

After a courageous battle with pancreatic cancer, Steve Mendelsohn, W2ML, of Dumont, New Jersey, passed away May 23. He was 67. An ARRL Life Member, Mendelsohn began his time with ARRL in 1983 when he was elected as Vice Director of the Hudson Division. After two terms as Vice Director, he was elected as Hudson Division Director in 1987. In 1996, the ARRL Board of Directors elected Mendelsohn as its First Vice President, where he served until 2000. The next year, he was again

elected as the Hudson Division Vice Director, serving through 2004.

Outside of his League activities, Mendelsohn was active both as the Communications Director of the New York City Marathon and, along with his wife Heidi, W2MLW, as the Game Day Frequency Coordinator (GDC) for the New York Jets. The November 2007 issue of QST featured Mendelsohn on its cover, along with an article about him and the GDC program. Mendelsohn was inducted into the CQ Hall of Fame last week for his contributions to the ARRL, the New York City Marathon and the National Football League. Read more here <http://www.arrl.org/news/former-arrl-first-vice-president-steve-mendelsohn-w2ml-sk>.

==> SILENT KEY: FORMER ARRL ATLANTIC VICE DIRECTOR JIM MOZLEY, W2BCH (SK)

James M. Mozley, W2BCH -- who served as Vice Director of the ARRL Atlantic Division from 1986-89 -- died May 13. He was 89. A long-time resident of Camillus, New York, Mozley was active in the ARRL Western New York Section as an Assistant Section Manager and as an Official Emergency Station. He also served as an Official Observer from 1991-2004. He also served as the Western New York Section Emergency Coordinator when Bill Thompson, W2MTA, became the Section Communications Manager in 1980. Read more here <http://www.arrl.org/news/former-arrl-vice-director-jim-mozley-w2bch-sk>.

==> + ARRL HEADQUARTERS TO CLOSE IN OBSERVANCE OF MEMORIAL DAY HOLIDAY

ARRL Headquarters will be closed Monday, May 28 in observance of the Memorial Day holiday. There will be no W1AW code practice or bulletin transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, May 29 at 8 AM (EDT). We wish everyone a safe and enjoyable holiday weekend!

==> AMATEUR RADIO IN SPACE: AMATEURS ASKED TO LISTEN FOR HORYU-2 SATELLITE

The Japanese HORYU-2 <http://kitsat.ele.kyutech.ac.jp/index_e_new.html> research satellite was launched May 17 at 1639 UTC as part of a mission that included the JAXA climate observation satellite Shizuku. HORYU-2 was built by students at the Kyushu Institute of Technology (KIT) and it carries the call sign JG6YBW. The satellite will conduct a variety of experiments including high-voltage power generation and space debris measurements. Amateurs have been asked to monitor HORYU-2's Morse code and 1200-baud AX.25 packet telemetry at 437.375 MHz. Telemetry decoding software is available for download <http://kitsat.ele.kyutech.ac.jp/Documents/ground_station/Horyu2%20Data_Analysis_Program_japanese.zip>.
To encourage hams to submit reports, KIT will conduct a monthly prize drawing. Details are available here <http://kitsat.ele.kyutech.ac.jp/Documents/ground_station/english/Receive_com

petition_eng.pdf>.

==> THIS WEEK IN RADIOSPORT

This week:

- May 25 -- NCCC Sprint Ladder
- May 26-27 -- CQ WW WPX Contest (CW)
- May 27 -- QRP ARCI Hootowl Sprint (local time); SARL Digital Contest
- May 27-28 -- Michigan QRP Memorial Day CW Sprint

Next week:

- June 1 -- NCCC Sprint Ladder; HA3NS Sprint Memorial Contest
- June 2 -- Wake-Up! QRP Sprint
- June 2-3 -- Alabama QSO Party; Maritime QSO Party; 10-10
International Open Season PSK Contest; SEANET Contest
- June 5 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 1-3 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-3>,
Seaside, Oregon
- June 2 -- ARRL Georgia Section Convention
<http://www.arrl.org/hamfests/georgia-section-convention-atlanta-hamfest-1>,
Marietta, Georgia
- June 8-9 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>,
Plano, Texas
- June 9 -- ARRL Arkansas State Convention
<http://www.arrl.org/hamfests/arkansas-state-convention>, Rogers,
Arkansas; ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-2>, Knoxville,
Tennessee
- June 30 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-electro
nics-expo-firecracker-hamfest>,
Harrisburg, Pennsylvania
- July 20-22 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-78th-glacier-waterton-
international-hamfest>,
East Glacier, Montana
- July 26-28 -- Central States VHF Society Conference

HAM HAPPENINGS: DAYTON 2012

The city of Dayton, Ohio was invaded over the weekend of May 18, 19 and 20 by radio amateurs from all over the world for the Dayton Hamvention. By all accounts it was a huge success. The weather was, for the first time in many years, absolutely perfect. Sunny days in the upper 80s and clear nights in the 50s made for great strolls through the massive flea market. No matter what obscure or rare item you're looking for, odds are that someone in the flea market has it for sale. The old saying of "if you can't find it at Dayton it doesn't exist" is really true. Don Dubon, N6JRL is president of the Dayton Amateur Radio Association, the sponsoring club for the Hamvention. He says this was an excellent year.

--

Audio report only. Please download the audio version of this weeks newscast at www.arnewsline.org.

--

Of course, it takes more than just DARA to put on a show of this size. It is truly a group effort.

--

Audio report only. Please download the audio version of this weeks newscast at www.arnewsline.org.

--

Always at the sharp end of the pileup is Bob Heil, K9EID.

--

Audio report only. Please download the audio version of this weeks newscast at www.arnewsline.org.

--

This year, Bob added television host to his resume. Ham Nation is an Internet television show all about amateur radio and the crowds were even thicker around Audio Alley.

--

Audio report only. Please download the audio version of this weeks newscast at www.arnewsline.org.

--

Amateur Radio Newsline is honored to be a part of Ham Nation. Bringing the magic of our great hobby and service to a new and very receptive audience.

Amid the new product announcements was very exciting news that Icom is now the official amateur radio supplier of the Boy Scouts of America Jamboree On The air. Icom has assembled a number of self contained "go kits" containing everything needed to get on the air from JOTA and other scouting events consisting of an Icom IC 7200 and everything else needed to get on the air.

Kenwood debuted their latest and greatest, the TS-990. Phil Parton, N4DRO goes over some of the features.

--

Audio report only. Please download the audio version of this weeks newscast at www.arnewsline.org.

--

Expect the new TS-990 to begin shipping in the last quarter of this year. The retail list price hasn't been released yet, but Phil says between $5000 and $10,000 is a good ballpark. From the looks of it, it's worth every penny.

Another new rig debuted at Hamvention was the long awaited Heiberling PT-8000. As we hear from DH7JH, it is indeed finally a reality.

--

Audio report only. Please download the audio version of this weeks newscast at www.arnewsline.org.

--

So how much is the Heiberling PT-8000 you ask?

--

Audio report only. Please download the audio version of this weeks newscast at www.arnewsline.org.

--

Yes. He said $17,000. Not Euros, US Dollars. Time to start saving that spare change.

Over the years Amateur Radio Newsline has relied on one seasoned, some say grizzled, Dayton veteran to distill the Dayton experience down to it's true essence. That fabled old ham is none other than Chip Margelli, K7JA from CQ Publications.

--

Audio report only. Please download the audio version of this weeks newscast at www.arnewsline.org.

--

That , of course, just scratches the surface of Hamvention 2012. We'll have more from Dayton in next week's Amateur Radio Newsline report.

**

**

RADIO BUSINESS: LIGHTSQUARED - THE NEVER ENDING STORY TAKES A NEW TURN

Is it an end to the story that never seems to end? Possibly as word that LightSquared Inc. has filed for Federal bankruptcy protection. This as it says that it will continue to try and resolve the concerns of U.S. regulators who frustrated the company's plan to deliver high-speed wireless to as many as 260 million people.

LightSquared, based in Reston, Virginia, listed assets of $4.48 billion and debt of $2.29 billion as of February 29th in a Chapter 11 filing May 14th in U.S. Bankruptcy Court in Manhattan, New York. The filing followed intense negotiations with creditors, who had requested that the company's backer, Philip Falcone, step aside. Falcone and the current management team will remain with the company according to company spokesperson , Terry Neal.

But this might not be the last time we hear from LightSquared. In a statement, Falcone noted that the bankruptcy filing was not option the company embraced quickly or easily. Rather that it was necessary to protect LightSquared against creditors who were looking for a quick profit.

Falcone added that LightSquared remains committed to our original mission, and that he is steadfast in his belief that a path forward exists that will satisfy and benefit all constituencies.

LightSquared's plans for a high speed high speed broadband network hit a roadblock in February. That's when the FCC said it would withdraw preliminary approval for the company's network after government tests found that the signals would interfere with global-positioning systems. That decision followed a yearlong fight between LightSquared versus GPS users and providers.

The bottom line: If Lightsquared is successful in reorganizing under the Federal Bankruptcy Law, the never ending story could be with us for some time to come. (Published news reports)

**

RADIO EDUCATION: DXING FROM THE BLACK HOLE SEMINARS IN ILLINOIS IN SEPT

"DX'ing from the Black Hole is the title of a multi-session course to be presented this fall in conjunction with the 60th W9DXCC DX Convention to be held in Schaumburg, Illinois,

The W9DXCC convention committee has announced it will offer a 4 session class on Friday, September 14th to introduce ham operators to the excitement and fun of DXing.

The class has been designed for new and inexperienced DX'ers. Each session will cover a different aspect of DX'ing including operating practices, station design, chasing awards, QSL'ing and propagation from the area known as the Black Hole.

All presenters are accomplished DXers from the Northern Illinois DX Association. Between them they represent over 100 years of experience that includes participation in DXpedition operations to rare locations around the world and numerous awards. Please contact W9MU by e-mail to jhudson (at) wishcom (dot) net for further details and information." (W9DXCC)

**

HAM HAPPENINGS: D-STAR AT THE 2012 LONDON OLYMPICS

The London GB7OK D-STAR repeater server has been updated with Jonathan Naylor, G4KLX's software and can now access all D-STAR reflectors. Also, four new D-Star nodes in London area have come on air just in time for 2012 Olympics. The four nodes are MB6IHF in West London, MB6INL in North London, MB6IOK in South East London and MB6SS located in South West London. All four nodes will give D-STAR access to all Dplus, XRF and DCS reflectors. (G1HIG)

**

RADIO MARKETPLACE: CW LAUNCHES INDUSTRY INSIDER NEWSLETTER

CQ Communications has announced the launch of the CQ Industry Insider, an e-mail newsletter for the hobby radio industry. The newsletter will report on news and trends in the amateur radio, scanning and listening marketplace, as well as company news and announcements, marketing tips and an idea exchange for spotlighting concepts for new products and services.

According to Publisher Dick Ross, K2MGA, the goal in publishing the Industry Insider is to help businesses in the amateur radio industry thrive and grow by sharing industry news and trends, marketing tips and product ideas.

The Editor of the CQ Industry Insider is Jason Feldman, who currently works with both Popular Communications and WorldRadio Online, and is Director of Pop'Comm's monitoring registration program. He came to CQ with considerable experience in producing e-mail trade newsletters.

Feldman will be backed up by Ad Manager Chip Margelli, K7JA; Editorial Director Rich Moseson, W2VU; Production Director Dottie Kehrwieder, and the rest of the CQ Communications staff.

The CQ Industry Insider is being distributed initially to companies and individuals already on the CQ advertising department e-mail list. Industry members not on the list who would like to be added should contact Chip Margelli by e-mail to ads@cq-amateur-radio.com. (CQ)

**

NAMES IN THE NEWS: LOGBOOK OF THE WORLD MARKS 50,000 USERS

A Serbian ham is the holder of what can best be described as an electronic honor. On May 1st Dragan Pavlovic, YT3PDT, completed his registration process for Logbook of The World. As such he becamethe 50,000th person to take advantage of the ARRL's online QSL confirmation system.

According to ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N there are more than 3500 individuals from outside the US in the process of obtaining a digital certificate. There are also numerous hams here in the US who have started the certificate process, but not yet finished. (ARRL, WIA)

**

WORLDBEAT: WRTH A-12 SHORTWAVE BROADCAST SCHEDULES AVAILABLE

The World Radio and Television Editorial team has announced that the Summer 'A' season broadcasting schedules file is now available to download, free of charge, from the WRTH website. The 86 page file is approximately 4500 kB in size and contains the kind of information that SWL's need to keep on top of the summer DX season. To get a copy take your web browser to www.wrth.com and follow the link "Latest PDF Updates." (WRTH)

**

WORLDBEAT: EGYPT NATIONAL SOCIETY TO CONCENTRATE ON YOUTH EDUCATION

IARU Region 1 Youth Coordinator Lisa Leenders, PA2LS, reports that youth oriented amateur radio activities in Egypt are on the increase.

In a recent report, Leenders noted that the Egyptian Radio Amateurs Society or ERASD, has announced plans to promote and improve amateur radio services and youth activities in Egypt. This through the participation in more international and regional activities.

An ERASD prepared plan for three years is divided into four key points. These are Radio Activities, Education, Society's Station, Media. During the radio Activity the Egyptian Radio Amateurs Society will be providing educational programs and materials to promote amateur radio and develop the scientific and technical skills of youth in the hobby. (IARU Region 1, Southgate)

**

WORLDBEAT: NORTHERN IRELAND BALLYMENA AMATEUR RADIO CLUB TURNS 65

Northern Irelands Ballymena Times reports that the Ballymena Amateur Radio Club has recognized by Ballymena Borough Council for their 65 years of service to the community.

Recently, members of the club were invited to the Ballymena Mayor's office to be presented with a plaque for their achievement. Chairman Aubrey Kincaid gave a short speech to Mayor Hubert Nicholl explaining the club's history. According to Aubrey, the club was officially started back in 1947 by local radio enthusiasts and ex-servicemen. However it's thought a club was in operation and on the air as far back as 1929. (IRTS)

**

HAM RADIO IN SPACE: STUDENT PROJECT MAY FLY IN SPACE

GoErie.com reports on the work of students from Penn State Behrend who developed a super capacitor based energy storage device designed to replace the silver-zinc battery on ARISSat type satellites.

According to the report, when David Jesberger, Kathleen Nicholas and Jacob Sherk graduated on May 4th from Penn State Behrend, they left behind a finished senior project that could soon be headed into space. This is because senior engineering students at Behrend pitch ideas each year for projects they would like to tackle in their final year.

Nicholas, Jesberger and Sherk all bid for a chance to be part of a project for the Radio Amateur Satellite Corporation. The result of their work was a collection of fifteen super-capacitors linked together by a circuit board that also contained their names and the famed college mascot Nittany Lion paw print. You can read more about this student team effort on-line at tinyurl.com/supercap-battery. (Erie Times News, Southgate)

**

RADIO EDUCATION: IEEE BROADCAST TECHNIOLOGY SOCIETY EXTENDS ABSTRACT DEADLINE

The Institute of Electrical and Electronic Engineers' Broadcast Technology Society has announced an extension of the deadline for receiving abstracts of prospective papers to be presented at the organization's annual fall 2012 IEEE Broadcast Symposium. A final date of May 31st has been set for delivery of abstracts by prospective presenters.

Submissions are welcomed from broadcasters, researchers, developers, technology suppliers and service providers within the field of broadcasting. Submissions must indicate that abstract is for the 2012 IEEE Broadcast Symposium, and contain complete contact information, including the author's full name, affiliation, mailing address and telephone number. Abstracts should be limited to 1,000 words and should be sent via email to bts@ieee.org.

Proposals for panel discussions involving technology, applications, business models and policy-related issues and opportunities within the broadcasting industry are also being solicited. In addition, proposals for half-day tutorial sessions on broadcast technology topics are welcomed.

This year's symposium event will be held in Alexandria, Virginia from October 17th to the 19th. (RW)

**

HAM HAPPENINGS: NEW JERSEY CLUB TO ACTIVATE SUBMARINE RADIO STATION

The Nutley Amateur Radio Society, of Nutley New Jersey, will be activating the radio room of the World War II Submarine the USS Ling. This as a part of the world-wide Museum Ships Weekend on June 2nd and 3rd.

The Ling is a Balao class fleet submarine, measuring 312 feet and is a permanent museum ship, berthed on the Hackensack River at Hackensack, New Jersey. As we go to air it is expected that amateur radio stations on over 75 museum ships will be on the air for this event. (K2DC)

THE CHANGING OF THE GUARD: NYC MARATHON COMMUNICATIONS COORDINATOR AND FORMER NEWSLINE CONTRIBUTOR STEVE MENDELSOHN, W2ML - SK

For each of the 36 years that the New York City Marathon has been run, Steve Mendelsohn, W2ML, could be found in the lead vehicle with the race director traveling along with the lead male runner and relaying messages via ham radio. But this coming November, Steve will not be there. This is because our longtime friend lost his valiant battle against Pancreatic Cancer the morning of May 23rd. Steve was only 67 when he died at his home in Dumont, New Jersey. And as our producer Bill Pasternak tells us, this for him is not an easy goodbye:

--

Its not easy to say goodbye to a friend, and in the case of someone whom you have known for a good part of your life. So while others will give you statistics and facts about what Steve Mendelsohn, W2ML, did in his rather amazing life, I want to share a few personal thoughts.

I fist met Steve when he was working for one of the supply houses near what we New Yorkers called Radio Roe. Steve was a salesman and I had just saved enough to purchase the transmitter of my dreams. A Hallicrafters HT-40. Not the completed unit but rather the kit.

The truth be known, Steve tried to talk me out of the purchase saying there were better units for about the same price. But none of those covered 6 meters in addition to HF and so he made the sale. And as a result of that quick conversation we became friends for life. Only neither of us knew it at the time.

Fast forward the timeline to the late 1960's. In those days the ham radio meeting ground in New York City was the WA2SUR repeater on 2 meters operated by the late George LeDoux, K1TKJ. And it was there one afternoon that I heard some folks in QSO. One of the people had a familiar voice. His call was WA2DHF and his name was Steve. So I joined the QSO and quickly learned that this was the same Steve who had sold me the HT-40 kit almost a decade earlier. And I guess this is where it really all began.

There are a couple of personal stories involving Steve that I want to relate because they tell far more about Steve than anything purely ham radio, albeit both do have a ham radio connection.

The first revolves around the WA2ZWP repeater that a group of us Brooklynites put up in the late 1960's. We knew from the outset that we would be using a voice I-D but none of us knew how to properly interface an automotive 8 track player to an RCA Carfone transmitter. But Steve Mendelsohn did and he spent several evenings with this reporter explaining how to make the transistors in the tape player talk to the tubes in the repeater transmitter with no distortion and not so loud as to cover up those who were involved in a QSO. Steve knew audio technology and gladly shared it with myself and others.

But the most important Steve Mendelsohn story is the one that completely changed my life. It was in the winter of 1970. I was dating a gal named Sharon Wagner and every Sunday morning found me winding my way from Brooklyn out to Valley Stream to pick up the lady to go - well - go somewhere or do something. Be it just lunch and a movie or whatever, I would pick her up and we would be off to that proverbial somewhere. And it also became a ritual for everyone on WA2SUR to say hello to Sharon and for her to say hi in return. This with me in control of the transceiver. A Regency HR-2 as I recall.

Well this one Sunday after we had all said our hello's via WA2SUR, Steve says something like: ".you two have been going out for months. When are you going to ask the girl to marry you?"

At first I hemmed and hawed a bit looking for an excuse, but there was none to be had. Steve had put me into a corner where it was either catch the fish or cut bait and run. I knew that I was in love with the lady, so with all of New York hamdom listening in on 146.73 MHz, I asked Sharon to change her last name from Wagner to Pasternak. She immediately accepted and that September Sharon and I said "I Do."

If not for Steve, I do not know if I would have asked Sharon or any gal to become my wife. But thanks to him, I was forced to make a decision that was definitely the right one. 40 years so far and headed toward 41.

Over the decades Steve remained a true friend. Even after I moved West, we were never very long out of contact. When e-mail came along, it was even easier.

I still remember sitting on the phone and having him tell me about the fate-full meeting that got him involved in coordinating ham radio communications for the New York City Marathon. A position he loved and kept up for some 37 years.

And especially that one evening at the Dayton Hamvention way back in the 1980's where Steve engineered and edited one of our Westlink Report newscasts that was anchored by the late broadcast legend Jean Shepherd, K2ORS. A newscast recorded on a modified Sony portable reel to reel recorder that Steve had found out in his garage and made to work once again just for this occasion.

Theres so much more that I could relate if only we had the time because to me, Steve Mendelsohn, W2ML, was more than just another voice on the air. For the better part of five decades he was an important part of my life. He was my friend, and I will miss him.

Im Bill Pasternak, WA6ITF, and I dedicate this weeks newscast to my friend, the late Steve Mendelsohn, W2ML.

73 old buddy. I know we will meet once again in the future on the other side of the great eatherial abyss.

--

According to Bill, its impossible to tell the story of Steve Mendelsohn's amazing life and career in a short news item like this. However several print publications have. This includes a lengthy and well written tribute by the ARRL that can be found at tinyurl.com/w2ml-sk and a New York Times item on Steve's career as a communications coordinator at tinyurl.com/marathon-race-radio.

Steve Mendelsohn, W2ML is survived by his wife Heidi, W2MLW. As we go to air, memorial survives for Steve have not yet been announced. (ARNewsline(tm))

DX

In DX, word that F5IRO has received his Ugandan callsign 5X5RO. He will be operating CW and PSK during his spare time until June 8th. QSL via F8DFP.

OK7MT, OK5MM, and OK2PP have announced to be oprerational stroke P4 through May 31. They will sign P40H in the upcoming W-P-X CW Contest on May 26th and 27th. QSL via OK7MT.

Lastly, RK4FF should be on the air from Senegal as 6V7S through May 28th. Listen out for him on CW, SSB and RTTY on 80 through 10 meters. QSL via RK4FF.

(Above from various DX News Sources)

THAT FINAL ITEM: 90 YEAR OLD UK HAM GETS MASTERS DEGREE

And finally this week, a story on higher education that involved a ham radio operator.

Bert Gladwin G3FVO, a former MI 6 electronics engineer, has become the United Kingdom's oldest new graduate at the age of 90. This after graduating with a Masters degree from the University of Buckingham.

In his youth Gladwin left school at 14 and worked as a delivery boy. During World War II he served with the Royal Air Force and developed an interest in radio communications. After the war he worked for the Marconi company and obtained his amateur radio license.

Gladwin then worked for the Foreign Office setting up communications systems for British embassies around the world. He embarked on his degree in Intelligence History and Bletchley Park Studies at the age of 89 together with his wife, who was then 77.

G3FVO is not new to being a senior in taking advanced higher education courses. At the age of 60, he decided to undertake obtaining a Bachelor of Arts in Psychology. By the time he was 70 he had also completed a Bachelor of Science in Molecular Biology.

Bert Gladwin's advice to anyone considering a degree is to go for it at any age. He says that it's never too late to learn.

More is on-line at tinyurl.com/grad-at-90 (University of Buckingham)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

A reminder that the nominating period for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open. Full details and a downloadable nominating form are on our website at arnewsline.org/yhoty.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, in Southern Mississippi, saying 73 and we thank you for listening.

75th Anniversary of the Golden Gate Bridge Special Event Station

Posted: 24 May 2012 09:25 AM PDT
http://forums.qrz.com/showthread.php?347481-75th-Anniversary-of-the-Golden-Gate-Bridge-Special-Event-Station&goto=newpost

THE SAN FRANCISCO AMATEUR RADIO CLUB SALUTES THE 75th ANNIVERSARY OF THE GOLDEN GATE BRIDGE

The San Francisco Amateur Radio Club (SFARC) in cooperation with the California Historical Society (CHS) will mark the 75th anniversary of the opening of the Golden Gate Bridge by contacting other amateur radio operators throughout the world on Saturday, May 26th and Sunday, May 27th. The SFARC will operate on five amateur bands (28.375 24.975 21.275 18.125 14.275 7.175 3.750 SSB) using the special Federal Communications Commission assigned call sign W6G. It will transmit from its home station located at the San Francisco Veteran☐s Administration Medical Center at 42nd Avenue and Clement Street for 26 hours beginning at 1:00 PM PDT on May 26th and ending at 3:00 PM PDT on May 27th.

In announcing this event, SFRAC President Tony Dowler, K6BV, stated, ☐We are extremely proud to be a part of this historic occasion. The Golden Gate Bridge is known throughout the world not only as a great engineering feat, but also as a symbol of the San Francisco Bay Area. In that spirit we will be assisted by members from the Marin County Amateur Radio Club.☐

☐As a radio amateur myself, I am particularly pleased that these two pioneer organizations are cooperating in this worldwide event.☐ stated CHS President Thomas R. Owens.

Dowler further advised that confirmation cards will be sent to all stations contacted that request one. In addition, any station contacting W6G on all five amateur bands will receive a special certificate from the CHS marking that achievement.

The CHS, established in 1871, is the official State historical society and the SFARC, founded in 1916, is the oldest amateur radio club in the San Francisco Bay Area.

RVARC Supports the Marine Corps Historic Half

Posted: 24 May 2012 08:09 PM PDT
http://forums.qrz.com/showthread.php?347551-RVARC-Supports-the-Marine-Corps-Historic-Half&goto=newpost

Fredericksburg, VA., May 24, 2012: Sunday, May 20, members of the

Rappahannock Valley Amateur Radio Club (RVARC) supported the running of the

Marine Corps Historic Half in Fredericksburg, Virginia.

This was the fifth running of this annual event and once again the hams of

the RVARC donated their time, skills and equipment to support the United

States Marine Corps and the athletes who participated in the 13.1-mile race.

The club president, Tom Harmon (AK1E), and club event coordinator Warren Lee

(W4SHS) manned phone, packet and APRSR radios and computers in the net

control station at the command and operations center while 26 other club

members were stationed around the course at mile markers, aid and water

stations, and in the lead and trailing vehicles escorting the runners. One

member, Frank Haas (WA4PAG), ran the course as a participant, carrying an

HT.

Operators deployed in the pre-dawn darkness two hours before the starting

howitzer. All stations were manned and ready when, just five minutes before

the gun, all communications on the primary net simplex frequency were

disrupted by a case of tropospheric ducting that brought in traffic on a

repeater more than 200 miles away. All stations then switched to our

secondary frequency and the net was back up and ready when the gun went off.

The only other problem the club encountered during the event happened

several hours later when the club's EmComm truck, nicknamed "Harvey" and

owned and operated by Bernhard Behling (KJ4VOV), suffered a catastrophic alternator meltdown while following the last runner. Tom Hitt (W4LLK) then took over in his own car as the tail vehicle for the remainder of the race.

This year marks the 60th anniversary of the founding of the Rappahannock Valley Amateur Radio Club, and ARRL-affiliated club, which has been the recipient of many awards as an enthusiastic supporter of public service events in the Fredericksburg area for the last six decades.

Those hams who took part in Sunday's event were:

Tom Harmon (AK1E), Warren Lee (W4SHS), Jack Cavanaugh (KB4XF), Dar Horne (KD4CVC), Nick McCormick (KK4GBI),

Dave Seals (KG4SUM), Bob Kenny (AA2FD), Larry Campbell (AK4FB),

Joe Hammel, Jr (N3KWA), David Collins (N4WDC), Steve Hare (KI4UDE), Paul Travis Jr (K0PT), Tim Gajewski (KU4IY), Andy Thompson (N9VT), Wayne Gardner (KI4DAK), Chuck Hayward (KK4GSI), Robby Cherry (KD4WUO), Dennis Kieper (K4GZS), Patrick Schwarz (KB8RTZ), Gordon Thomas (WB4LNT), Dave Perrussel (KK4GBC), John Cross (WB4TYS), Jim McCloud (KU4C), Tom Hitt (W4LLK), Scott Bey (KK4DBA), Bernhard Behling (KJ4VOV), David Garvin (NO3B), Frank Haas (WA4PAG)

Fcc explores use of emergency aerial communications

Posted: 24 May 2012 01:57 PM PDT
http://forums.qrz.com/showthread.php?347511-Fcc-explores-use-of-emergency-aerial-communications&goto=newpost

FCC EXPLORES USE OF EMERGENCY AERIAL COMMUNICATIONS TO ENABLE QUICK RESTORATION OF COMMUNICATIONS FOR FIRST RESPONDERS, OFFICIALS, AND THE PUBLIC AFTER A MAJOR DISASTER STRIKES

Deployable Aerial Communications Architecture (DACA) Notice of Inquiry
Adopted Washington, D.C. ☐ Today, the Federal Communications Commission adopted a Notice of Inquiry (NOI) to explore the use of Deployable Aerial Communications Architecture (DACA) technologies. DACA technologies are aerial technologies such as unmanned aerial vehicles, weather balloons or existing aircraft that could provide emergency communications during or immediately after a major disaster, when terrestrial communications infrastructures may be damaged or disrupted.

☐During a disaster, when the terrestrial infrastructure is unavailable, DACA technologies could provide emergency communications to first responders and possibly civilians☐ noted David Furth, Acting Chief of the FCC☐s Public Safety and Homeland Security Bureau. ☐Ideally, DACA technologies could be deployed rapidly to the scene of a major disaster and enable immediate and continuous communications using the devices that first responders and other users carry with them everyday until the infrastructure is restored.☐

Federal, state, and local governments are constantly working to improve their emergency communications capabilities when a disaster strikes. Yet

there remains a gap during the first 72 hours after a catastrophic event when communications may be disrupted or completely disabled due to damaged facilities, widespread power outages, and lack of access by restoration crews into the affected area. DACA could provide temporary emergency communications to emergency management officials, first responders, critical infrastructure industry personnel, and the public to use their day-to-day communications devices seamlessly during and immediately after an emergency. Most significant, the use of DACA to ensure quick restoration of emergency communications could save lives.

In its Notice of Inquiry, the Commission seeks comment on:

· the deployment and operation of DACA technologies;

· the associated costs and benefits;

· coordinating and managing the use of DACA technologies; and

· authorizing the use of spectrum to support their operation.

The Notice of Inquiry also addresses DACA system performance issues, including questions on coverage area, capacity, interference mitigation, and interoperability.

Public comments are due 40 days from publication in the Federal Register, and reply comments are due 60 days from publication.

Action by the Commission May 24, 2012 by Notice of Inquiry (FCC 12-53). Chairman Genachowski, Commissioners McDowell, Clyburn, Rosenworcel and Pai. Separate statements issued by Chairman Genachowski, Commissioners McDowell, Clyburn, Rosenworcel and Pai.

For further information, contact Jennifer A, Manner, Deputy Chief, Public Safety and Homeland Security Bureau at (202) 418-3619 or jennifer.manner@fcc.gov.

FORECASTED GLOBAL LIGHTNING NOISE (QRN)-

Northern hemisphere low latitude regions can expect VERY HIGH thunderstorm lightning induced QRN tied to winter season proximity

to the Inter-Tropical Convergence Zone (ITCZ) as well as cold/warm/occluded fronts and associated extra-tropical cold core low

pressure systems.

Northern hemisphere mid latitude regions can expect HIGH TO VERY HIGHthunderstorm lightning induced QRN tied to winter

season cold/warm/occluded fronts and associated extra-tropical cold core low pressure systems.

Northern hemisphere high latitude regions can expect MODERATE TO HIGHthunderstorm lightning induced QRN tied to winter

season cold/warm/occluded fronts and associated extra-tropical cold core low pressure systems.

Southern hemisphere low latitude regions can expect VERY HIGH thunderstorm lightning induced QRN tied to summer season

proximity to the Inter-Tropical Convergence Zone (ITCZ) and tropical warm core low pressure systems.

Southern hemisphere mid latitude regions can expect HIGH TO VERY HIGHthunderstorm lightning induced QRN tied to summer

season cold/warm/occluded fronts and associated extra-tropical cold core low pressure systems, as well as tropical warm core low pressure systems.

Southern hemisphere high latitude regions can expect MODERATE TO HIGH thunderstorm lightning induced QRN tied to summer

season cold/warm/occluded fronts and associated extra-tropical cold core low pressure systems.

//
RFinder The World Wide Repeater Driectory now supports DStar!

Posted: 23 May 2012 08:50 PM PDT
http://forums.qrz.com/showthread.php?347430-RFinder-The-World-Wide-Repeater-Driectory-now-

supports-DStar!&goto=newpost

Press Release

05/23/2012

From the QTH of W2CYK

For immediate release

After attending the DStar forum in Dayton, it became apparent that there was a lack of DStar repeater locating options to the vastly growing population of DStar users. We at RFinder The World Wide Repeater Directory feel that all repeaters world wide, coordinated or not, digital or analog, radio-linked connected via Voice over IP should be in Ham Radio's first and only truly geo-enabled international repeater directory.

We are pleased to announce that by 2300Z 5/24/2012 we will fully support DStar in the directory. Western Hemisphere data is already loaded and we intend to have Eastern Hemisphere loaded by the indicated time. Currently we are loading approximately once a week but we hope to have a more quasi-realtime feed loaded within a month.

The WWRD Supporting DStar is just another step of making The World Wide Repeater Directory, it's third party applications such as RT Systems and CHIRP and of course the RFinder family of programs on iPhone, Android and www, Ham Radio's one-stop-shop for repeater data, no matter what the technology used for repeating radio signals.

RFinder is available in the Apple App Store for iPhone and Android, the web version can be found at http://www.rfinder.net.

RT Systems radio programming software for Window is WWRD enabled and can be found at http://www.rtsystemsinc.com

CHIRP is open source software and is WWRD enabled and can be found at http://chirp.danplanet.com

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1063
BID: $OPDX.1063
May 28, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Written/Relayed from Murfreesboro, TN

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, N4GN, K6VVA, KH6BZF, K8BL, K8GI, K8YSE, W8GEX & 60m News, W9ILY, W9RN, 4J5T, AT International, CO8ZZ, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/ IK1ADH & 425 DX News, IZ4AKS, OH2BH, OK2BOB, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX CW Contest participants.

** SPECIAL NOTE FROM EDITOR (Short Dayton HamVention Wrap-Up By KB8NW): The 2012 Dayton HamVention was really great this year. The weather was hot, but good. The attendance was high - reported 25,000+. There were plenty of things to do and see. I heard there were great turnouts at all the dinner banquet, forums and the Contest University. The Northern Ohio DX Association's hospitality suite was once again a big hit with a record attendance. During the SWODXA DX Dinner, the CQ Hall of Fame awards (as seen in OPDX.1062.20) were announced by Chip/K7JA and Gail/K2RED. Your editor, along with Don/K8MFO and Tom/K8CX, was there to receive the plaque for Don Chesser, W4KVX (SK). Also, announced was the SWODXA's "DXpedition of the Year" given to the HK0NA Malpelo Island operation, and the "DXpeditioner of the Year" was given Rudy Klos, DK7PE. The DX Forum on Saturday, had excellent presentations on T32C, ST0R and HK0NA. However, the presentation that stood out was the one by Don Greenbaum, N1DG, on "DXpedition's Funding and Costs". This is something every DXer should see and should be shown at every DX association and club. It will open your eyes. Don's excellent PowerPoint presentation from Dayton is now available at the NCDXF's Web page at:

http://www.ncdxf.org/misc/N1DG-DXpeditioncosts-Dayton2012.ppsx
In all, can't wait until next year. Hope to see you there.....

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 19th-May, through Friday, 25th-May there were 223 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, DL, DU, E3, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VK9N, VP2E, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZL7, ZL9, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4A, MEXICO (IOTA/WFF Op). Members of the Radioclub Cancun will be active as 4A3RCC from Cayo Culebra Island (NA-200) between June 1-3rd. Activity will be on 80-6 meters and possibly the Satellites. Special attention will be on 6m. Cayo Culebra is located on Reserve of Biosphere of Siaan Ka'an. QSL via EA5FL. For more details, see the following Web page at: http://www.radioclubcancun.org/culebra

4J, AZERBAIJAN (WCA/WFF Op). The "Safari DX-Activators Club" is planning
to conduct an International DXpedition between May 26-28th, from the
Gabala District in the ancient fortress Chukhur Gabala and in an area
presently conducting archaeological excavations. The place of event
will count for both the WFF and WCA programs:
WCA reference is 4K-016, new one
WFF reference is 4JFF-014, second time activation
Coordinates: 40°53'38.30"N / 47°41'37.80E
http://ru.wikipedia.org/wiki/%D0%93%D0%B0%D0%B1%D0%B0%D0%BB%D0%B0
The group will not participate in the CQWW WPX CW Contest, so the team
will operate mostly on the 30/17/12 meter bands. However, on Monday,
May 28th, they will operate on the regular HF bands – 20, 40, 15, etc.
The start is planned for May 26th, 12-00 AM, UTC. The callsigns are:
4J0SFR, main, and 4J0WFF, reserve. Modes – CW and SSB -- no Digital.
The team members are: Boris/4K4K (CW), Yasu/JR0HYT (CW), Anar/4K6AE (SSB),
Farhad/4K3M (SSB), Sergey/4J5A (CW), Sergey/4K3FPL (SSB), Farid/4K6AF
(E-logger) and Natig/4J5T (SSB). They state, "All incoming paper QSLs
will be answered, but, please, send them before July 2012. Otherwise,
we will not be able to answer you soon, sorry."

4L, GEORGIA. Andi, UU0JM, will be active as 4L0A during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW.

4U1G, ITALY. Ivo, E73A/9A3A, will be active as 4U1GSC from the United Nations Global Service Center (UNGSC) Amateur Radio Club in Brindisi, south east Italy, during the CQWW WPX CW Contest (May 26-27,th) as a Single-Op/All-Band/High-Power entry. QSL via 9A2AA.

6V, SENEGAL. Vladimir, RK4FF, who has been active as 6V7S from Le Calao in Ngaparou, will continue until May 28th, but will be in the CQWW WPX CW Contest as a Single-Op/All-Band entry. QSL via RK4FF.

6Y, JAMAICA. Sergey, UT5UDX, is now active as 6Y/UT5UDX until May 30th. His activity will also include the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band entry and sign as 6Y3W. QSL via RA4LW.

A5, BHUTAN. Members of the FGC DX Group (Foundation for Global Children) is now active as A5A from a mountain area in Bhutan until June 6th. The multi-national team consists of Zorro/JH1AJT (A5/A5A/A51A), Yutaka/JJ1LIB (A52F), Akinori/ZL1GO (A52GO), Kazuhiko/VR2KF (A52KF) and Jon/KL2A (A52X). Activity will be on 80-6 meters including the 30/17/12 meter bands using CW, SSB and RTTY. They plan to "erect high gain antennas, utilize receive antennas, and run amplifiers at 3 stations." They also plan to "Establish a radio station at Royal Thimphu College (first private college in Bhutan), and provide basic HAM radio lessons to RTC students." QSL A5A via JH1AJT (see Web page for details). For more details and update, visit the A5A Web apge at: http://bhutan2012.com/index.php

AU50, INDIA (Special Event). Only a few more days left to work special event station AU50GOA from Goa, India. Operations will last until May 31st. Activity is to celebrate 50 th anniversary of the Liberation of Goa from Portuguese colonial rule. Goa is a diamond DXCC entity (CR8 in 1937). Look for AU50GOA on 40/20/15/10 meters using CW, SSB and PSK. QSL via VU2SMS direct.

HB0, LIECHTENSTEIN. Seven Belgian operators will be active as HB0/homecall from Liechtenstein between September 19-22nd. Activity will be on 80-10 meters, with emphasis on higher bands and conditions permitting, using CW and SSB. Operators mentioned are Philippe/ON4ACP, Erik/ON4ANN, Jose/ ON4CAU, Erik/ON4CCV, Walter/ON8CW, Cedric/ON4CKM and Marc/ON4CJY. The pilot station will be Frans/ON6QB. QSL all callsigns via ON4ANN, direct (w/2 GS) or by the Bureau. Their HBo Web page is available at: http://users.telenet.be/on4ann

IOTA NEWS.....
AS-060. Kei, HL2UVH, and a friend will be active from Ch&#65533;ung Island between May 26-27th. Activity will be on 80-6 meters on all modes using the callsigns HL0A (for IOTA QSOs) and HL0V (during the CQWW WPX CW Contest). QSL via HL2UVH.

EU-145. Operators CT1EPV, CT1GFK, CT1GPQ, CT1IUA and CT3FN will be active as CS2W from Culatra Island, (WLOTA 0144) during the CQWW WPX CW Contest (May 26-27th) as a Multi-Single entry.

QSL via HB9CRV, by the Bureau and LoTW.

EU-150. Members of the Portuguese DX Group (GPDX) will be active as CT7/homecall and CT7/homecall/p from Insua Island (DIP MI-001, PIP NT-001, DCFP F-006, DCP CVC-046 and CVC-047, DMHP VC-017 and VC-061, DFP FM-101, DMP 1602, DDFP CMN-12) during July. The team consists of operators from Portugal, Germany and Switzerland. Activity will be on all HF bands and modes. The group also plans to be active in the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Low-Power entry using the callsign CR6W. Look for some operators to stay a few days longer on Insua Island and activate the lighthouse (ARLHS POR-028, WLOTA 2869). QSL CR6W via CS5DX. QSL all other callsigns via their home callsigns. For more information and updates, go to:
http://gpdx.netpower.pt
http://www.to-mk.com/neu

NA-240. Rick, K6VVA, reports: "Although an official welcome invitation was received from the Native Village of Kipnuk Traditional Council specifically for the well in advance announced K6VVA/KL7 NA-240 activation, these intended plans have now been suspended for an indefinite period based on the following -- Please see details at: http://www.k6vva.com/iota/na240 "

OC-137. A team of 8 Australian operators will be active as VK4ILH from Moreton Island during the International Lighthouse/ Lightship Weekend [ILLW] (August 18-19,th). Activity will take place prior to ILLW from the Cape Moreton Lighthouse (AU0009, WLOTA LH2987) starting August 17th. This will be the very first time Cape Moreton Lighthouse has ever been activated. Also, Moreton Island has not been activated in almost 15 years. Operators mentioned are Derek/VK4MIA, Paul/ VK4FPDW, Brooke/VK4MBL, Graham/VK4GRA, Ewan/VK4ERM, Catherine/ VK4GH, John/VK4IO and Luke/VK3HJ. QSL via VK4MIA, by the Bureau, direct or LoTW. For more details and updates, visit the following Web pages:
http://www.capemoreton2012.com (VK4ILH Web page)
http://www.facebook.com/vklighthouse (Facebook)
http://www.twitter.com/#!/vklighthouse (Twitter)
Also, check QRZ.com.

OC-139. Operator Paul/VK5PAS and six other operators will be active as VI5CW from Kangaroo Island between August 17-20th. Activity will include an entry in the International Lighthouse/Lightship Weekend [ILLW] (August 18-19th) from Cape Willoughby Light-house, as well as operations on all HF bands using mainly SSB, with some possible CW. QSL via VK5PAS.

OC-142. Operators VK4NM, VK4LAT and possibly others (will update) will be active as VK4NM from Fraser Island during the RSGB IOTA Contest (July 28-29th) as a Multi-single entry. QSL via M0OXO.

OC-249. Operator Kadek/YB9BU and possibly others will be active as homecall/8 from Wamar Island in the rare Aru Islands Group between May 25-28th. The Aru Islands are located in the Arafura Sea southwest of New Guinea and north of Australia. Wamar was last activated in 2002. QSL via their home callsigns.

J3, GRENADA (Op Needed!). Harry, AC8G (J37K), is planning a 6 (can be more) night stay in Grenada for the CQ WW SSB Contest (Oct. 27-28th) with considerable operating the days before the contest with emphasis on non-contest bands and modes. As of May 24th, the RT air fare is 610.20 USDs from Dayton to Grenada. For those interested, contact AC8G (Harry) via hflasher@dayton.net or 937-434-9616 for more details.

KH2/NH2, GUAM. Dave, N2NL, will be active as NH2T from Guam (OC-026) during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/ High-Power entry. He is expected to be here until the summer of 2013. Dave will be active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or via W2YC.

KH0, MARIANA ISLANDS. Tony, JA6CNL, will once again be active as KH0N from Saipan (OC-086) between June 15-18th. Activity will be on 80-6 meters CW ONLY. QSL via JA6CNL.

LX, LUXEMBOURG. a team of operators will be active as LX7I during the CQWW WPX CW Contest (May 26-27th) as a Multi-Single entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

P29, PAPUA NEW GUINEA (IOTA Op). Operators Derek/G3KHZ and Hans/SM6CVX are planning another IOTA DXpedition to Papua New Guinea for three weeks in October. Dates and callsigns were not provided, but they plan to visit the following islands: St. Matthias (OC-103), Tabar (OC-099) and Lihir (OC-069). It was mentioned that there is a possibility of Hans to journey to another island after the main activity. Also, an opportunity may exist for another operator. If interested contact G3KHZ.

P4, ARUBA. Andy, AE6Y, will once again be active as P49Y during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/High-Power entry.

QSL via AE6Y or LoTW.

PACIFIC TOUR. Haru, JA1XGI, reports on his Blog page that he will be active from E51 (Cook Islands) and V63 (Micronesia) in December. Look for updates and details at: http://ja1xgidxvacation.blogspot.com

PW0F, FERNANDO DE NORONHA. Ville, OH1MM/PY2ZEA, will be active as PW0F from Fernando de Noronha during the CQWW WPX CW Contest (May 26-27th). Operations will be with dipoles and inverted Vs. If time permits, Ville will also erect a directional wire beam (fixed to the north) for 20/15/10m. QSL via OH2BH.

PZ, SURINAME. Sergey, RX3APM, will be active as PZ5P until May 29th. Look for him to be in the CQWW WPX CW Contest (May 26-27th). QSL via UA4LU and LoTW.

ZL2WL QSL INFO UPDATE. Because of difficulties transferring ZL2WL's past logs, Buzz, NI5DX, will only be able to confirm contacts made with Wayne, ZL2WL, from May 9th forward. Both Buzz and Wayne are very sorry for any confusion this may have caused, but contacts prior to May 9th will NOT be able to be confirmed through NI5DX. Cards are being printed and Buzz expects them to be delivered in 4-6 weeks.

RADIO ARCALA MOVES ACROSS THREE CONTINENTS IN WPX (Press Release):
"In the summer months of the Far North, the midnight sun never sets and no QSOs are possible on the point rich lower bands. Additionally, 10M rarely opens in the North, so the only choice left to Radio Arcala and their associates is to tactically move South to satisfy their competitive urge.
The troops are still spearheaded by their battle ship, OH8X and the specific target is to reach North America with the massive hardware of Arcala fame, boldly challenging the forces of Mother Nature.
Northern Europe:
OH8X will be operated by Toni Linden, OH2UA
OH10X by Kim Ostman, OH6KZP
OH0X, Aland Islands by Pekka Holstila, OH2TA

Asiatic Turkey:
TC2X will be operated by Pertti Simovaara, OH2PM.
ADDED NOTE FROM TA1HZ - Operating from Istanbul (TA2KN Turkish Scouting and Guiding Federation Club station in Umraniye)

South America:
PW0F will be operated by Ville Hiilesmaa, OH2MM/PY2ZEA
PW0F, Fernando de Noronha operation will be conducted jointly with the Araucaria DX Group of Brazil

QSL info: OH8X via OH2UA
OH0X via OH2TA
others via OH2BH"

SV5, DODECANESE. Czech operators Bob/OK2BOB, Vilda/OK2BC and Jindra/OK1AMM are now active as SV5/homecall until June 1st. Activity will be mainly CW and SSB on 160-6 meters. The WW LOC will be KM36OV, QTH is KOS Island (EU-001). QSL via OK Bureau or direct.

SV9, CRETE. Alex, SQ9UM, is now active as SV9/SQ9UM from Crete until May 28th. Activity is on 40-6 meters using CW, RTTY, PSK and some SSB. He plans to participate in the CQWW WPX CW Contest (May 26-27th). QSL

via his home callsign.

T48, CUBA. The Filial of "Federaci&#65533;n de Radioaficionados de Cuba" in Las Tunas, will be active once again during "ARRL June VHF QSO Party" as a "Limited multioperator" entry from FL10MW using his usual callsign T48K. Their main operation will be on 6 meter with a five elements Tonna and 100 watts. They will also try 2 meters with 50 watts and a 9 element homebrew cubical quad, looking for the very first QSO ever made between Las Tunas and United States. QSL via DK1WI.

T7, SAN MARIO (New Governing Board). The ARRSM members have elected a new Governing Board for the period 2012-2015. The election results were made public April 20th, with the following new board members added:
Matteo Napolitano, T77NM - President
Nazzareno Carattoni, T77NC - Vice-President
Giovanni Cecchetti, T77CD - Secretary
Giancarlo Montico, T77WI - Treasurer
Giorgio Minguzzi, IZ4AKS - IARU Liaison Officer

The ARRSM assembly would like to thank former President Giuliano Giacomoni, T77J, and former Vice-President Antonio Ceccoli, T77C, for their valuable contribution to the life of the Association of Radio Amateurs of the Republic of San Marino during the last 30 years.
**ADDED NOTE: Giorgio, IZ4AKS, informs OPDX that there is some interesting news about the T70A station on their new Web site at: http://www.arrsm.com
The radio club at the moment is CLOSED due to a heavy snow storm that occurred
Feb 2012. The ARRSM is working to repair the structure of the club (the roof of the house collapsed under the weight of the snow). This will generate a decrease of the activity of T70A in the forthcoming contest until the station is ready again to be used. The Web site is now in Italian (official language of San Marino), but the ARRSM is already working on the English version.

TC7, TURKEY. Dmitry, R3GM (ex-RN3GM), will be active as TC7C from Turkey during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band entry. QSL via RA1QQ.

VP2, MONTSERRAT. Graham, M0AEP, will be active as VP2MDD from Montserrat (NA-103) between June 2nd and August 6th. Gordon, G3USR, will join him on the island between June 30th and July 9th. Both operators will be active on 80-6 meters, but will concentrate on 12/10/6 meters using CW and SSB (no digital). QSL via their home callsigns.

YO2/YP0, ROMANIA (Special Event/WFF Op). Members of the QSO BANAT (YO2KQT) Radio Club of Timisoara are now on the air as YP0WFF during the 3rd Hercules Marathon edition <http://www.alternativetm.ro/en/herculesmaraton> until May 27th. Operators are there for communications support between checkpoints and also operate from Domogled-Valea Cernei (YOFF 008) for those interested in YOFF operations. Activity will be on SSB and the Digital modes. Operators mentioned are Gigi/YO2MTG, Marius/YO2LOJ, Eduard/YO2LSP, Ovi/YO2MLL, Vlad/YO2LZP, Lili/YO2MMX, Diana/YO2MTD, Dan/YO2LLQ,

Robi/YO2MNF and Horatiu/YO2LQL. QSL only direct to YO2KQT.

VP5, TURKS AND CAICOS ISLANDS. Operators Bill/KX4WW and Noll/W9RN will be operating from KX4WW's QTH on Providenciales between May 31st and June 7th. They will be signing VP5/homecall on all bands 160-6 meters. QSL via their home callsigns.

YE0, INDONESIA. Operators YB0AKM, YB0ECT, YB0JS, YB0KVN, YB0AZ, YC0KVM, YC0TSU, YC0MXV, YC1LLY, YC0VKI, YB1CCF, YD1JZ, YB1KAR, YC1KAF and YD1GCL will be active as YE0X during the CQWW WPX CW Contest (May 26-27th) as a Multi-2 entry. QSL via YB0ZZ.

The following stations are expected to be active in the
CQWW WPX CW Contest (May 26-27th, 2012)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2012 CQWW WPX CW Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

Radio Operator Uses Hobby as Community Service:

Posted: 24 May 2012 05:44 PM PDT
http://www.eham.net/articles/28370

From his garage, John Wagner could see the damage Hurricane Claudette promised to bring to the Gulf Coast. He had just fired up his generator when the phone rang. "The city called saying they lost communications with the outside world," Wagner said. The news wasn't good, but the city wasn't helpless. Traditional channels of communication might break in an emergency - that includes some radio signals. Amateur radio emergency system operators like Wagner can relay the information that keeps chaos from breaking out in communities. Getting a ham radio license was always Wagner's goal, even as a child playing on a crystal radio receiver. There's something about using the airwaves he cannot explain. Something as simple as taking a piece of wire and electrical components and communicating with people across the world is mesmerizing.

//
One Radio Goes Silent After 36 Marathons:

Posted: 24 May 2012 05:42 PM PDT
http://www.eham.net/articles/28369

The New York City Marathon has been a five-borough race for 36 years. For every edition, Steve Mendelsohn has been a vital part. He had accompanied officials in the lead vehicle, relaying vital elite race info using his trusty ham radio. But that radio is now silent. Mendelsohn passed away on Wednesday at his home in Dumont, New Jersey. He was a victim of pancreatic cancer and was 67.

//
Thousands of Hams Get 'Internationally Connected' In Dayton:

Posted: 24 May 2012 02:40 PM PDT
http://www.eham.net/articles/28365

When Hara Arena -- home of the Dayton Hamvention for the past 48
years -- opened its doors at 9 AM on Friday, May, 18, thousands of hams
swarmed in, eager to see the latest and greatest that Amateur Radio has
to offer. And they weren't disappointed! With the introduction of three
new transceivers this year, as well as hundreds of vendors inside and
in the world-famous flea market, there was a definite buzz in the air,
especially within the ARRL EXPO.

//
Icom to Support Boy Scouts at National Jamboree and at Local Council Level:

Posted: 24 May 2012 02:38 PM PDT
http://www.eham.net/articles/28364

Against the backdrop of the 2012 Dayton Hamvention -- the largest
gathering of radio amateurs in the US -- ICOM America announced a
sponsorship agreement with the Boy Scouts of America for the
organization's 2012 National Scout Jamboree. As the BSA's official
Amateur Radio transceiver supplier for the jamboree, ICOM will provide
equipment and technical support for the K2BSA radio operation, the
Radio merit badge and Jamboree on the Air.

//
CQ Announces 2012 Hall of Fame Inductees:

Posted: 24 May 2012 02:39 PM PDT
http://www.eham.net/articles/28363

CQ magazine announced its 2012 Hall of Fame inductees on May 18,
welcoming 16 new members into the CQ Amateur Radio Hall of Fame, two

new members of the CQ DX Hall of Fame and two new members of the CQ Contest Hall of Fame. The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to Amateur Radio, as well as those amateurs who have made significant contributions either to Amateur Radio, to their professional careers or to some other aspect of life on our planet.

//
New 'PRB-1' Law Now in Effect in Ohio:

Posted: 24 May 2012 02:38 PM PDT
http://www.eham.net/articles/28362

On May 15, Ohio Governor John Kasich signed a bill, granting comprehensive rights to Amateur Radio operators in that state. HB 158 codifies the federal restrictions on the local zoning of amateur station antenna structures, thereby preserving Amateur Radio Service communications as a Homeland Security resource, placing the burden of proof for compliance on the zoning authority.

//
FCC Dismisses Texas Ham's Fourth Petition, Calls it 'Repetitive':

Posted: 24 May 2012 02:34 PM PDT
http://www.eham.net/articles/28361

For the fourth time in six years, the FCC has rejected a Petition for Rulemaking filed by Glen Zook, K9STH. In each of his Petitions, (2006, April 2009, 2011 and a Petition for Reconsideration in December 2009), Zook has asked the FCC to change its station identification rules as set forth in Section 97.119(a).

//
Amateurs Asked to Listen for HORYU-2 Satellite:

Posted: 24 May 2012 02:33 PM PDT
http://www.eham.net/articles/28360

The Japanese HORYU-2 research satellite
was launched May 17 at 1639 UTC as part of a mission that included the JAXA climate observation satellite Shizuku. HORYU-2 was built by students at the Kyushu Institute of Technology (KIT) and it carries the call sign JG6YBW. The satellite will conduct a variety of experiments including high-voltage power generation and space debris measurements. Amateurs have been asked to monitor HORYU-2's Morse code and 1200-baud AX.25 packet telemetry at 437.375 MHz.

//
PBS Frontline Focuses On Tower Dangers:

Posted: 24 May 2012 02:42 PM PDT
http://www.eham.net/articles/28359

I know this has nothing to do with ham radio
other than the fact that some hams do have towers.

//

Asia Pacific DX Convention 2012

Posted: 25 May 2012 10:17 AM PDT
http://forums.qrz.com/showthread.php?347601-Asia-Pacific-DX-Convention-2012&goto=newpost

You are cordially invited to attend the Asia Pacific DX Convention 2012,
which will take place November 2-4, 2012.

In addition to the usual presentations on recent DX-peditions, technical
sessions, DX dinners and so forth, the 2012 Convention offers something
special. Japan is where most of the amateur radio equipment is developed,
and you will have the opportunity to join a tour to the Icom factory,
participate in a technical session led by the Icom HF radio design team,
and more.

And don't forget, all of the programs at APDXC are conducted in English!

For the non-ham members of your party, activities providing a chance to
experience Japanese culture--such as tea ceremony and flower arranging are
being prepared.

We appreciate your introducing this convention to your DX/contest club
members. For more details, please visit the APDXC website
at:http://www.apdxc.org/

For convention updates, check our website often, or send an email to
subscribe to the APDXC newsletter.

We look forward to welcoming you at the APDXC in Osaka, Japan.

73

Mac / JA3USA

APDXC Committee

HAM HAPPENINGS: DAYTON 2012

The city of Dayton, Ohio was invaded over the weekend of May 18, 19 and 20 by radio amateurs from all over the world for the Dayton Hamvention. By all accounts it was a huge success. The weather was, for the first time in many years, absolutely perfect. Sunny days in the upper 80s and clear nights in the 50s made for great strolls through the massive flea market. No matter what obscure or rare item you're looking for, odds are that someone in the flea market has it for sale. The old saying of "if you can't find it at Dayton it doesn't exist" is really true. Don Dubon, N6JRL is president of the Dayton Amateur Radio Association, the sponsoring club for the Hamvention. He says this was an excellent year.

SARL NEWS - SUNDAY 27 MAY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 AND 7,066 MHz from Pretoria, with a relay on 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

CALL FOR ASSISTANCE BY HAMNET NORTHERN CAPE

SKA & MEERKAT comes to South Africa

WORKED ALL CONTINENTS AWARD

TAKE AMATEUR RADIO TO THE PUBLIC

HAMVENTION - A MIND BLOWING EVENT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

HAMNET NORTHERN CAPE NEEDS YOUR ASSISTANCE

Carel Oberholzer, ZS3OBE, of Hamnet Northern Cape says they are potentially in need of assistance to provide communication support for the operation to rescue the miners or remove the bodies trapped in the diamond mine near Kleinzee. Communications to Springbok - the nearest urban hub - is problematic and Hamnet has been requested to assist.

He says "The situation is fluid at this stage and our response is in the preparation phase. We need operators to assist in providing communications between Springbok and Kleinzee, a distance of about 80 km. The operation is expected to last for the next two to three weeks and we envisage deploying two person teams on a rotational basis to man a relay point on a mountain/high point somewhere in between.

If you can assist you will need to have a four wheel drive, VHF capability and be self-sustained in terms of food, water, shelter,

power and warm clothing."

Paul, ZS1PVS, indicated they can issue field masts, radios, antennas and feed lines from the HAMNET Western Cape store.

Call Carel at 082 805 0181 or Paul at 083 302 3366 to offer you assistance.

SA GETS LION SHARE OF SKA BUT WE SHOULD HAVE HAD IT ALL

After nine years of sweat and tears by the South African and Australian SKA site bid teams, the independent SKA Site Advisory Committee (SSAC), composed of world-renowned experts, carried out an objective technical and scientific assessment of the sites in South Africa and Australia, and identified by consensus Africa as the preferred site but their recommendation was overturned by the SKA Organization after complaints by the Australians, "We had hoped the unambiguous recommendation of the SSAC would be accepted as the soundest scientific outcome" Minister of Science and Technology, Naledi Pandor said at a media briefing on Friday 26 May 2012.

It appears the SKA organization had difficulty coming to a final decision and according to one of the members of the committee the atmosphere at the meeting was heated and at times the group had to take a recess. The ultimate outcome was that for the sake of inclusivity they agreed to consider constructing one of the three SKA receiver components in Australia. Two will be constructed in Africa.

The minister said that an important aspect of the site decision is the recognition of the MeerKAT telescope, being designed and built in the Northern Cape Karoo by South African scientists and engineers, as a critical step towards the implementation of the SKA. The MeerKAT will supplement the sensitive SKA Phase 1 dish array, providing the majority of the collection area of what will be the most sensitive radio telescope in the world. This recognition is substantive evidence of the great strides made by the local radio astronomy community since South Africa signalled its interest in the SKA.

Naledi Pandor said six weeks ago that splitting the SKA between South Africa and Australia was for her not an option. On the question if she was disappointed she said "No, I am happy for the country and I am happy for Africa. Of course you want everything, but I think getting three quarters is pretty good. I am ecstatic for our scientists. We have proved Africa can do it!"

Listen to more on Amateur Radio Today later this morning.

RA EXAMINATION

Councillors visited some of the centres where students wrote the Radio Amateur examinations on 24 May 2012. We wish you well with the results.

WORKED ALL CONTINENTS AWARD

Many radio amateurs cut their DXing teeth on the Worked All Continents award. This award recognizes contacts with all six continental areas of the world, and is issued by the International Amateur Radio Union (IARU). Recently, the SARL was authorized to issue these certificates to its members on the IARU's behalf. You can now apply for your certificate right here in South Africa. The basic award can be endorsed for a single mode or for meeting the requirements on each of five or six bands.

The application fee is R60 and the certificate will be sent in a sturdy mailing tube. Rules and application forms can at present be found on the Pretoria Amateur Radio Club's Web site (www.parc.org.za).

TAKE AMATEUR RADIO TO THE PUBLIC

16 June is National Amateur Radio Day. The SARL invites young and old to celebrate the day by taking amateur radio to the public. Talk on the air, invite some into your radio room or be daring and set up your station in a local park or shopping area. Get the word out amateur radio is fun, amateur radio is the most exciting of all scientific hobbies.

16 June is also youth day and we have the annual SARL youth sprint on that day too . If you are 25 years or younger, take part in the competition and win one of the many prizes. Take to the air between 10 and 12 local time and if you are over 25, show the young people how it is done. Full details are already on www.sarl.org.za and were sent to all members in the May SARL UPDATE e-mail.

FINAL RTA DATES ANNOUNCED

The final Radio in Action Technology symposium dates have been announced. The first event will be in the brand new auditorium recently completed on the Howard Campus in Durban on 22 July. The Cape Town RTA will be held at the Cape Peninsula University of Technology in Bellville on 11 August, In the Eastern Cape the RTA will take place on 1 September at the Nelson Mandela Metropolitan University and in Gauteng the event will be held on 29 September at the Sentech Auditorium at Radiokop.

The programme features a mixture of talks, demonstrations and hands-on activities. Hannes Coetzee will explore how the ionosphere works and show delegates how to do their own predictions. Every one attending will receive a CD with the necessary propagation prediction software. During the presentation Hannes will load the software on a PC and go through setting it up every step of the way.

Another interesting activity will be the building of a software defined radio interface. The necessary software will be on the RTA disc. A SDR receiver kit costing under R100 will be available for sale at each RTA. During the presentation Frik Wolff, ZS6FZ, will build the kit and show you how it operates and receives signals on the 40 metre band. There are more surprises in store. Stay tuned as more details will be in SARLNEWS over the next few weeks. A full programme and pre booking form

will be available on the web soon.

Keep the day when the RTA comes to your area open as it is something you do not want to miss.

HAMVENTION WAS ANOTHER MIND BLOWING EVENT

The annual USA Dayton Hamvention was once again a mind blowing event with many new product launches from all the major amateur radio suppliers.

When Hara Arena opened its doors at 09:00 on Friday, 18 May thousands of hams swarmed in, eager to see the latest and greatest that Amateur Radio has to offer. And they weren't disappointed! With the introduction of three new transceivers this year, as well as hundreds of vendors -- both new ones and old friends within the giant Hara complex -- there was a definite buzz in the air, especially within the ARRL EXPO.

ARRL EXPO -- located in the Ballarena Hall of the large Hara Arena -- included more than 20 exhibits staffed by ARRL programme representatives. Among the new booths for 2012 was an exhibit introducing the new digital edition of QST, ARRL's membership journal.

The popular kit building booth returned for a fourth consecutive year to the ARRL EXPO. Led by ARRL Laboratory Test Engineer Bob Allison, WB1GCM, ARRL Laboratory Engineer Mike Gruber, W1MG, and dedicated volunteers, the enhanced kit building area offered hams -- and non-hams -- the opportunity to learn how to solder, use hand tools, follow instructions and take home a finished piece of equipment!

The Deutscher Amateur Radio Club (DARC), the Japan Amateur Radio League (JARL), the Qatar Amateur Radio Society (QARS) and the Radio Society of Great Britain (RSGB) were on hand within the ARRL EXPO. "The theme of the 2012 Hamvention is Internationally Connected," Inderbitzen explained. "What better way to get connected than meeting with fellow radio amateurs from around the world?" In addition, representatives from the International Amateur Radio Union -- including IARU President Tim Ellam, VE6SH, IARU President Emeritus Larry Price, W4RA, IARU Vice President Ole Garpestad, LA2RR, and IARU Secretary Rod Stafford, W6ROD -- were on hand in the ARRL EXPO area to greet visitors.

One of the many reasons amateurs go to Dayton Hamvention each May is to look over the new gear announced by many manufacturers. The number of vendors at Hara Arena can be mind boggling, especially on your first trip. The big news is always the new full size HF transceivers. In addition to these transceivers, there were many low power radios, VHF/UHF units, antennas and accessories of all sorts -- all in addition to what must be the world's largest radio flea market.

In Amateur Radio Today, the SARL links up with News line for extensive audio reports and reviews of the new equipment that were on show.

DIGITAL CONTEST

The second SARL Digital Contest will be run this afternoon from 13:00 to 16:00 UTC with PSK31 and RTTY activity on 20, 40 and 80 metres. The contest is open to all radio amateurs in Southern African countries.

The following frequencies must be used for the contest, on 80 metres, 3 580 to 3 600 kHz, on 40 metres, 7 040 to 7 060 kHz and on 20 metres 14 070 to 14 099 kHz. Take note that there can be SSB QSOs between 7 053 and 7 060 kHz. A station may be contacted twice on each band, once on RTTY and once on PSK31. The exchange is a signal report plus a sequential serial number starting at 001.

Contacts with stations in Southern Africa are worth 3 points and contacts with stations outside this area are worth 1 point. The first contact with each ZS call area (6), each Southern African country (area 7) and the rest of the world (area 8) will be used as a band multiplier.

Logs must be submitted within 7 days after the contest and can be sent by mail to the West Rand Amateur Radio Club, PO Box 5344, Weltevredenpark, 1725 or by e-mail to contest@sarl.org.za

SARL 80 m CLUB CHAMPIONSHIP

The third SARL 80 m Club Championship will be on the air on Wednesday evening 30 May. This short contest will feature PSK31 and RTTY activity between 3 580 - 3 620 kHz and it starts at 17:30 and ends at 18:30 UTC.

The exchange is a RS(T) and a consecutive serial number starting at 001. The same station may be worked once on RTTY and once on PSK. One point is earned per contact.

Logs must be submitted by 23:59:59 CAT on Wednesday 6 June by e-mail to zs4bfn@netactive.co.za.

ZS3 SPRINT

The ZS3 Sprint was well supported on the 6th of May 2012. 112 Radio Amateur Members made 788 contacts during the hour and we received 27 logs. Three of them were the club logs that we used for control. The results are as follows for the hour on the air: 1st: ZS3R, Christo van Rensburg with a total of 52 contacts resulted in 107 points. 2nd: ZS6XT, Pieter Jacobs with a total of 45 contacts and 63 points. 3rd: ZS6EE, Quartus de Witt with a total of 48 and 53 points. 4th: ZS6APT, Pam Momberg with a total of 36 contacts and 49 points.

The Northern Cape Amateur Radio Club thanks everybody that took part and sent in their logs.

Detailed results will be published on the SARL Forum.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is at moderate levels. The sun's surface is peppered with small but quiet sunspots.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 57.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings and 20 m not far behind. 10 m openings should be less frequent.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

28 May - Logs for AWA Valve QSO party to be in to andyzs6ady@vodamail.co.za or AWA of Southern Africa, P O Box 12320; Benoryn 1504.

3 June - Logs for the digital contest must be in and can be sent by mail to the West Rand Amateur Radio Club, PO Box 5344, Weltevredenpark, 1725 or by e-mail to contest@sarl.org.za

4 June - Logs for the ZS4 Sprint to be sent to The Sasolburg Amateur Radio Club, ZS4SRK, PO Box 28194, Sonlandpark, 1944 or by e-mail to riaanzs4pr@gmail.comwith a copy to fwolff@global.co.za.

6 June - Logs for the SARL 80 m CLUB CHAMPIONSHIP must be submitted by by e-mail to zs4bfn@netactive.co.za.

16 June - National Amateur Radio day between 09:00 and 16:00 and Youth Day Sprint 10:00 - 12:00 CAT.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Johann Marais, ZU1JM, end edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Amateur Radio Operators Plan Field Day in Victoria:

Posted: 26 May 2012 06:06 AM PDT
http://www.eham.net/articles/28382

Despite Internet, cell phones, email and modern communications, every year, whole regions find themselves in the dark. Tornadoes, fire storms, ice and even the occasional cutting of fiber optic cables leave people without the means to communicate. In these cases, the one consistent service that has never failed has been amateur radio. These radio operators, called "hams," provide backup communications for everything from the American Red Cross to FEMA and even for International Space Station. Regional hams will join thousands of other operators for a field day, from 8 a.m. to 5 p.m. June 23-24 to show their emergency capabilities. The group will meet behind Citizens Healthplex, on Loop 463.

//
Amateur Radio Essential Tool:

Posted: 26 May 2012 06:05 AM PDT
http://www.eham.net/articles/28381

Behind the scenes at every Drivesouth Rally of Otago a team of local amateur radio enthusiasts works tirelessly to keep track of every car. Their support is vital to the three-day event, which started last night, as there is either unreliable or no cellphone reception where many of rally's stages are held. Otago Amateur Radio Emergency Communications (AREC) team leader Lindsey Ross said 28 members would be helping out in what was a "massive exercise" for the group. The team would be based at the Southern Cross Hotel where it had equipment set up on the roof and a control centre on the fifth floor. Its most important role was in ensuring the safety of rally competitors by keeping track of every car and making sure they had not left the track. To do this the team had people at the start, end and in some cases middle of each stage who would radio back to the control centre when each car passed. Members also kept track of times and gave the information to race organisers.

//
CA Historical Society and SF ARC Connect Globally via W6G Special Event:

Posted: 26 May 2012 06:03 AM PDT
http://www.eham.net/articles/28380

SAN FRANCISCO, May 25, 2012 (GlobeNewswire via COMTEX) -- The San Francisco Amateur Radio Club (SFARC) in cooperation with the California Historical Society (CHS) will mark the 75th anniversary of the opening of the Golden Gate Bridge by contacting other amateur radio operators throughout the world on Saturday, May 26th and Sunday, May 27th. The SFARC will operate on five amateur bands using the special Federal Communications Commission assigned call sign W6G. It will transmit from its home station located at the San Francisco Veteran's Administration Medical Center at 42nd Avenue and Clement Street for 26 hours beginning at 1:00 PM PDT on May 26th and ending at 3:00 PM PDT on May 27th. In announcing this event, SFRAC President Tony Dowler, K6BV, said, "We are extremely proud to be a part of this historic occasion. The Golden Gate Bridge is known throughout the world not only as a great engineering feat, but also as a symbol of the San Francisco Bay Area. In that spirit we will be assisted by members from the Marin County Amateur Radio Club."

//
Morse Code to Twitter; A History of Firsts:

Posted: 26 May 2012 06:01 AM PDT
http://www.eham.net/articles/28379

"Civilization grew in the beginning from the minute that we had communication." So said Norwegian explorer Thor Heyerdahl, who passed away in 2002. Heyederdahl, who was born in 1914, saw great developments in human communication in his time and understood the value that it has in the making of a community. Today marks 168 year anniversary of the first American telegraph line and first Morse Code message sent from the States. The telegraph could connect people at great distances and proved very useful in trans-continental and eventually world-wide communication. Today, of course, we have telephones, smart phones and computers to communicate across the globe. People communicate constantly through social media and sites like Twitter and the ease in which we can send messages to distant points is often taken for granted. Today we are going to look at some of the firsts in mass communication, starting with the telegraph and going up through some of our modern forms of getting in touch and sharing our thoughts, ideas and, let's face it, what we had for lunch.

//
Propagation Forecast Bulletin #21 de K7RA:

Posted: 26 May 2012 05:59 AM PDT
http://www.eham.net/articles/28378

Average daily sunspot numbers declined seven points over the past week to 110.3. Average daily solar flux dropped 3.3 points to 131. Unsettled geomagnetic conditions over the past few days most likely resulted from an interplanetary shock wave originating from a solar flare on May 20. Predicted planetary A index is 8, 5, and 8 on May 25-27, then 5 on May 28 to June 4, then 8, 12, 15, 10 and 8 on June 5-9, then 5 on June 10-11, 8 on June 12-13, 5 on June 14-16, then 8, 15, 10 and 8 on June 17-20, and 5 on June 21-25.

Radio News Bulletin
Sunday 27th May 2012

Licence Examination

There are just over two weeks left in which to apply to sit the next Amateur Station Licence Examination which will be held on Thursday 28th June at 2 p.m. in the ComReg Offices in Dublin. The closing date for entries is Thursday 14 June. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and are allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form. Please note over half the available places for this examination have already been allocated.

Change in 40 Metre News Frequency

The present 40 metre radio news frequency has become increasingly busier on Sunday mornings. This has lead on occasions to some difficulty in the reception of both the bulletins and the reports on the transmissions. It has been decided, therefore, to move the transmission of the 40 metre news to a new frequency of 7123 kHz on and from Sunday the 1st of July. This frequency was selected after monitoring a range of frequencies over a period of time by amateurs who use this particular transmission of the radio news bulletin.

Field Day Contests

Next weekend - Saturday and Sunday, 2nd and 3rd June -the first of the year's field day contests takes place, with CW field day, which runs from 15:00 UTC on Saturday to 15:00 on Sunday. The IRTS CW Field Day contest coincides with similar contests in other European countries, so there should be no shortage of QSOs. While the emphasis in these contests is on portable operation, fixed station QSOs are welcome. See www.irts.ie/contests for more information on this and other contests. As previously announced, there are some rule changes this year - these

are highlighted in the contest rules.

The Field Day series of contests continues in July with VHF/UHF Field Day, while HF SSB Field Day takes place in September.

Official Launch of the Craggy Island DXpedition Group

The Galway VHF Group will be officially launching of the Craggy Island DXpedition Group using the new callsign EI0TED. The launch will take place this weekend, on Sunday the 27th of May, at the Craggy Island Parochial House which is actually located in the Burren, County Clare. A H.F. Station will be in operation between 11:00 am and 3pm on 80, 40 and possibly 20 metres. Afternoon Tea and buns have been booked for the operators and guests courtesy of "Mrs. Doyle". Please find time to QSY to 3680 KHz after the IRTS news where we will take calls before QSYing to 40 metres for the rest of the afternoon. A special QSL card will be produced to mark this occasion.

Later this year there will be a number of operations from Offshore Islands round the coast of Ireland. EI3IS is an experienced kayaker and hopes to activate some of the more inaccessible islands with no landing facilities and due to the mode of transport many of these operations will be QRP. This should not present a major problem if the band conditions are reasonable. Check out the News section of www.galwayvhfgroup.com where up to date announcements of our operations may be found current EI0TED / EJ0TED operations may also be found on QRZ.COM.

Louth Erne Amateur Radio Club

Ofcom, the UK regulator, have approved a transatlantic 2m beacon testing for contact from Fermanagh to North America. Full details can be viewed on www.learc.eu

---

DX News

A group of Italians recently operated very successfully from Somalia as 6O0CW. For those of you who missed them there is another chance to work Somalia until 30 May when Darko E70A will be QRV as 6O3A. He is QRV on all bands plus 6m. QSLs go via K2PF or E77E

Bill KX4WW and Noll W9RN will be visiting the Turks and Caicos Islands from 31 May until 7 June. They will sign VP5/home call and will be active on all bands 160 - 6m.

For those not travelling to the EURO 2012 games in Poland and Ukraine there is the opportunity to chase the various special event stations which are active from now until 5 July. A number of new prefixes can be worked and details can be found on http://sq2rh.idsl.pl/efc/

Still on a soccer theme look out for Sergey Rebrov UT5UDX who is in Jamaica at present signing 6Y3W in the CQ WPX CW Contest. Outside the contest he will sign 6Y/UT5UDX and will be there until 30 May. QSL via RA4LW.

North Cork Radio Group

With the success of Last weekends' Cashota activity from Barryscourt Castle, North Cork Radio Group in conjunction with CASHOTA Ireland are pleased to inform of another award level event for Cashota chasers.

EI1NC/P will be active on Monday 4th of June from Charles Fort in Kinsale, Ref : EI018/C. Charles Fort was declared a National Monument in 1973. William Robinson, architect of the Royal Hospital in Kilmainham, Dublin, and Superintendent of Fortifications, is credited with designing the fort. As one of the largest military installations in the country, Charles Fort has been associated with some of the most momentous events in Irish history. The most significant of these are the Williamite War 1689-91 and the Civil War 1922-23.

Further information on the CASHOTA Ireland award program can be obtained from http://cashota-ireland.org/ also nota that all Irish Castles are also valid towards Cashota Uk awards at http://www.cashota.co.uk

---

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Italian Radio Amateurs Help Out After Quake:

Posted: 26 May 2012 05:39 PM PDT
http://www.eham.net/articles/28386

An earthquake measuring 6.0 on the Ritcher scale shook Italy's industrial and densely populated northeast on Sunday, killing at least six people, felling homes and factories and bringing down historic church steeples. Occurring in the middle of night it saw emergency services swing into action with many injured across the Emilia Romagna region, will heavy losses in the making Parmesan cheese industry. It has been called the region's worst quake since the 1300s, striking at 4.04am local time with its epicentre about 35 kms north of Bologna at a relatively shallow depth of 5kms.

GB2RS NEWS

Sunday 27th May 2012

The news headlines:

* NoV issued for new 2m transatlantic propagation study

* Queen's Diamond Jubilee QSO Party Award reminder

* RSGB responds to Ofcom's consultation on proposed Wireless Telegraphy Act Regulations

On 18 May, Ofcom issued a NoV for another propagation beacon to test the possibility of a 144MHz transatlantic path from the UK. Located at Lough Navar Forest in Co Fermanagh, Northern Ireland, at 349m ASL it will have a clear take off over the sea. GB3WGI will radiate on 144.487MHz towards North America, initially with an ERP of 100 watts relative to a dipole, with plans to increase this if licensing allows. This beacon was made possible due to the generous donation of a transmitter by Brian Justin, WA1ZMS, the man behind the US 70MHz beacon, and NoV holder, Gordon Curry, GI6ATZ, who is providing the site and site services. This NoV is particularly welcome from Ofcom in what is clearly a busy Olympic year and the VHF weak signal community in the US and the UK thank them for their efforts. No date is yet fixed for the installation of the beacon, but plans are well under way and an announcement will be made in due course.

Amateurs are reminded that the Q special prefix runs until 10 June and that contacts with stations using this special prefix count to the award for those who wish to apply for their Queen's Diamond Jubilee QSO Party Award. Full details, including how to apply for a Q prefix, are on the RSGB website at www.rsgb.org/jubilee

This week the RSGB responded to Ofcom's consultation on proposed Wireless Telegraphy Act Regulations. It has made a formal input to the Ofcom consultation on proposed new Regulations to provide Ofcom with powers to take action in cases of interference from non wireless telegraphy apparatus. Whilst the immediate proposal is to implement the new Regulations in time for the Olympic Games, the action by Ofcom highlights the point that the Society has advocated on many occasions – the need for Ofcom to have statutory powers in cases of serious interference to the spectrum from non- WT apparatus. Ofcom has indicated that it intends to prepare Regulations for ongoing application after the Olympic Games and part of the RSGB response emphasises the need for such powers. The text of the RSGB response can

be found online at www.rsgb.org/news/articlelinks.php?id=0362. The consultation remains open until 28 May 2012.

Today, 27 May, William Williams, GW8TGS will be an Olympic Torchbearer as part of the team carrying the Flame through Aberystwyth around 1814BST. Having taken part in several charity runs and raising over £15,000 for charity, William, GW8TGS was nominated by the Rotary Club of Aberystwyth for his fund raising and his other voluntary work. William says he feels honoured to be taking part in this once-in-a-lifetime event.

The International Lighthouse & Lightship Weekend is held in August every year. So far registrations are going well, with Australia on 42 entries ahead of its rival Germany, with 36 registrations. There are 215 entries from 30 countries and the numbers are rising each week. Among those activating ten lightships are Australia, Belgium, England, Finland, Germany, Netherlands, and the USA. The basic objective of the weekend is to increase awareness of lighthouses and lightships and their need for preservation and restoration, and at the same time to promote amateur radio and foster international goodwill. International Lighthouse & Lightship Weekend is on 18 and 19 August and registration is available on the website www.illw.net.

2012 is the Centenary of the Wireless Institute of Australia being established in the State of Queensland, Australia. A special Centenary callsign, VK100WIQ, will be activated from 1 June through to 31 July by way of the WIA affiliated radio clubs in Queensland. There is also a Centenary QSL card and a Centenary award available. Details of the QSL card and award can be found at www.wia.org.au.

Copyright © RSGB 2012. Not for public release before Monday 21 May 2012 except as a GB2RS broadcast. Cuban amateurs have received permission to use more digital modes on the airwaves. In addition to PSK31, QPSK31, AMTOR, PACKET and RTTY, Domino Contestia, Olivia, MFSK, JT65 and almost all variants of PSK have been added. Another important step is that they have now have access to the national society's internal network using packet radio nodes and have permission to use packet gateways in cross bands.

And now for the details of rallies and events for the coming week

GB2RS has not received any details of rallies taking place this weekend, 27 and 28 May.

The Central Scotland Mini Ham Radio Convention will take place on 2 June. It will be held at Crofthead Farm Community Education Centre, Templar Rise, Livingston EH54 6DG. Doors open at 10am, and there will be trade stands, a Bring & Buy as well as lectures and an RSGB bookstand.

On 3 June, the Spalding & District Annual Rally will take place at The Sir John Gleed Technology School, Halmer Gardens, Spalding, Lincs, PE11

2EF. Doors open at 10am and there will be trade stands, free car parking and catering facilities at the event. More details from John, G4NBR, on 07946 302 815.

Now for the news of special events

The Geoparks Communications Weekend finishes today, 27 May. EI2GEO will be on the air from Tankardstown on the Copper Coast Geopark in Co. Waterford. Activity will mainly be on HF.

Coventry Amateur Radio Society will put GB50CCC on the air until 19 June for the Coventry Cathedral Celebration.

Chorley and District Amateur Radio Society will be on air over the Queen's Diamond Jubilee bank holiday weekend with the club call MX0ISN. A special QSL card is being produced for this event and details are on qrz.com.

South Kesteven Amateur Radio Society will be operating GB0GMO from Grantham Museum on 1 and 2 June to mark the re-opening of the museum. They will be using voice modes on all bands from 6m to 40m and also on 2m from 10am to 4pm when the museum is open. A special QSL card will be available either direct or via the RSGB bureau.

South Lancs Radio Club will be on the air from Ashurst Beacon main car parking area airing the callsign MQ0SLR/P between 10am until 6pm on 2 June. Then on 3 June from 10am to 4pm they will be on the air from Shackerley Community Centre using MQ0SLR/P.

The Kent Weald Radio Club will be operating from the Headcorn Aerodrome, Kent for the duration of the Queen's Diamond Jubilee week beginning on 1 June. The club will be using the special event callsigns GB1ER and GB1HA working the HF, VHF & UHF bands. Visitors are welcome to call in to see the operation. Further details are available from Patrick, G0UXG via e-mail to palybl@btinternet.com.

And now the DX news compiled from 425 DX News and other sources

F5IRO has received his Ugandan callsign 5X5RO. He will be operating CW and PSK during his spare time until 8 June. QSL via F8DFP.

OK7MT, OK5MM and OK2PP will be operating stroke P4 until 31 May. They will use the callsign P40H in the WPX CW Contest that finishes at midnight tonight, 27 May. QSL via OK7MT.

Copyright © RSGB 2012. Not for public release before Monday 21 May 2012 except as a GB2RS broadcast. European Football Championship 2012 On The Air is an activity organised by Polish and Ukrainian amateurs. From 1 June to 5 July there will be numerous special event stations active on the air. More detailed information can be found at http://efc2012.pzk.org.pl.

A multi-national group will operate from the Kingdom of Bhutan until 6 June. The callsign will be A5A. They will be active on all bands from

10 to 80m and will take part in the WPX CW Contest that finishes at midnight tonight, 27 May.

Craig, MM0SSG is now on the air from Luanda in Angola until around the end of October. Workwise he is employed on an offshore oil platform but he is active as D2SG when back on land. His QSL manager is GM4FDM.

Now the contest news

Today, 27 May, is the third 70MHz Cumulative contest taking place from 1400 to 1600UTC. Using all modes on the band the exchange is signal report, serial number and locator.

The CW leg of the WPX Contest finishes at midnight tonight, 27 May, after a gruelling 48 hours. There are numerous entry categories, single/multi-band, single/multi-op, QRP/low/high-power, etc. Exchange a report and serial number.

The 70MHz UK Activity Contest takes place from 1900 to 2130UTC on 29 May. Using all modes the exchange is signal report, serial number and locator.

NFD takes place next weekend, 2 and 3 June during the Queen's Diamond Jubilee weekend. Incidentally, the Contest Committee considered changing the date of NFD so that it would not coincide with the Jubilee weekend, but decided not to because lots of other countries also have their Field Days on the same weekend. Running from 1500 to 1500UTC on the 1.8 to 28MHz bands, the exchange is signal report and serial number.

The UK Six Metre Group's Summer E's Contest runs for 24 hours on 2 and 3 June from 1300 to 1300UTC on the 50MHz band. Using all modes, exchange a signal report, serial number, locator and, if you are a member of UKSMG, your membership number.

The UK Microwave Group Low Band Contest takes place on 3 June on the 1.3, 2.3 and 3.4GHz bands. Running from 1000 to 1600UTC and using all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 18th to Thursday the 24th of May, compiled by Neil Clarke, G0CAS on Friday 25th of May.

Five new sunspot groups appeared during the period, with eight groups visible on the 20th. Most sunspot groups were small and quiet. A couple of regions were large enough to produce small C class solar flares, 17 in total for the period. Solar activity was very low on the 20th, 21st and the 22nd. Solar flux levels declined from 132 units on the 18th to 116 by the 24th. The average was 125 units. The 90 day solar flux average on the 24th was 116 units, that's one unit up on last week. X-ray flux levels varied little day to day and the average was B3.6 units. Geomagnetic activity started at quiet levels but on the 20th a small disturbance arrived, this relates back to the M5 solar flare from

the 17th. The Ap was 11 units. More elevated conditions took place on the 22nd and 23rd when the Ap was 18 and 19 units respectively. This was due to a recurring coronal hole. The only quiet day was the 19th, with an Ap index of 5 units. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second on the 21st to 700 by the 23rd. Particle densities were low every day, however, on the 20th they increased to 11 particles per cubic centimetre. Bz varied between minus 4 and plus 6 nanoTeslas on the quietest day and between minus and plus 11 nanoTeslas during the coronal hole disturbance.

Copyright © RSGB 2012. Not for public release before Monday 21 May 2012 except as a GB2RS broadcast. And finally the solar forecast. At first this week the quiet side of the Sun should be looking our way but from about midweek new active regions should be rotating into view. Solar activity is expected to be mostly low. Solar flux levels should increase and be in the 120's by next weekend. Overall, geomagnetic activity should be mostly quiet every day. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 14MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of about 28MHz. The optimum working frequency with a 90 per cent success rate will be around 21MHz. The best time to try this path will be between 1400 and 2100 hours. Sporadic-E is expected to take place most days with openings up to 70MHz at least. Openings on 144MHz are also possible on the occasional days with the favoured times during the mid morning and again in the late afternoon, but remember not exclusively.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Friskney and East Lincolnshire Communications Club has a club net on 144.165 USB, vertical polarization, from 7pm on Monday 28 May. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. On Friday 1 June there is a club HF net is on GB3FR from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

Lincoln Short-Wave Club is participating in the 50MHz UK Activity Contest on Tuesday 29 May. On Wednesday there is a talk at the BSA Club by Jim, G0EJQ and Steve, M5ZZZ on what's new at the RSGB. On Thursday 31 May there is a simplex club net on 145.375MHz from 20.00. On Saturday 2 June it's the Diamond Jubilee special event station GQ5FZ from the shack all day and a posh barbecue. For more information contact Pam Rose, G4STO, on 01427 788 356.

Wythall Radio Club continues its Intermediate course on Monday 28 May. Tuesday is a free `n' easy evening, then on Thursday the Lew Williams' Shield CW event comes to an end. Details from Chris, G0EYO, on 07710 412 819.

Telford & District Amateur Radio Society is celebrating Olympic Torch Bearing Day in Shropshire on Wednesday 30 May with a field event and refreshments. Then on Saturday 2 June it's National Field Day (CW) with G3JKX et al. Contact Mike, G3JKX, on 01952 299 677.

Now we return to the traditional listing in date order. On Monday 28 May Gloucester Amateur Radio & Electronics Society is having an informal meeting. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 28 May Stratford Upon Avon District Radio Society is holding its AGM & surplus sale. Contact G0CHO, on 01608 664 488.

On Tuesday 29 May Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 29 May Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 29 May Worcester Radio Amateurs Association is having a club on air night on 145.350MHz FM from 7.30pm. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday 30 May Midland Amateur Radio Society is holding training classes and is on the air. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 30 May South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

Copyright © RSGB 2012. Not for public release before Monday 21 May 2012 except as a GB2RS broadcast. On Thursday 31 May Salop Amateur Radio Society is having a demo of the Buddipole antenna by Alasdair, M0UAL. Details on the club website at www.salop-ars.org.uk.

On Friday 1 June Bromsgrove & District Amateur Radio Club is holding an antenna workshop. Contact Chris, M0BQE on 01905 776 869.

On Friday 1 June South Birmingham Radio Society is doing shack and aerial work. Contact Don, on 01214 581 603.

On Sunday 3 June Cheltenham Amateur Radio Association is operating GQ5BK at Brizen Jubilee Party. Details from Derek Thom, G3NKS, on 01242 241 099.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. On Sheffield Amateur Radio Club is having a talk on Monday 28 May by Steve, M1ERS on a new home for Sheffield ARC. On Saturday 2 June the club commences its RSGB National Field Day weekend event as G2AS/P. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On South Manchester Radio and Computer Club is holding a technical forum on Monday 28 May and on Thursday is watching the Story Of Electricity video. Details from Ron, G3SVW, on 01619 693 999.

Tynemouth Amateur Radio Club is having Morse tuition and putting G0NWM on the air on Friday 1 June, then on Saturday commences its RSGB National Field Day weekend event. Details from M6KLO, by email to mail@g0nwm.com.

Now we return to the traditional listing in date order. On Monday 28 May Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 28 May Bolton Wireless Club is having a talk by Chris, G4HYG on HF digimodes with a contest bias. For details, send an email to boltonwireless@gmail.com.

On Tuesday 29 May Chester & District Radio Society is looking at The Other Man's Shack . Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 29 May Morecambe Bay Amateur Radio Society is having a members' night. Contact Sheila, on 07867 516 836.

On Thursday 31 May Ripon & District Amateur Radio Society is holding a show and tell evening. Details from Rob Hall, M0RBY, on 07876 085 631.

On Friday 1 June East Cleveland Amateur Radio Club is having a radio components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 2 June Hornsea Amateur Radio Club commences its weekend National Field Day event at Bewholme. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

Copyright © RSGB 2012. Not for public release before Monday 21 May 2012
except as a GB2RS broadcast.

NEWS FOR SCOTLAND On Monday 28 May Ayr Amateur Radio Group is holding its 75th Anniversary Dinner. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Tuesday 29 May Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 30 May Ayr Amateur Radio Group is holding a group meeting. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday 30 May Glenrothes & DRC is preparing for National Field Day. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Thursday 31 May Aberdeen Amateur Radio Society is on the air and running a Morse class. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 1 June Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723

On Saturday 2 June Cockenzie & Port Seton Amateur Radio Club is operating MM0CPS at Port Seton Gala Day. More information from Bob, GM4UYZ, on 01875 811 723.

On Saturday 2 June Glenrothes & DRC commences its National Field Day weekend event. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Saturday 2 June Livingston & District Amateur Radio Society is at the Central Scotland Mini Ham Radio Convention. Details from Norman, GM1CNH, on 07740 946 192.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. On Tuesday 29 May and Saturday 2 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

Bredhurst Receiving and Transmitting Society is having an introduction to transistors by G3YVF on Thursday 31 May. On Friday 1 June the club starts operating GB2QJ on HF and VHF from the club shack. Details from Andrew, M6AAE, on 07403 325 075.

Chelmsford Amateur Radio Society is running a club net from 8.30 on Tuesday 29 May, and on Sunday 3 June they are attending the W&S Open Day. Contact Martyn, G1EFL, on 01245 469 008.

Norfolk Amateur Radio Club is having an informal meeting on Wednesday 30 May, including Bright Sparks and opening the club shack and workshop. On Saturday 2 June the club commences its weekend event for National Field Day. Details from Chris Danby, G0DWV, on 01603 898 678.

Now we return to the traditional listing in date order. On Sunday 27 May Waterlooville Amateur Radio Club is holding a chat night. Details from Rich, G4IBW, on 0772 225 002.

On Monday 28 May Surrey Radio Contact Club is having a construction evening. Contact John, G3MCX, on 02086 883 322.

Copyright © RSGB 2012. Not for public release before Monday 21 May 2012 except as a GB2RS broadcast. On Tuesday 29 May Radio Society of Harrow

is having an informal evening at Rayners Lane. More information from Linda, G7RJL, on 02083 868 586.

On Wednesday 30 May Havering & District Amateur Radio Club is watching the T32C DVD. More information from John, M0UKD, on 07890 222 111.

On Thursday 31 May Bittern DX Group is meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 31 May Horsham Amateur Radio Club is holding a fox hunt. Details are on the web at www.harc.org.uk.

On Thursday 31 May King's Lynn Amateur Radio Club is having a club night. Contact Ray, G3RSV, by email to ral- g3rsv@supanet.com.

On Thursday 31 May Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 31 May Shefford & District Amateur Radio Society is having a Top Band pedestrian DF hunt with Gary, M6PLT as the fox. Details from John Burnett, M6JBU, on 07860 804 793.

On Friday 1 June Crystal Palace Radio and Electronics Club is having a talk on inductors, transformers and tuned circuits by Bob, G3OOU. Contact Bob, G3OOU, on 01737 552 170.

On Friday 1 June Mid-Sussex Amateur Radio Society is holding a surplus equipment sale. Details from Rob, 2E0RJA, on 01444 232 129.

On Friday 1 June Wey Valley Amateur Radio Group is holding its AGM. Details are on the web at www.weyvalleyarg.org.uk.

On Saturday 2 June Newbury & District Amateur Radio Society is taking part in National Field Day. Contact Rob, G4LMW, on 01635 862 737.

On Sunday 3 June Bromley & District Amateur Radio Society continues its Intermediate course. Details from Andy, G4WGZ, on 01689 878 089.

NEWS FOR THE SOUTH WEST On Monday 28 May Exeter Amateur Radio Society is having a talk on HF DX Operations with GX4ARE, then on Thursday it's the 2m club net on 145.575MHz at 19:45. The 4m club net is on Thursday on 70.425MHz at 19:00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday 28 May Bristol RSGB Group is having a talk by Tony Bettley on what really happened at the T32C DXpedition". Details from Robin, G3TKF, on 01225 420 442.

On Monday 28 May Riviera Amateur Radio Club is having a club night. Contact Alan Wyatt, G2DXU, via email to rivieraarc@gmail.com.

On Monday 28 May Weston Super Mare Radio Society is holding a Morse class & natter night. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 30 May Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

Copyright © RSGB 2012. Not for public release before Monday 21 May 2012 except as a GB2RS broadcast. On Thursday 31 May South Bristol Amateur Radio Club is holding an open house and on the air night. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 31 May Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

NEWS FOR WALES

On Thursday 31 May Aberystwyth & District Amateur Radio Society is having a club night on the air on 145.500 then 145.550. Details from Ray, GW7AGG, on 01970 611 853.

On Sunday 3 June Carmarthan Amateur Radio Society is having a rig check by GW4RVA. Contact Lloyd, 2W0LLT, on 01239 711 297.

# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
21 - 27 May 2012

Solar activity was very low to low during the period. An impressive
CME was observed from a region beyond the west limb late on 26 May.
Associated with this non-Earth-directed CME were Type II (estimated
shock velocity 751 km/s) and Type IV radio sweeps as well as a
greater than 10 MeV proton event at geosynchronous orbit. There were
five regions numbered during the period with Region 1492 (S14,
L=281, class/area Eao/190, on 27 May) being one of the largest and
most active. This region produced six C-class flares, including a
long duration C3/Sf flare at 27/0552Z associated with a
non-Earth-directed CME observed off the southeast limb in LASCO
C2/C3 imagery.

A greater than 10 MeV proton event was observed at geosynchronous
orbit on 27 May. The event began at 27/0535 UTC, reached a peak of
14 pfu at 27/1045 UTC, and ended at 27/1235 UTC. This event was
associated with the CME observed beyond the west limb.

The greater than 2 MeV electron flux at geosynchronous orbit reached
high levels during 24 - 27 May.

Geomagnetic field activity ranged from quiet to minor storm levels
during the period. Mostly quiet levels occurred on 21 May. Activity
increased to quiet to active levels on 22 May. A further increase to
quiet to minor storm levels occurred on 23 May. Activity decreased
to quiet to unsettled levels during 24 - 25 May with brief active to
minor storm periods at high latitudes. Mostly quiet levels occurred
during 26 - 27 May. The increased activity during 22 - 25 May was
associated with a recurrent coronal hole high-speed stream (CH HSS).
ACE solar wind data indicated a co-rotating interaction region (CIR)
on 22 May in advance of the CH HSS. Associated with the CIR were
increased IMF Bt (peak 14 nT) and intermittent periods of southward
IMF Bz (maximum deflections to -11 nT). The CH HSS commenced on 23
May as wind speeds increased to around 700 km/s. The CH HSS began to
```

gradually subside on 24 May.

Forecast of Solar and Geomagnetic Activity
28 May - 23 June 2012

Solar activity is expected to be at very low to low levels during the period with a chance for M-class activity during 30 May through 13 June due to the return of old Region 1476 (N10, L=180, class/area Fkc/1050 on 09 May).

A chance for a greater than 10 MeV proton event at geosynchronous orbit exists from 30 May through 13 June due to the return of old Region 1476.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to reach high levels during 28 - 29 May, 06 - 12 June, and 20 - 23 June in response to recurrent CH HSS effects. Normal to moderate levels are expected during the rest of the period.

Geomagnetic field activity is expected to be at quiet to unsettled levels during most of the period. There is a chance for isolated active periods during 4 - 5 June and again during 18 - 19 June due to recurrent CH HSS effects.

http://forums.qrz.com/showthread.php?347905-Aircraft-Carrier-USS-Hornet-(CVS-12)-on-Museum-Ships-Weekend&goto=newpost

The USS Hornet ARC will operate station NB6GC from the USS Hornet Aircraft Carrier Museum in Alameda, CA as part of the 2012 Museum Ships On The Air Weekend sponsored by USS New Jersey (BB-62). NB6GC will operate SSB, PSK, and maybe CW on the 75M, 40M, 30M, 20M, 15M, and 10M HF bands. SSB frequencies will usually be XXXXX12 KHz in the General Class Phone bands, i.e., 3812, 7212, 14312, 21312, and 28312. PSK-31 will be on the usual PSK frequencies for each band, i.e., 7070, 10140, 14070, and 21070. CW operation, if conducted, will be at the low end of the General Class CW allocation plus 12 KHz. Three radios will be in operation whenever possible. Hours of operation (PDT): Friday, June 1, 1700 - 2200; Saturday, June 2, 0930 - 2200; Sunday, June 3, 0930 - 1700. Contact ko6no@yahoo.com for information. 73 de Ken, KO6NO.

High Altitude Balloon Crossband Repeater Payload Northeast USA

Posted: 28 May 2012 01:30 AM PDT
http://forums.qrz.com/showthread.php?347939-High-Altitude-Balloon-Crossband-Repeater-Payload-Northeast-USA&goto=newpost

High Altitude Balloon Crossband Repeater Payload Northeast USA

Amateur radio operators in New England and northern Atlantic coast in the US and Canada are invited to listen and operate via the crossband repeater payload on a high altitude balloon flight from Hermon, Maine.

Launch is planned for June 2, 2012 at about 0830 EDT (UTC-4) by members of the Pine State Amateur Radio Club as one of the events during the 25th Annual Bangor Hamfest at Hermon High School.

The club is working with the University of Maine Electrical and Computer Engineering Department to plan and execute the flight.

The crossband repeater frequencies are:

Uplink: 147.570 MHz

Downlink: 446.100 MHz

The payload will also include APRS for position and altitude tracking. University of Maine tracking information can be found at:

http://eece.maine.edu/umhab/

Coverage for the VHF/UHF repeater is estimated to be more than 450

miles. Stations as far away as western New York, Long Island, all of New England, and Maritime Canada should be able to work it.

The PSARC High Altitude Balloon team will award a certificate for the station furthest away from the balloon to make contact through the repeater. Please join in to help set a distance record for the repeater.

The latest launch information and more details are available on-line:

http://www.n1me.org/Hamfest.php

http://eece.maine.edu/umhab/ (which will be updated shortly before

the launch.)

Steve Jordan, KD1OM,

President PSARC and

Stuart Ballinger, WA2BSS

RAC Bulletin 2012-030E - Field Day 2012 is just around the corner.
2012-05-28

This year's Field Day is just weeks away, and by now your preparations should be well under way. Whether your focus for the event is an Emergency Preparedness Display, a Public Service Demonstration or just an excuse to get on the air, the main thing is to have fun.

This is also a great time to recruit new Hams, or encourage "just licensed" Hams to join you to get their "feet wet" with pile ups, experiencing for the first time the thrill of having the world at their fingertips.

Field Day is also a great time to recruit new RAC members, or to repatriate ones who have not renewed for one reason or another. Why not place some RAC membership forms on your Public Information table.

For full Field Day rules and details, please visit the ARRL website.
Have fun!

RCF and Ofcom agree ACO exam pass equivalent to Amateur Radio Foundation
pass

The Radio Communications Foundation is pleased to announce that agreement has been reached with the Air Cadets Organisation (ACO) to accept a pass in their ACO Radio Communications Foundation Equivalent examination as equivalent to a pass in the Amateur Radio Foundation examination.

Ofcom has also accepted that the ACO FE examination syllabus meets the Radio Amateur Foundation level requirements and will issue a Radio Amateur Foundation level licence via the Radio Society of Great Britain (RSGB), on receipt of a successful Air Cadet candidate pass details.

The Foundation understands that the RSGB is offering those under 21 who achieve their licence through this route a year□s free membership of the Society.

The vision of the Foundation is to bring the benefits of radio to young people and to encourage the use of technology. The Foundation is delighted with this agreement as it completely meets this objective and it is inspiring that young Air Cadets may set out on a lifetime of enjoyment of the hobby through this agreement.

The Radio Communications Foundation

The Radio Communications Foundation is a Registered Charity established in 2003 with the objectives of supporting people and projects where radio communications through the expertise of the radio amateur is the theme. In 2007, the Office of Communications (Ofcom) signed an agreement with the Foundation for the management of the examinations required to obtain an Amateur Radio transmitting licence. The Radio Society of Great Britain administers these examinations in accordance with standards defined by the Foundation. See www.commsfoundation.org

That is the question I've just asked.

I doubt it will get a welcome response.

This has been rushed through by some on the RCF without thinking about it.

http://www.eham.net/articles/28391

Joseph Dreher, of Baldwinsville, died Thursday, his 93rd birthday, at
Crouse Hospital after a short illness. He was born in in Terre Haute, Ind.,
and was employed by General Electric Company from 1941 through 1985, his
tenure interrupted by four years active duty during WWII as an officer in
the Corps of Engineers, two years of which were spent in Iceland. In 1947
he moved to Baldwinsville, having been relocated by General Electric to
Electronics Park. An amateur radio enthusiast licensed for almost 80 years,
Mr. Dreher was active in local "ham" affairs. He also spent much time as a
volunteer.

(I received the following via email)

Rochester Hamfest 2012: Here we GROW again!

Sponsored by the Rochester Amateur Radio Association

We outgrew our previous location and we didn't like relying on the weather;
so we moved to become a huge indoor event - still only $5.00! If you can
only make one big hamfest this summer we're sure you won't be disappointed
at the newest Rochester Hamfest!

When : June 30, 2012 (6:30am - 4pm) - Last chance Auction starts at 2pm.

Where : Rochester Institute of Technology Campus (Close to the Thruway)

Highlights :

WEATHERPROOF!

60,000sf of beautiful INDOOR air-conditioned space for Commercial
Vendors and Flea Market

Outdoor tailgating available on pavement

Raffle prizes include: Five (5) dual band hand held radios, gift
certificates, and more!

Tickets and Attendance

All at the same low prices!

Admission: $5 - (FREE for RaRa members & kids)

Indoor Flea Market Space: $5 - (FREE for RaRa members)

Table and chair rental $10.00 (Note: Only available by advanced
reservation before June 10th!)

Outdoor Tailgating: $5 - (FREE for RaRa members)

Save time and $$$ - Get your tickets and reserve your space now! (Click here) Don't wait in line: Advance ticket holders can use "Express Check-in lanes".

Limited spaces are still available... exhibitor sales close June 1st.

Reserve your spaces now!

Lodging and Other Area Activities

Onsite Hotel for out of town travelers

Side trips for the family while you're "Hamming it up":

Niagara Falls

New York wine country

Rochester Beaches

You had my hopes up for a while. Rochester, MINNESOTA isn't too
terribly far away, but NY is. ;)

Firedrake Exposed! China's Secret Shortwave Jamming Project

Posted: 28 May 2012 06:05 AM PDT
http://forums.qrz.com/showthread.php?347955-Firedrake-Exposed!-China-s-Secret-Shortwave-Jamming-Project&goto=newpost

Hi, Below is information about my new book. It is the third book of mine that has been published in 2012 covering topics related to radio communications. You were kind enough to publish information about my first two books this year and I hope that you will be able to publish the information about my newest book.

"Firedrake Exposed! China's Secret Shortwave Jamming Project" by Steven Handler (N9ABC)

Several years ago a jammer dubbed "Firedrake" became the scourge of the ham bands. Broadcasting it's high pitched loud music on the amateur radio bands worldwide, hams sought to locate the source and silence the broadcasts. Although Firedrake seems to be gone from the ham band, perhaps temporarily, it still plagues the shortwave bands. My new 23 page mini-book "Firedrake Exposed! China's Secret Shortwave Jamming Project" published in May of 2012 exposes the source of the Firedrake jamming.

The book reviews shortwave jamming by China, including Firedrake and other HF jammers. It includes precise direction finding results, obtained from ITU registered monitoring sites, identifying transmitter sites. It also includes charts of Firedrake HF frequencies and times heard broadcasting in 2012 as well as historical charts of frequencies and times during the 2011. This book provides background information on Chinese shortwave jamming as well as the US response.

It is available in an electronic version only. For more information contact the author at n9abc@arrl.net

A year without Dayton

Posted: 27 May 2012 06:30 PM PDT
http://forums.qrz.com/showthread.php?347915-A-year-without-Dayton&goto=newpost

Well, I guess you could say I□m a Dayton junkie. I have been to every Hamvention for over 30 years. When leaving Hamvention, from the time the wheels of my truck hit Basore Road, I am looking forward to next year's Hamvention. After a long, cold winter in Pittsburgh you need something to keep you going. I have been a ham since 1979 and I have about anything a ham could ever want or need, sometimes three of them! I no longer go to Dayton for any real need of parts or equipment. No, I go for the entire Dayton experience. For one short weekend a year you go from a world where almost no one knows what ham radio is, to a world where EVERYONE is a ham! And hell, it□s not JUST Hamvention! There□s Four Days in May, the contest dinner, and just about any gathering of special hammy interest you could ever image! I just love every moment of it.

Like I said, I haven□t missed a Hamvention in around 30 years, ever since I started going. Imagine my horror when I discovered that my daughter□s college graduation happened to be on the SAME weekend as Dayton? My stomach did a complete 360! OH MAN. Now, I would never dream of missing my daughter□s graduation, but it was a hard time in the weeks leading up to Hamvention. Turn on the radio and there is someone talking about going to Dayton. I look in the magazines and on every ad it says □See us at Dayton!□ The weather got warmer and my head automatically turned to Dayton mode. I could smell it in the air! I had flash-backs of standing on the loading dock looking over Mendelson□s tent. I could see myself walking up Audio Ally. Oh look, there□s Bob! There□s the FISTS booth on the left. Is Nancy there? At the top I make a right and swing around to the Begali booth. Hi Piero, hi Bruna! It was pure hell. I would be missing all of it!

Now don□t get me wrong, it is not that I was not into my daughter□s college graduation. I was just P-Oed that out of 52 weekends a year, it HAD to be on the one weekend that I cherish over any other weekend of the year. Oh well, that□s the way it goes.

But, this doesn□t stop there! We needed to drive from Pittsburgh up to Rhode Island. That□s about an 11 hour drive. Along the way Dayton haunted me. We stopped at a rest area to use the facilities, I went to use the hand dryer and can you guess the make of the unit? Yes, it was a Dayton hand dryer! I walked out to get back to the car and looked at a car in the parking lot, the handicap license plate happened to be □01 DX□. (No, it

wasn☐t a ham car either) We drove past a Crowne Plaza. We stopped at a local hardware store in Rhode Island and they had Kenwood motor oil! I work on cars for a living and I NEVER heard of Kenwood motor oil? But there it was! Everywhere I looked some element of Hamvention was calling me!

It☐s all over now. Another 300 and some odd days to the largest hamfest in the world. Another 300 some odd days until I can stand on the loading dock overlooking Mendelson☐s tent. Another 300 some odd days until I can walk up Audio Ally. I can☐t wait. My friend Bob got an extra Hamvention program and had other local Pittsburgh hams sign it like a high school year book. I love it. I can look at others pictures and watch YouTube videos. Looks like the weather was great and no sewer pipes busted! (BTW that flowed right through our space last year. hihi)

The graduation went VERY well, thank you for asking. We made it safely there and back, the weather was great and I am one proud daddy. I am blessed. Despite the fact that I wasn☐t at Hamvention I still wanted to thank all of the MANY Hamvention volunteers. You do a fantastic job. By the way, if anyone makes plans for me next Dayton weekend they are going to land up with a black eye! The good Lord willing and the creek don☐t rise, I will be there in 2013. With bell on. CU there

dit dit

AMSAT Submits NASA Edison Program Proposals

This week the Board of Directors announced AMSAT was a partner in a pair of Phase-2 NASA Edison Program proposals that were successfully submitted on Tuesday May 22, 2012.

If selected, these proposals would provide AMSAT and its partners with the funds to construct and launch new amateur radio satellites. Due to the highly competitive nature of this program, no additional information can be released at this time.

NASA intends to announce the winning proposals in the Fall of 2012. More information will be released as it becomes available.

[ANS thanks the AMSAT Board of Directors for the above information]

ARISS Call For Volunteers

During the Dayton Hamvention AMSAT and the ARRL announced opportunities for amateur radio satellite operators to join the ARISS Program (Amateur Radio on the International Space Station) in roles as Technical Mentors and Ground Station Operators.

On Friday and Saturday of the Hamvention AMSAT Vice President for Educational Relations Mark Hammond, N8MH took advantage of the ARRL Stage to explain these roles for radio amateurs who serve as an advising and coordinating liaison between NASA, the school or group making the ARISS contact, and the Ground Station Operators, who set up the satellite station at the contact location.

This week the ARRL published the ARISS recruiting program on the web with a call for volunteers. The ARRL said, "Public awareness of the ARISS program is growing as a result of a new proposal process, and promotion by NASA

through its broad outreach to schools and teachers. This presents the Amateur Radio community with an opportunity to reach out to even more schools in locations across the US through the ARISS program.

See the ARRL web for full details of the ARISS call for volunteers.

With the help of experienced Amateur Radio volunteers, and coordination from the ARISS partnership team, crew members speak directly with large youth audiences in a variety of public forums --school assemblies, science museums, Scout camporees and jamborees and space camps□where students, teachers, parents, and communities learn about space, space technologies and Amateur Radio.

There are two ways to get involved:

Volunteer with a Ground Support Team

We are recruiting clubs and individuals throughout the US who are able and willing to support the ARISS program in their local communities. Optimally, this means setting up direct Amateur Radio contacts with the ISS. Direct contacts provide the best opportunity to showcase Amateur Radio and offer students a firsthand experience. An ARISS event can open the door for an ongoing relationship between local ham radio clubs and schools, providing students with continuing opportunities to explore radio science, satellite communications and wireless technology with Amateur Radio.

Volunteer as an ARISS Technical Mentor

ARISS is also seeking additional volunteers to train to support the program in the liaison capacity as US ARISS Technical Mentor who will serve as the coordinators between NASA operations and the local on-site support teams at the event site. They serve as advisors to the local Ground Support Volunteers and need the same skills as well as

hands-on satellite communications experience. Technical Mentors communicate with the other mentors on the ARISS international operations team to coordinate ARISS contacts via telebridge stations around the world. They assimilate and transfer this information to the local Ground Support Volunteers who complete all of the arrangements for a

scheduled ARISS contact.

The ARISS program is a cooperative venture of NASA, the ARRL and AMSAT and other international space agencies. ARISS organizes and schedules contacts via Amateur Radio between ISS crew members and educational organizations.

Again ... More details about volunteering to assist with ARISS can be found at the ARRL website.Amateur radio operators interested in becoming involved as a ground support team or technical mentor are invited to send an email to: ARISS.Recruit@verizon.net

[ANS thanks ARRL, ARISS, and AMSAT for the above information]

Dayton Hamvention Satellite Demonstration Area Videos Posted

Patrick Stoddard, WD9EWK/VA7EWK recorded three videos of satellite passes that were worked from the AMSAT demonstration station at last weekend's 2012 Dayton Hamvention.

The videos are now available on Patrick's YouTube channel.

Two of the three videos were from VO-52 passes last Friday (18 May) and Saturday (19 May). Later on Saturday, the third video from an SO-50 pass was recorded.

You will see Keith Pugh, W5IU; Doug Papay, KD8CAO, and Roger Ley, WA9PZL taking care of the antenna. Keith□s equipment is used for the demonstration station is two Yaesu FT-817s, two homebrew antennas (3-element 2m Yagi, 6-element 70cm Yagi), and a laptop running SatPC32 to control the radios. The radios and laptop are powered from a large 12V battery.

[ANS thanks Patrick Stoddard, WD9EWK/VA7EWK for the above information]

UKube-1 is Taking Shape

AMSAT-UK is reporting UKube-1, the UK Space Agency□s first Cubesat mission, has reached an important milestone. Two payloads have now undergone pre-integration testing at Clyde Space□s facilities in Glasgow.

UKube-1, is a collaboration between the UK Space Agency, industry and academia. Open University payload C3D and University of Bath payload TOPCAT were the first of the four payloads selected to be tested. These workshops provided the first opportunity to carry out physical and functional testing between the protoflight payloads and platform subsystems.

The tests confirmed physical, electrical and operational interfaces between the subsystems. The tests represent the successful handover to flight integration and delivery from the interface emulator (supplied to payload teams by Clyde Space at the start of the program to facilitate rapid parallel development of subsystems).

C3D is a small imager which will take pictures of the earth and investigate radiation damage effects in space. It uses new sensor technology developed for space conditions.

TOPCAT (Topside Ionosphere Computer Assisted Tomography) will measure space weather conditions to inform users of the Global Positioning System (GPS) users using a dual-frequency GPS receiver designed especially for use in space.

With the remaining payloads due to be tested over the coming few weeks, the program continues confidently towards full integration in July.

UKube-1 will also take an educational subsystem called FUNcube, developed by the voluntary organisation AMSAT-UK, to encourage young people to learn about radio, space, physics and electronics. It contains a 1200 bps BPSK telemetry beacon and a 435/145 MHz linear transponder.

See these links to AMSAT-UK for more information:

UKube-1 on BBC TV http://www.uk.amsat.org/5983

UKube-1 to launch in 2013 http://www.uk.amsat.org/5933

[ANS thanks AMSAT-UK for the above information]

Listen to HORYU-2 on the Web

Andrei YO8SSQ and Cezar YO8TLC have made available a web based receiver to enable listeners to hear the new amateur radio satellite HORYU-2 when it□s within range of Romania.

The WebSDR receiver is located at the Astronomical Observatory Department of □Stefan cel Mare□ University in Suceava, Romania, latitude 47.6417N longitude 26.2453E, grid locator KN37cp. The height ASL is 350m.

The hardware consists of two SDR receivers which are fed into 48 kHz sound cards on an AMD Sempron 2600+ computer running Vector Linux.

The web page displays a track showing the current position of HORYU-2 and also provides coverage of the 3.5 MHz (80m) band.

Listen to the HORYU-2 and 80m WebSDR.

More information about HORYU-2 437.375 MHz (+/- 9 kHz Doppler shift).

[ANS thanks AMSAT-UK for the above information]

North America Rare Grid EK69 Activation From Cayo Culebra Island

Members of the Radioclub Cancun will be active as 4A3RCC from Cayo Culebra Island, Mexico (NA-200) between June 1-3. Activity will be on 80-6 meters and possibly the Satellites. Special attention will be on 6m. Operators include: Jose Angel, XE3PP; Guillermo, XE3RA; Zalo, XE3N; Julio, XE3PHM; Jorge, XE3PBL; and Julio, XE3JMA.

Cayo Culebra is located on Reserve of Biosphere of Siaan Ka'an.

For more details, see the Radioclub Cancun Web page.

Satellite Operations Planned for Worldwide Museum Ships Weekend

Museum Ships Weekend Coming Up June 2-3, 2012

by Allen F. Mattis, N5AFV, n5afv at amsat.org

The worldwide Museum Ships Weekend Event (MSWE) will be held for two days, June 2-3, 2012. Last year 83 ships in 13 countries around the world participated in the event. Amateur radio operators make special event contacts from these museum ships on all amateur radio bands with most of the contacts taking place on the HF bands. In the past

several years only two or three museum ships in North America have made satellite contacts during the event.

This year a number of Houston area AMSAT members, W5ACM, N5AFV and WC5WM, will participate with the Brazos Valley Amateur Radio Club (BVARC) operating club station KK5W from Seawolf Park on Pelican Island in Galveston, Texas. Seawolf Park is home to two Second World War vintage museum ships - the destroyer escort USS Stewart (DE-238) and the submarine USS Cavalla (SS-244). As a result, a contact with KK5W counts for two ships. Amateur radio operators who make contacts with 15 or more ships qualify for a handsome certificate.

The BVARC KK5W station plans to operate the afternoon passes of AO-27 and FO-29 on Saturday June 2nd and hope other AMSAT members will be operating from other ships. This will be their fifth year participating in the MSWE and hope to make their first MSWE satellite contact with another museum ship this year.

If any AMSAT members are interested in this event they may visit the MSWE website to find out if any museum ships near them are participating.

The Houston area based Brazos Valley Amateur Radio Club will celebrate its fifth year of participation in the annual Museum Ships Weekend Event, June 2-3, 2012 by offering a special commemorative certificate to amateur stations who contact all five Texas Based Museum ships during the event.

The five museum ships and their call signs include:

The submarine USS Cavalla and Destroyer Escort USS Stewart (KK5W) in Galveston, TexasThe Tall Ship Elissa (N5E) also in GalvestonThe Battleship USS Texas (NA5DV), in La Porte TexasThe Aircraft Carrier USS Lexington (W5LEX) in Corpus Christi, Texas

To earn the Texas Navy Certificate, amateur stations must submit proof of contact with all five Texas Museum ships to QSL Manager, KK5W along with a #10 SASE. The address is in QRZ.com.

Museum Ships Weekend is an annual operating event sponsored worldwide by the Battleship New Jersey Amateur Radio Station with more than 90 ships participating this year. ☐We decided to put in a special Texastwist to the event to commemorate our five years of taking part☐, said Ron Litt, K5HM, one of the Event Coordinators.

The Texas Navy Certificate is a cooperative effort between four different area clubs, In addition to the Brazos Valley club, members of the Battleship Texas Amateur Radio Station, The Tidelands Amateur Radio Society and the South Texas Amateur Radio Club are participating as well.

For more information contact: Ron Litt, K5HM; K5HM@arrl.net

[ANS thanks Allen Mattis, N5AFV for the above information]

High Altitude Balloon Crossband Repeater Payload Northeast USA

Amateur radio operators in New England and northern Atlantic coast in the US and Canada are invited to listen and operate via the crossband repeater payload on a high altitude balloon flight from Hermon, Maine. Launch is planned for June 2, 2012 at about 0830 EDT (UTC-4) by members of the Pine State Amateur Radio Club as one of the events

during the 25th Annual Bangor Hamfest at Hermon High School. The club is working with the University of Maine Electrical and Computer Engineering Department to plan and execute the flight.

The crossband repeater frequencies are:

Uplink: 147.570 MHz

Downlink: 446.100 MHz

The payload will also include APRS for position and altitude tracking. University of Maine tracking information can be found at the University of Maine website.

Coverage for the VHF/UHF repeater is estimated to be more than 450 miles. Stations as far away as western New York, Long Island, all of New England, and Maritime Canada should be able to work it.

The PSARC High Altitude Balloon team will award a certificate for the station furthest away from the balloon to make contact through the repeater. Please join in to help set a distance record for the repeater.

The latest launch information and more details are available on-line:

http://www.n1me.org/Hamfest.php

http://eece.maine.edu/umhab/ (which will be updated shortly before the launch.)

[ANS thanks Steve Jordan, KD1OM, President PSARC and Stuart Ballinger, WA2BSS for the above information]

ARISS Status - 21 May 2012

1. ARISS International Team Meeting Held

The ARISS International Team monthly meeting was held on May 15. Discussions included a status of the Ham TV project. Minutes have been posted.

2. Astronaut Training Status

Chris Hadfield, KC5RNJ/VA3OOG and Thomas Marshburn, KE5HOC, both slated to fly with Expedition 34, acquired their preflight training during a session on May 14. Alexander Gerst, KF5ONO (Expedition 40) took his introductory/

basic operations class on May 9.

Kevin Ford, KF5GPP is scheduled for a preflight session on May 22. He is scheduled to launch with the Expedition 33 crew in October 2012.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

Nominations for the 2012 amateur radio newsline young ham of the year close may 30

Posted: 26 May 2012 10:51 AM PDT
http://forums.qrz.com/showthread.php?347737-Nominations-for-the-2012-amateur-radio-newsline-young-ham-of-the-year-close-may-30&goto=newpost

A Quick Note From The Amateur Radio Newsline

NOMINATIONS FOR THE 2012 AMATEUR RADIO NEWSLINE YOUNG HAM OF THE YEAR CLOSE MAY 30

Nominations for the 2012 Amateur Radio Newsline Young Ham of the Year Award must be postmarked no later than midnight May 30th. If you know of a deserving teen or pre-teen, age 18 or younger, please go to www.arnewsline.org/yhoty -- download the nominating form ☐ read its simple instructions ☐ fill it out and send it to the address listed on it.

The "Amateur Radio Newsline Young Ham of the Year Award" is presented annually to a United States or Canadian licensed Radio Amateur who is 18 years of age or younger and who has provided outstanding service to the nation, his community or the betterment of the state of the art in communications through the Amateur Radio hobby/service.

The award is open to any FCC licensed Amateur Radio operator residing in the United States or its possessions or Industry Canada licensed radio

amateur residing in the Canadian provinces who is aged 18 and younger and who has used Amateur Radio to significantly contribute to the benefit of the service, to the state of the communications art, and/or to their community or their nation.

All nominations must be submitted before May 30 of any given calendar year on an official application and accompanied by verification materials. These nominating applications are available for electronic download from at this site at www.arnewsline.org/yhoty.

The current (as of 2012) "Young Ham of the Year Judging Committee" is chaired by Mark Abramowicz, NT3V: with members Rich Moseson,, W2VU; Brian Mileshowsky, N5ZGT; Larry Wolfgang, WR1B and Bill Morine, N2COP. Todd Hitzeroth, N6ZXJ continues as an Alternate Judge.

SOME BACKGROUND ON THE PRIMARY AWARD SPONSORS

The Amateur Radio Newsline, Inc., better known as "Newsline" is the worlds largest not for profit (501(c)(3) and totally independent ham radio broadcast news and data information service. It was organized in 1976 by Jim Hendershot WA6VQP and Bill Pasternak WA6ITF. Since that time it has produced and put to air over 1815 consecutive weeks of news of free bulletin programming dealing with Amateur Radio and related personal communications issues.

Primary corporate underwriting since the inception of the "Young Ham of the Year Award" program is supplied by Yaesu U.S.A. Additional corporate underwriters are CQ Magazine and Heil Sound.

Yaesu is a world leader in the design, manufacture and distribution of Yaesu brand high quality Amateur Radio and Vertex brand commercial two-way radio equipment.

As of 1995, CQ Publishing has been an additional corporate underwriter. CQ Magazine and its sister publication CQ-Contest are owned by CQ Communications and are considered the trend-setting publications serving today's modern radio amateur.

In 2008 Heil Sound Ltd.; an innovative manufacturer of microphones for the amateur, professional sound and broadcast industries joined as the latest corporate underwriter.

PAST YHOTY AWARD RECIPIANTS

1986 - Shawn Alan Wakefield, WK5P

1987 - David Rosenman, KA9PMK

1988 - Jonathan Binstock, NK3D

1989 - Erin McGinnis, KA0WTE

1990 - Mary F. Alestra, KB2IGG

1991 - Richard S. "Sammy" Garrett, AA0CR

1992 - Angela Fischer, KB0HXY

1993 - Kevin Boudreaux, N5XMH

1994 - Allison Daneen Zettwoch, KD4CKP

1995 - Adam Weyhaupt, N9MEZ

1996 - Toby Metz, KB7UIM

High Altitude Balloon Crossband Repeater Payload Northeast USA

Posted: 28 May 2012 01:30 AM PDT
http://forums.qrz.com/showthread.php?347939-High-Altitude-Balloon-Crossband-Repeater-Payload-Northeast-USA&goto=newpost

High Altitude Balloon Crossband Repeater Payload Northeast USA

Amateur radio operators in New England and northern Atlantic coast in the
US and Canada are invited to listen and operate via the crossband repeater
payload on a high altitude balloon flight from Hermon, Maine.

Launch is planned for June 2, 2012 at about 0830 EDT (UTC-4) by members of
the Pine State Amateur Radio Club as one of the events during the 25th
Annual Bangor Hamfest at Hermon High School.

The club is working with the University of Maine Electrical and Computer
Engineering Department to plan and execute the flight.

The crossband repeater frequencies are:

Uplink: 147.570 MHz

Downlink: 446.100 MHz

The payload will also include APRS for position and altitude tracking.
University of Maine tracking information can be found at:

http://eece.maine.edu/umhab/

Coverage for the VHF/UHF repeater is estimated to be more than 450

miles. Stations as far away as western New York, Long Island, all of New
England, and Maritime Canada should be able to work it.

The PSARC High Altitude Balloon team will award a certificate for the
station furthest away from the balloon to make contact through the
repeater. Please join in to help set a distance record for the repeater.

The latest launch information and more details are available on-line:

http://www.n1me.org/Hamfest.php

http://eece.maine.edu/umhab/ (which will be updated shortly before

the launch.)

Steve Jordan, KD1OM,

President PSARC and

Stuart Ballinger, WA2BSS

Keeping the Lines of Communication Open at Banner Communications:

Posted: 29 May 2012 05:02 PM PDT
http://www.eham.net/articles/28393

The idea of communicating through two-way radios is enough to excite most people's inner child, but there's a lot more that Banner Communications and Electronics offers. "We have regular, old 'Smokey and the Bandit' type stuff," said John Pekarek, Banner Communications' new owner. The business also sells cellular signal boosters, pagers, and voice mail options. They have a radio tower on Banner Mountain. They also do in-house repairs, including repairing radios from firehouses and police stations that have been sent from all over the country. "It's something that people take for granted -- communication," said Pekarek. "It breaks down fast -- people wonder what's going on when there's no communication." Keeping communication viable is an important goal for Pekarek. He's worked at Banner Communications since he was in high school, 13 years ago. Pekarek also does electronic work for the local Ham radio club; he got his Ham radio license when he was 15 years old.

http://forums.qrz.com/showthread.php?348168-8th-Annual-MCARC-Hamfest&goto=newpost

8th Annual MCARC Hamfest

WHEN: July 21st, 2012, 7:00AM-12:00 Noon

WHERE: Athens Regional Park, Athens, TN

(I-75 Exit 49, Go east 1/2 mile on Hwy 30 toward Athens, Athens Regional
Park on right.)

TALK IN: 147.060 (-) 141.3 or 145.150 (-) 141.3 (Repeaters are linked)

NEWSFLASH !!!!

The hamfest has moved... but still in the same park!

We have secured the McMinn County Agricultural Expo Center, which is
located off the rear of the Athens Regional Park.

We will now have 31,000 sq. feet under roof! This is a 200 ft X 125 foot
open shed. Yes, dealers, reserve your spot NOW!

Get in on the very first year in this new location!

AND... no more parking on top of the hill and walking down to the fest!

Everything is on one level! All graveled area.

AND... LARGER OUTDOOR TAILGATE AREA!

The lot area is probably on the order of 8 times larger than the old site.

ALL SPACES THIS YEAR WILL BE $5 per space!

See http://www.mcminnarc.com/fest/fest.html for more info!

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

With great sadness I just happened to learn that Joel F6FHP passed away yesterday evening.
No further information is known at the moment.
This is yet another bad news for the EME community with another great OP becoming a SK.
To my regret we have never met personally but over some 35 years we still contacted one
another every now and then, be it via moon or in earlier years only via tropo and meteor
scatter.
Repose en paix, mon cher ami!

Source; Bernd DF2ZC via Moon Net

In behalf of the MMM team condolences to the family members of F6FHP. We lost a great
DX-er.

Moonbounce from Uganda, 5X1EME, KJ60GH

Hello MMM

Eight day on the moon

Today we did a safari, trying to shoot some elephants. Shooting pictures off course...
We saw quite a lot wild animals, apes, chimpanzees, hyenas, zebras, ostriches, buffaloes,
a hippopotamus and so on. Very nice. e also bought some craft as a souvenir. On big market
everyone is selling the same stuff so after having seen one you know them all. Most of the
drafs
were made in China... At the end of the afternoon Rene taught our maid how to cook
spaghetti.
She never had seen minced beef before in her life so she wanted to cook it into water.
We saved our dinner by telling her step by step how to make it.
Today the very sad news came that Joel F6FHP died. In honour to him we transmitted several
periods
in both polarities "RIP F6FHP 73". Requiescat in pace amice. Repose en paix.
It's getting tough to work new ones. Everyone seems to have worked us by now.
At the end of this day (we made 9 QSO's on two meters), our total now is 275 QSO's on 144
MHz and 9 QSO on 432 MHz.
We will be QRV tomorrow from moonrise to moonset (as long as there are customers and we
don't have other duties)
on 144.134 MHz, 5X1EME 1st. Just when the common window with the USA started we had a
powerfailure again... Can't help it,
frustrating indeed...

We uploaded the log and uploaded some new pictures, see http://www.emelogger.com/uganda
under log and multimedia.

All QSL via PA3CEE

Don't miss the new pictures!

73 Atleticoteam
Rene PE1L and Eltje PA3CEE

SOURCE:Rene PE1L & Eeltje PA3CEE direct to MMM

After some very successfull DXpeditions to the Gambia past year
(C56EME with 361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz),
Bonaire (PJ4X) and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya (5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near Kampala on the equator.

The plan is to leave May 21st and build up the station before the weekend. It's just
the two of us but we know what we are doing. It's a hard job to get the license there.
Callsign is still a bit insecure but we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a update via MoonNet,
MMMonVHF and our mailinglist.
If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood.
We have to come back as often as possible. We can't resist....

SOURCE: Rene PE1L and Eltje PA3CEE direct to MMMonVHF

** DXCC: F: France ; square JN14; start 2012-06-02 **

F/PA2CHR/p qev from JN14BU begin of June

During my summer holiday I will be QRV on Saturday 2
June and (if good activity) Sunday 3 June from a
hilltop in Southern France.
This is not a real DX-pedition, just some hours fun.
If you need JN14 locator pse let me know, maybe we
can arrange a sked.

Station 144 MHz: FT857, 150W. PA and 10el.
Station 432 Mhz: FT857, 100W. PA and 21el.

WIANEWS WEEK COMMENCING JUNE 03 2012.

We'll compress 3 days of Amateur radio into 8 minutes and give you a feel
for what you missed out on at the 2012 WIA AGM and Conference in Mildura.

THIS STORY AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 3 2012.

SA GETS LION SHARE OF SKA.

After nine years of sweat and tears by the South African and Australian SKA
site bid teams, the independent SKA Site Advisory Committee, identified by
consensus Africa as the preferred site but their recommendation was
overturned by the SKA Organization after complaints by we Australians,

It appears the SKA organization had difficulty coming to a final decision and
according to one of the members of the committee the atmosphere at the
meeting was heated and at times the group had to take a recess. The ultimate
outcome was that for the sake of inclusivity they agreed to consider
constructing one of the three SKA receiver components in Australia.

Two will be constructed in Africa.

(sarl-Southgate)

Community broadcasting service for South Australia's Goolwa community

The Goolwa community in South Australia will have a new long-term community radio service after the Australian Communications and Media Authority decided to allocate the licence to Radio Alexandrina Community Broadcasters Association Inc. (Alex FM).

Alex FM was one of two applicants for the Goolwa licence. The other was Fleurieu Christian Broadcasters Inc. (Spirit FM). The licence is initially for a period of five years, when the licensee must then apply for it to be renewed.

Alex FM proposes to represent the general community interest while Spirit FM had proposed to represent the Religious - Christian community interest.

The ACMA considered that Alex FM better demonstrated its capacity to provide the proposed service which would be more capable of meeting the existing and perceived future needs of the community.

(ACMA MEDIA)

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

we'll compress 3 days of Amateur radio into 8 minutes and give you a feel for what you missed out on at the 2012 WIA AGM and Conference in Mildura.

For many arrivals in Mildura the first taste of hospitality was the airport arrival lounge where local amateurs were waiting to provide personal transport to accommodation. After check-in, registration was one stop in a whirlwind of meeting amateurs left, right and centre. Mal Brooks was handing out the registration packs together with a locally grown mandarin and maps to aid navigation through Mildura.

The Friday afternoon was topped off with a visit to the local boutique brewery pub where we sampled some local ales. A brisk walk around the corner and we were on the way to Settlers where the amateurs outnumbered the locals three to one, but they took it in their stride and dinner was on the way in the blink of an eye.

The buffet style meal was punctuated by local Balloon Pilot and all-round Scotsman, Alan Cameron who regaled several tall tales, some of which may have had a little help from the local brew.

Dinner was accompanied by local musicians who kept up a lively flow of song and music.

Breakfast the next morning was a social affair with amateurs making their way to the central dining hall where all manner of great food was available, and as food goes, Mildura kept up its end of the deal with great food the whole way through the weekend.

Afterwards a quick registration for the AGM - every current WIA member was presented with a blue voting card - not that we needed to vote on anything in the end, but being prepared is always par for the course.

VK3KI, WIA President Michael Owen, ran a tight ship and after opening the AGM celebrating 102 years of the Wireless Institute of Australia at 09:07 and the acceptance of apologies we stood for a minute silence to acknowledge the silent keys who passed in the last year. 65 WIA members and 55 further Amateurs, two Life Members among them.

The minutes of last year's AGM were accepted and the financial report was passed without comment.

New Directors were introduced and at 09:13 the AGM was all done and dusted.

Next item on the agenda was the annual awards and President's Commendations.

President's Commendations

Neil Husk VK6BDO

In recognition of his contribution to amateur radio and the Wireless Institute of Australia over many years, including supporting the WA Repeater Group and the WIA news broadcasts, but most particularly his ongoing support of the education of potential amateurs including his role in the foundation of HAM college and his role training and assessing since then.

Keith Bainbridge VK6XH, VK6EME, VK6RK

In recognition of his contribution to the Wireless Institute of Australia and amateur radio over many years including serving as a member of the Council of the Wireless Institute of Australia Western Australia Division and thereafter as a member and Chairman of the WA Advisory Committee, his different roles in the Northern Corridor Radio Group, his compilation of notes for Amateur Radio magazine, his support of the WIA Awards program and his untiring support and promotion of the Wireless Institute of Australia.

Onno Benschop VK6FLAB

In recognition of his active participation in various aspects of amateur radio during his first year as a licenced radio amateur.

David McAulay VK3EW

For his valuable ongoing contribution to the WIA's Awards Committee.

Alek Petkovic VK6APK

For his valuable ongoing contribution to the WIA's Awards Committee.

President's Commendations to Nominated Assessors
Roger Cordukes VK4CD
Peter Willmott VK3TQ
Terence Ryeland VK2UX
Peter Watts VK5ZFW
Ronald Bertrand VK2DQ

Larry Lindsay VK2CLL
Peter Dowde VK7PD
Colin Pomroy VK3BLE
Craig Cook VK3CMC
Trevor Quick VK5ATQ
Lyle Dobbs VK4LM
Trevor Connell VK8CO
Laurie Pritchard VK4BLE
Dale McCarthy VK4DMC
Tony LaMacchia VK2BTL
Eric Van De Weyer VK2VE
Ian Ellings VK7QF
Philip Adams VK3JNI
Paul Hoffmann VK5PH
Owen Clarke VK3BC
Steven Tregear VK3TSR
Scott Habgood VK2UBQ
Kathi Suminer VK6KTS
Gail Lidden-Sandford VK4ION

In recognition of their valuable contribution to amateur radio and the Wireless Institute of Australia as a Nominated Assessor - a role requiring specific qualifications and central to the effective operation of the WIA Exam Service.

Higginbotham Award:

David Clegg VK5KC

In recognition of his contribution to amateur radio and the Wireless Institute of Australia including his support of the North East Radio Club and as a very active Secretary and now President of the Adelaide Hills Amateur Radio Society and as a member of the South Australian Advisory Committee and his untiring support of the Wireless Institute of Australia.

Amateur Radio Technical Award:

James (Jim) Tregellas VK5JST for his articles 'An introduction to stepper motors' and 'Building an 80 metre magnetic loop antenna for your attic', published in the May, July and August 2011 issues of Amateur Radio.

Al Shawsmith Award for journalism:

Justin Giles-Clark VK7TW for his article 'Modern communications technologies - a quick Centenary review and the future', published in the December 2011 issues of Amateur Radio.

The Chris Jones Award;

Gavin Reibelt VK4ZZ
(commendation not provided here)

The Ron Wilkinson Award:

Dale Hughes VK1DSH for his contribution to amateur radio in representing the amateur service in the preparation for WRC-12 and as a member of the Australian delegation to the APG and the WRC and his long history of technically excellent articles published in Amateur Radio magazine.

G. A. Taylor Medal:

Peter Young VK3MV
(commendation not provided here)

After the awards, we started the Open Forum Discussion.

Discussions were productive and engaging about many issues close to the heart of Amateur Radio, including several proposals to promote our hobby to new audiences and the future of the club grant scheme.

There was discussion about how successful the club grant scheme had been, whether it was too confining in its requirements - one example from the floor was that it should be possible for the club-grant scheme to be used to buy tins of paint because it might well be that this would be the most important thing for a club to spend money on and one member stood to ask for exactly that - having just moved into a hall that needed more than some TLC. During morning tea - which included several nice pastries - several discussions continued on and the topic of promotion of the hobby was discussed.

After lunch we had several great presentations, details will be available on http://wia.org.au

We saw a demonstration of Amateur TV, saw satellites launched into space, heard about how audio chirps help determine propagation and saw amazing footage and inventiveness with project Horus.

Pre-dinner drinks were enjoyed by some, but yours truly was putting together the announcement for the conference next year in VK6 and you'll hear more about that in the news next week.

Dinner was accompanied by classical music and a classic speaker who had a lifetime in media and commercial broadcast radio and had many tales to tell about radio in Mildura.

For early risers the next morning, there was the opportunity to witness two Horus launches, weather balloons with electronic payloads. One of the launches had a repeater as a pay-load and many amateurs used it to check-in with VK3WIA.

Meanwhile, the festivities continued on the Paddle Ship Mundoo - where among the food and fun we had a live shack operating the call-sign VK102WIA - try saying that in a hurry. Many amateurs took the opportunity to operate the station and QSO's were had with New Zealand, VK6 and Russia. At several times signal reports were quite strong but some detective work determined that a few hams decided to make call-backs from the boat - anything for a QSL card.

After lunch and a group photo we made our way to the QTH of Noel Ferguson VK3FI who opened up his home and his shack for all of us to be inspired by. A life-time of building is visible in Noel's shack and his attention to

detail comes with a dry wit which saw the local bag-pipers come by to annoy the President of the Sunraysia Radio Group. The BBQ was of the same high standard that Mildura offered throughout and it was topped off with a masterfully called raffle, under the auspices of Ray VK3HSR.

And that's how it ended, laughing into the distance. What an experience!

Next year we'll have to put on a great show to top this one.

HAMS ACROSS AUSTRALIA.

The Caboolture Radio Club, call sign VK4QD, will be celebrating 100 Years of the WIA in Queensland from Saturday to Monday, 16th to 18th June using the special event call sign VK100WIQ. The operation will be from the clubhouse located at 169 Smiths Road, Caboolture.

We will be also be holding a "Grand" re-opening on Saturday 16th June from 11am to 3pm to celebrate our recently renovated clubhouse. This is a great opportunity to check out our upgraded facilities and the cool new custom-made consoles while the VK100WIQ operation is in full swing.

Hope to see you!

73, Peter VK4QC, Secretary

Calling all merry makers. You are cordially invited to RES Reunion of facilitators, students, past students and friends and partners.

All welcome.

Saturday 9th June 2012

Hinze Dam

10 AM onwards or until we drop.

You will need to bring all food, and beverages BBQ's and restrooms are available.

Please bring out door chairs if you wish to be more comfortable.

Directions will be available of 146.7 MHz (Gold Coast Repeater) and 146.5 Simplex from 9.00 AM onwards.

Please RSVP via email to ron@res.net.au. If you RSVP then we will be able to advise you of any changes such as postponements due to bad weather.

FREE - Boot Sale - fill your boot - sell your junk to others - and buy some of theirs.

Fox Hunt - $5 entry - monetary prize for winner AND prizes for 2nd and 3rd.

Go to web site www.ron.so

(Peter VK4KTX)

VK5

South East Radio Group Convention

This is John VK5DJ for the South East Radio Group.

The South East Radio Group's 48th Annual Convention will be held next Saturday and Sunday, 9th and 10th June at Mount Gambier.
That's next weekend.

Last year the hall was open for just one day although the Australian Fox Hunting Championship was run over its usual two days. Many comments were received about wanting the 2 day convention back and we are pleased that we have been able go back to the 2 day format. The program is on the website now. Just type "SERG Convention" into Google.

The first event is the Sniffer Hunt at 11.00AM on Saturday. Of course the famous night fox hunt will be held that evening and again the organisers will do their best to trick the foxes. A special challenge is promised and competitors will need to be on their toes. If you've never seen fox hunting in action here's your big chance to see how experts and beginners do it and have huge fun in the process.

The venue for the Home Brew Competition and the Trading tables is the headquarters of the 1st Mount Gambier Scout Group in Margaret Street, Mount Gambier. Entry Fee for the two days is only $5.00. The hall opens at midday on Saturday and 9:00AM on Sunday, there are hourly door prizes.

Our Chef from last year has been convinced to return, so catering will be available at the venue.

Presentations will be at the SERG Club Rooms in the Reidy Park Centre followed by the post-convention BBQ at the SERG clubrooms.

The Home brew competition is a highlight with prizes provided by a generous anonymous amateur, so bring along that project you've been working on. The project can be simple or complicated. There are several sections that cater for the beginner and the expert.

2012 is a special year for the club as it's also the South East Radio Group's fiftieth birthday so come along next weekend and help us celebrate.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

More Italian Earthquakes

Two additional earthquakes have struck the Emilia Romagna region of Italy with heavy losses in the Parmesan cheese industry and 16 deaths have been reported.

Hundreds were injured when the 5.8-magnitude earthquake shook northern Italy on Tuesday, forced thousands of people from their homes, and came nine days after the 6.0 magnitude quake killed seven.

Among the ongoing rescue and recovery workers are radio amateurs from the Raggruppamento Nazionale Radiocomunicazioni Emergenza, and RNRE, using both HF and VHF.

Tuesday's quake was followed by dozens of aftershocks with one recorded at 5.6 magnitude in the industrial and densely populated area.

Some historical buildings including churches have been further damaged by the latest shakes, particularly in the San Felice sul Panaro and Mirandola districts.

IARU Region 1 Emergency Coordinator Greg Mossop G0DUB reports that RNRE have a mobile unit with five radio amateurs in the area and two more units are ready to go when requested.

This follows a request from the Italian Civil Protection Department. The HF frequency 7060kHz is in use by IQ1HQ at the RNRE Headquarters and IQ0TK from the Civil Protection Department in Rome. VHF links are on 145.200MHz.

Please keep the frequency of 7060kHz clear. RNRE can also be found in Google English on http://tinyurl.com/RNRE-Italy

(Jim Linton VK3PC. Chairman IARU Region 3, Disaster Communications Committee, acknowledging the input from Greg Mossop G0DUB IARU Region 1 Emergency Communications Co-Ordinator)

Radio transmitter causes bomb scare

The BBC report that a suspicious device triggered a bomb alert in Surrey.

BBC News say:
The device was found after reports of suspicious activity near the Maultway, Camberley at about 10:00 BST on Monday.

The Maultway and roads near the Cheylesmore Park estate were closed for about four hours.

Following examination by army bomb disposal experts Surrey police said "The unit is now described as being a transmitter or repeater for a citizen or pirate band radio station."

[Presumably by pirate band they are referring to 88-108 MHz?]

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

>From the TARC Inc. in Townsville we learn of an activation of VI4XQA at
Mareeba, a special event station at the Mareeba Heritage Centre Saturday
9th June. The event station will be using either special call VI4XQA, or
VK4XQA and will be operating adjacent to the heritage display of the
first Amateur Radio station in Queensland, the Marcus Brimms XQA Spark
Station.

(Townsville and VK4ZZ newsletter of TARC)

Coventry Amateur Radio Society have GB 50 CCC on the air until 19th June for
the Coventry Cathedral Celebration.

GB 0 TLR Railways on the Air

Southgate Amateur Radio Club will be operating a Special Event station for
the Railways on the Air event on 22nd and 23rd of September.

This is being run in conjunction with the North London Model Engineering
Society at the Tyttenhanger Light Railway site near London Colney,
Hertfordshire using call sign GB0TLR, the same callsign as used last year
and operating on 20, 40 and 80 metres.

T6JM

That station from Afghanistan CT1FKN who is signing T6JM is about to depart
mid-June. T6JM is mainly QRV on 20m SSB and BPSK31.
QSL T6JM to CT1KFN his home call.

Members of the Jersey Contest Group will be active as GJ 2 A from the
Isle of Jersey during the Radio Society of Great Britain's'
Islands on the Air Contest.

This event taking place July 28 and 29.

QSL direct to GJ 3 DVC.

European Football Championship 2012 on the AIR

EFC 2012 is an on-the-air activity which promises to be a great deal of fun, organized by Polish and Ukrainian amateurs affiliated with PZK and UARL.

>From June 1st to July 5th 2012, there are numerous special event stations active on the air. They are operating concurrently with the 2012 European Football Championship, which this year is organized jointly by Poland and Ukraine.

There are two awards which can be earned during this period, as well as many interesting QSL cards and prizes.

More detailed information be found on website http://efc2012.pzk.org.pl

(irts)

DK9FN will once again return to Temotu Province
be active as H40FN between this December 22nd and January 7th of 2013.
QSL H40FN via HA8DD.

F4CYZ iS operational from Morocco as CN2YZ through years end. His activity will be from the city of Tangier especially on the weekends. The Mediterraneo DX Club is supporting his activities and is also providing a Web site with a log-check. Its in cyberspace at www.mdxc.org/cn2yz

South East Queensland ATV group tell us Martin VK4JVC has been working away on the SEQATV group Digital Television transmitter, if you are in the Deception Bay area close to Martin's QTH you may be able to pick up the low power test transmissions using standard digital TVs or desk top boxes able to tune manually tune 436 MHz

(Alan VK4NA)

WW SPECIAL INTEREST GROUPS --- DIGITAL

Cuba's Radio Hams get new Digimodes

With great pleasure I inform to the world community of amateur radio that after a national debate and then follow the legal avenues has been approved by the department authorized by the government the use of new digital modes for all Cuban hams.

The last legislation only allowed us to work in PSK31, QPSK31, AMTOR, PACKET and RTTY.

We can now work in Domino Contestia, Olivia, MFSK, JT65, almost all variants of PSK (BPSK, QPSK, PSK-R) among others.

And more importantly, it has set up a mechanism to apply for new digimodes by any hams, I have asked already some who were not authorized, including WSPR, JT6M, HSMM, PACTOR II and III, FSK441, among others.

Another important step is that they have authorized access to the FRC's internal network using packet radio nodes, and have authorized the use of packet gateways in cross bands (HF / VHF, etc.)

Cuban radio amateurs are pleased with this approval that puts us on a par with colleagues anywhere in the world.

3 from CO7WT
CU on HF on Digimodes !!!

WW SPECIAL INTEREST GROUPS --- ILLW

The anniversary ILLW grabs imagination

The 15th annual International Lighthouse and Lightship Weekend in August has inspired many to register early with 32 countries and nearly 250 registered already.

Although this is just over half of the countries normally attracted by the event it is slightly ahead of expectations with ten weeks to go.

The weekend increases the public awareness of lighthouses and lightships and their need for them to be preserved, promotes amateur radio and fosters international goodwill.

The event was started mainly by late Mike Dalrymple GM4SUC and the Ayr Amateur Radio Group in 1995 as the Northern Lighthouse Activity Weekend with stations at Scottish lighthouses. It quickly went international.

The third weekend in August coincides with the worldwide lighthouse open day organised by the Association of Lighthouse Keepers that sees public access to many of the featured lighthouses.

During the weekend a group or individual sets up an amateur station at or adjacent to a lighthouse, lightship or marine beacon that is listed.

To register, complete a short online form, read the event rules and have lots of fun. You will see complete statistics on past events, reports from previous years and ILLW are on Facebook too.

Visit the website at illw.net for the International Lighthouse and Lightship Weekend held on August the 18th and 19th.

(Jim Linton VK3PC)

NEW JERSEY CLUB TO ACTIVATE SUBMARINE RADIO STATION

The Nutley Amateur Radio Society, of Nutley New Jersey, has activated the radio room of World War II Submarine USS Ling. This as part of the world-wide Museum Ships Weekend THIS weekend, June 2nd and 3rd.
The Ling is a Balao class fleet submarine, measuring 312 feet and is a permanent museum ship, berthed on the Hackensack River New Jersey.

(ARNewsLine)

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Hallo everyone, this is Clive VK6CSW with a reminder that tomorrow Monday June 4th the Radio Amateurs Old Timers Club of Australia's monthly News and Information Bulletin will be broadcast on a number of HF and VHF frequencies.

The principal HF transmissions will be on 20 metres on 14.150 MHz USB at 0100 UTC beamed north from Melbourne for the eastern states, and at 0200 UTC beamed westward for Western Australia.

Numerous local relays will take place on both VHF and lower HF frequencies, To find the times and frequencies for your area please visit the RAOTC website at www.raotc.org.au

Once again, that's www.raotc.org.au

Everyone, RAOTC Members and non-members alike, is invited to listen to this interesting half hour of Old Timer news, information and anecdotes and to participate in the call backs afterwards.

Once again, the RAOTC monthly bulletin is scheduled for tomorrow, Monday June 4th.

BSA TO OFFER MORSE CODE INTERPRETER STRIP

For many years, Boy Scouts and Scouters of America have been able to earn an interpreter strip to wear on their uniforms.

This strip, worn on the uniform denotes proficiency in a foreign language or sign language.

Each language has its own strip (with the name of the language embroidered in that language), and some Scouts and Scouters wear more than one strip.

Now those hams involved with the Boy Scouts can show their proficiency in Morse code with a Morse code interpreter strip (with M-O-R-S-E spelled out in Morse code)

Emergency Agencies should work with Radio Amateurs

The Straits Times newspaper reports that the use of amateur radio in rescues should be promoted.

They say amateur radios could be the key to communicate with people in distress and, therefore, collaboration between government agencies and amateur radio users should be intensified.

They quote Malaysian Information Department director-general Ibrahim Abd Rahman as saying that integration between the two should be encouraged as it helped the agencies to build good rapport and teamwork spirit. He said agencies like the Fire and Rescue Department, Civil Defence Department (JPA3), police, Malaysian Red Crescent Society (MRCS), hospitals, Royal Malaysian Air Force and the Department of Civil Aviation should work together with amateur radio users.

GW8TGS carry's Olympic torch

27th May, William Williams, GW8TGS was an Olympic Torchbearer as part of the team carrying the Flame through Aberystwyth from around 18.14 BST, arriving at Vicarage Fields half an hour later.

Having taken part in several charity runs and raising over £15,000 for charity, William, GW8TGS was nominated by the Rotary Club of Aberystwyth for his fund raising and his voluntary work. William says he felt honoured to be a part in this once-in-a-lifetime event.

SPECIAL INTEREST GROUPS --- SUMMITS ON THE AIR
www.sotawatch.org
www.sota.org.uk

SOTA has now been operating in VK3 for 4 months, and awareness of the program continues to grow. Peter VK3PF joined the fray, activating Mt Ida VK3/VU-009 on the way up, along with Mt William VK3/VS-001 on his way back from the WIA AGM.

May has also seen a varied range of summits activated from One Tree Hill VK3/VS-036 near Ararat, Mt Beckworth VK3/VC-024 near Ballarat, Mt Cole VK3/VS-009 and Mt Buangor VK3/VS-003 which are in between Ararat and Ballarat.

There have been a few false starts in the month as well, but SOTA may end up with more than 10 activators before too long.

Most activations have been HF SSB, but a reasonable portion have been 2m FM. This is bringing out those who remember the days when there was more activity on 2m simplex frequencies, such as the national calling frequency 146.5 FM. DX in the month was mostly restricted to CW, but there was a W/VK contact on 40m, as well as a 20m SSB contact into G.

All activations in the month were QRP with operators using FT817s, but it is known that there are some kit builders out there. It is also known that some LiPos are being put together to power FT857s and IC706MkIIs so some higher power activations might be on the horizon for those eagerly chasing from Europe.

Wayne, VK3WAM, presented SOTA at the EMDRC, which was warmly received. The presentation was captured on video, and is available on Youtube at: http://www.youtube.com/watch?v=JmdMMBNiUJA There was to be an additional presentation at FAMPARC yesterday morning Saturday June the 2nd.

SOTA Chasers were heard from VK7 and VK5, chasing contacts on VK3 summits, but some also made contacts into Europe and asked activators there for SOTA codes. A few VK1ers are looking on awaiting the day when their association will go live, but that is likely to still be a few months away. Perhaps VK5 will only be a few months behind that.

(Wayne VK3WAM)

Tony's 10-metre band report

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/cL_N6UKMzxA/may_31.htm?utm_source=feedburner&utm_medium=email

'As different as chalk and cheese' is a good old-fashioned English
expression meaning extremely different in important aspects. Compare the
mid-week Wednesday list with the weekend. XX9E (Macau) and 6V7S (Senegal)
were top again during the week with A5A (Bhutan) and HK1NA (Columbia) top
in the contest

//
Satellite operations planned for worldwide Museum Ships Weekend

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/TWTyNBbQUdA/museum_ships_weekend.htm?utm_source=feedburner&utm_medium=email

The worldwide Museum Ships Weekend Event (MSWE) will be held for two days,
June 2-3, 2012. Last year 83 ships in 13 countries around the world
participated in the event. Amateur radio operators make special event
contacts from these museum ships on all amateur radio bands with most of
the contacts taking place on the HF bands. In the past several years only
two or three museum ships in North America have made satellite contacts
during the event

//
23cm band covered by GNSS

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/YorIbvz8ouA/23cm_band_covere_%20by_gnss.htm?utm_source=feedburner&utm_medium=email

An article in the Microwave Journal shows that all of 1240-1300 MHz except
for one narrow gap will be used by global navigation satellite systems
(GNSS)

//
EME 2012 Double Rooms

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/gsAvxOT7r1w/eme_2012_double_rooms.htm?utm_source=feedburner&utm_medium=email

EME2012 Conference bookings have exceeded expectations, so more deluxe
double rooms are being reserved for guests

//
Worked All Continents Award

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/m-cA2UgEeRo/worked_all_continents_award
.htm?utm_source=feedburner&utm_medium=email

Many radio amateurs cut their DXing teeth on the Worked All Continents
award. This award recognizes contacts with all six continental areas of the
world, and is issued by the International Amateur Radio Union (IARU)

on Thursday, May 31. The Audio News will return on Thursday, June 7.

==> FCC NEWS: FCC EXPANDS PART 95 MEDRADIO RULES TO ALLOW DEVICES IN
2360-2400 MHZ BAND

In a First Report and Order and a Further Notice of Proposed
Rulemaking (ET 08-59) released on May 24, the FCC decided to expand the
Part 95 Personal Radio Service rules to allow medical devices to
operate on a secondary basis in the 2360-2400 MHz band. These devices
-- called Medical Body Area Networks (MBAN) -- provide a way for health
care facilities to monitor their patients via wireless networks.
Because use of these frequencies will be on a secondary basis, MBAN
stations will not be allowed to cause interference to -- and must
accept interference from -- primary services, including radio amateurs
who operate on a primary basis in the 2390-2395 MHz and 2395-2400 MHz
bands. Read more here
<http://www.arrl.org/news/fcc-expands-part-95-medradio-rules-to-allow-devices
-in-2360-2400-mhz-band>.

==> MARS: HOUSE ARMED SERVICES COMMITTEE "URGES" MARS COORDINATION
```

On May 18, the US House of Representatives approved HR 4310, The National Defense Authorization Act for Fiscal Year 2013. This bill authorizes appropriations for military activities and prescribes military personnel strengths for Fiscal Year 2013. When the House Armed Services Committee sent the bill to the House, it included language in support of the Military Auxiliary Radio System (MARS) and called for the three MARS branches -- Army, Air Force and Navy/Marine Corps -- to be brought under one umbrella. Read more here <http://www.arrl.org/news/house-armed-services-committee-urges-mars-coordination>.

==> ON THE AIR: HAVE SOME FUN IN THE 2012 ARRL JUNE VHF QSO PARTY

There will be lots of RF generated on 6 meters and up the weekend of June 9-11 during the 2012 ARRL June VHF QSO Party. While many amateurs think of the VHF+ bands as a "local" band for public service, emergency communications or even a bit of fun on FM repeaters, weak-signal VHF+ enthusiasts know better. Even with a modest station, it's possible to work hundreds -- or even thousands -- of miles on the VHF bands during a good opening.

ARRL Contest Branch Manager Sean Kutzko, KX9X, is a big VHF enthusiast. "In more than 25 years of Amateur Radio, weak-signal work on 6 and 2 meters remains the most fun and intriguing activity I do," he said. "There is nothing like a good VHF opening -- with interesting propagation characteristics like Sporadic-E, tropospheric ducting, aurora and even meteor scatter and moonbounce -- VHF offers QSO opportunities that HF can never satisfy." Read more here <http://www.arrl.org/news/have-some-fun-in-the-2012-arrl-june-vhf-qso-party>.

==> AMATEUR RADIO FUN: ANNOUNCING THE WINNERS OF THE 2012 QST VIDEO CONTEST

The votes have been tallied for the 2012 QST video contest and the winners chosen!

- First Place, Amateur: Erin King, AK4JG: Erin -- along with her mentor and members of the Columbus (Georgia) Amateur Radio Club (CARC <http://www.w4cvy.org/>) -- sent a weather balloon and a high-definition video camera to an altitude of over 90,000 feet. They tracked the balloon across the Georgia countryside using APRS and managed to recover the payload from the branches of a towering pine tree. The resulting video is nothing short of spectacular.
- Second Place, Amateur: Jim Wright, N2GXJ: Jim's video Discovering the Fun does an outstanding job of capturing the thrill of obtaining an Amateur Radio license and then discovering the pleasures of HF digital operating with PSK31. When Jim unfurls his ARRL DX Century Club certificate at the end of the video, you can't help but smile.
- Third Place, Amateur: Jared Gohlke, N4JMG: Jared chronicles a Rowan Amateur Radio Society (RARS <http://www.rowanars.org/>) transmitter hunt among the woods and cotton fields of North Carolina. The result is both informative and humorous. After watching this video you may want to try a "foxhunt" of your own!

- Professional: Gary Pearce, KN4AQ: Gary Pearce, KN4AQ, is a professional videographer and the creative force behind Amateur Radio Video News (ARVN <http://arvideonews.com/>). Gary took his equipment and crew to the 2012 Orlando Hamcation for a glimpse of one of the most popular Amateur Radio gatherings in the southeastern United States.

You can watch the winning videos in the digital edition of the July issue of QST when it becomes available in a few weeks. If you can't wait, enjoy the videos right now on the web <http://www.arrl.org/winners>.

==> SOLAR UPDATE

Tad "All spheres, grown, ungrown, small, large, Suns, moons, planets <http://www.youtube.com/watch?v=8aK6k6tt1Z4>" Cook, K7RA, reports: The average daily sunspot numbers sank more than 28 points this week (nearly 26 percent) to 81.9, while the average daily solar flux declined more than 16 points to 111.6. No new sunspots appeared since May 25. The short term outlook is for lower solar activity, with the solar flux peaking around 120 on June 5-15 and July 1-12. The latest prediction has solar flux at 110 on May 31-June 2, 115 on June 3-4, 120 on June 5-15, then 115 on June 16-18, 110 on June 19-26 and 105 on June 27-28. The predicted planetary A index is 5 on May 31-June 2, then 10, 15, 18, 15 and 8 on June 3-7, 5 on June 8-11, 8 on June 12-13, 5 on June 14-17, and 15, 12 and 8 on June 18-20, and then back down to 5 on June 21-25. Look for more on the ARRL website on Friday, June 1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Ralph Vaughan Williams' A Sea Symphony <http://en.wikipedia.org/wiki/Sea_Symphony> (II On the Beach at Night Alone), taken from Walt Whitman's Leaves of Grass <http://en.wikipedia.org/wiki/Leaves_of_Grass> (Book XIX <http://en.wikisource.org/wiki/Leaves_of_Grass/Book_XIX#On_the_Beach_at_Night_Alone>,
verse 8).

==> THIS WEEK IN RADIOSPORT

This week:

- June 1 -- NCCC Sprint Ladder; HA3NS Sprint Memorial Contest
- June 2 -- Wake-Up! QRP Sprint
- June 2-3 -- Alabama QSO Party; Maritime QSO Party; 10-10 International Open Season PSK Contest; SEANET Contest
- June 5 -- ARS Spartan Sprint

Next week:

- June 8 -- NCCC Sprint Ladder
- June 9 -- Portugal Day Contest; Asia-Pacific Sprint (SSB)
- June 9-10 -- DRCG Long Distance Contest (RTTY); VK Shires Contest; GACW WWSA CW DX Contest; REF DDFM 6 Meter Contest

- June 9-11 -- ARRL June VHF QSO Party
<http://www.arrl.org/june-vhf-qso-party>
- June 13 -- NAQCC Straight Key/Bug Sprint; NAQCC-EU Monthly Sprint
- June 13-14 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 1-3 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-3>,
Seaside, Oregon
- June 2 -- ARRL Georgia Section Convention
<http://www.arrl.org/hamfests/georgia-section-convention-atlanta-hamfest-1>,
Marietta, Georgia
- June 8-9 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>,
Plano, Texas
- June 9 -- ARRL Arkansas State Convention
<http://www.arrl.org/hamfests/arkansas-state-convention>, Rogers,
Arkansas; ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-2>, Knoxville,
Tennessee
- June 30 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-electro
nics-expo-firecracker-hamfest>,
Harrisburg, Pennsylvania
- July 20-22 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-78th-glacier-waterton-
international-hamfest>,
East Glacier, Montana
- July 26-28 -- Central States VHF Society Conference
<http://www.arrl.org/hamfests/central-states-vhf-society-conference-1>,
Cedar Rapids, Iowa
- July 27-28 -- ARRL Oklahoma Section Convention
<http://www.arrl.org/hamfests/oklahoma-section-convention-ham-holiday-2012>,
Oklahoma City, Oklahoma
- July 27-29 -- ARRL Rocky Mountain Division Convention
<http://www.arrl.org/hamfests/rocky-mountain-division-convention-2>,
Bryce Canyon, Utah
- August 3-4 -- ARRL Texas State Convention
<http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-2>,
Austin, Texas
- August 3-5 -- Pacific Northwest DX Convention
<http://www.arrl.org/hamfests/pacific-northwest-dx-convention-1>,

Portland, Oregon
- August 4 -- ARRL Ohio State Convention
<http://www.arrl.org/hamfests/ohio-state-convention>, Columbus, Ohio
- August 10-12 -- RAC National Convention 2012
<http://www.arrl.org/hamfests/rac-convention-2012>, Edmonton, Alberta,
Canada
- August 18 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-2>,
Weston, West Virginia
- August 18-19 -- ARRL Southeastern Division Convention
<http://www.arrl.org/hamfests/southeastern-division-convention-huntsville-ham
fest>,
Huntsville, Alabama
- August 19 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-2>, Salina,
Kansas
- August 24-26 -- ARRL New England Division Convention
<http://www.arrl.org/hamfests/new-england-division-convention-1>,
Boxboro, Massachusetts
- August 26 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-2>,
New Kensington, Pennsylvania

(e-mail: dj1yfk@darc.de)

7O, Yemen (Update):
The 706T-DXpedition is history, with a total of 162,029 QSOs.
The organizers are still asking for donations; QSLs can be requested
on their website.
http://www.yemen2012.com/sponsors.php
https://secure.clublog.org/charts/?c=7O6T

A6, United Arab Emirates:
Tom, A6/DL2RMC, will be QRV from a hotel on Yas Island. This island
does not belong to AS-021, though! Activities will depend on the local
situation and his work load. He already acquired his license. QSL
via Homecall.

F, France:
After a dispute with his boss Guglielmo Marconi, Roberto Clemens
Galletti di Cadilhac (1879 - 1932) built up his own transmitting
station 100 years ago. The special callsign TM6GAL is active until
June 10th to commemorate his achievements. QSL via F6HQP.
http://ed73.ref-union.net/ed/

FO, French Polynesia:
Pat, F4EBT, will visit French Polynesia from June 1st - 24th and
will be active (holiday style) as FO/F4EBT from Tahiti (OC-046,
DIFO FO-002 WLOTA 0885), Moorea Island (OC-046, DIFO FO-010, WLOTA
0465), Raiatea Island (OC-067, DIFO FO-012, WLOTA 1977), Huahine
Island (OC-067, DIFO 004, WLOTA 1371), Bora Bora Island (OC-067,
DIFO FO-003, WLOTA 0430) and Maupiti Island (OC-067, DIFO FO-008).
QSL via Homecall.

FO, Marquesas Is.:
Christian, F5IDM, is a member of a scientific expedition to observe
the Venus Transit. From June 3rd - 12th he will use the special
callsign TX5VT from the following islands of the Marquesas group

(OC-027): Hiva Oa (DIFO FO-021, WLOTA 1233); Nuku Hiva (DIFO FO-023,
WLOTA 2030); Ua Huka (DIFO FO-026) and Ua Pou (DIFO FO-027).
QSL via F5IDM (KH6 Bureau, see QRZ.COM).
http://www.cveillet.net/PF/TX5VT.php

G, England:
The ,,Pontefract & District Amateur Radio Society" (FISTS #14041)
will be active as GB0PH (Pontefract Heritage) on June 4th from
Pontefract Castle (CASHOTA G-261, WCA G-00261, WAB SE42, WW Loc.
IO93iq) in Yorkshire QSL via bureau, G0BPK (direct).

The ,,Coventry Amateur Radio Society" celebrates the 50th anniversary
of the consecration of Coventry Cathedral until June 19th using
the special call sign GB50CCC, mostly on 80m, 40m and 20m in phone
and on 2m in FM (WW Loc. IO92fj). QSL via bureau.

I, Italy:
ARI Fidenza will take part in the Museum Ship Weekend (June 2/3)
as II1WIL from La Spezia, where the USS Williamsburg is laid up for
the last twenty years. QSL via bureau by IQ4FE.

JT, Mongolia:
Alex UA9YAB (JT0YAB), and Alex UA9YPS (JT0YPS) will activate the
Altai Tavan Bogd National Park from May 31st to June 4th.
QSL JT0YPS via UA9YPS, direct only, QSL JT0YAB see QRZ.COM.

PJ4, Bonaire:
William, K9HZ, will be using PJ4HZ from June 1st to 10th from Bonaire
on the HF bands. QSL via Homecall, direct only, eQSL.

SP, Poland:
On the occasion of the European Football cup in Ukraine and Poland,
the following special callsigns will be QRV from June 1st to July 1st.

SN2012GD Coordinator: Roman SQ2RH
OPs: Bogdan, SP2EBG, Rafal, SQ2IHP, Piotr, SP2AYC, Miroslaw, SP2QOT,
Robert, SQ2WHH, Ida, SQ2OTS, Stanislaw, SP2WGB, Krzysztof,
SP2UUU, Henryk, SQ2NUK, Ireneusz, SP2DKI, Marek, SP2QG, Dariusz,
SP2MKI and Marek, SP2MKT

SN2012PO Coordinator: Bogdan, SP3IQ
OPs: Members of the club station SP3PKK and Henryk, SQ3LMR.

SN2012WA Coordinator: Zygmunt, SP5ELA
OPs: Members of the club station SP73VOT

SN2012WR Coordinator: Marek, SP6NIC
OPs: Members of the club stations SP6ZDA and SP6PRT (Contest Call SN6F)

SN2012PZPN Coordinator: Waldemar, 3Z6AEF
OPs: Members of the club station SP6PYP and Roman, SP3FGQ, Zenon, SQ3KNN,
Krzysztof, SP6JIU, and Tomasz, SP4GHL

HF2012EFC Coordinator Hubert, SP9MDY
OPs: Members of the club station SP9KJU and Kazimierz, SP9GFI, Mietek, SP9NWN, sowie Wojtek, SP9W

3Z2012EFC Coordinator: Romuald, SP4JCP
OPs: Members of the club station SP4PND

HF2012BGS OP: Jerzy, SP9BGS

HF2012EUPP OP: Wieslaw, SQ5ABG

HF2012EURO OPs: Marek, SP9UML and Members of the club station SP9KTL

SN2012EB OP: Slawomir, SP4EOO

SN2012EURO OPs: Grzegorz, SP2OFF, Members of the club stations SP2KFL and SP2YOF

SN2012FUD OP: Bogdan, SP2FUD

SN2012RKK OP: Krystian, SP2RKK

SN2012UEFA Wladek; SP4ICP (Contest Call SN4W)

SN4EFCOP: Wojtek, SP4QCU

3Z2012RKT OP: Janusz, SP1RKT

QSL information see below.

TK, Corsika:
TK/PA3ALK was heard on 6m and 30m.

UR, Ukraine:
On the occasion of the European Football cup in Ukraine and Poland, the following special callsigns will be QRV from June 1st to July 1st.

EM2012EURO Kharkov UR5LCV
EN2012EURO Donetsk UT3IWA
EO2012EURO Lviv UR4WWE

Individual and club stations
EM2012AA-ZZZ
EN2012AA-ZZZ
EO2012AA-ZZZ

For QSL information see below.

V3, Belize:
Travis, AF6WU and Kjerstin, KJ0VDA, will be V31WU and V31DV
respectively in June and work on the HF bands. QSLs via AF6WU.

VE, Canada:
Ron, VE3AT, on the occasion of the Diamond Jubilee of Queen Elizabeth
II, will use the special call sign VC3O until June 24th. QSL via VE3AT.
Peter, VE3JPP will activate VC3E for the same reason. QSL via VE3JPP.

VP2, Montserrat:
Graham, M0AEP, is using the call sign VP2MDD from June 2nd to August
6th from Montserrat (NA-103). Gordon, G3USR (VP2MSR), will join him on
June 30th and stay till July 9th. They will be QRV from 80m - 6m, with
a focus on 12/10/6m in CW and SSB. QSLs via Homecall.

VP5, Turks and Caicos:
Bill, KX4WW, and Noll, W9RN, will be active from Providenciales (NA-002)
from May 31th till June 7th, using VP5/homecalls. They plan to use all
HF bands and 6m. QSL VP5/KX4WW via KX4WW, direct only, VP5/W9RN via W9RN.

DARC Club of the Year:

In a ceremony held in the Carillon Museum in Dayton/OH, on May 19th, the
DARC e.V. (Deutscher Amateur Radio Club) was awarded the annual club
award of the Dayton Hamvention. In the laudatio, the DARC's achievements
in the build-up of amateur radio in Germany after WWII and after the
reunificaton were honored. Also, the efforts to provide educational
and technical support to radio amateurs and shortwave listener, and its
efforts to lobby for the needs of radio amateurs, e.g. at the World Radio
Conference and in EU circles were mentioned. The annual "Ham Radio" fair
in Friedrichshafen was recognized as the major amateur meeting next to
the Dayton Hamvention. Mike Klater, W8CI, this year's general chairman
will visit the Ham Radio this year and be a keynote speaker.
The awarding ceremony was repeated on the following day in conjuction
with the closing ceremonies and the raffle on the Hamvention.
Source: Rainer Arndt, W4/SM5LBR

50,000 LoTW users:
On May 1st, Dragan, YT3PDT, successfully completed his registration
for the Logbook of The World, which makes him the 50,000th user.
More than 5000 more users are in the queue to complete their registration.

Digi modes in Cuba:
The radio amateurs of Cuba got a general permission for using digital modes.

OPs wanted>
Harry, AC8G (J37K) plans a DXpedition for the CQ WW SSB Contest
(October 27/28) to Grenada and is looking for OPs.
Contact: hflasher@dayton.net.

Museum Ships Weekend:
This year's MSW takes place on June 2nd/3rd.
http://www.nj2bb.org

Upcoming Contests:

2./3.6. DARC Microwave Contest
2./3.6. IARU Region 1 Fieldday

IOTA: Compiled by Klaus, DL7UXG (e-Mayl: iota@dxhf.darc.de)

Island activities:

EU-065; F; Bretagne (Finistere North West) Region group: From the
Island Molene, Keith/G3TTC will be active on the 5th of June
as F/G3TTC/p. QSL via G3TTC (d/B)

EU-105; F; Bretagne (Finistere North) Region group: On June 2nd,
Keith/G3TTC visits Batz island. As F/G3TTC/p he will hand out
IOTA points. QSL via G3TTC (d/B)

EU-127; DL; Schleswig-Holstein State South West group: Using the call
DD4T, Max/DJ4EL, Alex/IZ4AMS, Enrico/IK2FIL, Ben/DO1BEN,
Vinny/DL6II, Michelle/IZ1POA and Enrique/XE2AA will be QRV from
Helgoland Island (GIA N-14; WLOTA 0518) from June 3-10.
They plan to be on the air with three stations at the same time
on all bands and in all modes. QSL via IZ4AMS (d/B).
More information: http://www.dd4t.eu/

NA-143; W5; Texas State East group: Bill WS5H, Bob N5JSL and Ron
K5HM (members of the Brazos Valley ARC) will work as KK5W from
June 2nd to 4th from the USS Cavalia and USS Stewart from Seawolf
Park on Pelican Island (USi TX008S, Galveston County). This
activity is part of the ,,Museum Ships Weekend 2012". QSL only
direct via KK5W.
http://www.bvarc.org/index.php?page=ms

NA-143; W5; Texas State East group: N5E is QRV from June 2nd to 4th
(Museum Ship Weekend) from the Tall Ship Elissa.
QSL via K0JCC (d/B)

NA-200; XE3; Quintana Roo State South group: Members of the ,,Radioclub
Cancun" plan an activation of Cayo Culebra island (WW Grid EK69).
From June 1st to 3rd they will be QRV as 4A3RCC from 80m - 6m in
SSB and RTTY. QSL via EA5FL (d/B).
http://www.radioclubcancun.org/culebra

NON-IOTA

TM0MIT MORBIHAN ISLAND TOUR: Members of the Babaow Island Gang plan to
be on the air as TM0MIT between June 1st and 6th, and activate 8
to 10 islands in the department Marbihan (DPT 56) and the Province
Brittany (DPF 06). These islands count for the French Islands Award
(DIFM) and the Islands of Morbihan Award (DIM). Depending on the
local situation they will be active for about 8 hours on each island.
All QSOs count for the WFF programme as FFF-151. QSL direct via F5CWU.
http://tm0mit.webs.com/

K0TFT GOAT ISLAND: Members of the Sooland Amateur Radio Association
will activate Goat Island (USi NE006/SD004, WW Loc. EN12ls) on June 2nd.
They will be on 20m in phone and CW, and other bands if conditions
permit. QSL via K0XU (d/B)

MOre Lighthouse Activities

GB0PH LH 1841 04.06.
KA9ROY/KP2 LH 2477 30.05. - 07.06.
TX5VT LH 1233 03.06. - 12.06.
TX5VT LH 2030 03.06. - 12.06.
WB9EDL/KP2 LH 2477 30.05. - 07.06.

WFF Activities

JAFF
JA1JCF/0 will be QRV from ,,Yatsugatake-Chushinkogen Quasi"
(JAFF-056) national park from June 1st to 3rd. He will work in CW
on the HF bands. QSL via JA1JCF (d/B)

YLFF
Eddie/ES2TT is QRV from Castle Krimulda (WCA YL-00039, YLFF-001)
from May 31st to June 4th. On May 31st he'll be YL/ES2TT and on
June 1st as YL2012USCARS (American Cars Fan Meeting - Saulkrasti
2012) on all bands in SSB, CW and BPSK. QSL via ES2TT (d/B)
http://www.uscars.lv/

On June 2nd/3rd, YL0WFF is QRV from national park Slitere (YLFF-004)
and from Slitere lighthouse (ARLHS LAT-015). QSL via YL2CF (d/B)

Victoria Advocate
Radio operator uses hobby as community service
Victoria Advocate
Traditional channels of communication might break in an emergency - that includes some radio signals. Amateur radio emergency system operators like Wagner can relay the information that keeps chaos from breaking out in communities. Getting a ham radio ...

Amateur radio operators plan field day in Victoria
Victoria Advocate
In these cases, the one consistent service that has never failed has been amateur radio. These radio operators, called "hams," provide backup communications for everything from the American Red Cross to FEMA and even for International Space Station.

NZART Headquarters Infoline Issue 252

1 June 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

Debby says…sorry everyone no information received for this issue
of HQ Info-line as everyone that usually contributes has been either
busy arranging conference or enroute to get there!

I am writing this from Sunny Nelson, awaiting the first meeting of
Council to commence shortly.

No doubt you will all be able to review the minutes of Council, online
once they have been approved.

In the meantime, I suggest you listen to the official broadcast on
Sunday night, which always gives an interesting précis of the
annual general meeting and weekends activities.

Talk soon…Debby ZL2DL

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the July/August 2012
issue of Break-In-closes on 10 July 2012.
2.. Copy for Break-In: Copy is welcome in most electronic formats but
word.doc files are preferred. Photos and other graphics should be send
as separate discrete files (*.jpg preferred); not as embedded pix in the
body of the text. Please ensure that suitable descriptive
captions/legends are included with your copy.
All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 5 July 2012
for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if
available, to be on a separate floppy or CD (with captions), posted
DIRECTLY TO US. Use the Call Book address. All other material can go to

Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

RESCUE RADIO: HAMS RESPOND AFTER QUAKE HITS ITALY

It has been called the region's worst quake since the 1300's. Amateur radio was one of the services requested to help in the quake's aftermath. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, reports:

--

Striking on Sunday, May 20th at 4.04 am local time the quake's epicenter was located about 35 kilometers north of the Italian city of Bologna at a relatively shallow depth of 5 kilometers. Its intensity measured a 6.0 on the Richter scale as it shook the nation's densely populated northeast region. Homes, factories and some historic church steeples were all felled by the force of the temblor.

There was a 5.8 magnitude aftershock on Tuesday, May 29th at 9 am local time in the province of Modena, about 22 miles north-west of Bologna. This aftershock caused more buildings to collapse across the region, leaving at least 17 people dead, more than 350 injured, and 12 people reported missing.

Jim Linton, VK3PC, is the Chairman of the IARU Region 3 Disaster Communications Committee. He relays an IARU Region 1 report that Italian radio amateurs were called on to responded in the wake of the disaster. According to VK3PC, the voluntary group RNRE was requested to make several mobile units available to respond as needed, due to the continuing seismic activity. No H-F frequencies were in use during the initial quake with all communications apparently taking place on the VHF and UHF bands.

IARU Region 1 now reports that 7060 KHz is in use by IQ1HQ which is the RNRE and IQ0TK which is the Rome Civil Protection Department. There are also VHF links in the area at this time. Following a request from the Italian Civil Protection department, the RNRE have sent one mobile unit with five radio amateurs to the affected area and two more units are ready to go if requested.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Berwick, Pennsylvania.

--

As if this quake was not enough, another 4.3-magnitude earthquake was registered on May 28th in Southern Italy. The European Mediterranean Seismological Centre reports the epicenter was located 9 kilometers west of the town of Castrovillari. At airtime, There is no information about any injuries or damages caused by the latest earthquake. (VK3PC, G0DUB, KB3TZD)

**

RESCUE RADIO: HAMNET NORTHERN CAPE RESPONDS TO MINE DISASTER

Hams from South Africa's Hamnet are being asked to prepare for activation in the wake of a mining disaster in that region.

Carel Oberholzer, ZS3OBE, of Hamnet Northern Cape says they are potentially in need of assistance to provide communication support for the operation to rescue the trapped miners or remove their remains from a diamond mine near Kleinzee.

According to ZS3OBE, communications to Springbok which is the nearest urban hub is problematic and Hamnet has been requested to assist.

Oberholzer says that operators are needed to assist in providing communications between Springbok and the Kleinzee mine location. This is a distance of about 80 kilometers.

If activation occurs, the operation is expected to last for two to three weeks. Hamnet will likely two person teams on a rotational basis to man a relay point on a high point somewhere in between the mine and the city.

Oberholzer describes the situation as fluid at this stage. As such the Hamnet response is only in the preparation phase.

We will have a follow-up on this story in a future Amateur Radio Newsline report.

(Hamnet)

**

HAMVENTION 2012: TRULY A MIND BLOWING EVENT

The numbers are in and this years Dayton Hamvention was once again a mind blowing event with some 25,000 hams attending to see new product launches from most of the major amateur radio suppliers. Amateur Radio Newsline's Don Wilbanks, AE5DW, was on scene and has more:

--

When Hara Arena opened its doors at 9 a.m. Eastern Daylight Time on Friday, May 18th thousands of hams swarmed in. All were eager to see the latest and greatest gear that manufacturers and vendors had to offer. And they were not disappointed.

Last week we covered a couple of the new radios from Kenwood and Heiberling. This week we will take a look at what Yaesu had to offer. In their case it was both a new HF transceiver and a new method of digital audio for use on VHF and UHF bands. Dennis Motschenbacher, K7BV, is Yaesu's spokesman:

--

K7BV: "The surprise that no one knew about including me was the FTDX-3000 which is an HF and 50 MHz 200 watt radio that uses the fantastic receiver that we developed for the FTDX-5000. So now for $3000 someone can have the receiver performance of a $5000 FTDX-5000. Of coarse you don't get the second receiver and you don't get 200 watts; you only get 100; but there's that rig that so many people have been waiting for."

--

But that was not all. For the world at 2 meters and above Yaesu introduced its long awaited digital audio hand-held that uses a different modulation scheme from either Icom's D-Star or Alinco's ITU-TV.32 protocols. Again, Dennis Motschenbacher, K7BV:

--

K7BV" "We have a new digital handheld that uses C4FM FFDMA protocol and its going to be a whole new venture of digital into amateur radio with many, many of the capabilities that some of the other existing services can't offer. We introduced the hand held for that today and the repeater and the mobile will be coming later on in the year."

--

In simpler terms, the introduction of the new Yaesu digital radio is kind of the ham radio equivalent of the 1970's Betamax versus VHS

clash, but this time it will be at least 3-way affair. Four ways if you count the proponents of the P-25 protocol with recycled police and fire radios that has an ever growing following among the technical experimenters in the hobby.

Turning to the social aspect of Hamvention, the theme of the 2012 Hamvention was Internationally Connected with Germany's Deutscher Amateur Radio Club having been selected as the 2012 Hamvention Club of the Year. Mitch Wolfson, DJ0QN, a former California ham who moved to Germany more than three decades ago was one of several DARC representatives who came to Dayton:

--

DJ0QN: "Well that was quite a surprise. We were really pleased to hear that DARA selected us as the Club of the Year. We haven't done anything different the past couple of years that we have done the last 40 years. We have continued to represent Germany and also help amateur radio in all of Europe and all of IARU Region 1. We did a lot of work into making sure that we supported amateur radio in Germany by supporting it against issues like RFI problems that have been caused by new devices such as PLC and have done a lot of work in that area."

--

Also on hand for this year's international event were representatives of the Japan Amateur Radio League, the Qatar Amateur Radio Society and the Radio Society of Great Britain. In addition, some of the leaders of the International Amateur Radio Union were on hand. This included IARU President Tim Ellam, VE6SH, Vice President Ole Garpestad, LA2RR, and Secretary Rod Stafford, W6ROD. They were there to meet and greet visitors. All of the international societies were located in the ARRL EXPO in the Ballarena Hall that also housed more than 20 exhibits staffed by ARRL representatives. Among the new ARRL booths for 2012 was an exhibit introducing the digital edition of QST magazine.

We wish we had more time to tell you about Hamvention 2012,. But there are other stories we have to cover. So for now, I'm Don Wilbanks, AE5DW, in Southern Mississippi, for the Amateur Radio Newsline.

--

For a visual highlight tour of Hamvention 2012 we suggest that you visit twit.tv/hn and watch Episode 49 of Bob Heil's show Ham Nation called the Dayton Experience. Also there are two new Hamvention 2012 music videos on You Tube produced by kit building expert Joe Eisenberg, K0NEB. One is called Hamvention 2012 "Band On The Run" and the other is titled Hamvention 2012 "Gimme Dat Ding." To find them just put the word joehusker into the search YouTube search line. We think you will enjoy them both. (ARNewsline, RSGB, others)

RADIO FOR YOUTH: MORE ON THE BSA AND ICOM ALLIANCE

As we mentioned briefly last week, one of the biggest surprises to come out of Hamvention 2012 was an announcement that Icom and the Boy Scouts of America are joining forces to give scouts a new and exciting access point to ham radio. Amateur Radio Newsline's Mark Abramovich, NT3V, is here with some more information on this new alliance:

--

While some might say the new partnership between Icom and the BSA is historic, the key players who hammered out the deal simply say it was a natural progression that will expose tens of thousands of Scouts and their leaders to the fun, the excitement and the challenges found in amateur radio.

Jim Wilson, K5ND, who coordinates the annual Jamboree on the Air for the Boy Scouts of America each October, was introduced to Ray Novak, N9JA, division manager for amateur and receiver products at Icom America in Seattle, by a past staff member at the K2BSA operations at the national Boy Scouts Jamboree.

Wilson, who is coordinating the K2BSA operations for the 2013 BSA jamboree at The Summit in West Virginia, says he was initially looking for a commitment on equipment which Icom has been loaning the jamboree operations over the years. But Wilson had a different idea this time... "Donate the equipment, don't loan it to us, but donate it to the jamboree and after the jamboree, we'll move it to local councils so they can put it to use and it'll be in use year-round," Wilson says. Wilson says his dialogue with Novak explored other areas where the BSA and amateur radio are in sync - such as Radio merit badge and Jamboree on the Air.

>From that came the proposal from Icom's Novak to put HF radios, microphones and an antenna, in the hands of the BSA in the form of "loaner kits" to send out to Scout councils across the country.

"One is a long-range loan of up to 12 months that a Scout council can put in place while they're developing donations to support a longer term station," Wilson says. "But, give them a station that they can show how it works, they can get the Scouts excited, they can get local donors excited. "And, then another type of loan station - which we're calling an event loan station. So, if you've got a Radio Merit Badge workshop where you'd like to put in place one of these stations, you can apply and we'll get it in the queue, see if it works out and get a

station out there for a week or two weeks or what have you."

Novak, who has been helping set up equipment needs for the past few national jamboree operations at Fort AP Hill in Virginia, says he didn't want to wait a year for the next jamboree to get gear into the hands of Scouts and leaders for special events like JOTA or camporee demos or Radio merit badge workshops.

"I'm not as concerned about the Boy Scouts getting licensed as I am with them seeing that amateur radio is actually a fun thing and they take home with them and share with their parents and others what fun they had talking into a microphone and transmitting thousands of miles away to talk to another Boy Scout or another youth the same age instead of sitting there and texting," Novak says.

The BSA's Wilson says he confided in Novak his vision for the new Scout jamboree location in West Virginia and the idea of eventually establishing a permanent footprint for amateur radio there. That turned into something Wilson described as unexpected - an offer of repeaters for the site.

"A 2-meter repeater and 2, 70 centimeter repeaters," Wilson says of the Icom offer. "The 2-meter and 70 centimeter will be analog and we'll have a D-Star repeater also at 70 centimeters." And, Novak says there is more, much more being worked out for HF, VHF, EchoLink, Foxhunting, and antennas for the K2BSA operations and Radio merit badge for the 2013 jamboree. "Right now we're at just the very beginning of working out all the details and luckily we've got about a full year before we really need to have everything in place for the Summit and the jamboree," Novak says. "But that one year will go fast."

Wilson, who is excited to see this vision unfolding for the BSA and amateur radio, says it wouldn't have been possible without the people at the local Scout councils who have contributed to a seven-fold increase in the number of Radio merit badges earned by Scouts in recent years. And, some of those Scouts, he says, are going on to the next level - thanks to the interest spurred by the merit badge...

"There are some committed Scouters and amateur radio operators putting in place merit badge workshops, offering Jamboree on the Air experiences, getting youth engaged in amateur radio and then they're going on and earning their Radio merit badge," Wilson says. "And, I'll bet a fair percent of those are going on and earning their Technician licenses."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

All things considered, the agreement between the Boy Scouts of America and Icom could easily lead to a lot of new young voices on the air and that would be very good news for all of amateur radio. Also it begs

the obvious question of whether or not it will lead to similar agreements between other equipment suppliers and youth groups here in the United States or possibly elsewhere in the world. On this one only time will tell. (ARNewsline, NT3V)

**

RADIO LAW: OHIO ENACTS PRB-1 LIKE LAW TO PROTECT HAMS

Good news for Ohio hams. They now have P R B One-like antenna protection. Bill Pasternak, WA6ITF, is in the Newsroom with more:

--

Ohio hams now have antenna and support structure assurance. On May 15, Ohio Governor John Kasich signed a bill, granting comprehensive protections and rights to amateur radio operators in that state.

HB 158 codifies the federal restrictions on the local zoning of amateur station antenna structures, thereby preserving Amateur Radio Service communications as a Homeland Security resource. It also places the burden of proof for compliance on the zoning authority.

The new law states that: "Any legislative authority that denies an application for approval of an amateur station antenna structure shall state the reasons for the denial and shall, on appeal, bear the burden of proving that the authority's actions are consistent with this section."

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

This language of the new Ohio law removes the burden of proof from the amateur radio operator and places it on the legislative authority. And that's very good news for hams living in the Buckeye State. (ARRL)

**

RADIO LAW: NEW FCC COMMISSIONERS SET TO WORK

New FCC Commissioners Jessica Rosenworcel and Ajit Pai have been sworn-in and have officially begun their work.

Rosenworcel, a Democrat, takes the seat held by former Commissioner Michael Copps. Pai, a former Senate staffer as well who most recently worked at Jenner & Block, is a Republican who takes the seat vacated last spring by former Commissioner Meredith Baker.

Pai has already announced his personnel with Matthew Berry as his chief of staff. In the past Berry has been the FCC's general counsel. He was most recently at the law firm of Patton Boggs.

Gene Fullano has been named acting legal advisor for Commissioner Pai. He was most recently associate chief of the FCC's Public Safety & Homeland Security Bureau. (RW)

**

RADIO LAW: KAPLAN TO LEAVE FCC WTB CHIEF POSITION

The Genachowski lead FCC is losing another bureau chief. This with word that Rick Kaplan is stepping down as chief of the regulatory agency's Wireless Telecommunications Bureau.

Kaplan has been at the FCC since 2009, working in several posts. This included a stint as Chief of Staff to Commissioner Mignon Clyburn.

According to a report from Radio World, Ruth Milkman, who preceded Kaplan as chief, will return to the bureau in that role after a year as special counsel to the chairman for Innovation in Government.

The changes are effective in mid-June. (RW)

**

RESCUE RADIO: TOO MANY CB SETS CAUSES HOUSE FIRE

Tampa Bay Online reports that having too many CB radios connected to one power source likely sparked a fire. One that caused tens of thousands of dollars of damage at a St. Petersburg, Florida home.

Fire investigators think the blaze was started by too many citizens band radios connected to an overloaded extension cord. Damage is estimated at $35,000 to $50,000.

The owner of the home told the newspaper that he and his family were watching television when the fire started. They evacuated and no one was injured. The Red Cross helped the family find temporary lodging.

And less we forget, investigators say that the home where the fire occurred reportedly had no working smoke detectors. More is on-line at tinyurl.com/cb-house-fire. (KB5TJI)

**

WORLDBEAT: CB RADIO BOMB SCARE IN THE UK

The BBC reports that a suspicious electronic device triggered a bomb alert in the city of Surrey. According to the news agency, the device was found after reports of suspicious activity near the Maultway, Camberley at about 10:00 British Standard Time on Monday, the 21st.

Following examination by army bomb disposal experts Surrey police issued a statement saying that the unit turned out to be a pirate radio F.M broadcast transmitter or repeater for a citizen or pirate band radio station. You can read the entire story on-line at tinyurl.com/cb-bomb-scare. (BBC)

**

RADIO READING: NEW E-BOOK FOR NEWCOMERS OR RETURNING HAMS

21 Things to Do After You Get Your Amateur Radio License is a new book by Daniel M Romanchik, KB6NU, that is now available for electronic reading on the Kindle and Nook. Written for the new ham or those amateurs who have not really been all that active late, its 21 chapters cover just about every aspect of the hobby as it is today. Included are such topics as how to locate an Elmer, how to buy a radio, set up a shack and much more. Also covered are the social aspects of the hobby including participation in clubs, hamfests and the like. The Kindle edition priced under three dollars is available from amazon.com. (Southgate)

**

NAMES IN THE NEWS: K6VVA IOTA NORTHERN LATITUDE OPERATION POSTPONED

Some names in the news. Rick Hilding, K6VVA, has announced that his Northern Latitudes Islands on the Air DXpedition has been rescheduled for July of 2013. This in the hope of gaining better propagation during that time period.

As explained in his announcement, the far Northern Latitude has additional propagation factor complications. So in evaluating the total picture, a pause was deemed necessary to maximize possibilities for all Islands on the Air chasers to make contacts. You can follow planning progress on-line at www.k6vva.com/iota/na172 (K6VVA)

**

NAMES IN THE NEWS: GW8TGS CARRIES OLYMPIC TOURCH

A big treat for a United Kingdom ham as William Williams, GW8TGS , had the honor of being the Olympic Torchbearer as part of the team carrying the flame through the city of Aberystwyth.

Williams turn came on May 27th starting at around 18.14 GMT and arriving at Vicarage Fields half an hour later.

Having taken part in several charity runs and raising over 15,000 Pounds for charities, GW8TGS was nominated by the Rotary Club of Aberystwyth for his fund raising and his other voluntary work.

Williams says he feels honored have taken part in this once-in-a-lifetime event. (GB2RS, Southgate)

**

NAMES IN THE NEWS: RESULTS OF ARRL SPRING 2012 SM ELECTION ANNOUNCED

Of the nine Section Manager elections this spring, two were decided by member voting. Ballots were counted on May 22nd at ARRL Headquarters. The incumbent Indiana Section Manager, John Poindexter, W3ML decided not to run for a new term of office. Two radio amateurs vied for the open position, with Lou Everett Sr, WA5LOU, being declared the winner with 596 votes. His opponent Brian Jenks, W9BGJ, received 429 votes.

In Northern Florida, incumbent Section Manager Paul Eakin, KJ4G, was re-elected with 627 votes. His opponent Gary Alberstadt, KA3FZO, received 434 votes. Eakin has served as Section Manager since 2008.

California's Santa Clara Valley will also have a new Section Manager with Brandon Bianchi, NI6C, taking over from Phil Steffora, K6TT, who decided not to run for a new term of office. Bianchi is currently serving as an Assistant Section Manager and did not face an opponent for the Section Manager position.

All other incumbent ARRL Section Managers running for re-election did not face opposition and were declared elected for their next terms of office beginning this July 1st. (ARRL)

WORLDBEAT: CUBAN HAMS AWARDED NEW DIGIMODES

Pavel Costa, CO7WT, says that following both a national debate followed by legal avenues that the government of Cuba has approved the use of new digital modes for all Cuban radio amateurs. With this regulatory change Cuban hams are now permitted use of Domino, Contestia, Olivia, M-F-S-K, J-T-65, and almost all variants of PSK. More important says CO7WT, this approval has set up a mechanism to apply for other new digital modes by any Cuban hams. Previous legislation restricted Cuban radio amateurs early digital modes such as to PSK31, QPSK31, AMTOR, PACKET and RTTY. (CO7WT)

**

WORLDBEAT: RSGB BACKS OFCOM IN PROPOSED ANTI INTERFERENCE LAW

The Radio Society of Great Britain has offered a formal response in support telecommunication regulator Ofcom's inquiry on proposed new anti-interference regulations. Laws to provide the telecommunications regulator with powers to take action in cases of interference from non-wireless telecommunications apparatus.

The RSGB says that while the immediate proposal is to implement the new regulations in time for the upcoming Olympic Games. It adds that this action by Ofcom highlights the point that the RSGB has advocated on many occasions. That being the need for Ofcom to have statutory powers in cases of serious interference to the spectrum from non-wireless apparatus.

Ofcom has indicated that it intends to prepare these regulations for ongoing use after the Olympic Games. Part of the RSGB response emphasizes the need for such regulatory enforcement powers. (RSGB)

**

HAM RADIO IN SPACE: HAMS WORLWIDE ASKED TO MONITOR FOR THE HORYU-2 SATELLITE

Hams world-wide are being asked to monitor for Japan's HORYU-2 satellites Morse code beacon and 1200-baud AX.25 packet telemetry at 437.375 MHz.

Japan's HORYU-2 is a research satellite was launched May 17th as part of a mission that also included the JAXA climate observation satellite Shizuku.

HORYU-2 was built by students at the Kyushu Institute of Technology and identifies using the call sign JG6YBW. Telemetry decoding software is available for download at tinyurl.com/horyu-software. This is an executable program so you might want to be certain that it will run on your computer before installing it.

More about the Horyu satellite itself is on-line at tinyurl.com/horyu-sat. (ARRL, AMSAT)

HAM RADIO IN SPACE: AMSAT SATELLITE PROPOSALS SUBMITTED TO NASA

The AMSAT North America Board of Directors has announced that the organization was a partner in a pair of Phase-2 NASA Edison Program proposals that were successfully submitted on Tuesday May 22nd. Due to the highly competitive nature of this program, no additional information can be released at this time. However, if selected, these proposals would provide AMSAT and its partners with the funds to construct and launch new amateur radio satellites. NASA intends to announce the winning proposals in the Fall of 2012. (ANS)

PROPAGATION: NEW UK TO NORTH AMERICA 2 METER BEACON GB3WGI COMING SOON

A new United-Kingdom based trans-Atlantic beacon is coming to the 2 meter band. Located at Lough Navar Forest in Northern Ireland at a height of 1145 feet above average terrain, the GB3WGI beacon will have a clear take off over the sea toward North America. The system will radiate on 144.487MHz initially with an Effective Radiated Power 100 Watts relative to a dipole, with plans to increase this if licensing allows.

This new propagation beacon is being made possible thanks to the generous donation of a transmitter by Brian Justin, WA1ZMS, the man behind the US 70MHz beacon, and United Kingdom Notice of Variation holder, Gordon Curry GI6ATZ who is providing the site and site services. No date has been announced for the installation of the beacon, but plans are well under way.

The Notice of Variation is the U-K equivalent to a United States Special Temporary Authority. It was issued by telecommunications regulator Ofcom on May 18th. (G4BAO)

**

DX

In DX, UA4WHX, who just went QRT as JY8VB has been spotted with the Palestinian call E40VB on 12 meters. Details of the stay are not known. QSL via home call.

OH2PM will be operating as TC2X from Istanbul at TA2KN which is the Turkish Scouting and Guiding Federation Club station in Umraniye. QSL this operation via OH2BH.

ZL3CW is working as TX5CW from Noumea, French Caledonia. QSL via his home call as well.

The special event station 8N1TDU is active from Japan's Tokyo Denki University Campus until December 31. QSL this one as directed on the air.

Lastly, HA1ZH is active in all modes and on all bands until December 31st. This on the occasion of his 50th jubilee as a ham QSL information is at www.ha1zh.hu

(Above from various DX news sources

THAT FINAL ITEM: SOLAR POWER BREAKTHROUGH

And finally this week, word of a major efficiency breakthrough in the field of renewable energy from the sun. Heres WIA Newsman Graham Kemp, VK4BB, with the details:

--

The world's most successful solar cell breaks the 20% barrier

Aussie researchers teamed with Sun-tech Power to create Pluto Technology. The solar cells reached a production capacity last year of 0.5 gigawatts, worth more than 1 billion US dollars a year. This is enough to power 300,000 average homes that typically have eight solar panels on them for at least 25 years.

The Pluto Technology won a 2012 Collaborative Innovation Award Wednesday night at the Cooperative Research Centers Association conference in Adelaide.

For the Amateur radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

Don't get your hopes up yet to replace your mains powered ham gear with these new solar cells. Further research and marketing is needed to make them a world-wide everyday home power source. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go a quick note that the nominating period for the 2012 Amateur Radio Newsline Young Ham of the Year Award closed at midnight on May 30th. Over the coming days the submissions will be sent to the judging committee and a winner will be announced in a few weeks.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Fred Vobbe, W9HDU, in Lima, Ohio, saying 73 and we thank you for listening.

472 kHz and 5 MHz in Denmark

The Danish regulator the ERST has announced the availability for Radio Amateurs of 5250-5450 kHz and 472-479 kHz and an expansion to 70 MHz.

Effective June 1, 2012 the pilot scheme at 5 MHz will cease, and 5250 to 5450 kHz can be used by A and B Certificate holders using all modulation types with respectively 1000W and 100W maximum output power. Issued trial licenses are valid until expiry.

Denmark will also have an amateur radio band at 472-479 kHz from January 1, 2013.

Addionally ERST announced an expansion of 70 MHz which will become 69.9375-70.0625 MHz, 70.0875-70.1125 MHz and 70.1625-70.5125 MHz

UK Information Commissioner - RSGB 'Unlikely' to have complied with Data Protection.

Posted: 31 May 2012 02:58 AM PDT
http://forums.qrz.com/showthread.php?348351-UK-Information-Commissioner-RSGB-Unlikely-to-have-complied-with-Data-Protection&goto=newpost

The UK's Information Commissioner has this morning issued the outcome of a complaint made against the Radio Society of Great Britain (RSGB) concerning data protection issues.

In its three-page report, it concludes that 'on the basis of all the information available, we have decided that it is unlikely that the Society

have complied with the requirements of the DPA.'

The conclusion goes on to say 'This is because on this occasion, it appears the Society were unable to satisfy a condition in schedule 2 of the DPA for disclosing [the complainant's] personal data to third parties and, furthermore, doing so was unlikely to be within [the complainant's] reasonable expectations.'

The incident arose when correspondence sent to the RSGB was allegedly sent by e-mail to eleven members of an external organisation.

The RSGB has been asked to consider the information provided to it by the ICO and steps have been taken by the RSGB to prevent the situation from happening again.

No one was available this morning from the RSGB for comment on the ICO's findings.

All Aboard for Museum Ships Weekend

Posted: 30 May 2012 03:51 PM PDT
http://forums.qrz.com/showthread.php?348310-All-Aboard-for-Museum-Ships-Weekend&goto=newpost

All Aboard!

Members of the USS Oklahoma and USS Batfish Amateur Radio Club will host
members of the Middle School Radio Club, KF5CRF. Several of their 15
licensed students will be participating from inside the USS Batfish during
2012 Museum Ships Weekend (MSW), June 2 and 3, 2012 (0000Z June 2, through
2359Z June 3, 2012.

Coordination for this level of activity began at HamCom in Plano, TX, when
Wade Harris KF5IF, meet with several students of the Viking Radio Club last
June (2011), at the time, only 2 students were licensed. Harris, Trustee
for the USS Batfish WW2SUB, and USS Oklahoma WW2OK, invited the students to
join his team in 2012 for the MSW event in Muskogee, OK.

Students arrive on Saturday about mid-morning. After a short tour of the
facility, submarine and a visit to the USS Oklahoma Memorial, the students
will take to the airwaves. The voices may sound younger then you might
expect for someone participating in a hi-tempo environment such as MSW.
Students range in age from 12 to 14 except KF5LLG age 10.

Operations will include phone and digital, with digital primarily being PSK31. Efforts are underway to bring a live web cam video stream from the event. Visit www.hamsoncams.com" target="_blank">www.hamsoncams.com and select the KC5CYY or K5USA link to view the stream. The Oklahoma War Memorial Park, where the USS Batfish and USS Oklahoma Memorial Mast are displayed is located along the Arkansas River and fairly remote from the city, video and audio quality may be less than perfect.

For more information about MSW, QSL and certificate, including frequencies and modes, visit www.nj2bb.org" target="_blank">www.nj2bb.org, the MSW sponsor. KF5CRF is mentored by Clifton Harper, KE5YZB a middle school teacher.

NASA Astronaut to Speak at Sea-Pac Convention in Seaside:

Posted: 31 May 2012 05:56 PM PDT
http://www.eham.net/articles/28412

SEASIDE - NASA astronaut Michael Barratt, a veteran of a long-duration mission to the International Space Station and the last mission of space shuttle Discovery, will be the featured speaker at the Sea-Pac Northwest Amateur Radio Convention banquet on June 2. Sea-Pac members from five northwestern states will hear a motivational keynote address titled "Living in the Ultimate Ham Platform." During his presentation, Barratt (amateur call sign KD7MIJ) will discuss his most recent spaceflight mission, living aboard the station and the use of ham radio on the orbiting laboratory. The presentation begins at 8:30 p.m. at the Seaside Civic and Convention Center at 415 First Ave. in Seaside.

W6G Salutes Golden Gate Anniversary:

Posted: 31 May 2012 05:55 PM PDT
http://www.eham.net/articles/28411

The San Francisco Amateur Radio Club helped mark the 75th anniversary of the opening of the Golden Gate Bridge by contacting other amateur radio operators this Memorial Day weekend. Working with the California Historical Society, the club operated on five amateur bands using special call sign W6G. It transmitted from its home station at the San Francisco Veteran's Administration Medical Center and was assisted by the Marin County Amateur Radio Club.

Aubrey R. Bishop Jr., KB1EDJ (SK):

Posted: 31 May 2012 05:54 PM PDT
http://www.eham.net/articles/28410

Aubrey Randall Bishop Jr. of Georgetown, a retired business owner, died Monday at Cedar Glen in Danvers on his birthday. He was 75. Mr. Bishop was born in Lynn and grew up in Saugus before moving to Georgetown in 1970. He served in the National Guard. Mr. Bishop turned a boyhood interest in cars into a career when he opened Bishop's Auto Body and Paint Supply in Lynn. In his retirement, he worked in the home circulation department of the Eagle Tribune. Mr. Bishop also served as a volunteer fireman with

Georgetown's Erie Fire Association No. 4 for more than 40 years. A ham radio enthusiast, he served as treasurer of the Quannapowitt Radio Association. He was a member of the Masons, serving as treasurer of the Ipswich Ferson Royal Arch Chapter and later as treasurer emeritus.

FCC Expands Part 95 Medradio Rules to Allow Devices in 2360-2400 MHz Band:

Posted: 31 May 2012 04:37 PM PDT
http://www.eham.net/articles/28402

In a First Report and Order and a Further Notice of Proposed Rulemaking (ET 08-59) released on May 24, the FCC decided to expand the Part 95 Personal Radio Service rules to allow medical devices to operate on a secondary basis in the 2360-2400 MHz band. These devices -- called Medical Body Area Networks (MBAN) -- provide a way for health care facilities to monitor their patients via wireless networks. Because use of these frequencies will be on a secondary basis, MBAN stations will not be allowed to cause interference to -- and must accept interference from -- primary services, including radio amateurs who operate on a primary basis in the 2390-2395 MHz and 2395-2400 MHz bands.

//
House Armed Services Committee 'Urges' MARS Coordination:

Posted: 31 May 2012 04:38 PM PDT
http://www.eham.net/articles/28401

On May 18, the US House of Representatives approved HR 4310, The National Defense Authorization Act for Fiscal Year 2013. This bill authorizes appropriations for military activities and prescribes military personnel strengths for Fiscal Year 2013. When the House Armed Services Committee sent the bill to the House, it included language in support of the Military Auxiliary Radio System (MARS) and called for the three MARS branches -- Army, Air Force and Navy/Marine Corps -- to be brought under one umbrella.

//
Have Some Fun in the 2012 ARRL June VHF QSO Party:

Posted: 31 May 2012 04:37 PM PDT
http://www.eham.net/articles/28400

There will be lots of RF generated on 6 meters and up the weekend of June 9-11 during the 2012 ARRL June VHF QSO Party. While many amateurs think of the VHF+ bands as a "local" band for public service, emergency communications or even a bit of fun on FM repeaters, weak-signal VHF+ enthusiasts know better. Even with a modest station, it's possible to work hundreds -- or even thousands -- of miles on the VHF bands during a good opening.

SARL NEWS - SUNDAY 3 JUNE 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 FM from Pretoria with relays on 7,066 MHz and 3,695 MHz SSB. (other news readers change to suit).

SILENT KEY

Neville de Gruchy - ZS6AON, of Florida became silent key on Saturday the 12th of May. He was a long time amateur with also an interest in the solar system and aircraft. He is survived by his XYL Sylvia, to whom he was married for 63 years. His son Aubin, is currently living in the UK and his daughter Lynn, is with her mother, Sylvia.

Our sincere condolences to his relatives and friends.

(PAUSE)

In the news today:

TONY VOORVELD ZS6CCD AT THE RTAs

YOUTH DAY EVENT

SKA TO FEATURE ON THE NEXT INTECNET

REPEATER WORK GROUP MEETS ON 23 JUNE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

TONY VOORVELD ZS6CCD AT THE RTAs

Tony Voorveld, ZS6CCD, well known for his animated presentations, will this year speak at the Durban, Cape Town and Johannesburg Radio Technology in Action (RTA) symposiums. Unfortunately he is not available for the Port Elizabeth leg of the event. Radio Amateurs in the Eastern Cape should stay tuned to SARL NEWS, we will have a

surprise in store for your RTA. Tony will talk and demonstrate "Sounds from Nature" and no, it is not about wildlife, but something more scientific but yet fun. You don't want to miss it!

The Durban date announced last week was incorrect. It will be held on Saturday 21 July. Here are the dates for the other centres as well: Cape Town 11 August, Port Elizabeth 1 September and Johannesburg 29 September.

YOUTH DAY EVENT

The SARL has an agreement with ICASA that will allow unlicensed persons to operate an amateur radio station under the supervision of a licensed radio amateur without the need to register as an educational station. Here is further incentive to set up a demonstration station, involve the youth in the youth day sprint and show the man in the street how great amateur radio is.

Clubs and individuals setting up a demonstration of amateur radio in a public area as part of National Amateur Radio Day are invited to order brochures from the NARC. A new metal pin badge is also available in limited quantities to be handed to young people visiting and operating a special event station. Visit www.sarl.org.za for more details. Please send details of what you or your club are planning for 16 June 2012 to artoday@sarl.org.za so that it may be included in the media releases and radio interviews.

In keeping with the spirit of National amateur Radio Day, Peter Davies, ZS6IQ, will be braving the cold and will operate from his boat "Jokerman" on the Vaal Dam near Deneysville. The location will change from time to time but the boat can be tracked on www.aprs.fi lookup the callsign ZS6IQ-9. All contacts will receive a special QSL card and will be logged on qrz.com. 40 m will be the preferred band. Look up ZS6IQ on qrz.com for info on the day.

SKA TO FEATURE ON THE NEXT INTECNET

Prof Justin Jonas of the SKA team will be the guest on the next Interactive Technical Net (INTECNET) on Sunday 17 June 2012. The net will start at 19:30. Prof Jonas will talk about what part of the SKA will come to South Africa and highlight the science that will be done. He will also participate in an interactive session and answer questions from radio amateurs around the country.

Clubs wishing to link their repeater to the Intecnet interactive audio stream are invited to send details of their landline number to artoday@sarl.org.za.

REPEATER WORK GROUP MEETS ON 23 JUNE

The SARL Repeater manager, Frik Wolff, ZS6FZ, invites all division 6 clubs to send their representative to the repeater work group meeting to be held at the National Amateur Radio Centre (NARC) at 09:00 on

Saturday 23 June 2012. The representatives are requested to bring the following documentation:

1) All technical reports of tests done on 14,76 5 MHz and 145,687 5 MHz repeaters as discussed and agreed at the January 2012 meeting and contained in the minutes.

2) The 2012 paid ICASA licence of all the unmanned equipment under the club's control;

3) New proposals for new unmanned station installations;

4) Proposals for any current or planned future unmanned station.

ICASA has made it very clear that documentation for any and all temporary repeater installations should be submitted to the SARL. Should they find any repeaters active on air that do not correspond to their database, or the official SARL listing, ICASA will cancel the license. Information should sent to vubandplanning@sarl.org.za.

To assist with catering arrangements, please send details of who will be attending to vubandplanning@sarl.org.za.

RSGB BACKS OFCOM

The Radio Society of Great Britain has offered a formal response in support telecommunication regulator Ofcom's inquiry on proposed new anti-interference regulations. The laws are to provide the telecommunications regulator with powers to take action in cases of interference from non-wireless telecommunications apparatus.

The RSGB says that the immediate proposal is to implement the new regulations in time for the upcoming Olympic Games. It adds that this action by Ofcom highlights the point that the RSGB has advocated on many occasions that being the need for Ofcom to have statutory powers in cases of serious interference to the spectrum from non-wireless apparatus.

Ofcom has indicated that it intends to prepare these regulations for ongoing use after the Olympic Games. Part of the RSGB response emphasizes the need for such regulatory enforcement powers.

LICENSE FEE

The fee to keep your call sign should have been paid by 30 April. If you forgot, please do so now.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is at moderate levels. The sun's surface is peppered with small but quiet sunspots.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 56.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be less frequent and mostly on east-west paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

16 June - Youth Day event. Remember to be on the lookout for Peter, ZS1IQ, on the Vaal Dam. 16 June - Intechnet at 17:30 with Prof Justin Jonas about the SKA. 323 June - Repeater work group meeting at 09:00 at the NARC. Send information to vubandplanning@sarl.org.za. Pay your license and save a lot of paper work!

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Flip Britz ZS4GE, and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

130 Skywarn Spotters Train in Chicopee:

Posted: 01 Jun 2012 05:58 PM PDT
http://www.eham.net/articles/28416

CHICOPEE, Mass. (wwlp) - On the eve of the one year anniversary of the June first tornado, a very timely weather conference in Chicopee. 130 people came to the National Weather Service Skywarn training seminar held at 22News studios Thursday night. They came to be certified and re-certified as "Skywarn Spotters," capable of identifying and reporting severe weather and damage. "We can verify that there is a tornado on the ground. Or there is damage. Or there's hail or extreme flooding, street flooding. Just different types of storm damage and verify it and tell the National Weather Service," said Eric Tuller, a skywarn coordinator from Ware. Many of these "weather spotters" are also Ham Radio Operators, who form an emergency reporting network. Among them, Jim brisbois from Chesterfield.

Take Part in the Annual On-The-Air Station Test from WX4NHC at the NHC:

Posted: 01 Jun 2012 12:55 PM PDT
http://www.eham.net/articles/28414

The annual WX4NHC On-the-Air Station Test from the National Hurricane Center (NHC) in Miami will take place Saturday, June 2, 1300-2100 UTC (9 AM - 5 PM EDT). "The purpose of this annual station test is to test all of our radio equipment, computers and antennas using as many modes and frequencies as possible in preparation for this year's hurricane season," said WX4NHC Assistant Amateur Radio Volunteer Coordinator Julio Ripoll, WD4R. "This is not a contest or simulated hurricane exercise."

//
Propagation Forecast Bulletin #22 de K7RA:

Posted: 01 Jun 2012 12:55 PM PDT
http://www.eham.net/articles/28413

Average daily sunspot numbers sank more than 28 points this week (nearly 26%) to 81.9. Average daily solar flux declined more than 16 points to 111.6. This is for the seven days of May 24-30, and is compared to the previous seven days, May 17-23.

Well-known DXpeditioner Baldur Drobnica DJ6SI arrested in Greece
for "espionage"

Posted: 02 Jun 2012 01:04 PM PDT
http://forums.qrz.com/showthread.php?348650-Well-known-DXpeditioner-Baldur-Drobnica-DJ6SI-arrested-in-Greece-for-quot-espionage-quot&goto=newpost

http://sv2dcd.blogspot.de/2012/05/wh...thorities.html

http://sv8cs.blogspot.co.uk/2012/05/...ncredible.html

http://sv5byr.blogspot.co.uk/2012/05...at-greece.html

Three Greek hams are announcing on their blogs that well-known DXpeditioner Baldur Drobnica DJ6SI has been arrested in Greece allegedly for espionage, while in holiday on the island of Kos. He was □producing strange noises□ with his computer (CW and RTTY). His activity was spotted on DX clusters. The first blog is featuring a video with explanations in Greek language presented by Baldur□s lawyer. Baldur says in German that he is going to complain to Amnesty International and he answers a question of the lawyer saying that he never experienced such a treatment from authorities of the 70 countries he visited as a DXpeditioner. But he almost lost his life when trying to activate Spratly Island in 1983. Two of his colleagues died. See details on

http://www.dokufunk.org/amateur_radi...2a578ce3c25e79

The current story was covered on my website too in Romanian. Google translation is available on the main page. I am sure the YO hams will keep their fingers crossed for Baldur, who made so many DXers happy with his tremendous activity on the amateur radio bands since 1962. Maybe letters to the Greek authorities would help?

Hurricane Watch Net Enters 47th Season

Posted: 02 Jun 2012 11:47 AM PDT
http://forums.qrz.com/showthread.php?348642-Hurricane-Watch-Net-Enters-47th-Season&goto=newpost

Amateur Radio□s Hurricane Watch Net is geared up and ready for its 47th year of activity. Formed in 1965 by Jerry Murphy, (Amateur radio call sign K8YUW), during Hurricane Betsy, the Hurricane Watch Net was an informal group of radio amateurs who recognized a need to provide communications to and from hurricane affected areas. Over the years the net has relayed reports in to the National Hurricane Center and just as importantly out to the many Amateur Radio stations located in the path of hurricanes.

While the net continues to use original HF radio frequencies, typically 14.325 MHz, the inner workings have grown with today□s technologies. To the casual listener the net is anchored by a single net control station, but there might be as many as a dozen net control stations located all over the United States and in the islands all connected to an Internet channel while this is going on. This instant □back-channel□ communication helps accommodate the shifting radio coverage on the HF bands. It also helps coordinate operation on multiple HF frequencies. When a maritime Amateur Radio operator or one on an island reports weather conditions in a storm all of those net control stations are listening. At times, the acting control operator will lose propagation and another will pick the report up. The control stations will then coordinate a □shift□ with the better positioned station picking up the net. All together there are 37 control operators, spread from Florida to Arizona to Canada all with the idea of adequate communication into the storm affected area.

The back channel communication also serves as a conversational link to the National Hurricane Center in Miami, FL where hurricane experts can request information and reports from our net stations, and confirm the data we supply.

Many of the tools we use to conduct the net are available to all through the official Hurricane Watch net website, http://www.hwn.org. These tools include color graphics of a storm□s position and forecast direction, conversion tools to handle different measuring standards, and the latest detailed reports and forecasts from the NHC. The HWN is also working to keep a database of our frequent contributors so that we don□t need to repeatedly ask your location and details, but get right to your reporting.

This technology of Internet-relayed satellite pictures, radar positions and statements may raise the question of why maintain contact on □old fashioned□ HF radio. The storms of last year again proved to answer that- by taking out power, blocking satellite signals and otherwise interrupting technology. As we□ve come to expect, it left the Ham Radio Operator who has the ability to put a signal out with trained, detailed observations to keep the rest of the world appraised.

The primary reason for our overwhelming success over the 46 years of our existence is hundreds of fellow amateur radio operators in the affected area who monitor the storm's progress and voluntarily bring to us that data which is so vitally important. You need not be a member to enable those vital reports to us. Additionally, we often find ourselves needing relay assistance to capture essential information. We always appreciate your cooperation by allowing a clear frequency so that we can hear weak and

impaired signals which might be coming from an affected area. For more information on how you can participate in the Hurricane Watch Net, visit http://www.hwn.org.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 3rd June 2012

Echo Ireland

The latest edition of Echo Ireland, contains a report on the society's recent Annual General Meeting as well as the Committee Report and annual accounts presented to the AGM.

Recent activities dealt with in Echo Ireland include the very successful EJ0PL expedition to Little Saltee Island, the Skerries Radio Club's Mills On The Air weekend at Skerries Mill, the Titanic Special Event Operation (EI1MGY) by the Mayo Radio Experimenters Network and the Lough Erne Rally.

EI2KC's "HF Happenings" column has reports from a number of EI DXers, as well as details of recent and forthcoming DXpeditions. Anthony EI2KC also reports on his recent visit to the shack of Tony EI7JN. In another "Excerpt from the HX Files", Pat EI2HX describes how he went about extending one of his existing ATV antennas, while in the "Contest Corner", contest manager Thos EI2JD has some advice for contesters on sticking to band plans.

The June Echo Ireland should be with members within the next few days.

Change in 40 Metre News Frequency

The present 40 metre radio news frequency has become increasingly busier on Sunday mornings. This has lead on occasions to some difficulty in the reception of both the bulletins and the reports on the transmissions. It has been decided, therefore, to move the transmission of the 40 metre news to a new frequency of 7123 kHz on and from Sunday the 1st of July. This frequency was selected after monitoring a range of frequencies over a period of time by amateurs who use this particular transmission of the radio news bulletin.

Licence Examination

There are just over two weeks left in which to apply to sit the next Amateur Station Licence Examination which will be held on Thursday 28th June at 2 p.m. in the ComReg Offices in Dublin. The closing date for

entries is Thursday 14 June. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and are allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form. Please note over half the available places for this examination have already been allocated.

South Eastern Amateur Radio Group

SEARG, for the 5th successive year again has taken part in the Geoparks Communications weekend which runs in conjunction with European Geoparks Week. The event took place over the weekend of the 26th and 27th of May and the club operated using the callsign EI2GEO from the old copper mine at Tankardstown, near Bunmahon in Co. Waterford on the Copper Coast Geopark. Apart from the good HF band conditions that were prevalent during the clubs stay at the Geopark, it was also the hottest weekend of the year. The annual communications weekend is co-ordinated by the Riviera Amateur Radio Club in Torbay and awards are available for operating Geopark stations. Further information is available on the SEARG web site at www.searg.com

As the Geopark event is not a contest, operation tends to be relaxed with ample time and an ideal location to experiment with antennas. There is also a strong social aspect to the event with barbecue and drinks on the Saturday night.

The Copper Coast European Geopark is located on the South East coast of Ireland. It extends from Fenor in the east to Stradbally in the west and as far north as Dunhill. The Copper Coast gets its name from the 19th Century copper mines that were once predominant in the area.

South Eastern Amateur Radio Group would like to thank Paula McCarthy from the Copper Coast Geopark management for providing us with this excellent location over the last five years. The club are looking forward to operating it again next year.

DX News

Pat F4EBT will be travelling in the French Polynesia area of the Pacific from now until 24 June. He is using the callsign FO/F4EBT from at least two different islands in the IOTA OC-046 group and at least four different islands in the IOTA OC-067 group. QSLs go via his home call or via the French bureau. Another station to look out for in the Pacific is TX5VT operated by Christian F5IDM. He will operate from the separate DXCC entity of the Marquesas Islands from 3 - 11 June. QSL via F5IDM John KB4CRT will be on the Caribbean island of Montserrat from 6

-12 June. His callsign will be VP2MRT and he will be active on all bands 80 - 2m. The IOTA reference is NA-103 and logs will be uploaded to Logbook of the World.

Another activation from Montserrat will be VP2MDD. This time the operator is Graham M0AEP and he will be on the island from 7 June until 6 August. He will concentrate on 12, 10 and 6m. MJ/EI9FBB, Dave, will be on from the old German signal station on Jersey, June 2-6. Dave says he'll have high power to various Yagisa nd verticals, emphasizing the higher HF bands, mostly CW, "with a little SSB thrown in." QSL bureau or direct to EI9FBB, or LoTW.

23cm band covered by GNSS

An article in the Microwave Journal shows that all of 1240-1300 MHz except for one narrow gap will be used by global navigation satellite systems (GNSS). The gap of about 1 MHz occurs at 1259 MHz.

International Lighthouse and Lightship Weekend

The 15th International Lighthouse and Lightship Weekend in August has inspired many to register early with 32 countries and nearly 250 registered already. To register, complete a short online form, read the event rules and have lots of fun. We have complete statistics on past events, reports from previous years and we're on Facebook too. Visit the website at illw.net for the International Lighthouse and Lightship Weekend held on August the 18th and 19th.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-May, through Sunday, 3rd-June there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T5, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

8Q, MALDIVES. Juergen, OE4JHW, reports that he will do a suitcase DX-pedition to Kuredu Island between September 2-4th. More details will be forthcoming soon.

A5, BHUTAN. The members of the FGC DX Group (Foundation for Global Children) will continue to be active as A5A from a mountain area in Bhutan until June 6th. The ClubLog shows as of 0851z, June 3rd, the A5A team has made 28113 QSOs with 12290 unique callsigns (14883/CW and 13280/SSB). Breakdown is: 187/AF, 5147/AS, 18093/EU, 4327/NA, 163/OC and 196/SA. QSL A5A via JH1AJT (see Web page for details). For more details and update, visit the A5A Web apge at: http://bhutan2012.com/index.php

A6, UNITED ARAB EMIRATES. Ulli, DL9WVM, will once again be active as A6/DL9WVM from Dubai between June 10-30th. Activity will be on 80-10 meters. He informs OPDX that any SKED requests can be arranged via SKYPE (account 'dl9wvm'). Ulli states that he is working remotely from Dubai for his company in Berlin and sits the whole day 'beside' his equipment. QSL via LoTW, or via his home callsign, direct or by the Bureau. Meanwhile, Ulli mentions that his friend Tom/DL2RMC is also active from Abu Dhabi which started around May 29th, and he will be there for 3 weeks depending on his job in UAE. Callsign is A6/DL2RMC and his license has already been issued.

CONTEST CHART CORRECTION. Please note that in OPDX. 1063 the "NG3K CQWW WPX CW Contest chart" listed VK9PN as Norfolk Island. This is incorrect and should be Lowe Island.

CS, PORTUGAL. Members of the Amateur Radio Association of the District of Leiria (ARAL) will activate CS5FAT from its facilities in the Cova da Iria at the Shrine of Fatima between June 10-13th. Activity will be on the HF, VHF and UHF bands. QSL via CT6ARL, direct or by the Bureau. Amateur radio operators are invited to operate from the Shrine of Fatima between now and October on the dates 10, 11, 12 and 13 of every month or such other dates of amateur radio convenience by appointment. For more details, see QRZ.com or the Blog page: http://cs5fat.blogspot.pt

CY9, ST. PAUL ISLAND (Press Release #2). On May 25th, the CY9M team reports: "Time is flying! Two months today the CY9M team will be making their way to Sydney, Nova Scotia, then onwards to the northernmost tip of Cape Breton, ready to depart for St Paul island on July 26th.
Much has happened since the first press release in February. Those who keep an eye on the CY9M Web site will note major organizations such as Northern California DX Foundation <http://www.ncdxf.org> and ARRL Colvin Award <http://www.ncdxf.org> have agreed to financially back our plans. Together, with all other kind donors and clubs, we thank them sincerely.
The team makes special mention to Al, VE1AL, for his local logistical help. His ongoing assistance is much appreciated.
Meanwhile, the last few weeks has seen a host of sponsors commit to the expedition.
Elecraft, main equipment sponsor of our expedition, is providing six K3 transceivers. We are indebted to Elecraft for their support.
DX Engineering, Tigertronics, Waters & Stanton, Heil Sound, Spiderbeam, RF Power and Vibroplex have shown faith in our activation by generously supporting too.
G3TXQ Broadband Hexbeam by MW0JZE is providing the team with three

antennas. Using both Hexbeams and vertical arrays, we hope to be heard from the island! M2 Antenna Systems are also contributing with a 50 MHz yagi/beam we know how wanted St Paul island is on 6m and cross fingers for good openings.
As mentioned previously, there are few landing spots on the island. Actual station location will be determined where we land. From planning discussions, we know each proposed location has positives and negatives to certain regions around the globe therefore this is very much an "on the day" set-up at any given landing spot.
Now the shipping process begins.
If you would like to donate any amount to the CY9M St Paul Island Dxpedition, please click here: http://www.cy9m.com/donor
Feel free to follow us on Twitter <https://twitter.com/#!/CY9M> and Facebook <http://www.facebook.com/CY9M.2012> - nearer the time of departure (and afterwards) various team members will update as we journey.
Thanks for taking the time to read and share we look forward to working
you from DXCC Most Wanted entity #40.
73, CY9M Team, St Paul Island DXpedition."

CY0, SABLE ISLAND (QRT). Alan, VE1AWW, reported on May 28th: "Very bad news. Sable Island is a Migratory Bird Sanctuary. Yesterday, a migratory bird (and protected species) was found near my towers with injuries suggesting a collision with one of the towers. I am required to take down the towers until an investigation and policy can be developed for tern season (April-August). Very disappointing for sure. CY0/VE1AWW QRT . . . ."

DXER ARRESTED ON ESPIONAGE! Several sources are reporting that well-known DXer/World-Traveller Baldur, DJ6SI, who has been active from all over the world from 70 countries, was arrested on the Island of Kos while operating as SV5/DS6SI. He was there on holiday with his XYL. Many Greek amateurs are pretty upset and embarrassed over this event. It is also reported that Baldur is back in Germany, but is scheduled to return for a trial day. Here are a few Web pages about the incident:
http://sv2dcd.blogspot.de/2012/05/what-shame-for-greek-authorities.html

http://sv8cs.blogspot.co.uk/2012/05/sv5dj6si-arrested-as-spy-incredible.html
http://sv5byr.blogspot.co.uk/2012/05/that-can-happened-only-at-greece.html

http://yo4px.blogspot.com

EH8, SPAIN (Special Park Op). Members of the Grupo DX Teide will once again activate the Teide Volcano, the highest point in Spain, between June 30th and July 2nd. Last operation was in 2007 using the callsign AN8TID. To commemorate their 5th anniversary of that operation, and the Teide National Park being added to the UNESCO World Heritage List, the team will be active as EH8TID this time. Operations will take place from the same location as last time: the La Rambleta del Teide, 3555m ASL, and less than 163m from the top of the mountain. The area is highly protected, and therefore; they

are only authorized to use vertical and wire antennas and only 100 watts. Operators mentioned are Jos&#65533; Antonio/EA8ARG, Luis/EA8AY, &#65533;ngel/EA8BFH, Miguel &#65533;ngel/EA8BRW, and Francisco/EA8CW. Activity will be on 80-6 meters using CW, SSB, RTTY and PSK31. QSL via EA8NQ. A special certificate will be provided _upon request_ to whom made at least three contacts on different bands and/or modes. The certificate will be sent free by E-mail as a printable image or PDF. Those who want a printed certificate must send 5.00 Euros, 6.00 USAs or 5 IRC to cover printing and shipping expenses. For more details, see their Web page at: http://www.eh8tid.tk

FO, FRENCH POLYNESIA (IOTA Op). Just a reminder that Pat, F4EBT, is now active as FO/F4EBT until June 24th, and plans to activate the following French Polynesia IOTA Islands: Tahiti (OC-046), Moorea (OC-046), Raiatea (OC-067), Huaine (OC-067), Bora-Bora (OC-067) and Maupiti (OC-067). Activity will be holiday style, usually SSB only on 80/40/20/17/15/12/10 meters using a TS-50 w/100 watts into a FD4 Multiband antenna. QSL via his home callsign, direct (1 IRC or 2 USDs) or by the Bureau.

FO/M, MARQUESAS ISLANDS. Christian, F5IDM, a member of a scientific expedition to observe the Venus Transit, will be active as TX5VT between June 3-12th. He plans to activate the following islands in the Marquesas Island group (OC-027): Hiva Oa (DIFO FO-021, WLOTA 1233), Nuku Hiva (DIFO FO-023, WLOTA 2030), Ua Huka (DIFO FO-026) and Ua Pou (DIFO FO-027). QSL via F5IDM (KH6 Bureau or direct, see QRZ.com). For more details, see: http://www.cveillet.net/PF/TX5VT.php

GB0, ENGLAND (Special Event). Look for GB0AFD (Armed Forces Day) to be active on Sunday, July 1st, to commemorate the UK's Armed Forces Day with the local Veterans Association. The large event will be held in Alexandra Park Hastings Sussex together with all local associations. They hope that many ex-Servicemen Operators from RNARS, RAFARS and the Royal Signals Association will give them a call and help build up interest for the general public attending the event. Their intended operating bands will be on 80/40/20/30 meters using SSB or CW or PSK31. Depending on conditions other bands may be tried. They will have a Linear 300/400W using wire dipoles; they will also monitor 2m and 6m CW or SSB. Their times of operations are from 10:00 am until 16:00 pm. They would welcome any schedules -- just contact Tony, G4KLF, QTHr.

HC, ECUADOR. Dr. Rick, NE8Z/HC1MD, will once again be active from here. Look for HC1MD from Tumbaco between June 7-14th and July 21-31st. Activity will be on 40-10 meters operating CW, SSB and RTTY, using a TS-850s w/SB-200 and a Carolina Windom. He will also be on 6 meters CW/SSB, monitoring 50.110 MHz using a FT-857D w/100w into a Moxon Antenna. QSL via K8LJG. View the HC/Ecuador and HC8/Galapagos DX-Diplomas at: http://webpages.charter.net/ne8z

IOTA NEWS.....
AS-061/
AS-092. (Update) "DX-World.net" is reporting members of the Russian Robinson Club will be active as RI0K from Ratmonova Island

(AS-061, Big Diomede Island) and Alyumka Island (AS-092, in the Chukotka Autonomous Region) between July 15th and August 28th. These are very rare IOTAs.

AS-066. Vladimir "Vlado", UA0LCZ, will be active as RI0NZ from Popov Island between July 24-30th. QSL via his home callsign, by the Bureau or direct.

AS-154. (CANCELLED) A team of Hungarian and Turkish operators were expected to activate Giresun Island between July 24th and August 1st. Hungarian Radio Amateurs were not granted permission to operate.

EU-029. Alain, F5LMJ, will be active as 5P5J from Lolland Island between July 14-28th. QSL via LoTW or eQSL, or his home callsign by the Bureau.

EU-158. Operators Mike/SV1RK and Stavros/SV3CJU will once again be active from Sapienza Island (LH GRE116, WLOTA 1471, WW LOC KM06US) after 7 years as J48SAI between June 8-10th. Activity will be on the HF bands and 6 meters using CW, SSB and RTTY. QSL via LoTW or via SV1RK, by the Bureau or direct.

NA-039. Jeff, KL2HD, is currently staying on Adak Island until June 8th. He is a biologist and studies wildlife in the Aleutian Islands of Alaska in the summer and occasionally runs his rig from Adak Island where his summer office is located. He also spends most of the summer on a research ship, the M/V Tiglax, traveling the Aleutians and will someday try maritime mobile operation. Watch for activity on 20/17 meters SSB between 0400-0800z. QSL via LoTW (preferred), direct or by the Bureau. Check out his QRZ.com page for an online log and pictures.

OC-177. Look for 30 operators to be active as YE0M from Kaliage Besar Island (Seribu Islands) between July 6-9th. Activity will be on 160-2 meters using CW, SSB and RTTY. Operators mentioned are YB0AA, YB0AZ, YB0HD, YB0JS, YE0YE, YB0AKM, YB0BUI, YB0ECT, YB0KVN, YC0KVM, YC0LOW, YC0LLY, YC0MXV, YC0RAN, YC0TSU, YC0VKI, YD0RVT, YB1PR, YB1MH, YB1CCF, YB1GJS, YB1KAR, YC1CDV, YC1KAF, YD1JZ, YD1GCL, YD1LUX, YD1MRI, YD1ORZ and YD1XUH.QSL via YB1GJS.

SA-012/
SA-035. Operators Alex/UA9YAB and Alex/UA9YPS will be active as from Margarita Island (pfx YV7 and SA-012) and Los Roques Islands (pfx YV5 and SA-035) between August 2-9th. Signing YV7/homecall and YV5/homecall, activity will be on the HF bands. QSL via their home callsigns.

SA-029. (Update) Operators Marcelo/PY1MT, Moreira/PU1MMZ, Mauricio/PU1SET, Jose/PY1MX and Jair/PY1HS will be active as ZV1M from Itacuruca Island (DIB RJ-08), Rio de Janeiro State, Brazil, between July 27-29th. Activity will include the RSGB

IOTA Contest (July 28-29th). Operations will be on 80/40/
20/15/10 meters using CW and SSB. QSL via PY1MT, direct
only with SASE/SAE + 2 USDs (no IRC). Their Web site is
available at: http://www.casadoradioamador.blogspot.com

II9, ITALY (Special Event). Members of the Italia ARAS (Amateur Radio Society - <http://www.arasitalia.org>) of Pedara, Catania, and the ARI (Associazione Radioamatori Italiani - <http://www.ari.it>), will activate special event station II9AS to remember the 40° anniversary of first flight
of the famous Anti-Submarine Aircraft employed by NATO, Breuget BR 1150 "Atlantic" between June 6-9th. Operators mentioned are Marco/IT9JPW, Michele/IW9HPW and some other IT9 operators. Look for the ARI team to be active from the Air Base Station of Sigonella in Catania between 0600-1800z on June 9th. Activity will be on 40-10 meters using CW and SSB, and operating a couple of stations. A special QSL card will be available via IT9JPW.

J3, GRENADA (Op Cancelled!). Harry, AC8G (J37K), who was planning a 6 night stay in Grenada for the CQ WW SSB Contest (Oct. 27-28th), has announced that American Air has cancelled his flight to Grenada. Other dates are not acceptable, so he cancelled the operation.

N2, UNITED STATES (Special Event). Mike, W2GR, will be on the air with the special callsign N2W between June 10-24th. The callsign N2W will be on the air during the week before and the week after Nik Wallenda tries to or becomes the first person in history to walk directly over Niagara Falls on a tightrope. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via W2GR CBA. The walk will be broadcast live worldwide on ABC on Friday, June 15th, 2012.

PJ4, BONAIRE. By the time you read this, Bill, K9HZ, should be active as PJ4HZ from Kralendijk, Bonaire (SA-006, WLOTA LH-1279), until June 10th. QSL via his home callsign.

PJ7, SINT MAARTEN (2013 Op!). Randy, N0TG, has announced a real early
2013 operation to Sint Maarten (NA-105, WLOTA 383, DIFO FS-001) between
March 15-23rd. He states that they have the facility arranged, tickets,
etc. So, look for Randy/N0TG, Ron/AA4VK and Jeff/N1SNB to sign PJ7/homecall
next year. Activity will probably be on all bands and modes. QSL "all"
callsigns via N0TG.

PT7, BRAZIL (Contest/Lighthouse Op). Members of the GPDX-CE (Portuguese
DX Group Cear&#65533;) will be active as PT7ZT/p from the Paracur&#65533; Lighthouse
(BRA-276, DFB and DFCE EC-09) in the Municipality of PARACURU between
June 8-10th. The Lighthouse of Paracuru is about 115km from the capital
Fortaleza. The team plans to participate in the Portugal Day Contest
(June 9-10th). They will use a FT 890AT with a GP20 Vertical Dipole and
Window Tagra antenna. QSL via the home callsign, direct or by the Bureau.

PR2I QSL UPDATE. Fred, IK7JWX, QSL manager for PR2I (IOTA SA-024 and SA-071), apologizes for the long delay in responding to the many QSLs received via direct. The the fault was not his, but to a failure of the printing machine. All QSLs will be in the mail as of Monday, June 4th.

VP9PN LOG. The log for the VK9PN operation is now available online at: http://www.hamqth.com

QSL RECEIVED VIA LoTW: 4Z5IW, CX4ACH, IZ8CLM, JA4FHE, M0VKC, MU0FAL, MW0ZZK, OH0Z, OZ1ADL, PJ4C, RI1FJ, S79RR, SA6G, SN7Q, UN7LZ, V73NS, VE3AXW, VK2DX, YV5OIE, ZL2IFB and ZP6CW

QSLS RECEIVED VIA MAIL: 1A4A, 3XY1D, 4J5A, 4KR60A, 7Q7PRO, A35YZ, AT2DW, C21HA, E51M, E7DX, GR100MGY, HK0NA, OH1VR/VP9, T6BP, TT8ES, UK9AA, VK5KGP, VK9N/ZL1RS, VK9XS, VK0TH and ZK2C

QSLS RECEIVED VIA THE BUREAU: 9J3A, A22/JA4ATV, CU2KG, CX/N3BNA, DL5YYM, E73M, E73XL, E79D, ED9M, HH2/OE7NHT, OH3JF, OH0R, OJ0B, OM2011IIF, PJ4I, PY1MM, S9DX, S92SS, V21ZG, V5/DL2SL, VP5DX, YL6W, ZL7/W1SY, ZD8O and ZL8DX

R1150, EUROPEAN RUSSIA (Special Event). Look for club station RK3VWA to operate with the special callsign R1150V between now and August 31st. Activity is to celebrate the 1150th anniversary of the birth of the Russian statehood. Additional information about days of activities and other events will be published on the Web site: http://www.r3v.ru

SILENT KEY. It has been reported that Bill Wells, VK4UA, become a Silent Key (SK) on May 30th, having turned 89 earlier in May 2012. He came from Victoria and his interest in radio began as a 14 year old when he built his first radio receiver. Bill served in the RAAF from 1942-46 and was licensed for 65 years. OPDX and its readers would like to send out our deepest sympathy to the family and friends of VK4UA.

TK, CORSICA (EU-014). Alex, IW5ELA, will be active as TK/IW5ELA from
Calvi between June 6-9th. Activity will be on 40/20/15/12 meters and
mainly on CW. He will use a FT857 w/100w into a vertical antenna.
QSL via his home callsign.

V8, BRUNEI (Update). Members of the Gemilang Amamteur Radio Club (GEMILANG
Radio) and the Mediterraneo DX Club will team-up and sponsor/plan another
DXpedition, this time to Brunei (OC-088). The multi-national team (90%
of the team operated during the 9N7MD DXpedition) will be active as
V84SMD between November 13-22nd. Activity will be on 160-10 meters,
including the 30/17/12 meter bands, using CW, SSB and RTTY. They plan
to have 15 to 18 operators with 4 to 5 stations on the air 24 hours.
Suggested frequencies are:
CW - 1826.5, 3505, 7005, 10105, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 1840, 3799, 7080, 14200, 18145, 21295, 24950 and 28470 kHz
RTTY - 3600, 7040, 10140, 14085, 18100, 21080, 24930 and 28085 khz

Their equipment will be three Icom 7000s, Icom 7200 and a Elecraft K2.
Antennas will be 2 Spiderbeam (5 bands), 80m vertical full size, inverted
L for 160m, vertical for 40m, vertical dipole for 30m and beverages for
receiving. The current operators mentioned are Norbert/DJ2JC, Heye/DJ9RR,
Henri/F1HRE, Michel/F5EOT, Jean-Luc/F6BIV, Gabriele/I2VGW (Team Co-leader),
Francesco/I2DMI, Bob/I2WIJ, Pino/I8YGZ (Techical Supervisor), Fabio/IK2LTR,
Marco/IZ2GNQ, Dario/IT9ZZO (Physician), Fabrizio/IZ2KXC, Ant/IZ8CCW (Team
leader), Eric/ON7RN, UZ2HKC, Lan/V85AVE, Nizam/V85AX, Ayub/V85TX (Logistic
Supervisor) and Adhi/YB3MM. Pilot stations are Pino/IZ8BGY (AS/EU/OC) and
Don/N1DG (NA/SA). QSL via IK2VUC, direct, by the Bureau or the OQRS. Logs
will be uploaded to LoTW 4-5 months after the activity. The V84SMD Web
page is now online at: http://www.mdxc.org/v84smd

Haida Part of Museum Ships on the Air:

Posted: 02 Jun 2012 05:48 PM PDT
http://www.eham.net/articles/28423

The HMCS Haida will be one of about 100 ships around the world taking part this weekend in an event called Museum Ships on the Air 2012. Amateur radio operators will be able to talk with ships from Europe, Australia and the United States in this unique event first launched in 2001 by the Battleship New Jersey, which is stationed in Camden, N.J., and sponsored by the vessel's amateur radio society (call sign NJ2BB). Ken Lloyd, president of the Friends of HMCS Haida, says the aim is to enhance the visitor experience aboard these floating museums by providing a glimpse into the stories of these ships through amateur radio. "The operators will discover some of the history of the ships and their heroic crews," he said. HMCS Haida's call sign is VE3DA. The other Canadian museum ship taking part is the submarine HMCS Onondaga, which was in service for 33 years for the Royal Canadian Navy. It is now in Rimouski, Que., and its call sign is VA2GNQ.

Ham Radio Enthusiasts Share Their Passion:

Posted: 02 Jun 2012 05:48 PM PDT
http://www.eham.net/articles/28422

Amateur radio operators from around East Tennessee will ham it up this month at two events in Knoxville. The Radio Amateur Club of Knoxville will hold its annual hamfest next Saturday from 8:30 a.m. to 4 p.m. at the Kerbela Temple, 315 Mimosa Ave. Ham radio equipment, antennas, electronic parts, old-time radios, CB radios and other broadcast equipment will be on display and for sale. Vendors will include Ten-Tec of Sevierville, a popular maker of radio equipment.

Previously Dismissed Radio Signals Were Credible Transmissions from Earhart

Posted: 02 Jun 2012 05:47 PM PDT
http://www.eham.net/articles/28420

Dozens of previously dismissed radio signals were actually credible transmissions from Amelia Earhart, according to a new study of the alleged post-loss signals from Earhart's plane. The transmissions started riding the air waves just hours after Earhart sent her last inflight message. The study, presented on Friday at a three day conference by researchers of The International Group for Historic Aircraft Recovery (TIGHAR), sheds new light on what may have happened to the legendary aviator 75 years ago. The researchers plan to start a high-tech underwater search for pieces of her aircraft next July. "Amelia Earhart did not simply vanish on July 2, 1937. Radio distress calls believed to have been sent from the missing plane dominated the headlines and drove much of the U.S. Coast Guard and Navy search," Ric Gillespie, executive director of TIGHAR, told Discovery News.

Hurricane Watch Net Enters 47th Season:

Posted: 02 Jun 2012 04:41 PM PDT
http://www.eham.net/articles/28417

Amateur Radio's Hurricane Watch Net is geared up and ready for its 47th year of activity. Formed in 1965 by Jerry Murphy, (Amateur radio call sign K8YUW), during Hurricane Betsy, the Hurricane Watch Net was an informal group of radio amateurs who recognized a need to provide communications to and from hurricane affected areas. Over the years the net has relayed reports in to the National Hurricane Center and just as importantly out to the many Amateur Radio stations located in the path of hurricanes.

GB2RS NEWS

Sunday 3rd June 2012

The news headlines:

Amateurs help Italian earthquake relief efforts

Big news for Air Cadets radio exam candidates

Extra spectrum for Danes at MF, HF and VHF

Following the earthquake on 20 May, two additional aftershocks struck the Emilia Romagna region of Italy on May 29. One of these was a 5.8 magnitude shock. After a request from the Italian Civil Protection department, the voluntary group RNRE immediately sent one Mobile Unit with five radio amateurs to the area and put two more units on standby, ready to go when requested. The HF frequency 7060kHz is in use by IQ1HQ, operated by RNRE, and IQ0TK for the Civil Protection Department in Rome. VHF links are currently on 145.200MHz. Amateurs are requested to keep these frequencies clear for emergency traffic.

The Radio Communications Foundation is pleased to announce that agreement has been reached with the Air Cadets Organisation to accept a pass in their ACO Radio Communications Foundation Equivalent examination as equivalent to a pass in the Foundation Radio Amateur examination. Ofcom has also accepted that the ACO Foundation Equivalent examination syllabus meets the Radio Amateur Foundation level requirements and will issue a Radio Amateur Foundation level licence via the Radio Society of Great Britain on receipt of a successful Air Cadet candidate pass details.

The RSGB is offering those under 21 who achieve their licence through this route a year's free membership of the Society. The vision of the Radio Communications Foundation is to bring the benefits of radio to young people and to encourage the use of technology. The Foundation is delighted with this agreement as it completely meets this objective and it is inspiring that young Air Cadets may set out on a lifetime of enjoyment of the hobby through this agreement.

The Danish regulator has announced the availability of 5250 to 5450kHz, 472 to 479kHz and an expansion to the 70MHz allocation. Effective from 1 June, the 5MHz pilot scheme will cease and 5250 to 5450kHz can be used by A and B Certificate holders using all modulation types with, respectively, 1000W and 100W maximum output power. Issued trial licenses are valid until expiry. The allocation at 472 to 479kHz will commence on

1 January 2013. 70MHz will expand to 69.9375 to 70.0625MHz, 70.0875 to 70.1125MHz and 70.1625 to 70.5125MHz.

The telecoms regulator of the Principality of Monaco has allocated the segment 472 - 479kHz to the amateur service, with secondary status, with a maximum power of 1 watt eirp.

And now for the details of rallies and events for the coming week

The Central Scotland Mini Ham Radio Convention takes place today, 2 June. It is at Crofthead Farm Community Education Centre, Templar Rise, Livingston EH54 6DG. Doors open at 10am, and there will be trade stands, a Bring & Buy as well as lectures and an RSGB bookstand.

Tomorrow, 3 June, the Spalding & District Annual Rally will take place at The Sir John Gleed Technology School, Halmer Gardens, Spalding, Lincs, PE11 2EF. Doors open at 10am and there will be trade stands, free car parking and catering facilities at the event. More details from John, G4NBR, on 07946 302 815.

The 11th Junction 28 QRP Rally will take place on 10 June at Alfreton Leisure Centre, Church Street, Alfreton, Derbyshire DE55 7BD. The event is organised by the South Normanton Alfreton and District Amateur Radio Club in association with the G-QRP Club. Doors open at 10am and admission is ?2.50. There will be trade stands, special interest groups and catering facilities. More from Russell Bradley, G0OKD, on 01773 783 658.

Now for the news of special events

Coventry Amateur Radio Society will put GB50CCC on the air until 19 June for the Coventry Cathedral Celebration.

Chorley and District Amateur Radio Society will be on air over the Queen's Diamond Jubilee bank holiday weekend with the club call MX0ISN. A special QSL card is being produced for this event, and details are on qrz.com.

South Kesteven Amateur Radio Society will be operating GB0GMO from Grantham Museum on 1 and 2 June to mark the re-opening of the museum. They will be using voice modes on all bands from 6m to 40m and also on 2m from 10am to 4pm when the museum is open. A special QSL card will be available either direct or via the RSGB bureau.

South Lancs Radio Club will be on the air from Ashurst Beacon main car parking area, airing the callsign MQ0SLR/P between 10am and 6pm today, 2 June. Then on 3 June from 10am to 4pm they will be on the air from Shackerley Community Centre using MQ0SLR/P.

Kent Weald Radio Club will be operating from the Headcorn Aerodrome, Kent for the duration of the Queen's Diamond Jubilee week. The club will be using the special event callsigns GB1ER and GB1HA, working the HF VHF & UHF bands. Visitors are welcome to call in to see the operation. Further details are available from Patrick, G0UXG via e-mail to

palybl@btinternet.com.

The Wakefield & District Radio Society will be assisting the Sandal Community Association in their celebrations of HM the Queen's Diamond Jubilee. The event will take place today, 3 June at the West Yorkshire Sports & Social Club, Sandal Hall Close, Wakefield WF2 6ER. The special event callsigns GB60HRH and GB5SCA will be in operation on the HF bands using SSB plus, hopefully, SSTV and PSK, as well as 2m between 0800 and 1600UTC. More details are on the club website, www.wdrs.org.uk.

And now the DX news compiled from 425 DX News and other sources

KX4WW and W9RN will be visiting the Turks and Caicos Islands until 7 June. They will sign VP5/home call and will be active on all bands from 6 to 160m.

>From the island of Molene in the Finistere North West group, Keith, G3TTC will be active on the 5 June as F/G3TTC/P. QSL via G3TTC either direct or via the bureau.

Using the call DD4T, several amateurs will be on the air from Helgoland Island, EU-127, from 3 to 10 June. They plan to operate three stations at the same time on all bands and in all modes. QSL via IZ4AMS, either direct or via the bureau.

A5A will be on the air from Bhutan until 6 June. They will operate SSB, CW and RTTY on the 6 to 80m bands with three stations. QSL via JH1AJT, either direct or via the bureau, and via Logbook of the World. QSL instructions and further information can be found at www.bhutan2012.com.

Now the contest news

National Field Day takes place this weekend during the Queen's Diamond Jubilee weekend. Running until 1500UTC today, 3 June, on the 1.8 to 28MHz bands, the exchange is signal report and serial number.

The UK Six Metre Group's Summer E's Contest runs for 24 hours on the 50MHz band ending at 1300UTC today, 3 June. Using all modes, exchange a signal report, serial number, locator and, if you are a member of UKSMG, your membership number.

The UK Microwave Group Low Band Contest takes place today, 3 June, on the 1.3, 2.3 and 3.4GHz bands. Running from 1000 to 1600UTC and using all modes, the exchange is signal report, serial number and locator.

The 80m Club Championships data leg takes place on 4 June from 1900 to 2030UTC. The exchange is signal report and serial number.

On 5 June the 144MHz UK Activity Contest takes place between 1900 and 2130UTC. Using all modes on the band the exchange is signal report, serial number and locator.

There will be lots of RF generated on 6 metres during the weekend of 9 to 11 June as part of the 2012 ARRL June VHF QSO Party. The objective of

the party is to work as many amateur stations as possible in as many different 2 degree x 1 degree grid squares using authorised frequencies above 50MHz. UK stations work US and Canadian amateurs only. This all starts at 1800UTC on the Saturday and runs through 0259UTC on Monday. For full details on the QSO Party, check out the website www.arrl.org/june-vhf-qso-party.

The French DDFM 6m Contest takes place for 24 hours on 9 and 10 June from 1600UTC to 1600UTC. The exchange is signal report, serial number and the first four digits of your Locator.

On Sunday 10th, the Practical Wireless 2m Low Power Contest runs for seven hours. The maximum permitted power for this event is 3 watts and the scoring is 1 point per contact, multiplied by the total number of Locator squares worked. Running from 0900 to 1600UTC and using all modes, the exchange is signal report, serial number and locator.

The final event for 10 June is the second 144MHz Backpackers contest. Running from 0900 to 1300UTC and using all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 25th to Thursday the 31st of May, compiled by Neil Clarke, G0CAS on Friday 1st of June.

At the start of the period six sunspot groups were visible but by the 29th two had disappeared. However, on the 31st, two new groups rotated into view. One of these groups produced 11 M class solar flares on its last rotation. Solar activity was very low on the 28th and the 29th but low on the remaining days, when occasional C class solar flares took place. Solar flux levels declined from 117 units on the 25th to 106 by the 29th but recovered back to 117 units by the 31st. The average was 112. The 90 day solar flux average on the 31st was 117 units, that's one unit up on last week. X-ray flux levels declined from B4.4 units on the 25th to B2.1 by the 28th. Levels by the 31st had increased to B5.4 units. The average was B3.5 units. Geomagnetic activity was quiet every day and the average Ap index was 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 350 and 470 kilometres per second. Particle densities were low every day except for a brief increase to 21 particles per cubic centimetre on the 28th and to 20 units on the 31st. Bz varied no more than minus 8 and plus 10 nanoTeslas.

And finally the solar forecast. This week the more active side of the Sun is expected to be looking our way. Solar activity is expected to be low most days but could increase to moderate levels on the occasional day. Solar flux levels should be in the 130's for most of the week. Geomagnetic activity is expected to be at unsettled levels today and tomorrow due to a recurring coronal hole. Activity is expected to be at quiet levels for the remainder of the period. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows should be about 14MHz. Paths this week to

India should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 1100 and 1800 hours. Sporadic-E is expected most days up to 50MHz but only occasionally on 144MHz.

Finally, the propagation team has learned with great regret that Charlie Newton, G2FKZ, has gone silent key. For many years he was the compiler of these propagation reports, chairman of the Society's Propagation Studies Committee, and was the author of a pioneering study of radio aurora.

And on that sad note, that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Friskney and East Lincolnshire Communications Club has a club net on Monday from 7pm, on 144.165 USB, vertical polarization. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. On Friday there is a club net on GB3FR from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

Wythall Radio Club is running a special event station for the Queen's Diamond Jubilee on Monday. On Tuesday there's a social evening, and on Sunday 10 June the club is visiting the Junction 28 QRP Rally. Contact Chris, G0EYO, on 07710 412 819.

South Birmingham Radio Society is closed on Monday, then having a talk in the main hall on Wednesday. Thursday sees training classes with Dave Murphy, G8OWL, then there's shack and aerial work on Friday. On Sunday 10 June the club is visiting the QRP Radio rally at Alfreton, Derbyshire. On Friday 8 June Bromsgrove & District Amateur Radio Club is preparing for VHF mobile operation. Contact Chris, M0BQE on 01905 776 869.

NEWS FOR THE NORTH OF ENGLAND

Listeners to GB2RS in the Wakefield area of Yorkshire will be aware of the 0900 news reading that takes place via the 6m repeater GB3WY on 50.800MHz. Unfortunately, the original team of three news readers is now reduced to only G4CLI. One or two volunteers, who must be RSGB members, are now required to come forward as reserve or alternating readers. If you are interested, then please contact the GB2RS News Manager, Gordon, G3LEQ on 01 565 652 652.

We start our events listing with clubs that have several events this week. Wakefield & District Radio Society is operating Diamond Jubilee special event stations GB60HRH and GB5SCA on Sunday 3 June from 1200 to 1700 at the West Yorkshire Sports and Social Club. That's at Sandal Hall Close, Wakefield, West Yorkshire, WF2 6ER, and is in association with the Sandal Community Association. There's a debrief on the event on Thursday, alongside the Foundation exam and putting the shack on the air. On Saturday 9 June the Intermediate and Advanced Licence courses continue from 13:30. Details from Ken, G8FSO, by email to

g8fso@wdrs.org.uk.

Hornsea Amateur Radio Club is taking part in the 80m Club Contest Data on Monday, then holding a committee meeting on Wednesday. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Halifax & District Amateur Radio Society is having a club night on Tuesday. On Saturday 9 June the club is at the charity gala, offering their Green Receiver crystal set construction project. Contact Martin, M0GQB, on 01422 341 317.

Denby Dale Radio Club is having an illustrated talk on Wednesday by Christian, M0KLF on his Arctic holiday. On Saturday 9 June the club is operating GB2HS at Honley Show. On Sunday 10th it's the 1940's weekend from Thwaite Mills, Leeds. Details from Richard, M0RBG, on 07976 220 126.

Now we return to the traditional listing in date order. On Monday 4 June Sheffield Amateur Radio Club is taking part in the 80m Contest Data and having a social evening. Contact Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 5 June Morecambe Bay Amateur Radio Society is running a Queen's Diamond Jubilee special event. Contact Sheila, on 07867 516 836.

On Tuesday 5 June Otley Amateur Radio Society is taking part in the 144 MHz UK Activity Contest & having a Morse class with G0WNT. Contact Paul, 2E0PAK, on 07768 996 370.

On Tuesday 5 June Stockport Radio Society is having a talk by Nigel, G0RXA on what's going on above your heads. More information from Nigel Roscoe, on 07973 312 699.

On Thursday 7 June Ripon & District Amateur Radio Society is on the air. Contact Rob Hall, M0RBY, on 07876 085 631.

On Thursday 7 June South Manchester Radio and Computer Club is having a visit from Roger, F5VMB. Details from Ron, G3SVW, on 01619 693 999.

On Friday 8 June East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 8 June Tynemouth Amateur Radio Club is having a talk by G0GYO on his meeting with SV5RW. Contact Bob, M6KLO, by email to mail@g0nwm.com.

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
28 May - 03 June 2012

Solar activity was at very low to moderate levels during the period. Very low levels were observed from 28 - 29 May. An increase to low levels was observed from 30 May - 02 June as Region 1493 (N15, L=209, class/area Dso/170 01 June) and Region 1496 (N16, L=199 class/area Cso/120 on 01 June) rotated onto the visible disk. Another increase to moderate levels was observed on 03 June as Region 1496 produced an M3 x-ray flare at 03/1755 UTC. Associated with this event were both a Type II radio sweep (estimated shock speed of 1077 km/s) signature and CME supporting imagery from the LASCO C2 imager. After analysis, this CME was determined to not be Earth directed. Region 1493 was the most active region during the period producing 8 C-class x-ray events.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at high levels on 28 - 29 May and then decreased to moderate to normal levels for the remainder of the period.

Geomagnetic field activity was at quiet to minor storm levels during the period. Quiet conditions were observed from 28 - 29 May. Late on 29 May, solar wind speeds, as measured by the ACE spacecraft, increased from 350 km/s to around 450 km/s. Solar wind speeds remained elevated till late on 31 May. In conjunction with these elevated solar winds, quiet to unsettled levels were observed from 30 - 31 May with isolated active and minor storm levels at high latitudes. A return to quiet levels was observed from 01 - 02 June. Late on 02 June, an isolated active period was observed due to prolonged negative IMF Bz measured by the ACE spacecraft. On 03 June, an increase from quiet to minor storm levels with major storm periods observed at high latitudes was observed. This increase in activity was associated with a continuation of sustained negative IMF Bz from 02 June.

Forecast of Solar and Geomagnetic Activity
04 June - 30 June 2012

Solar activity is expected to be at low levels with a chance for M-class activity from 04 - 15 June.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels during 04 - 05 June, 13 - 19 June, and 26 - 30 June. High levels are expected during 06 - 12 June, and 20 - 25 June.

Geomagnetic field activity is expected to be at active levels with a chance for minor storm levels on 04 - 05 June as a coronal hole high speed stream (CH HSS) becomes geoeffective. Quiet to active levels are expected on 06 June as CH HSS effects persist. A decrease to quiet to unsettled levels is expected on 07 - 08 June as the CH HSS wanes. Predominantly quiet levels are expected from 09 - 17 June. Quiet to active levels are expected from 18 - 20 June as another CH HSS becomes geoeffective. A return to mostly quiet levels is expected for the remainder of the period.

Hamfest Brings Together Familar Voices:

Posted: 03 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28424

Some familiar voices got together Saturday in Hermon to meet some not so familiar faces. Members of the Bangor Chapter of the Pine State Amateur Radio Club took part in Ham Fest. It's the 25th year for the event, which gives some ham radio operators a chance to see each other for the first time, even though they may have been talking to each other for years. Club members say despite what some think, the ham radio hobby is alive and well and vital to emergency communications. Jerry Burns, the Ham Fest Chairman, says "9-11, when the Twin Towers came down, most of New York City's communications were gone, so hams came in from all over the Northeast to set up communications links, Katrina, disasters everywhere."

Youth Day Event

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/aEl37wFBxeA/youth_day_event.htm?utm_source=feedburner&utm_medium=email

The South African Radio League (SARL) has an agreement with ICASA (the SA
regulator) that will allow unlicensed persons to operate an amateur radio
station under the supervision of a licensed radio amateur without the need
to register as an educational station

Watch Venus Transit online

Posted: 04 Jun 2012 01:12 PM PDT
http://forums.qrz.com/showthread.php?348911-Watch-Venus-Transit-online&goto=newpost

Watch Venus Transit online

Clint Bradford K6LCS has posted a collection of URL's where you should be
able to watch the June 5-6 Venus transit online from sites around the world

At 22:09 UT on June 5, 2012 the planet Venus will appear as a small, dark
disk moving across the face of the Sun. The transit will finish at 04:49
UTC on June 6 (exact time depends on location of observer).

venus_transit_visibility.gif

Clouds permiting, it may be visible to observers in the UK from dawn (about
03:46 UT in London).

This will be the last time the planet Venus will make the trek across the
face of the sun as seen from Earth until the year 2117.

Note: Observing the Sun directly without appropriate protection can damage
or destroy retinal cells, causing temporary or permanent blindness.

Don't Mention the 'O' Word...

Posted: 05 Jun 2012 05:06 AM PDT
http://forums.qrz.com/showthread.php?348994-Don-t-Mention-the-O-Word&goto=newpost

This year, the capital of Britain is hosting a major sporting event. The event has very strict controls over the use of many key words and indeed the very numbers of the year associated with it.

It seems that there wasn't much thought as to how amateurs might explain the use of the 'O' prefix, as a number of members started asking how they might do it without inviting a lawsuit.

The RSGB then appears to have obtained confirmation from the offices of the unmentionable organisation in question that certain wording would be acceptable for QSL cards and to use on air, which clear things up a bit, if belatedly. One of the essential benefits of membership, no doubt.

So the only thing to figure out now, seeing as we haven't, as far as I can tell, been granted permission to use any logo, other terms or images, is what the hell to put on the QSL card?

Seeing as this is another 'everybody say yeah!' moment that's poorly thought through, I think I'll stick my 'O' notice of variation in the bin, which will be available in the corner of the shack for OFCOM to inspect throughout its effective period. The public are welcome to visit to witness the 'O' callsign not being used.

For the curious, or the terminally bored, here's the lowdown

//
N2S On The Air!!

Posted: 04 Jun 2012 12:18 PM PDT
http://forums.qrz.com/showthread.php?348903-N2S-On-The-Air!!&goto=newpost

June 9,2012 1400 UTC to June 9,2012 2000hrs UTC.

28.35mhz, 21.35mhz, 14.25mhz, 7.25mhz

The Overlook Mountain ARC, Kingston, NY[/B][/B] is sponsoring a Special Event Station at the Rondout Valley Scouting Camporee.

This event also celebrates the 100th anniversary of the Girl Scouts of America. The theme is Emergency Preparedness and Scouts will be given the opportunity to contact hams throughout the world.

For a QSL card send a SASE envelope or via the Bureau; for a certificate send a SASE 8.5" x 11 " envelope. All requests for a QSL go to N2WCY (QSL mgr) who is in the call book.

Field Day to Promote Emergency Response of Amateur Radio Operators:

Posted: 04 Jun 2012 05:07 PM PDT
http://www.eham.net/articles/28427

Despite the Internet, cell phones, email, and modern communications, every year whole regions find themselves in the dark. Tornadoes, fires, storms, ice, and even the occasional cutting of fiberoptic cables leave people without the means to communicate. In these cases, the one consistent service that has never failed has been Amateur Radio. These radio operators, often called "hams" provide backup communications for everything for the American Red Cross to FEMA and even the International Space Station. Montgomery County "hams" will join with thousands of other Amateur Radio Operators showing their emergency capabilities June 23 and 24. The "hams" will set up at 100 Blue Stem Lane in Hawk Point, Mo.

//
Amateurs Broadcast from Local Submarine War Museum:

Posted: 04 Jun 2012 05:07 PM PDT
http://www.eham.net/articles/28426

Muskogee - Amateur radio operators aboard the USS Batfish contacted other war museum radio operators worldwide on Saturday and Sunday. The USS Batfish/USS Oklahoma Amateur Radio Club hosted a special event as part of the annual "Museum Ships Weekend" celebration created by the amateur radio club affiliated with the USS New Jersey (BB62). This event promoted the hobby of amateur radio, as well as the preservation of the heritage of sailing ships around the world. Past and present U.S. warships and warship museums, as well as merchant and passenger vessel museums from other countries, participated in this weekend event. Radio operators at this event used multiple amateur radio frequencies to contact other ships, as well as other amateur radio operators around the world by voice, Morse code, and computer. The contacts that this club made included radio operators in Moscow, Northern Africa, Hawaii, New Zealand, and an operator flying above Arizona at 38,000 feet.

//
Amateur Radio 'Hams' Still Found Up and Down the Dial:

Posted: 04 Jun 2012 05:07 PM PDT
http://www.eham.net/articles/28425

There are more than 50 among us on the North Fork, though you might not know just by looking at them. vAmateur radio operators silently surround us, though they could be your only hope when other modes of communication fail. "Amateur radio operation is sort of a stealth hobby because it's sometimes seen as being geeky," said Jim Baker, W2NSF, the president of the Peconic Amateur Radio Club. W2NSF is Mr. Baker's call signal, the code he relays during transmissions to identify himself to other amateur radio operators, or "hams." "Amateur radio operators are also misunderstood because we're only 'amateur' because we don't get paid for what we do. It doesn't mean that we're not professional in the way we execute our jobs when we're given them."

910. [RAC-Bulletin] RAC Bulletin 2012-031E - Canada Day Contest

RAC Bulletin 2012-031E - Canada Day Contest
2012-06-04

A reminder to all Amateur Radio Operators that our Canada Day Contest is just over three weeks away. This is a great opportunity have a little fun on the airways and compete with others over a twenty four hour period. What better way to celebrate Canada's birthday!

Whether you choose to operate as an individual or as part of a group, get on the air and see how many Official RAC stations that you can rack up. Also, check with your Regional Director to ensure that all possible RAC call signs for your Section are on the air, giving folks the best possible opportunity to pick up the "bonus points".

RAC Canada Day Contest - 0000 - 2359 UTC - July 1, 2012

For all of this years rules and details, please visit theRAC website <http://www.rac.ca/en/rac/programmes/contests/files/2012%20RAC%20Canda%20Day%20Contest%20Rules%20-%20English%20and%20French.pdf>.

The very best of luck to everyone and have fun!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

June 9-10
```

- ARRL June VHF QSO Party
- SNS and NS Weekly Sprints--CW, Digital (Jun 8)
- WFF Green Days
- DRCG Long Distance Contest--Digital
- Australian Shires Contest
- Asia-Pacific Sprint--Phone
- Portugal Day
- GACW WWSA CW DX Contest
- REF DDFM Six Meter Contest

June 16-17

- Kid's Day--Phone
- NAQCC Monthly QRP Sprint--CW (Jun 13)
- CWops Monthly Mini-CWT Test (Jun 13)
- All-Asian DX Contest--CW
- SARL Youth Day Sprint--Phone
- Stew Perry Warmup Contest--CW
- QRP ARCI QRP Shootout
- West Virginia QSO Party
- Feld-Hell Field Day Sprint
- SMIRK QSO Party
- WAB 50 MHz Phone
- Run For the Bacon--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

ARRL VHF+ contests have new names beginning immediately! From ARRL Contest Branch Manager, Sean KX9X, "The June VHF QSO Party has a long history but we felt it was time the name of the event properly reflected what it was: a contest. We're still working out all the details in the Contest Branch and on the ARRL website to get everything properly converted, but you will soon see references to the January, June and September ARRL VHF Contests, not QSO Parties or Sweepstakes." (No change is required to submit a log since the Cabrillo-format CONTEST: name for these events does not refer to "QSO Party" or "Sweepstakes".)

The Packrats and the Northeast Weak Signal (NEWS) VHF clubs are sponsoring a VHF conference on October 12, 13 and 14, in Bensalem, PA. Early-bird rates are available and all details are online on the Packrats <http://www.packratvhf.com> website. Papers and presentations are requested on any and all topics related to VHF+ communication, theory, construction, operation, antennas, contesting, safety, modes, EME, digital techniques and more. Send your submission to Rick, K1DS <rick1ds@hotmail.com>.

At the Dayton Hamvention, WRTC2014 <http://wrtc2014.org> Chairman Doug Grant, K1DG <K1DG@WRTC2014.org> reported on the progress of one of WRTC2014's popular fund-raising opportunities - Tent Sponsorship in which a club donates a modest sum to help acquire all the necessary equipment to support a WRTC station. In return, the club logo is displayed on the tent and the club is acknowledged in the event's

promotional material. Several large clubs have already committed to sponsoring multiple tents: YCCC, NCCC, and PVRC are leading the way with three tents each. Non-club groups can also participate by sponsoring a tent in the memory of a contester whose key has gone silent. Tents are already being sponsored to honor fallen comrades W4AN, N6ZZ, K5KA, W4AI/ZD8J, W2PV, KC1F, W5ZL, KL7FH & KL7Y, and I2UIY.

The Daily DX <http://www.dailydx.com> reports that the 2013 Visalia International DX Convention <http://www.dxconvention.org/> will be changing venues from the Holiday Inn near Highway 99 to the larger Downtown Visalia Conference Center and adjacent Marriott Hotel. The dates remain the unchanged from those previously announced - April 19-21, 2013. The convention website still refers to the Holiday Inn as the venue but keep an eye on the site for updates. Hotel reservations should be available through the convention website beginning the week of June 18th.

Scott W3TX contributed the following information from PROMED <http://www.promedmail.org> regarding ticks and Lyme disease, the bane of Beverage walkers and antenna farm builders. "While ticks normally become active in spring, this year's [2012] mild winter has brought them out earlier than normal. Although the adults, which are actively feeding now, can transmit the disease, CDC reports that most humans are infected by immature ticks known as nymphs, which feed spring through summer. When it comes to preventing tick bites, there are several precautions a person can take. The best way to minimize the threat of Lyme disease is to keep contact with the bloodsuckers to a minimum. This can be done by avoiding places where they are most likely found, including wooded and bushy areas, or areas with high grass. If you do anticipate contact with one of these high risk areas, it's important to wear a hat, long sleeves and pants, and to use insect repellant containing 20 per cent or more DEET on the exposed skin," Dr Kara Mascitti said. "It's also important to do a thorough tick check when returning indoors to remove any ticks that might have gotten on you despite these measures. Showering immediately upon returning indoors can also wash away ticks that haven't yet attached to the skin. If you do find a tick on you, the best way to remove it is to grab it as close to the skin as possible and pull up with a steady, consistent motion. Afterward, wash your hands and the bite area thoroughly with rubbing alcohol or soap and water. As for clothing and gear that comes in contact with the body such as backpacks, it's a good idea to treat them with a permethrin-based product designed to kill and repel ticks. CDC also recommends putting clothes in the dryer for one hour on high heat to kill any ticks that may be on them." The full article is available online <http://www.lehighvalleylive.com/sports/index..ssf/2012/04/lyme_disease_is_on_the_rise_in.html>.

The PW7T team had a good time in the recent CQ WPX CW contest with a goal of avoiding band-change errors that cost them a place in the standings last year. How did they do? You can read all about it in

their writeup about the contest at the Forteleza DX Group's website <http://www.pw7t.net/2012/05/wpx-cw-pw7tpt7cb-m2-hp-3/>. (Thanks, Luc PY8AZT)

One-day "university" events are popping up all over as hams flock to opportunities to learn about technical and operating subjects. The best-known is Contest University but any hamfest or convention is liable to feature classes. For example, at the upcoming W9DXCC <http://www.w9dxcc.com> convention, they are sponsoring an all-day training event, "DX'ing from the Black Hole", held on the day before the main convention and aimed specifically at new and inexperienced DXers. This type of course adds real value to hamfests and flea markets, encouraging hams to spend a day learning something new and useful. Perhaps offering classes like this would enliven a hamfest near you?

Hi-Z Antennas <http://www.hizantennas.com/> has reached a licensing agreement to resume selling their receiving antenna arrays. The company had been entangled in a patent dispute, now apparently resolved.

Gene Zimmerman W3ZZ <http://www.arrl.org/news/former-the-world-above-50-mhz-conductor-gene-zimmerman-w3zz-sk> became a Silent Key on 3 June at the age of 71. Gene was a giant in the world of radiosport. Not only was he an excellent and knowledgeable operator, but worked tirelessly behind the scenes as a member of contest committees and advisory groups. QST readers probably know him best as the editor of "The World Above 50 MHz" column, with sharp analysis of propagation and events. His many friends will miss his legendary story-telling and the gleam in his eye as he skewered miscreants. Bob N6TV has published an album of W3ZZ photos <http://bit.ly/W3ZZphotos> for the enjoyment and remembrance of all. See the Results and Records section of this newsletter for news about two new awards created to honor Gene.

Web Site of the Week - If you would like to find out more about the stations you hear in contests, Pete N4ZR reports that his website "World HF Contest Station Database <http://www.conteststations.com>" is "back from the dead" and waiting for your station updates! My info was certainly out of date but is now current. (Thanks, Bob N6TV)

WORD TO THE WISE

Recent editions of the ARRL Handbook and ARRL Antenna Book include a CD-ROM with plenty of supplemental material and software. In particular, the Handbook's CD-ROM includes three complete chapters on operating: Space, Digital, and Image. You'll find a Smith Chart tutorial on the Antenna Book's CD along with handy software like HFTA and TLW, too. Check 'em out!

==> SIGHTS AND SOUNDS

For those who missed the Dayton Top Band Dinner, Frank W3LPL's presentation "1921 Transatlantic Tests, Progenitors to Modern Top Band

Contests and DXing <http://topbanddinner.com/page_presentations.html>"
is available on-line.

What happens after a 2000-foot tower falls? (Yes, it made a
sound...) As Bob N6TV found, "This 27-minute video
<http://www.weau.com/video/?autoStart=true&topVideoCatNo=default&clipId=6995960>
takes you through every step, from the original construction, to the
failure (due to ice), to the construction and installation of its
replacement less than a year later. It's pretty cool to see every step
of the big tower construction, from steel fabrication, to galvanizing,
to cable manufacture, and then to the final installation and power-up
of the transmitters."

==> RESULTS AND RECORDS

Results for the record-breaking 2011 ARRL 10 Meter Contest are now live
on the ARRL Contest Branch results website
<http://www.arrl.org/contest-results-articles>. Record scores
<http://www.arrl.org/contest-records> through 2011 are also posted. The
2012 RTTY Roundup and January VHF Sweepstakes extended results are also
online. Thanks to our new writeup authors Scott K7ZO (10 Meter) and
Kevin W9GKA (Jan VHF) for great writeups along with old pro, Jay WS7I
(RTTY Roundup). (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Speaking of VHF+ contests, certificates for the 2011 ARRL June VHF
Contest are arriving in mailboxes across the land. There was a bit of a
surprise for the winners this year - completely redesigned certificates
with cool graphics and a new layout - each contest will have its own
four-color certificate! (Thanks, Sean KX9X)

Two new VHF contest operating awards honoring Gene W3ZZ have been
created just in time for his favorite VHF+ operating event, the ARRL
June VHF Contest. Tim K3LR and Dave W9ZRX are sponsoring the brand-new
W3ZZ Rookie Award for the top Single-Op, Low Power score made on a
minimum of two bands by a "rookie" submitting a log in the contest for
the first time (no limit on how long the operator has been licensed).
In addition, as Gene was a long-time member of the K8GP Grid Pirates
who frequently operated in the Limited Multioperator category, the ARRL
Contest Branch has renamed the Overall Limited Multioperator plaque the
Gene Zimmerman, W3ZZ Memorial Plaque and thanks Jeff K1TEO, who
graciously gave up his sponsorship of the plaque to allow this to
happen. As these awards have just been announced, watch the ARRL
Contest Branch <http://www.arrl.org/contests> website for any further
information or answers to questions.

The January 2012 NAQP CW preliminary results
<http://www.ncjweb.com/naqpcwprelim.php> are now available on the NCJ
website. Congratulations to N9RV for his first place single-op finish
and new all-time record (breaking his own record). The top five scores
broke the existing record. Many other state records were also set. SSB
results should be available shortly. (Thanks, Bruce WA7BNM)

2011 California QSO Party results <http://www.cqp.org/Results.html> have also made their online debut along with updated records <http://www.cqp.org/Records.html>. The data, charts, and reports were prepared by K6TD, AD6E, and K6MM. (Thanks, Al AD6E)

The final results for the 2011 New York QSO Party <http://www.nyqp.org> have been posted at. In addition, there is a full listing of 2011 plaque winners. Participation in 2011 was great and all are looking forward to the 2012 NYQP on October 20. (Thanks, Dean NW2K)

Following the announcement that 2012 Dayton Hamvention attendance was 24,483 and based on extensive research and modeling, Doug K1DG has determined "17000 hams will show up if there are no sunspots. For every uptick of 1 in the total SSN for the year, 800 more will attend." So get out those Cycle 24 predictions and start your hotel reservation planning!

OPERATING TIP

During WPX CW we heard many examples of why using "cut numbers <http://www.qsl.net/zs1an/contesting_faq.html>" is not such a good idea. Cut numbers increase the chances of copying errors. They really don't save much time and what's saved is often lost again due to repeats and fills. Nevertheless, here are some of Jim K8MR's guidelines for using them...if you must:
1. Avoid using them except for numbers that are already known (such as a CQ zone) or sent repeatedly (such as RST or when sending power in the ARRL DX contests).
2. Leading T's (zeros) in serial numbers are OK but not for more than three total digits.
3. Don't ever mix cut numbers and letters: For example, ENNA for the grid square EN91 is very bad form.

==> TECHNICAL TOPICS AND INFORMATION

Don WD8DSB recently built two W7IUV <http://www.w7iuv.com/> preamps and has documented <http://sites.google.com/site/rxpreamps/> the project online which might be useful for others considering building the preamp. He used the W7IUV double-sided circuit board method and has artwork for the board at a 1:1 scale along with a parts placement guide that can be downloaded in PDF document format.

Stew K3ND reports very good results <http://k7vc.com/402cd.html> from reinforcing a CushCraft 40-2CD according to the W6NL modifications. This antenna has survived ice, heavy wet snow, and high winds. The newer model CC XM-240 can be strengthened in the same way.

Amphenol UHF connectors are often recommended as "best practice" for coaxial cables at HF (although there are some good versions available from other vendors). There are quite a few variations, though - to be sure you know which one to get, go to the Amphenol website <http://www.amphenolrf.com/> where you can view the complete line, including installation instructions (good for just about all UHF connectors), drawings, detail specifications, and even check

distributor stock and inventory. Frank W3LPL notes that the base part number for a PL-259 from Amphenol is 83-1SP and anything after the "P" indicates a variation from the standard connector. (Thanks, Gary K9GS)

The bidirectional Beverage antenna
<http://www.google.com/patents?id=oN5iAAAAEBAJ&printsec=abstract&zoom=4&dq=1434984#v=onepage&q=1434984&f=false>
was patented by Harold Beverage in 1922. When he built the huge RCA receiver site at Riverhead, Long Island, the Beverages were built as bidirectional using a passive combiner with variable amplitude and phase to provide steerable deep nulls off the rear of the array. The antenna is described in this seminal article "The Wave Antenna <http://www.nrcdxas.org/articles/WaveAntenna.pdf>" published in 1923. Perhaps the largest steerable phased Beverage array ever built was the four-Beverage array
<http://www.smecc.org/general_electric_computers/HoultonTelephone2.jpg>
at AT&T's transatlantic radiotelephone site in Houlton, Maine, straddling present day I-95 a few miles west of the Canadian border. (Thanks, Frank W3LPL)

Just in time for the summer's sporadic E season comes a timely item by Bruce K0YW in ARRL Propagation Bulletin <http://arrl.org/w1aw-bulletins-archive-propagation> ARLP018 about noise figure and preamps on 6 meters. "At 6 Meters and below the employment of a preamp ahead of most modern transceivers is not likely to result in any noticeable improvement as the ambient thermal noise from the earth and sky background is high enough to readily overcome the sensitivity threshold of the existing receiver's RF stage/s, especially if the myriads of local man-made noise sources are added in. It is this combination of factors that will establish the 'Noise Floor' that the radio sees." Bruce goes on to explain why preamps are rarely useful at HF and on 6 meters - the original bulletin has more information.

Technical Web Site of the Week - From the ARRL Propagation Bulletin <http://arrl.org/w1aw-bulletins-archive-propagation> ARLP021, Don NJ2E alerted us to the National Air and Space Lecture Series including one titled "The Solar Dynamics Observatory: The Sun Up Close and Personal <http://airandspace.si.edu/events/eventDetail.cfm?eventID=2768>". Click on the View Archived Recording link to watch the 71-minute video.

==> CONVERSATION

Thailand - Coming Alive on HF At Last

Following 2011's devastating flooding in Thailand, Thai hams displayed tremendous ham spirit and skill in assisting with disaster relief. Even limited to VHF, their skills were obvious to the authorities who had long resisted opening the HF airwaves except to a select few clubs and individuals. Long-time Thai licensee, Fred K3ZO (also known as HS0ZAR) has been following developments closely and has some good news to share with readers of the Contest Update. It may not be very long before we

hear more and more new Thai call signs on the HF bands!

73, Ward N0AX

The long-awaited Thailand Amateur Radio Intermediate Class license exam -- the gateway to HF privileges for Thai licensees -- was held on May 19. This is the first time the examination has been given since November 27, 2004. So for over seven years Thailand's roughly 150,000 - 175,000 Novice licensees had been limited to Novice Class privileges, which amount to 10 watts on 2 meter channelized FM.

Unlike most countries in the world, Thailand has not abolished the Morse exam and in fact the first part of the exam to be given was the 8 wpm Morse receiving test, which only 43 out of 151 examinees (including 3 YLs) passed. Those 43 were allowed to take the written exam which will be graded by Thailand's NBTC, that country's equivalent of the FCC. The results will be known in about a month and apparently a public ceremony will be held to acknowledge the accomplishment of these folks.

>From my vantage point as a close observer and sometime participant in Thailand's ham radio affairs for the past 44 years, I feel strongly that this event is a real milestone in Thailand's ham radio progress, for the following reasons:

1) For a national radio society, RAST (Radio Amateur Society of Thailand) has long been top-heavy with foreign-born member participation. While Thai hams were required by Thai regulations to join RAST in order to receive their Intermediate Class licenses, few showed up at meetings to participate actively in club affairs. Under the new and dynamic leadership of RAST's current president, Prof. Pornchai ("Joe") Semjang HS2JFW, this is changing. The preparations and arrangements for this examination session were all done by Thai hams, including the setting up of the venue, coordination with the NBTC and drawing up of the question pool. This is not to minimize in any way the importance of the roles of Joe's two immediate predecessors Mayuree Chotikul HS1YL, who skilfully navigated the Society through troubled waters in very difficult political times, and Chaiyong Wongwuticomjon HS1QVD, who carefully prepared RAST for the newly enlarged role it has assumed in the modern era and whose great vision brokered the ascension of Joe to the presidency.

2) It was a tremendous accomplishment for the organizers of this examination to bring together virtually the entire corps of experienced Thai-national CW HF DXers to handle the Morse part of the examination. These are precisely the folks that RAST needs to have managing its affairs because of their close understanding of HF operations and international regulations and customs. Few of them had been active participants in RAST affairs before this. Hopefully this will encourage them to continue their participation.

3) The close cooperation between the NBTC and RAST in this event augurs well for the future. To a certain extent such cooperation in the recent

past was made difficult by the very slow evolution that Thailand's regulatory body had to undergo. All along it was hampered by political uncertainty and so organizational inertia was often a logical response to such dilemmas. Now that the NBTC has finally been fully and legally constituted, impediments to future such cooperation will hopefully be minimized.

4) I would be remiss if I were not to mention the behind-the-scenes work in support of RAST's efforts over many years by the Thai Army's Maj. Narissara Shaowanasai HS1CHB. His uncanny knack for recognizing the leadership qualities of people like Joe and Champ E21EIC and picking them out of the crowd to propel them into becoming active and effective RAST officers cannot be overemphasized.

Does the fact that the Morse exam eliminated so many candidates right off the bat mean that Thailand will move to follow other countries and eliminate Morse as an examination requirement? Not necessarily. Please read the article on the RAST website <http://www.qsl.net/rast/> about the examination written by Champ E21EIC. You can detect a certain pride that Thailand is one of the few countries in the world still having a Morse exam requirement and a feeling on his part that many more candidates came close to passing the Morse exam and will be motivated to work on their CW.

A brief video montage about the session is on YouTube <http://www.youtube.com/watch?v=iasjR91Kv10&feature=player_embedded>. Now that RAST has demonstrated the fact that it can assemble a pool of talented Morse operators to give that part of the exam, I predict that exams will get back to being held on a regular basis again.

73, Fred, K3ZO

==> CONTESTS

6 June through 19 June 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

SNS and NS Weekly Sprints--CW,Digital, from Jun 8, 0200Z to Jun 8, 0300Z. Bands (MHz): 1.8-14. Exchange: Serial number, name, S/P/C. Logs due: none. Rules <http://www.ncccsprint.com>

WFF Green Days--Phone,CW,Digital, from Jun 9, 0000Z to Jun 10, 2359Z. Bands (MHz): 1.8-28. Exchange: RS(T) and WFF number if available. Logs due: 30 days. Rules <http://www.wff44.org>

DRCG Long Distance Contest--Digital, from Jun 9, 0000. Multiple operating periods. Bands (MHz): 3.5-28. Exchange: RST, CQ Zone, and UTC time. Logs due: Aug 1. Rules <http://www.drcg.de>

Australian Shires Contest--Phone,CW, from Jun 9, 0600Z to Jun 10, 0600Z. Bands (MHz): 3.5-28. Exchange: RS(T) and VK Shire or CQ Zone. Logs due: Sep 1. Rules <http://groups.yahoo.com/group/vkshires>

Asia-Pacific Sprint--Phone, from Jun 9, 1100Z to Jun 9, 1300Z. Bands (MHz): 14-21. Exchange: RST, serial. Logs due: 7 days. Rules <http://jsfc.org/apsprint/aprule.txt>

Portugal Day--Phone,CW, from Jun 9, 1200Z to Jun 10, 1200Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial or district code. Logs due: Sep 1. Rules <http://portugaldaycontest.rep.pt>

GACW WWSA CW DX Contest--CW, from Jun 9, 1500Z to Jun 10, 1500Z. Bands (MHz): 3.5-28. Exchange: RST, CQ zone. Logs due: Jul 30. Rules http://www.wwsatest.org

NAQCC Monthly QRP Sprint--CW, from Jun 13, 0030Z to Jun 13, 0230Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info>

CWops Monthly Mini-CWT Test--CW, from Jun 13, 1300Z. Multiple operating periods, twice monthly on 2nd and 4th Wed, 18 to 28 kHz above band edge. Bands (MHz): 1.8-28. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

All-Asian DX Contest--CW, from Jun 16, 0000Z to Jun 17, 2400Z. Bands (MHz): 1.8-28. Exchange: RST, operator age (YL may send 00). Logs due: Jul 31. Rules <http://www.jarl.or.jp/English>

SARL Youth Day Sprint--Phone, from Jun 16, 0800Z to Jun 16, 1000Z. Bands (MHz): 7. Exchange: RS and age. Logs due: 7 days. Rules <http://www.sarl.org.za>

Stew Perry Warmup Contest--CW, from Jun 16, 1500Z to Jun 17, 1500Z. Bands (MHz): 1.8. Exchange: 4-char grid square. Logs due: 30 days. Rules <http://web.jzap.com/k7rat/stew.rules.txt>

QRP ARCI QRP Shootout--Phone,CW, from Jun 16, 1500Z. See website. Bands (MHz): 1.8-28. CW on Saturday, SSB on Sunday. Exchange: Category, ARRL/RAC section or DX. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

West Virginia QSO Party--Phone,CW,Digital, from Jun 16, 1600Z to Jun 17, 0200Z. Bands (MHz): 3.5-28. Frequencies: CW--35 kHz from band edge, Phone--35 kHz from General/Nov/Tech segments. Exchange: RS(T), WV county or S/P/C. Logs due: Jul 20. Rules <http://www.qsl.net/wvsarc>

Kid's Day--Phone, from Jun 16, 1800Z to Jun 16, 2400Z. Bands (MHz): 3.5-28. Exchange: Name, age, location, favorite color. Rules <http://www.arrl.org/kids-day>

Feld-Hell Field Day Sprint--Digital, from Jun 16, 2000Z to Jun 16, 2200Z. Bands (MHz): 28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules

<http://www.feldhellclub.org>

Run For the Bacon--CW, from Jun 18, 0200Z to Jun 18, 0400Z. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org>

VHF+ CONTESTS

ARRL June VHF QSO Party--Phone,CW,Digital, from Jun 9, 1800Z to Jun 11, 0300Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Jul 11. Rules <http://www.arrl.org/contests>

REF DDFM Six Meter Contest--Phone,CW, from Jun 9, 1600Z to Jun 10, 1600Z. Bands (MHz): 50. Exchange: RST, serial number, grid square. Logs due: 15 days. Rules <http://concours.ref-union.org>

SMIRK QSO Party--Phone,CW, from Jun 16, 0000Z to Jun 17, 2359Z. Bands (MHz): 50. Exchange: Grid square and member number. Logs due: Aug 1. Rules <http://www.smirk.org>

WAB 50 MHz Phone--Phone, from Jun 17, 0900Z to Jun 17, 1500Z. Bands (MHz): 50. Exchange: RS, serial, WAB square or DXCC entity. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk>

Skyline Amateur Radio Club Summer Hamfest Saturday June 9

The Cortland Hamfest will be held on Saturday June 9 2012 from 7AM to 1PM
at the Cortland County Fairgrounds.

Admission: $5.00 each

Outdoor Flea Market: Free with admission

Indoor Flea Market: $5.00 per 10' space plus admission - contact Andy
Slaugh for reservations by clicking on his name.

Dealers: $10.00 per 8' space

VE Testing for all levels

Walk-ins welcome, registrations appreciated.

Tests begin at 9AM sharp with no late entry allowed.

Travel Directions:

I-81 to exit 12, follow sign to Ithaca and Route 281

Turn left on to Route 281 South

Travel 8/10m mile; turn left on to Fisher Ave.

Turn right again on to Fairgrounds Dr.

From Ithaca:

Route 13 North to Route 281 North

Follow Route 281 through the city of Cortland

Turn right on to Fisher Ave

Turn right again on to Fairgrounds Dr.

Re the barefootnet,0n 40 meters.

Posted: 04 Jun 2012 05:03 PM PDT
http://forums.qrz.com/showthread.php?348945-Re-the-barefootnet-0n-40-meters&goto=newpost

Hello all and thanks for your participation on the barefoot net.we have had
some bad noise come up on 7.142.00 so we have decided to go to 7.170.00 and
make the net a bit later at 11.30z.thanks to all for being patient,but as
you know setting up a net takes a bit of work.the net will work 7 days a
week and we encourage all standard power users to join in as well as the
people who run big power.everyone is welcome on this net.vk3vin ian
westerland will be net control,and myself vk3hjd will be there to assist.we
also encourage all whitestick operators around vk and the world to join
in.thanks for your cooperation and look forward to hearing you all,best
73's vk3hjd john and vk3vin ian.

AMSAT NEWS SERVICE

ANS-155

ANS is a free, weekly, news and information service of AMSAT North America,
The Radio Amateur Satellite Corporation. ANS reports on the activities of a
worldwide group of Amateur Radio operators who share an active interest in
designing, building, launching and communicating through analog and digital
Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor at amsat.org

In this edition:

* STEM Education Identified as Critical for Continued Rides to Space

* AMSAT-NA Board of Directors Nominations

* AMSAT-UK Colloquium 2012 Second Call for Speakers

* Successful ARISS Contact as Northland Preparatory Academy Calls ISS

* Multiple CubeSats Autonomously Docking May Build Large Satellites

* LVB Tracker Boxes in Stock at the AMSAT Office

* 13cm Band Rules Expanded to Allow MedRadio Adjacent to Satellites

* Funding Availability Key to Final Acceptance in QB50 Project

* AMSAT at Ham-Com, 8-9 June, Plano, TX, Special Event K5P

* Satellite Shorts From All Over

STEM Education Identified as Critical for Continued Rides to Space

The AMSAT Forum at the 2012 Dayton Hamvention featured news of the educational opportunities for AMSAT to contribute to the innovation in attracting and retaining students in science, technology, engineering and mathematics, or STEM, disciplines. Educators have identified STEM programs as a priority in strengthening the Nation's future workforce.

"Education is important to us", said AMSAT Vice-President Educational Relations Mark Hammond N8MH, "It's a part of our mission and vision." Mark noted several key points of AMSAT's support for STEM education:

AMSAT is a non-profit volunteer organization which designs, builds and operates experimental satellites and promotes space education.AMSAT works in partnership with government, industry, educational institutions and fellow amateur radio societies.AMSAT encourages technical and scientific innovation, and promotes the training and development of skilled satellite and ground system designers and operators.

As evidenced by this year's acceptance of AMSAT's Project Fox cubesat in the NASA "Educational Launch of NanoSat", the ELaNa program, we were selected on our merit in support of NASA strategic and educational goals. Education is quickly becoming critical for our ride to space.

The recently formed Educational Partnership between AMSAT and ARRL, including NASA is looking for help. We need to develop an education program on the ground starting now. We have resources already available for STEM education in both the K-12 classroom and at the University level while our satellite builders work on the next flight.

For example, the huge collection of telemetry data collected during the recent ARISSat-1 flight is available on our FTP server. This data presents an opportunity for the utilization of satellite data in the classroom (through plotting, graphing, analyzing).

An immediate need is for volunteers to collect and organize existing STEM related lesson plans and ideas from the web, useful to K-12 educators and relevant to amateur radio and satellite. Critical steps such as this will allow ARISSat-1 telemetry data to be used in the classroom. Similar lesson plans and ideas can be used for educational

purposes in future satellite missions, such as Fox-1 and Fox-2.

To support this effort specific tasks have been identified and now volunteers are needed to support:

+ Educators: We need lesson plans/ideas related to satellites and amateur radio. ARISSat-1 telemetry data needs to be used in the

classroom!Educators: sign up for ARRL Teacher's Institute program!Web content person for AMSAT's education web pages.Also to maintain a calendar of amateur radio youth events.Archivist/publicist of satellite educational activities (photos, stories for AMSAT Journal, press, videos).Mentors and ground station operators (with equipment!) for ARISS contacts.Look for opportunities to engage youth, and document it (photos, articles, AMSAT Journal, press).

To volunteer contact Mark directly at n8mh at amsat.org. The AMSAT-EDU mailing list is the place to exchange education project ideas and to learn how to help with our educational outreach. Information on how to join the AMSAT-EDU list can be found on the AMSAT web.

AMSAT's vision is to deploy satellite systems with the goal of providing wide area and continuous coverage. AMSAT will continue active participation in human space missions and support a stream of LEO satellites developed in cooperation with the educational community and other amateur satellite groups. This is a path to getting Fox-1 in orbit, and our future Fox-2, ARISSat-2, -3, -?

Again, the key contact is AMSAT Vice-President Educational Relations Mark Hammond N8MH - n8mh at amsat.org.

[ANS thanks Mark Hammond, N8MH for the above information]

AMSAT-NA Board of Directors Nominations

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. A valid nomination requires either one current Member Society, or five current individual members in good standing, to nominate an AMSAT-NA member for the position.

Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK.

The three nominees receiving the highest number of votes will be seated as regular board members with two year terms. The two nominees receiving the next highest number of votes will be seated as alternate directors for one year.

Written nominations, consisting of names, calls and individual signatures, should be mailed to: AMSAT-NA, 850 Sligo Ave #600, Silver Spring, MD, 20910. They must be received no later than June 15th. No other action is required.

Nominations may also be made by electronic means including e-mail, FAX, or electronic image of a petition. Electronic petitions should be sent to MARTHA@AMSAT.ORG or faxed to 301-608-3410, and also must be received by June 15th. If using any electronic submission, there is a second, verifying step:

ELECTRONIC SUBMISSIONS WITHOUT THIS SECOND, WRITTEN VERIFICATION ARE NOT VALID UNDER THE EXISTING AMSAT-NA BYLAWS. A verifying traditional written petition MUST be received at the AMSAT-NA office at the above address within 7 days following the close of nominations.

[ANS Thanks AMSAT Secretary Alan Biddle, WA4SCA for the above information]

AMSAT-UK Colloquium 2012 Second Call for Speakers

This is the second call for speakers for the AMSAT-UK International Space Colloquium 2012 which, due to the Olympic & Paralympic Games, will be held the weekend of September 15-16, 2012 at the Holiday Inn, Guildford, GU2 7XZ, United Kingdom.

AMSAT-UK has posted details of the 2012 Colloquium on-line.

AMSAT-UK invites speakers, to cover topics about micro-satellites, CubeSats, nano-sats, space and associated activities, for this event.

They are also invited to submit papers for subsequent publishing on the AMSAT-UK web site. We normally prefer authors to present talks themselves rather than having someone else give them in the authors' absence. We also welcome "unpresented" papers for the web site.

We appreciate that it is not always possible to give a firm indication of attendance at this stage but expressions of interest would be appreciated.

Submissions should be sent *ONLY* to G4DPZ, via the following routes:

e-mail: david dot johnson at blackpepper dot co dot ukPostal address at http://www.qrz.com/db/G4DPZ

AMSAT-UK also invite anyone with requests for Program Topics to submit them as soon as possible to G4DPZ. Invitations for any papers on specific subjects will be included in the future call. Likewise if anyone knows of a good speaker, please send contact and other information to G4DPZ.

AMSAT-UK http://www.uk.amsat.org/

[ANS thanks Dave Johnson, G4DPZ and AMSAT-UK for the above information]

Successful ARISS Contact as Northland Preparatory Academy Calls ISS

On Thursday, May 24, students from Northland Preparatory Academy in Flagstaff, Arizona participated in an Amateur Radio on the International Space Station (ARISS) contact with Joe Acaba, KE5DAR on the ISS.

Approximately 550 students, staff and administrators, as well as Dr. Jeffrey Hall, director of the Lowell Observatory, and the mayor were in attendance. The contact complemented a Science, Technology, Engineering and Math (STEM) curriculum. Video of the event, including Dr. Hall's presentation, has been posted on-line.

The Arizona Daily Sun ran an article on the event.

[ANS thanks Carol, KB3LKI, and the ARISS Status Report for the Week of May 29, 2012 for the above information]

Multiple CubeSats Autonomously Docking May Build Large Satellites

This week AMSAT-UK, SpaceRef.com, and SSTL have announced plans to develop the 'STRaND-2' mission at the University of Surrey and Surey Satellite Technology Limited (SSTL). This mission will test a novel in-orbit docking system based upon XBOX Kinect technology that could change the way space assets are built, maintained and decommissioned.

STRaND-2 (Surrey Training, Research and Nanosatellite Demonstrator) programme, following on from the smartphone-powered STRaND-1 satellite that is near completion. Similar in design to STRaND-1, the identical twin STRaND-2 satellites will each be a 3 unit Cubesat. Components from the XBOX Kinect games controller to scan the local area and provide the satellites with spatial awareness on all three axes.

SSTL says on their web site, "The STRaND-2 twins will be separated after launch. After the initial phase of system checks, the two satellites will be commanded to perform the docking procedure and, when in close proximity, the Kinect-based docking system will provide the satellites with 3D spatial awareness to align and dock. Other applications for STRaND-2 include the safe removal of space debris and spacecraft maintenance, with a low cost "snap-on" nanosatellite providing backup power, propulsion or additional on-board computing capability."

SSTL Project Lead Shaun Kenyon says, "We were really impressed by what MIT had done flying an autonomous model helicopter that used Kinect and asked ourselves: Why has no-one used this in space? Once you can launch low cost nanosatellites that dock together, the possibilities are endless, like space building blocks."

Dr. Chris Bridges, Surrey Space Centre Project Lead says, "It may seem far-fetched, but our low cost nanosatellites could dock to build large and sophisticated modular structures such as space telescopes. Unlike today's big space missions, these could be reconfigured as mission objectives change, and upgraded in-orbit with the latest available technologies."

LVB Tracker Boxes in Stock at the AMSAT Office

Martha says she now has LVB Tracker boxes in stock at the AMSAT Office. The cost is $200 plus $20 shipping.

The AMSAT Store Website is currently down due to technical issues so you can place your order via these routes:

Call Martha at the AMSAT Office (301-589-6062) 10:00 AM-6:00 PM EDTFax - 301-608-3410Mail - AMSAT, 850 Sligo Ave #600, Silver Spring MD 20910

The LVB Tracker is a rotator interface designed to to be used as an interface between tracking software and the Yaesu 4500/5500 series of Az/El rotators.

Here's why you want one:

Several physical interface options including RS-232, USB and TCP/IP over 10/100 Ethernet (tested but not implemented)Uses standard EasyComm and Yaesu GS-232 protocolsCross-platform compatibility - Windows, Linux, BSD, MacCompatible with existing real-time prediction programs such as SatPC32 and NovaOpen sourceIntegrated firmware programmer for easy installation and upgrade

Watch a demo of the LVB Track Interface with Yaesu G-5500 rotator on-line. (does not use the AMSAT enclosure)

[ANS thanks Martha at the AMSAT Ofice for the above information]

13cm Band Rules Expanded to Allow MedRadio Adjacent to Satellites

The ARRL is reporting in a First Report and Order and a Further Notice of Proposed Rulemaking (ET 08-59) released on May 24, the FCC decided to expand the Part 95 Personal Radio Service rules to allow medical devices to operate on a secondary basis in the 2360-2400 MHz band. International amateur satellite operations are allocated between 2400-2450 MHz, adjacent to the new devices.

The new allocation is Medical Body Area Networks (MBAN) which provide a way for health care facilities to monitor their patients via wireless networks. Because use of these frequencies will be on a secondary basis, MBAN stations will not be allowed to cause interference to, and must accept interference from, primary services, including radio amateurs who operate on a terrestrial primary basis in the 2390-2395 MHz and 2395-2400 MHz bands.

[ANS thanks the ARRL for the above information]

Funding Availability Key to Final Acceptance in QB50 Project

The QB50 Project, funded by the European Commission, plans to orbit 50 CubeSats separated by a few hundred kilometers and carrying identical sensors to study Earth's lower layers of the thermosphere/ionosphere and study effects of satellite re-entry. All 50 CubeSats will be launched out of Murmansk, Russia, into a circular orbit with 79 degree inclination at 320 km altitude in the first half of 2015.

The project is run by an international consortium under the leadership of the von Karman Institute (VKI) near Brussels. The Call for Proposals for CubeSats carrying the standard sensor package which may also include additional experiments closed on April 30, 2012. VKI reports the response to this Call resulted in proposals for 70 CubeSats from 38 countries in the following categories:

53 standard 2U CubeSats for atmospheric science.7 proposals for In-Orbit-Demonstration (IOD) 3U CubeSats for testing new technologies or minitaurised science sensors which also include the standard science

sensors.5 proposals for IOD 3U CubeSats which do not include the standard science sensors.1 proposal for IOD 2U CubeSats which also include the standard science sensors.4 proposals for IOD 2U CubeSats which do not include the standard science sensors.2 proposals for interdisciplinary science.

VKI, with the help of external reviewers, is now in the process of evaluating the 70 proposals, aimed towards a selection of 50 CubeSats to be flown on QB50.

VKI wrote in the 31 May 2012 issue of the QB50 Newsletter, "The availability of funding for developing a CubeSat will be a critical issue in the selection process. At this stage, it is not known which proposals will actually be able to obtain the required funding. The final selection of 50 CubeSats can only be made once the availability of funding is established. CubeSat teams who submitted a proposal should now contact their national funding agencies and/or industrial sponsors to obtain the funding. The process of securing this funding should be completed by 1 October 2012 with the signing of a ☐Contractual Agreement☐ between the university and VKI."

In the coming months, VKI will support the CubeSat teams in their efforts to obtain the funding, e.g. by sending a ☐Letter of Support☐. It is not expected that all 70 CubeSat teams will be able to sign the Contractual Agreement by 1 October, therefore, the de facto down-selection from 70 to 50 CubeSats will be made based on securing the funding by each team.

In some cases, funding agencies will only be able to provide a part of the funding. Teams who only received approval for part of the funding should consider the possibility of collaboration with another team that also received only a part of the requested funding.

[ANS thanks The QB50 Project and von Karman Institute for the above information]

AMSAT at Ham-Com, 8-9 June, Plano, TX, Special Event K5P

AMSAT will have an AMSAT Booth, Satellite Demonstrations, and two Satellite Talks at Ham-Com in Plano, TX, on 8-9 June 2012. The talks will be given by Douglas Quagliana, KA2UPW/5, and Keith Pugh, W5IU.

This year there will be a Special Event activity (sponsored by the Plano Amateur Radio Klub) associated with Ham-Com and the call sign will be K5P. AMSAT's Satellite Demonstrations will be conducted using K5P as part of the Special Event. Additional details about Ham-Com are available at: http://www.hamcom.org/

If you attend Ham-Com, drop by and see us. In addition, if you can spare an hour or two, we could use the help in the AMSAT Booth and doing the Demos.

We plan to work as many of the following Satellite Passes as possible:

Ham-Com 2012 Demos

Satellite Shorts From All Over

Venus will pass in front of the sun on 6 June 2012. Bob Bruninga, WB4APR will be in Japan to observe the event. He has created a web page, "The 2012 Transit of Venus using HAM Radio" including a list of selected calling frequencies, see: http://aprs.org/VenusTransit2012.htmlThe 2012 AMSAT Annual Meeting and Symposium will be held at the Holiday Inn, Orlando (Florida) Airport on October 26-28, 2012. The First Call for Papers has been issued. The Symposium Team requests a tentative title of your presentation as soon as possible, with final copy to be submitted by October 1 for inclusion in the printed proceedings. Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv@amsat.org. Watch for the latest 2012 Symposium information to be posted on the AMSAT web.The UK Space Agency has released a YouTube video celebrating the UK's 50 years in space: http://tinyurl.com/UK-50-In-Space (Southgate)Eric Knaps, ON4HF built an arrow antenna for working the FM satellites. Photos are posted on-line.ESA astronaut Andre Kuipers published a photo gallery during the arrival and docking at the ISS of the SpaceX Dragon resupply ship.A 50 minute interview with Neil Armstrong made this year is now available. The video is split into 4 parts which can be seen on-line. (Trevor, M5AKA)The May 20 annular eclipse was photographed by NASA□s Lunar Reconnaissance Orbiter as it turned its camera to look back home. Images of the Earth with the Moon□s fuzzy shadow are posted on-line. For eclipse photos from Earth's point of view are posted here.There are two new Hamvention 2012 music videos on YouTube produced by Joe Eisenberg, K0NEB. One is called Hamvention 2012 "Band On The Run" and the other is titled Hamvention 2012 "Gimme Dat Ding." To find them just put the word joehusker into the search YouTube search line.

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that please keep in mind the tidal forces of the Moon (and the Sun) don't only act on the oceans, they act on the land as well. If you stand on the equator, the land beneath you will go up and down by as much as 21 inches (55 centimeters) over the course of a day.

73,

This week's ANS Editor,

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5H, TANZANIA
Chas,NK8O/VE3ISD, is visiting to Mwanza on Lake Victoria for several years now but this time he plans his first amateur radio operation in CW signing 5H9CP with a KX3 (QRP) from Jun 11-22. The antenna design will depend on the local trees. Scheduled times and frequencies will be released on QRZ.com. The hobby comes only after his obligations at the "Nyakato Health Center", of course. QSL via NK8O.

A5, BHUTAN
JA1JQY (A52JY), JK1EBA (A52BA), JA3MCA (A52MA), JA1KJW (A52KJ), and JA8VE (A52VE) will be QRV in SSB/CW/RTTY on 160m-6m from a hotel at 3000m altitude in the capital Thimpu from Jun 6-14. A beacon will be set up to run continuously on 50.125 MHz. QSLs via homecalls.

A6, UNITED ARAB EMIRATES
Here is a small contribution from Ulli,DL9WVM, for the DXNL:
I am going to visit my children again and will stay in Dubai from Jun 10-30. So far I have made nearly 25.000 QSOs from this location and will try to be QRV again on 80-10m as much as possible. Inquiries about 6m are useless since operating on 6m is not allowed in the UAE. I also try to activate WFF A6FF-004 (Mushrif National Park [and buffer zone]) once which is virtually "across the road" in Mirdif. The are is comple-tely fenced and used for a recreation and amusement park. There is plenty space for parking and I will try to become QRV as A6/DL9WVM/m from there. However, this depends on whether I can find a hidden spot of shade (do not attract too much attention!). Despite air conditioning it is impossible to endure an hour in the car, at temperatures between 40 and 50 degrees Celsius in the shade :-)
If Abdullah,A61Q, is available (and willing), then we would investigate whether it is possible to activate Dibbah rock in the Gulf of Oman in some way. Based on his first recordings this 'island' seems to be difficult to access and would then be the only remaining place that

counts for AS-124. After the construction of the new breakwater in the harbor lying opposite to it, the distance to Shark Island is less than 300m. If we can not report positive results concerning Dibbah rock to Roger Ballister there is a risk that AS-124 could be removed from the IOTA list.
If you like to arrange a sked with me please contact me on Skype. I am available in Dubai both via VoIP and chatting. Simply send a contact request which I can answer. If anyone plans to obtain a license for the United Arab Emirates you can contact me as well and I will be happy to support the person. Licenses are NOT a problem to obtain in principle. The Emirates Amateur Radio Society (EARS) was put in charge by the TRA (the local licensing authority) to issue the licenses, which in general is no problem.

CO, CUBA, NA-015
The "Radio Club Las Tunas" wil join the ARRL June VHF QSO Party in the "limited multi operator" class signing T48K (Loc FL10mw) on Jun 9-11. On 6m they will use a 5-ele-antenna by Tonna with 100 watts and on 2m they will run 50 watts into a homebrew 9-ele-quad. They hope for a first contact between Las Tunas and USA. QSL via DK1WI.
See also: http://www.arrl.org/june-vhf-qso-party

CT, PORTUGAL
Members of the "Amateur Radio Association of the District of Leiria" (ARAL) plan to hit the airwaves as CS5FAT on all bands from the Cova da Iria at the shrine of Fatima from Jun 10-13. Until October all amateurs are invited to become active from the shrine of Fatima each month from the 10th to 13th or by special appointment. QSL via CT6ARL.
See also: http://cs5fat.blogspot.pt

CY0, SABLE ISLAND (QRT)
a wounded animal of a protected migratory bird species has been found at the antenna system of CY0/VE1AWW within the nature reserve. This is the preliminary end of CY0/VE1AWW.

EA, SPAIN
ED3CW (QSL via EB3CW), ED5ATK (QSL via EA5ATK), ED5DM (QSL via EA5DM), ED5DWS (QSL via EA5DWS), ED5DY (QSL via EA5DY), ED5FL (QSL via EA5FL), ED5HAB (QSL via EA5HAB), ED5JC (QSL via EC5JC), ED5KB (QSL via EA5KB), ED6QY (QSL via EA6QY) and ED8DD (QSL via EA8DD) want to enjoy pile-ups from Jun 5-24 on the occasion of the F1 Grand Prix at Valencia. They have issued also a special award program. See: http://www.f1award.com

F, FRANCE
From Jun 3-17 the "Association des Radio Amateurs de la Sarthe" is using the special call TM24H for the 60th time on the occasion of the 24-hours race at Le Mans. QSL via F6KFI.

FS, ST MARTIN, NA-105
John,FS/K9EL, plans to work in holiday style from St. Martin (NA-105, DIFO FS-001, WLOTA 0383, Grid Loc FK88) from June 8-24. He uses an IC7000, a vertical for 80m-10m, a 3-ele-yagi for 6m and in CW, SSB and

RTTY. He has also a power amp available for 6m. Skeds are possible via
e-mail to john@k9el.com. QSL via homecall, LoTW or club log.
See: http://www.k9el.com and http://www.clublog.org/logsearch/FS/K9EL

HC, ECUADOR
Rick,NE8Z, will show up on the bands as HC1MD from Tumbaco in CW, SSB
and RTTY on 40m-10m (possibly 6m) from Jun 7-14. QSL via K8LJG.

I, ITALY
ARAS Italia (IQ9DM) is celebrating the 40th anniversary of the maiden
flight of the long-distance reconnaissance aircraft Breguet Atlantic
BR 1150 by using the special callsign II9AS from Jun 6-9. They will be
QRV from the base of Sigonella in Catania on Jun 9, together with ARI.
Operation will take place with several stations in all modes on 40-10m.
QSL via IT9JPW, unfortunately only direct.
See also: http://www.assoradiomarinai.it

IS0, SARDINIA, EU-024
Patrick,IM0/ON7ARQ, will be QRV from Sardinia on Jun 12-26. He will
join the All Asian DX Contest from Isola di San Pietro in the southwest
of Sardinia.

KL7, ALASKA, NA-039
Jeff,KL2HD, is staying on Adak Island (NA-039) until June 8. He is a
biologist and spends most of his time on the research vessel MS Tiglax.
You can work him in SSB on 20m and 17m between 0400-0800 UTC.
QSL preferably via LoTW, but via bureau is ok as well.

ON, BELGIUM
Robert,ON4LRG, Janny,ON5PO, Paul,ON6DP, Didier,ON6YH, Pierre,ON7PC, and
Jean,ON7ZM, will show up on HF signing OP0P/p or homecalls/p from the
St Fontaine castle (WCA ON-00496, BCA LG-095) on Jun 10, 0600-1000 UTC.
QSLs for OP0P via ON6DP, LoTW and eQSL.

On the occasion of Gerhard Mercator's 500th birthday the special event
station ON500MERCATOR will be put on the air. With his large world map
from 1569 (Nova et orbis terrae aucta descriptio ad usum navigantium)
Mercator acquired world fame. The eponymous projection was developed
by him and is important for the maritime and aviation because of its
conformal projection. QSL via ON7KO. See also: http://www.snw.uba.be

SM, SWEDEN
Each year from May 15 to June 15, Ove,SM0PSO, celebrates his new life
with a donor heart by using the special callsign SF0530COH.
QSL via homecall. See also: http://www.sm0pso.com

SV, GREECE
Mike,SV1RK, and Stavros,SV3CJU, will be QRV as J48SAI from the island
of Sapienza (EU-158, LH GRE116, WLOTA 1471, Loc KM06us) working in CW,
SSB and RTTY on HF and 6m from Jun 8-10. QSL via SV1RK, LoTW.

UA, EUROPEAN RUSSIA
Members of the clubstation RK3VWA are active as R1150V until Aug 31

to celebrate the 1150th anniversary of Russian statehood.
See also: http://www.r3v.ru

The special event station R200V is activated from various historical
sites in the Smolensk and Moscow regions between June and September
to remember the 200th anniversary of the French invasion.
QSL via RK3LO, LoTW and eQSL.

The special event station R200BS remembers 200th anniversary of the
Battle of Borodino until July 31. QSL via RK3CQ.

The Russian section of the "European PSK Club" is using the special
callsigns R73EPC and R55EPC on all bands in B(Q)PSK31 on all bands
from Jun 1-30. QSLs for R73EPC via RK3DSW, for R55EPC via R9CBA.
See also: http://www.epc-ru.ru

VE, CANADA
CJ3 and CK3 prefixes are allowed from Jun 12-26 on the occasion of
the 100th anniversary of the city of Kitchener in Ontario.
QSL routes will be announced in the QSOs.

VK, AUSTRALIA
Organized amateur radio service was introduced in Queensland 100 years
ago under the auspices of the "Wireless Institute of Australia". Radio
amateurs celebrate this with the special callsign VK100WIQ between
June 1 and July 31. A special award program was established, too.
QSL via bureau. See also: http://www.wia.org.au

VP2M, MONTSERRAT, NA-103
John,KB4CRT (SMIRK 3932), announced to become active as VP2MRT from
Gingerbread Hill in St. Peters Parish (NA-103, WLOTA 1475, Loc FK86VS)
working in SSB, some CW and maybe also PSK on 80m-2m from Jun 6-12. He
plans to join the upcoming "ARRL June VHF QSO Party" (Jun 9-11), too.
John will listen particularly for AS and OC.
Unfortunately QSLs only direct via KB4CRT, LoTW.

Graham,M0AEP, goes to Montserrat (NA-103) as well and will sign VP2MDD
in SSB and CW with a focus on 12m/10m/6m between June 7 and August 6.
QSL via homecall.

W, UNITED STATES
Andy,N8OFS (SMIRK 6737), will take part in the ARRL June VHF QSO Party
working portable (WW Loc EN91) in FM on 52.525 MHz.
QSLs unfortunately only direct or via eQSL.

Mike,W2GR, will use the special callsign N2W in CW, SSB and RTTY on
40m-10m from Jun 10-24. The occasion is the first attempt to cross the
Niagara Falls on a rope by Nik Wallenda on June 15. QSL via W2GR.

ZD7, ST HELENA, AF-022
Bruce,ZD7VC, is usually working on 20m/17m/15m/6m from 1700-2200 UTC.
QSLs unfortunately only direct.

VP9PN log: The log of the VK9PN DXpedition is online now.

SILENT KEYS: Joel Oulie,F6FHP, has died. The EME community and all radio
friends will miss him sorely. Steve Mendelsohn,W2ML, who was elected
into the CQ Amateur Radio Hall of Fame only recently, died on May 23
from cancer. Bill Wells,VK4UA, passed away on May 30 at the age of 89.
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost them, but grateful that we could
get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 9/10 DRCG Long Distance Contest
Jun 9/10 Portugal Day Contest
Jun 9 Asia Pacific Sprint Contest
Jun 9/10 WW South America Contest

The ARI Roma organizes the second 70 MHz and Crossband Contest on June 10
from 0700-1700 UTC. See also: http://www.ariroma.it/70.html

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-004, 5B/ZC4, Cyprus: Carolyn,5B/KC9URR, and Padraig,5B/KC9UUS, are doing
their first DXpedition to Cyprus from Jun 2-17. They will work holiday
style only in SSB using a FT-857 and Buddipole. KC9UUS is only 15 years
old. QSLs via homecalls (bureau/direct). QSL cards will be sent after
their return home.

AS-017, JA6, Okinawa Islands: The special event station 8N6JAPAN is working
on HF from Okinawa until Jul 31 and celebrates the 40th anniversary of
the return of Okinawa to Japan. QSL via bureau.

EU-014, TK, Corsica Island: Alessandro,TK/IW5ELA, is spending his holidays
in Calvi/Corsica (Loc JN42jn) from Jun 6-9. QSL via homecall.

EU-020, SM1, Gotland County group: Tetsu,SM1/JH8SGR, will be active from
Gotland (WLOTA 2969) running 500 watts and wire beams on the HF bands
from Jun 11-13. QSL via homecall (bureau/direct).

EU-054, I*9, Egadi Islands: Franco,IK4YCQ, spends his holidays on the island
of Favignana (IIA TP-011, MIA MI-025, WLOTA 1545) until Jun 8. Listen
for IF9/IK4YCQ working holiday style in SSB on HF. QSL via homecall.

EU-065, F, Bretagne (Finistere North West) Region group: Keith,F/G3TTC/p, is
working in SSB on 40m and above from Quessant (DIFM AT001, WLOTA 0208)
on Jun 6. QSL via G3TTC (bureau/direct).

EU-068, F, Bretagne (Finistere South West) Region group: The next stop of
Keith,G3TTC, will be Sein Island (DIFM AT007, WLOTA 2721) on Jun 9.
QSL via G3TTC (bureau/direct).

EU-094, F, Bretagne (Finistere South) Region group: The third destination
of Keith,G3TTC, will be Glenan Island. He will hand out IOTA points
in SSB on Jun 12. QSL via G3TTC (bureau/direct).

OC-128, DU1, Palawan Island: Dandy,K6ZRH (aka DU1IMA), is planning to visit
Palawan Island (WLOTA 1612) and wants to become active as K6ZRH/DU1 in
SSB on 40m, 20m and 15m from Jun 10-30. QSL only direct via K6ZRH.

NON-IOTA: Erik,ON7EX, Dries,ON6VOX, Hakim,ON7HLU, and Francois,ON4LO, will
be QRV as ON4LO/LH from the fireship "Mayflower" (ARLHS BEL048) in SSB
on 80m-10m from Jun 8-12. QSL via ON4LO (bureau/direct).

William,KD8PZO, will be QRV from Burton Island (USi VT020L) working
holiday style in SSB on 10m-20m from Jun 8-10. QSL via homecall.

Paracuru Lighthouse: Moreira,PT7ZT, and members of the GPDX-CE will show up
as PT7ZT/p from Paracuru Lighthouse (ARLHS BRA-276, DFB CE-09, DFCE
CE-09, Loc HI06lo) from Jun 8-10. QSL via PT7ZT (bureau/direct).

Lighthouse activities

FS/K9EL LH 0383 Jun 8-24
GX4BJC/A LH 1841 Jun 11-30
MX1SWL/A LH 1841 Jun 11-30
T48K LH 0032 Jun 9-11
VP2MRT LH 1475 Jun 6-12

WFF activities

KFF: W3WFF will activate a new KFF from the nature park Powdermill (KFF-623)
on Jun 9. Activities are planned in CW and SSB on 40m-10m (WFF QRGs)
using 100 watts and wire antennas. The logs wil be uploaded to the LoTW
and WFF LogSearch. QSL via N3GJ (bureau/direct).

DLFF: Daniel,DM3DA/p, will be QRV from the national park Eifel (DLFF-003)
from Jun 7-9. QSL via DM3DA (bureau/direct).

RFF: The team of R44WFF will activate several RFF areas from Jun 5-12 like
Buzulusky national park (RFF-171) and the Orenburgsky reserve (RFF-067)
Special QSLs will be sent via bureau. QSL via RA3AKF.

EUFF: The EUFF Green Party 2012 will take place on Jun 9, 0600-1759 UTC.
This day is thought to encourage amateurs to leave their home QTH and
do some portable activities in nature. QSOs with stations in WFF areas
are supported especially. See also: http://www.wff44.org/committees/day
and http://wff-yo.blogspot.com

Emergency communications in Italy

As a result of further tremors on the afternoon of May 29 emergency communi-
cation has been intensified by the radio amateurs. Due to a request of the
Italian civil defence authority the National emergency radio and volunteer
group (RNRE) sent a mobile unit of five radio amateurs to the crisis region

in northern Italy and prepared two other units which are ready for immediate use. The HF frequency 7060 kHz is used by IQ1HQ, the RNRE headquarters, and IQ0TK, the civil defence authority in Rome. VHF links are currently running on 145.200 MHz. The main earthquake occurred on May 20 at 0200 UTC in the region of Emilia Romagna in northern Italy.

DXer arrested on espionage

Baldur,DJ6SI, was arrested on Kos Island (SV8) and is suspected of spying because of his radio operation. See also:

New Providence Kids Make Radio Contacts Around the World:

Posted: 05 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28432

Ham Radio on-the-air operating event for kids, is to be held on Saturday June 16, at Centennial Park, New Providence. NPARC, the Amateur Radio Club serving the Watchung Hills Area, will set up two operating ham radio stations in the Gazebo, at Springfield Avenue and Academy Street, on Saturday, June 16. Kids from New Providence and surrounding areas, are invited to make direct radio contacts with other kids from all over the world. On previous Kids Days there were many contacts to the eastern United States and as far west as Oklahoma, Colorado and California. This year, Ham Radio expects to make many exciting overseas contacts during the afternoon.

Cleveland's Amateur Radio Club Celebrates 50th Year:

Posted: 05 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28431

The Cleveland Amateur Radio Club is celebrating its 50th anniversary this year. The first constitution of the club is dated June 22, 1952. The club will celebrate its history with different events throughout the year. According to information complied from club minutes by CARC past president Bob Gault, the club's inception occurred about three months earlier on March 28, 1962, when a group of aspiring hams met after the last radio operator class was given by Civil Defense at the old Bradley County Courthouse. They agreed to form a club and a temporary organization was set up and committees were named to draw up by-laws and a constitution.

AITI And Police Crack Down On Illegal Amateur Radio:

Posted: 05 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28430

Bandar Seri Begawan - Members of the public who are involved in the illegal use of amateur radio equipment without a licence from the Authority for Info-communications Technology Industry of Brunei Darussalam (AITI) - the country's telecommunications industry regulator - face a maximum fine of B$10,000 or up to three years imprisonment, or both, if convicted. This was revealed by Ak Saiful Rosman bin Pg Hj Roslee, the Manager of Monitoring

and Enforcement at AITI during a briefing on the Joint Operation with the Berakas Police Station to crack down on illegal radio equipment. Present at the briefing was Chief Inspector Awg Burhan bin Abang, the Officer-in-Charge of the Berakas Police Station. The joint roadblock operation, which involved a team of 16 police personnel and seven AITI officials, took place at the Tungku Link Highway yesterday. Ak Saiful Rosman said the aim of the joint operation was to "unearth offences such as owning or using radio equipment without holding a licence from AITI; owning or using radio equipment with an expired licence; and possessing radio equipment not permitted by AITI".

Former 'The World Above 50 MHz' Conductor Gene Zimmerman, W3ZZ (SK):

Posted: 05 Jun 2012 03:03 PM PDT
http://www.eham.net/articles/28428

Gene Zimmerman, W3ZZ, of Gaithersburg, Maryland, passed away on Sunday, June 3. He was 71. Zimmerman wrote the popular QST column "The World Above 50 MHz" from 2002-2011. He also served on the ARRL Contest Advisory Committee, edited the VHF contesting column for CQ Contest magazine during its five-year lifespan and was director of the CQ VHF Contest from 2000-2002. An ARRL Life Member, Zimmerman earned VUCC on six bands: 50, 144, 222, 432, 903 and 1296 MHz, as well as DXCC, Worked All States and Worked All Continents on 6 meters. He was an early proponent of -- and participant in -- aggressive contest log checking.

A Humanitarian Aid Mission: J52EME QRV on EME from Guinea Bissau.

In autumn 2011 the first announcement was communicated by Lucio I3LDP, on
behalf of the Verona DX Team: They were planning for a 144 EME activity from J5
Guinea Bissau, scheduled for March/April 2012. And so it came: In the early
morning of 23 March 2012 the team and equipment departed from Bologna airport
and travelled via Lisbon to Bissau.
The DXpedition location was the Cumura Mission, where a Franciscan Friar, who is
an OM and member of A.R.I. Verona, offered his assistance. Father Gianfranco
Gottardi has worked for nearly 20 years in several missions in Guinea Bissau where
his presence was requested by the Bishop of Bissau. He was active on HF from these
missions with the call signs J54OFM, J52OFM and J59OFM. The OFM suffix standing
for Order Friars Minor, which refers to St. Francis.
The DXpedition teamï¿½s goal was also to help Father Gianfranco with their work: All
the money received with QSL cards is already or will be donated to the mission.
During the stay also some work was planned, such as the creation of a LAN in the
Hospital of Cumura and the connection to the Leper Hospital. Also fixing and
improving the mains power system which then worked only for a few hours a day
for the hospital was on the to-do list. Work at the generators was also planned so
that for the periods of power outage the 24V batteries would be charged and ready
for emergency services, such as incubators and medical equipment.

Lucio I3LDP sent a detailed report: ï¿½Immediately after arrival to the Cumura Mission
in Guinea Bissau, we started assembling the two 8 el. yagis, cross polarized. This was
a tough job as we had to work in a dreadful heat of 40ï¿½ C! After finishing the
assembly of the structure, we added adapters, cables and an aiming system taken
from an old telescope. The relay H/V DowKey 402A was placed before the excellent

preamp donated by Pete WA2ODO (gain 23.9 dB and noise figure 0.14 dB). Cables were Ecoflex 10 for the connections to the antennas and 18 m of Ecoflex 15 for connecting the PA type Colibri lent to us by Nico of ITB, exceptional for low size and weight, only 7 kg with 1000 W out. RTX type IC-7000 and home-made sequencer completed the setup.
We placed the antenna system on top of a container, near the place where we had installed the HF equipment. When the Moon rose we were ready to go, but we immediately realized that the place was wrong; big noise and even worse: increasing SWR when the antenna was elevated. So we dismantled everything, placed antenna and support on a tractor and went to a field near the house of volunteers of Cumura Mission. Characteristics of that location were: open field with some papaya trees, big mango trees on the north side and a big mango tree in direction 270ï¿½. To the East the situation was even worse: a house and very high trees made us see the moon only at elevations greater than 15/20ï¿½. We had no decent cover.

This was not quite a classic DXpedition working field-day style. We had a pool, air conditioning, and an ï¿½a la carteï¿½ restaurant: Our accommodation was named the "Sheraton Hotel", that instead of having 4 **** had 4ï¿½mangoes: some rooms were derived from an old structure that was part of the old hospital, and here we transformed the old reception into a kitchen and a dining room.

We accepted these conditions and we placed all the antennas there, for 144, 432 and 50 MHz. First equipment turn-on was on the 25th March. As we had a temporarily internet connection we could see that I3MEK was calling on 144,138 MHz. Shortly after we lost the connection, but we went on that frequency, pointed antenna to the moon and soon we decoded his CQ at -22dB with V pol. After some calls we finally got OOOs at 1913Z at -20, then RRRs and 73s. WE HAD COMPLETED OUR FIRST EME QSO! At last J52EME was alive. We toasted, then closed the station because we had once again lost electric power. Next day we recovered a 4kW generator and placed it near the border of the field, with the line fully extended. At moon-rise we has some problems first, having to wait until 20ï¿½ elevation. So unfortunately the window towards JA, ZL, VK soon closed. We made only one JA station.

During the entire DXpedition we kept having a lot of problems, particularly with electric power. Also fuel was very difficult to get, a mango fell on the head of one of us who found out this painful way how heavy and hard it was, permanently fighting red ants (see left the visitors on the note book) and also defensive actions against mosquitoes.
If you print the moon graphs of those days, you will understand the problems of moon pointing near the equator. The Moon-rise was at az. 68ï¿½, this increased till 85ï¿½, then came back till az. 15ï¿½, from which it went to az. 340ï¿½ in 6 minutes, remaining at el. 88ï¿½. The following day was different: Moon-rise at az. 78ï¿½ going to 82ï¿½, then moving quickly, in 10 minutes, to az. 170ï¿½ where it remained without change for 18 minutes, then a quick movement, in 5 minutes, to az. 230ï¿½. Stunning! At least for someone who is accustomed to see it rise in the east and set in the west, passing by south.

We copied good signals most of the time, with a reasonable pile-up, but very often we got high noise and big birdies coming from the East, direction airport. This then obliged us to change QRG and telephone to Renato I3EJ or Mario I3MEK asking to announce the frequency change on the logger. At the end of the activity we had more than 220 QSOs in the log, and had an excellent feeling having made so many EME stations like us happy.

On 430 MHz we had terrible problems with noise, although the preamp and our 18 el. LFA home-made worked fine, with the PA Colibri by Nico which regularly put out 450 W. Doppler was very high and drifting, so decoding was not easy, even when the signals were very strong. We ended up with just 6 QSOs and we sure did our best. More wasnï¿½t meant to be.
On 50 MHz we had some skeds with American stations, but we could only see the trace of Lance W7GJ, in JT65A. Unfortunately the very high trees interfered with moon-set, and we had only a 5 el. LFA. We will contact Lance to find out whether he heard all the info from us.
Luckily we had a big ES activity towards EA and CT on 50 MHz. Sometimes we had to to ask the callers to leave us space in the pile-up in order to find other countries. So we completed with CN, 7X, F, IS0, IT9, DL, 9H, SV9, I, EA6, EA9, CU2, LZ.

This is the conclusion of the first EME DXpedition for the Verona DX Team, which gave us a lot of experience and lessons learned that will be useful for the next radio and humanitarian expedition, since we intend to go on in this way: bringing, in addition to our willingness to do radio, the help necessary in many underdeveloped countries.
After our return we received regards from a Franciscan Noun, Sister Stefania, who had become used to see our antennas pointing up: ï¿½Hello, happy Easter to you. Here all is well, but every night the moon weeps because it does not see you anymore. An embrace to all of you, hoping to see you again. Peace and Good. Sister Stefaniaï¿½

Now also in Guinea Bissau and in the Cumura Hospital
hangs the pennant of ARI Verona that we are proud to
represent; and our thanks to all that helped us and sent
donations. Our work continues, and every donation we
receive from you will be sent to Father Gianfranco who
will use it for works of charity in a country where red
earth is king and permeates everything.

All donations, already arrived or future ones, will go to the Cumura Mission. I am asking everybody here, whether having made a QSO or not, to make a donation. For donating money, please go to http://www.ari.verona.it/veronadxteam/en/ Beyond helping the mission, you will give a deserved satisfaction to the team who worked also for giving you this DX.ï¿½

73, Lucio I3LDP

K5QE in ARRL June VHF Contest

Hello to everyone in the EME community. This year, the ARRL June VHF Contest
will be held June 9th and 10th. We want to work as many EME stations on 2M AND
432 as possible to increase our grid count. Please help us with this event by
working us on JT65b or CW. Thank you very much. I understand that the EU contests
ban EME contacts, but that is NOT the case with the ARRL contests, so your contact
is very important to us. Hence, I would really appreciate the EME stations making
the effort to work me, as your contact will certainly be a rare grid for our log.
As usual, we will be operating 2M on 144.142MHz Second sequence. We will be running
QRO with 8 x 18&#65533;s and ask that you try to work us if you see us during the contest.
Our only moonrise is 0545Z on Sunday. If we see several EME callers, we will try
to work the Eastern EU stations first before they have moonset. If you see us working
another station, PLEASE keep calling. That allows us to decode your call while we
are finishing up a QSO with another operator. WE will use "contest style" messages
and will not send 73s, just to save time. If you only operate on CW, please call
us on CW. If we hear a CW caller, we will switch to CW and work you on CW as soon
as possible. Even if you don't see us calling CQ, you can call us on 144.142MHz OR
432.042MHz. If we see you, we will respond as soon as we can. We have MAP65-IQ
running this year, so we should be able to see more callers. If we see you, we will
respond as soon as possible, so don't give up....please keep calling.
Because we are a Multi-Multi station, we will be watching the N0UK EME-1 logger,
we just can&#65533;t post to these pages. If you see us, please spot us on the N0UK EME-1
logger.
If you are not in the contest, you can post freely to the loggers. So, you can talk to us,
we just can't talk back.If you don&#65533;t see us on 144.142MHz or 432.070MHz, please
check back
later because we may just be doing a bit of Search & Pounce or waiting for the tropo
station
to finish a QSO.

Good luck to all in the contest and we hope to see you there. Thank you.

Please note my new email address....k5qe@k5qe.com. Thank you.

** DXCC: SP : Poland ; square JO80 **

Hello everyone,

Because of the Global Astronomy Month 2012, a special call sign
SN2012GAM appear on the EME bands. We are going to work on European EME
Contest on 13cm. We are cordially invite you to take a QSO with this
special call sign, which will working form the EME Group Klodzko
(SP6OPN) station located in Poland.

73, vy
SP6JLW (Andy), SP3QFE (Armi)
and other operators of the EME Group in Klodzko (JO80jk).

SOURCE: Andrej, SP6JLW to MoonNet 2012-04-28

** DXCC: I: Italy; square JN56; start 2012-06-09 **

Steffen DD0VF qrv from JN56RM as IN3/DD0VF in June

This year some mountain hiking in South Tyrol again.
I'll be QRV in the morning and evening for MS. Reasonable
good take off from QTF 40-60 and 180-290 (G/GW shall work
with some offset to south).
Rig: only 50W, 4 or 7el (depending on space of balkony)

I could be also QRV from abt 2500m asl for a few hours
(possible calls IN3/DD0VF, IW3/DD0VF, HB9/DD0VF)

Let me know if you still need JN56.

SOURCE: tnx to Steffen direct to MMMonVHF

** DXCC: A5: Bhutan; square ???; start 2012-06-06 **

JA1JQY (A52JY), JK1EBA (A52BA), JA3MCA (A52MA), JA1KJW (A52KJ), and
JA8VE (A52VE) will be QRV in SSB/CW/RTTY on 160m-6m from a hotel at
3000m altitude in the capital Thimpu from Jun 6-14. A beacon will be
set up to run continuously on 50.125 MHz. QSLs via homecalls.

SOURCE: DXNL 1783 - Jun 6, 2012

** DXCC: VP2M: Monserat; square ????; start 2012-06-09 **

John,KB4CRT (SMIRK 3932), announced to become active as VP2MRT from
Gingerbread Hill in St. Peters Parish (NA-103, WLOTA 1475, Loc FK86VS)
working in SSB, some CW and maybe also PSK on 80m-2m from Jun 6-12. He
plans to join the upcoming "ARRL June VHF QSO Party" (Jun 9-11), too.
John will listen particularly for AS and OC.
Unfortunately QSLs only direct via KB4CRT, LoTW.
Graham,M0AEP, goes to Montserrat (NA-103) as well and will sign VP2MDD
in SSB and CW with a focus on 12m/10m/6m between June 7 and August 6.
QSL via homecall.

SOURCE: DXNL 1783 - Jun 6, 2012

** DXCC: W: USA; square EN91; start 2012-06-09 **

Andy,N8OFS (SMIRK 6737), will take part in the ARRL June VHF QSO Party
working portable (WW Loc EN91) in FM on 52.525 MHz.
QSLs unfortunately only direct or via eQSL.
Mike,W2GR, will use the special callsign N2W in CW, SSB and RTTY on
40m-10m from Jun 10-24. The occasion is the first attempt to cross the
Niagara Falls on a rope by Nik Wallenda on June 15. QSL via W2GR.

SOURCE: DXNL 1783 - Jun 6, 2012

** DXCC: CO: Cuba; square ????; start 2012-06-09 **

The "Radio Club Las Tunas" wil join the ARRL June VHF QSO Party in the
"limited multi operator" class signing T48K (Loc FL10mw) on Jun 9-11.
On 6m they will use a 5-ele-antenna by Tonna with 100 watts and on 2m
they will run 50 watts into a homebrew 9-ele-quad. They hope for a
first contact between Las Tunas and USA. QSL via DK1WI.

SOURCE: DXNL 1783 - Jun 6, 2012

** DXCC: OH: Finland; square KP33; start 2012-06-21 **

Markku, OH8UV, will be QRV on 50 MHz as OH7UV from KP23 with 100W in 4 el.

SOURCE: Markku, OH8UV, direct to MMMonVHF

** DXCC: D6: Comoros; start 2012-08-01 **

HF and 6m Activity planed as D64K (LH81PJ)

We will have a station dedicated to 6m with a K3, ACOM1000 and long yagi.

Dates to be confirmed.

Operators are: C31CT/EA3QS, IW3SQY, IZ4AKS, IZ8GCE, SP3DOI, IV3DSH, EA3AKY

Expedition website: www.d64k.com

SOURCE: Josep EA3AKY direct to MMMonVHF

** DXCC: VU: India; square ????; start 2012-05-23 **

Until July 8th, Taj, VU2DJ, Sabu, VU2ELJ, Sree, VU2OB, Prabin,
VU2POL, Peeter, VU2PJP, Murali, VU2FWW, Thomas, VU2VJT, Sunil,
VU2ATB, Ashraf, VU3MTY, Mujeeb, VU3WII and Sanal, VU3SIO, will
activate the special call sign 8T1M from 160 - 2 Meter in CW, SSB,
PSK, RTTY, FM and D-STAR. QSL via VU2MLQ.

==> + FORECASTERS CALLING FOR "NEAR-NORMAL" HURRICANE SEASON

Forecasters with the National Hurricane Center are calling for a
"near-normal" Atlantic hurricane season for 2012. In its initial
outlook for the 2012 Atlantic hurricane season -- which began Friday,
June 1 and runs through November 30 -- the National Weather Service's
Climate Prediction Center (CPC) is calling for a 50 percent probability
of a near-normal season, a 25 percent probability of an above-normal
season and a 25 percent probability of a below-normal season. The 2012
hurricane season began early when Tropical Storm Alberto and Tropical
Storm Beryl both developed several days before the official start of
the season, the first time since 1908 that two tropical storms
developed early; the only other year with two storms so early in the
season was 1887.

CPC forecasters say that there is a 70 percent chance of having 9-15
named storms, of which four to eight could become hurricanes, including
```

one to three major hurricanes (Category 3, 4 or 5). These ranges do not represent the total possible ranges of activity seen in past similar years. Tropical systems acquire a name upon reaching tropical storm strength with sustained winds of at least 39 miles per hour. Tropical storms become hurricanes when winds reach 74 miles per hour and become major hurricanes when winds increase to 111 miles per hour. An average season has 12 named storms, including six hurricanes with three becoming major hurricanes. Read more here <http://www.arrl.org/news/forecasters-calling-for-near-average-hurricane-season>.

==> + CHECK YOUR MAILBOX FOR THE JULY 2012 ISSUE OF QST

This July issue of QST features an in-depth look at Solar Cycle 24. With its slow start, many feared Solar Cycle 24 might not be as active as previous cycles. But if you've been on the air in the last few months, you know that the higher bands are exploding with activity. Propagation guru Carl Luetzelschwab, K9LA, takes a look at the current solar cycle and lets readers know what they can likely expect in the coming years. So why not set aside a couple of hours, grab a snack and get ready to explore the July issue of QST.

When you think of dipole antennas, you probably envision a horizontal wire with a vertical wire hanging down from its middle. Jeff Brone, WB2JNA, couldn't put up a traditional dipole in his third-floor apartment, so played around with its configuration and came up with a new model. In his article "A Dipole Doesn't Have to Be Straight," he explains that even though some antenna is better than no antenna, just about any kind of antenna will work.

If you've ever wanted to try the new software-defined radios, but weren't too keen to give up your analog equipment, take note. Alex Schwarz, VE7DXW, has found a way to upgrade an older analog radio to an SDR at a low cost. In his article "SDR Upgrade for Analog HF Radios," learn how he created a software and hardware interface for different models of radios, produced a software package that can be used by developers to run on Windows-based platforms and used this software for the demodulation of USB, LSB and CW.

The ARRL EXPO at the 2012 Dayton Hamvention was a resounding success. With tons of exhibits within the EXPO -- including the DIY Stage, the Youth Lounge and DX activities -- the thousands of Hamvention goers were never bored. ARRL News Editor S. Khrystyne Keane, K1SFA, explores the fun that is Dayton in her article "ARRL EXPO at the 2012 Dayton Hamvention." In the upcoming digital edition of the July issue, QST Technical Editor Joel Hallas, W1ZR, takes an in-depth look at the dozens of new products that vendors introduced this year at Hamvention. Look for the digital edition to be online in mid-June.

More than 30 years ago, the IARU offered a no-frills 20 meter CW transceiver, dipole antenna, headphones and a Morse code key to budding hams in Asia and Africa. In 2012, one of these transceivers, sent from

ARRL Headquarters, found its way back to Newington. While its journey back to the US remains a mystery, QST Editor Steve Ford, WB8IMY, tells the transceiver's story in his article "A Transceiver Comes Home."

ARRL Test Engineer Bob Allison, WB1GCM, takes a look at the Alinco DJ-G29T dual-band handheld transceiver in this month's Product Review. He says the rig "covers the 1.25 and 33 cm bands - a unique combination. With this radio, amateurs can access the 33 cm band without having to convert commercial service transceivers." QST Technical Editor Joel Hallas, W1ZR, checked out the WaveNode WN-2d station monitoring system, saying that it "provides useful accuracy and a lot of flexibility in terms of what you can measure and how you can display it. I found it a useful tool and a good adjunct to my station."

Of course, there are the usual columns you know and expect in the July QST: Happenings, Hints & Kinks, The Doctor Is In, Short Takes, Technical Correspondence, How's DX and more. Look for your July issue in your mailbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + SILENT KEY: FORMER "THE WORLD ABOVE 50 MHZ" CONDUCTOR GENE ZIMMERMAN, W3ZZ (SK)

Gene Zimmerman, W3ZZ, of Gaithersburg, Maryland, passed away on Sunday, June 3. He was 71. Zimmerman wrote the popular QST column "The World Above 50 MHz" from 2002-2011. He also served on the ARRL Contest Advisory Committee, edited the VHF contesting column for CQ Contest magazine during its five-year lifespan and was director of the CQ VHF Contest from 2000-2002. An ARRL Life Member, Zimmerman earned VUCC on six bands: 50, 144, 222, 432, 903 and 1296 MHz, as well as DXCC, Worked All States and Worked All Continents on 6 meters. He was an early proponent of -- and participant in -- aggressive contest log checking. Read more here <http://www.arrl.org/news/former-the-world-above-50-mhz-conductor-gene-zimmerman-w3zz-sk>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of May -- takes a look at the new digital edition of QST, the ARRL EXPO at the 2012 Dayton Hamvention, the League's response to the FCC's request concerning impediments to Amateur Radio, draft band plans for 13 and 33 cm, the results of the ARRL Video Contest, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-46>.

==> + ARRL BOARD OF DIRECTORS APPROVES 9 CM BAND PLAN

<http://www.arrl.org/images/view/News/BandPlan9cm.jpg> The ARRL Board of Directors has unanimously voted to approve the 9 cm band plan,

as presented by the ARRL UHF/Microwave Band Plan Committee. Earlier this year, the committee asked <http://www.arrl.org/news/arrl-seeks-comments-on-proposed-9-cm-band-plan> radio amateurs for comments on a proposed 9 cm band plan, explaining that the purpose of these band plans is to share information about how the amateur bands are being used and to suggest compatible frequency ranges for various types of applications. The committee also recognized that local conditions or needs may necessitate deviations from a band plan, and that regional frequency coordinating bodies may recommend alternatives for use in their respective regions. Read more here <http://www.arrl.org/news/arrl-board-of-directors-approves-9-cm-band-plan>.

==> + PAPERS REQUESTED FOR ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

Amateurs are invited to submit technical papers for presentation at the 31st Annual ARRL and TAPR Digital Communications Conference (DCC <http://www.tapr.org/dcc>), to be held September 21-23, 2012 at the Sheraton Gateway Airport Hotel in Atlanta, Georgia. These papers will also be published in the Conference Proceedings (you do not need to attend the conference to have your paper included in the Proceedings). The submission deadline is July 31. Please send papers to: Maty Weinberg, ARRL, 225 Main St, Newington, CT 06111, or you can make your submission via e-mail <maty@arrl.org>. For more information about the conference, see the DCC website <http://www.tapr.org/dcc> or call 972-671-8277.

==> SOLAR UPDATE

Tad "There's a fire starting in my heart <http://www.youtube.com/watch?v=0ckIulg1DfQ>" Cook, K7RA, reports: The average daily sunspot numbers increased about 60 percent during the past week (May 31-June 6), when compared to the previous seven days (May 24-30). The increase was 48.5 points, from 81.9 to 130.4. The average daily solar flux was also up -- 18.6 points from 111.6 to 130.2. This increase in solar activity began June 1. On May 29, the daily sunspot number was 73, with four sunspot groups visible: 1486, 1488, 1490 and 1492. On May 30, the size of groups 1486, 1488 and 1492 diminished, but 1490 grew, and the sunspot number was 78. On May 31, sunspot groups 1486 and 1488 disappeared, and new groups 1493, 1494 and 1495 appeared, but the daily sunspot number was still about the same, 76. On June 1, three new groups appeared -- 1496, 1497 and 1498 -- and the daily sunspot number jumped to 151. The next day the sunspot number was 113. On June 3, sunspot group 1499 appeared and the sunspot number was 133. On June 4, three more sunspot groups arose: 1500, 1501 and 1502. Groups 1490 and 1492disappeared, and the sunspot number jumped again, this time to 155, the high for the week and the highest since May 14 when it was 156. Geomagnetic activity peaked on June 3, when the planetary A index was 19, and the high-latitude college A index was 33. The activity continues, with the planetary A index on June 4-6 at 16, 17 and 17, and the predicted planetary A index for June 7-8 at 12 and 8, followed by 5 on June 9-17. Geomagnetic activity is expected to

increase again, with a predicted planetary A index on June 18-20 at 15, 12 and 8. For June 21-25 a planetary A index of 5 is expected, followed by another peak at 15 on July 1 and again on July 15. The predicted solar flux is 140 on June 7-9, 135 on June 10-11, 130 and 125 on June 12-13, 120 on June 14-15, 115 on June 16-18, and 110 on June 19-26. The recent geomagnetic activity was caused by a coronal hole, an opening in our Sun's magnetic field, allowing solar wind to spew forth. Look for more on the ARRL website on Friday, June 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Adele's Rolling in the Deep <http://en.wikipedia.org/wiki/Rolling_in_the_deep>.

==> + MARTIN HUYETT, K0BXB, WINS MAY QST COVER PLAQUE AWARD

The winner of the May QST Cover Plaque award is Martin Huyett, K0BXB, for his article "An AFSK Interface for Android Smartphones." Congratulations Martin! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the June issue today.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Have you ever operated on a microwave band (1.2 GHz and above)?
- How long is your longest wire antenna?
- What is your favorite way to read digital QST?
- Do you own an RF spectrum analyzer?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the September 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- June 8 -- NCCC Sprint Ladder
- June 9 -- Portugal Day Contest; Asia-Pacific Sprint (SSB)
- June 9-10 -- DRCG Long Distance Contest (RTTY); VK Shires Contest; GACW WWSA CW DX Contest; REF DDFM 6 Meter Contest
- June 9-11 -- ARRL June VHF QSO Party

<http://www.arrl.org/june-vhf-qso-party>
- June 13 -- NAQCC Straight Key/Bug Sprint; NAQCC-EU Monthly Sprint
- June 13-14 -- CWops Mini-CWT Test

Next week:

- June 15 -- NCCC Sprint Ladder
- June 16 - ARRL Kids Day <http://www.arrl.org/kids-day>; Feld Hell Sprint; SARL Youth Day Sprint; AGCW VHF/UHF Contest
- June 16-17 -- West Virginia QSO Party; All Asian DX Contest (CW); Ukrainian DX Classic RTTY Contest
- June 17 -- WAB 50 MHz (Phone)
- June 18 -- Run for the Bacon QRP Contest
- June 21 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 8-9 -- ARRL West Gulf Division Convention <http://www.arrl.org/hamfests/west-gulf-division-convention-ham-com-1>, Plano, Texas
- June 9 -- ARRL Arkansas State Convention <http://www.arrl.org/hamfests/arkansas-state-convention>, Rogers, Arkansas; ARRL Tennessee State Convention <http://www.arrl.org/hamfests/tennessee-state-convention-2>, Knoxville, Tennessee
- June 30 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-electronics-expo-firecracker-hamfest>, Harrisburg, Pennsylvania
- July 20-22 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-78th-glacier-waterton-international-hamfest>, East Glacier, Montana
- July 26-28 -- Central States VHF Society Conference <http://www.arrl.org/hamfests/central-states-vhf-society-conference-1>, Cedar Rapids, Iowa
- July 27-28 -- ARRL Oklahoma Section Convention <http://www.arrl.org/hamfests/oklahoma-section-convention-ham-holiday-2012>, Oklahoma City, Oklahoma
- July 27-29 -- ARRL Rocky Mountain Division Convention <http://www.arrl.org/hamfests/rocky-mountain-division-convention-2>, Bryce Canyon, Utah
- August 3-4 -- ARRL Texas State Convention <http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-2>,

Austin, Texas
- August 3-5 -- Pacific Northwest DX Convention
<http://www.arrl.org/hamfests/pacific-northwest-dx-convention-1>,
Portland, Oregon
- August 10-12 -- RAC National Convention 2012
<http://www.arrl.org/hamfests/rac-convention-2012>, Edmonton, Alberta,
Canada

It's encouraging to see how much press ham radio is getting!
Sure, most of the papers and broadcast stations running these
stories are on the small side, but that's fine. It's still good
publicity, and maybe in smaller towns readers are more apt to
know some of the hams mentioned in the stories and will approach
those people for more information.

Amateur Radio Newsline(tm) Report 1817 - June 8 2012

Amateur Radio Newsline report number 1817 with a release date of June 8, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. A famed German DXer is arrested in Greece but nobody seems to know why, including Greece. Also, medical wireless network to operate adjacent to ham radio satellites on 13 centimeters; Malaysia says emergency agencies should embrace amateur radio and a primer on International lighthouse and lightship weekend. Find out the details are on Amateur Radio Newsline(tm) report number 1817 coming your way right now.

RADIO LAW: FAMED GERMAN DX'ER DJ6SI ARRESTED IN GREECE

In what has to be one of the strangest international legal issues involving a ham radio operator, famed German DXpedition leader Baldur Drobnica, DJ6SI, has been arrested in Greece. But in a strange turn of events he was permitted to return to Germany if he promised that he would come back to Greece for trial. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom trying to sort it all out:

--

Let me start by saying that it is very hard to know what has really taken place because most of the news sources are foreign language ham radio blogs and other news reports that have been electronically translated into English. Also, as we go to air there comes a purported statement in German from the person in the center of the controversy, DXer Baldur Drobnika, DJ6SI. It was posted to QRZ.com by YO4PX after being translated by DK5KF. As that is the latest information, lets start there and then take a look at the rest of the story as it seemed to unfold.

The statement credited to DJ6SI reads as follows:

"June 3rd, 2012, 20:46 (UTC 2)

Dear Michael,

I wasn't charged with espionage. As a reason of my arrest it was stated that:

1. I performed radio traffic without the approval of the Greek authorities;

2. I owned transmitting equipment which enabled the reception of other frequencies;

To the accusation was later added an other point:

I hindered the visualization of the content of my notebook.

I would like to ask you to eliminate the information that I was arrested for espionage, or to replace it with my statement.

Vy 73 Baldur DJ6SI"

Now, the back story:

According to news reports, 75 year old Baldur Drobnica, DJ6SI was on holiday on the Greek island of Kos. That's where he was reportedly taken into custody for the crime of espionage which was quickly reduced to operating amateur radio equipment. This, even though both Greece and Drobnika's home country of Germany are both signatories to the CEPT pan-European Amateur Radio licensing agreement.

Even so, Greek news reports appear to indicate DJ6SI was actually arrested under a 1929 Greek law covering illegal operation of radio telegraph equipment even though the CEPT agreement would likely superscede the older law.

According to Greek ham radio blogs the accusation of espionage was based on a complaint that he was "producing strange noises" with his computer. Those strange noises turned out to be CW and RTTY. This was corroborated by many who notice reports of his operation on Internet-based DX spotting clusters.

Quite quickly the espionage charge appeared to disappear and the reduced charge under the 1929 law implemented. And in a strange turn of events, DJ6SI was permitted to return to Germany but he was told that he must return to Greece to stand trial on June 7th. That hearing is likely taking place as this newscast goes to air. But as several Greek hams have pointed out, DJ6SI would have not been permitted to leave the country if there were any real case or even a suspicion that he was engaged in spying activities.

And one Greek ham radio blog took the matter a lot further. The Radio Amateur Association of Greece issued an angry statement defending DJ6SI. It claims that the responsibility for the entire matter should be placed on the to the shoulders of the officer that ignored laws and regulations, arrested DJ6SI and led him to court. They also place blame on the prosecutor who they say was quick to suggest his conviction based on a law passed in 1927, in the year 2012.

The hams also point out that radio amateurs have been complaining for years to the responsible Ministry that public services and institutions and particularly police have not been informed properly about ham

radio. The association says that it's the governments duty to inform all relevant authorities about amateur radio and its operations.

Obviously. This story is far from over.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

You can read the Aegea News report in Google English at tinyurl.com/DJ6SI-Aegea-News. An article by Greek amateurs protesting Drobnika's arrest is at www.radiofono.gr/node/3251 (SV5YR, DK5KF, YO4PX, RadioInfo.gr, QRZ.com, others)

RESCUE RADIO: MALAYSIA SAYS EMERGENCY AGENCIES SHOULD WORK WITH HAMS

Emergency Agencies in Malaysia should work with Radio Amateurs. So says that nations Information Department director-general Ibrahim Abd Rahman.

Director-general Rahman has been quoted in the Straits Times newspaper as saying that integration between the two should be encouraged as it helped the agencies to build good rapport and teamwork spirit.

Rahman said that agencies like the Fire and Rescue Department, Civil Defense, police, the Malaysian Red Crescent Society, hospitals, the Royal Malaysian Air Force and the Department of Civil Aviation should work together with amateur radio operators. He notes that hams could be the key to communicate with people in distress and, therefore, a collaboration between government agencies and amateur radio users should be intensified.

You can read the entire story of Malaysia's new emergency response proposal to include ham radio in its emergency communications system on-line at tinyurl.com/malaysian-emcomm. (Straits Times)

RESTRUCTURING: NEW BANDS MADE AVAILABLE IN POLAND

Some new spectrum for hams in Poland. Pawe3 Zakrzewski, SP7TEV, reports via the I-A-R-U Region One website that the Regulation of the Council of Ministers from April 3rd and published in the Journal of Laws of the Republic of Poland on May 17th has made available several new bands. These include 70.1 to 70.3 MHz on a secondary basis with a power limit of 20 watts.

Also available to radio amateurs will be 2.400 to 2.450 Gigahertz without causing interference to the other services in line with the article number 5 of the ITU Radio Regulations. Lastly is 3.400 to 3.410 Gigahertz on a secondary basis, with no more than 20 watts effective radiated power.

The changes to Poland's National Table of Allocation of the Radio Frequency Spectrum will come into effect on June 1st. (IARU R-1)

**

RESTRUCTURING: BAND COVERAGE CHANGES IN DENMARK

The Danish regulator the ERST has announced the availability for of 5250 to 5450 kHz and 472 to 479 kHz and an expansion to 70 MHz to that nation's amateur radio service.

Effective this past June 1st, the pilot program at 5 MHz ceased. It was replaced by the new permanent allocation of 5250 to 5450 kHz. This spectrum can be used by that nation's A certificate holders at a power level of up to 1000 watts and B certificate holders at up to 100 watts out using all modulation types. Previously issued trial licenses are valid until their expiration date.

Additionally ERST announced an expansion of 70 MHz which will become 69.9375 to 70.0625 MHz, 70.0875 to 70.1125 MHz and 70.1625 to 70.5125 MHz. No changes were implemented to the current modes and power levels for this band.

Lastly, Denmark will also open a new amateur radio band at from 472 to 479 kHz as of January 1, 2013. (ERST)

**

RESTRUCTURING: NEW LOW FREQUENCY BAND IN MONACO

The telecommunications regulator of the Principality of Monaco has allocated the band segment of 472 to 479 kHz to its amateur service. This is on a secondary status basis and limited to a maximum power of one watt effective radiated power. (GB2RS)

**

RESTRUCTURING: SA AGREEMENT FOR HAM RADIO AT YOUTH DAY EVENT

The South African Radio League has signed an agreement with telecommunications regulator the Independent Communications Authority of South Africa that will allow unlicensed persons to operate an amateur radio station under the supervision of a licensed radio amateur. This without the need to register as an educational station.

The agreement comes in time for implementation for the June 16th South Africa Youth Day event. Both SARL and ICASA look at this agreement as a further incentive to set up a demonstration station, involve more young people in the youth day sprint and show the average man in the street how great amateur radio is. (SARL)

**

RESTRUCTURING: MED ELECTRONICS TO OPERATE ADJACENT TO HAMSATS 13 CM

Medical electronics will soon be operational adjacent to ham radio in the 13 centimeter band. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has more:

--

The ARRL and AMSAT are reporting on a First Report and Order and a Further Notice of Proposed Rulemaking released by the FCC on May 24. In it the regulatory agency decided to expand the Part 95 Personal Radio Service rules to allow medical devices to operate on a secondary basis in the spectrum from 2360 to 2400 MHz.

The new allocation came in a Report and Order on ET docket 08-59 and is specific for Medical Body Area Networks. These provide a way for health care facilities to monitor their patients without confining them to wired hookups.

The use of these frequencies will be on a secondary basis. This means that Medical Body Area Networks stations will not be allowed to cause interference to, and must accept interference from, any primary services using the spectrum. This includes amateur radio which operate on a terrestrial primary basis in the 2390 to 2395 and 2395 to 2400 MHz bands. International amateur satellite operations are allocated between 2400 to 2450 MHz, which is adjacent to the new medical devices shared spectrum.

For the amateur Radio newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

The assignment of this new medical service to the to the shared 13 centimeter band was not much of a surprise to those who have been following the communications politics taking pace in Washington of late. (ARRL, ANS)

**

RADIO PLANNING: ARRL BOD APPROVES NEW 9CM BANDPLAN

The ARRL Board of Directors has unanimously voted to approve a news 9 centimeter band plan. This, as presented to it by the League's UHF and Microwave Band Plan Committee.

In its findings, the committee recognized that local conditions or needs may necessitate deviations from a band plan. Also that regional

frequency coordinating bodies may recommend alternatives for use in their respective regions.

Several interesting notes about the new bandplan include an advisory that weak signal terrestrial legacy users should be encouraged to move to 3400.3 to 3401.0 MHz, as time and resources permit. Also that broadband segments may be used for any combination of high-speed data, amateur television and other high-bandwidth activities. Division into channels and or separation of uses within these segments may be done regionally, based on need and usage.

The new plan also notes that per I-T-U Radio Regulation 5.149 that in some regions these band segments are also used for Radio Astronomy. As such, amateur radio use of these frequencies should be first coordinated with the National Science Foundation.

Earlier this year, the committee asked radio amateurs for comments on a proposed 9 cm band plan. At that time it explained that the purpose of these band plans is to share information about how the amateur spectrum is being used and to suggest compatible frequency ranges for various types of application. (ARRL)

**

RADIO LAW: FCC DENIES CALL IDENTIFICATION CHANGE REQUEST

The FCC has again denied a rule making petition from Glen Zook, K9STH, of Richardson, Texas. One that requested that Section 97.119(a) of the Commission's Rules be amended to include an exception to the station identification rule.

Accorsding to the FCC, Section 97.119(a) provides that an amateur station must transmit its assigned call sign on its transmitting channel at the end of each communication, and at least every 10 minutes during a communication.

In his petition Zook asserted that the requirement that a station transmit its assigned call sign at the end of each communication is routinely violated by amateur operators.

The FCC says that Zook proposed to address this by adding to Section 97.119(a) which was an exception formerly contained in the Commission's regulations pertaining to the Amateur Radio Service. Specifically, K9STH requested that the rule be amended to provide that if an amateur station transmits its call sign during its first transmission, the call sign need not be transmitted at the end of the communications if the total communication is less than three minutes. Zook referred to this as the "3-minute rule."

In denying Zook's request the FCC noted that his proposal to reinstate the "3-minute rule" was dismissed twice in the last five years. It says that his latest petition sets forth no new facts or changed circumstances warranting further consideration of the proposal. As

such, the FCC concludes that the current petition is repetitive and as such it is being dismissed. (FCC)

**

FCC NEWS: SEAN LEV NAMED NEW FCC GENERAL COUNSEL

Federal Communications Commission Chairman Julius Genachowski has announced that Sean Lev, currently Deputy General Counsel and Special Advisor to the Chairman, will become FCC General Counsel. This after Austin Schlick announced his decision to step down as the agency's General Counsel, effective mid-June.

According to his bio, Lev came to the FCC from the Department of Energy, where he served as the Acting General Counsel and Deputy General Counsel for Environment and Nuclear Programs. Before joining the D-O-E in June 2009, Lev was a partner at Kellogg, Huber, Hansen, Todd, Evans & Figel, where his practice focused on telecommunications, administrative law, and appellate and general litigation. (FCC)

**

HAM HAPPENINGS: HAM RADIO AT THE 2012 MENSA ANNUAL CONVENTION

The 2012 Mensa Annual Gathering and National Convention will be held July 4th through the 8th in Reno, Nevada. During the gathering, the on-line Mensa amateur radio special interest group will be sponsoring the Special Events Station N-7-M. According to Bil Munsil, K1ATV, of Mesa, Arizona, there will be field day-type operation from the parking structure on top of the Silver Legacy resort. There also may be a 2 meter station and possibly an amateur fast scan ATV station in the lobby of the Reno Ballroom. More about the Mensa convention is on-line at www.ag.us.mensa.org. (K1ATV)

**

HAM HAPPENINGS: FOX CITIES ARC TO COMMEMORATE AIRVENTURE 2012

Jon Oldenburg. AB9AH, tells Newsline that the Fox Cities Amateur Radio club will once again be hosting a special event amateur radio station at the EAA Airvenute 2012. This from July 25th to the 29th.

Station W9ZL will operate each day from 1500 to 0000 UTC from the Airventure venue in Oshkosh Wisconsin. Stations will be active on 7.250 and 14.250 MHz SSB. Also on 52.550 MHz FM.

For a commemorative please QSL with a large self addressed stamped envelope to FCARC AirVenture 2011, PO Box 2346, Appleton Wisconsin, 54912.

According to AB9AH this will be the 19th year that the Fox Cities club will be hosting this commemorative Airventure station event. (AB9AH)

**

HAMVENTION 2012: OFFICIAL FIGURE SAYS OVER 24000 ATTENDED THIS YEAR

The numbers are out and they show conclusively that attendance at the Dayton Hamvention is on the rise. Amateur Radio Newsline's Don Wilbanks, AE5DW, has more:

--

The official attendance of Hamvention 2012 reached 24,483. This good news was announced by 2012 Hamvention General Chairman Mike Kalter, W8CI, at the Dayton Amateur Radio Association meeting Friday night, June 1st.

According to Kalter, this was an increase over last year. He attributed it in part to the excellent weather during Hamvention weekend.

W8CI also noted that many vendors reported excellent sales during the three days of Hamvention. Also that many restaurants, hotels and motels also reported increased sales. This contributing to an estimated $10 million economic impact for the region.

For the first time this year, a $3 Dayton Attractions Tour Shuttle ran from Hara's main entrance Friday and Saturday. Stops included the National Museum of the U.S. Air Force, Wright Dunbar Interpretive Center, the Dayton Aviation Heritage National Historical Park and Carillon Park.

In his address to the club, Kalter said that Hamvention would not be possible without the 500 plus volunteers who manage every aspect of the event. For those not aware, the Dayton Hamvention is the largest amateur radio gathering in the world and one of the largest events of its type operated entirely by volunteers.

Planning is already beginning for the 62nd Hamvention which will be held at Hara Arena May 17, 18 and 19, 2013. We plan to be there and hope that you will be too.

For the Amateur Radio Newsline, I'm Don Wilbanks AE5DW, in southern Mississippi.

--

And one side note. Not to be forgotten was a high altitude balloon launch that was again part of Hamvention activities. The two-hour flight reached an altitude over 87,000 feet and landed in a pasture approximately eight miles southwest of the Hara Arena launch point. Ironically, the pasture was owned by a ham, Donald Fourman, AB8OS. (DARA)

THE CHANGING OF THE GUARD: VHF/UHF EXPERT EUGENE ZIMMERMANN, W3ZZ - SK

We seem to say it more and more of late, but the changing of the guard in amateur radio continues with word of the passing of VHF and UHF expert Eugene Zimmerman, W3ZZ.

Zimmermann, of Gaithersburg, Maryland, passed away on Sunday, June 3rd, was likely best known in ham radio circles as the author of the popular QST column "The World Above 50 MHz" that he wrote from 2002 to 2011. He also served on the ARRL Contest Advisory Committee, edited the VHF contesting column for CQ Contest magazine during its five-year lifespan and was director of the CQ VHF Contest from 2000 through 2002.

First licensed in 1956, Zimmerman earned the coveted VUCC award on 50, 144, 222, 432, 903 and 1296 MHz, as well as DXCC, Worked All States and Worked All Continents on 6 meters. He also logged several national Top-10 finishes in the ARRL November Sweepstakes as well as a second-place North American finish in the CQ World Wide CW Contest operating from VP2MDD. W3ZZ also placed in the Top 10 several times in the ARRL VHF QSO Parties and in the ARRL VHF Sweepstakes.

Zimmerman was an ARRL Life member. He earned a PhD in Microbiology from the University of Maryland in 1968. He began his professional career at the National Institutes of Health where he spent a year as a technician studying respiratory viruses. This experience sparked an interest in virology and conquering the common cold. After this, he conducted early research at National Institutes of Health, studying the relationship between retroviruses and cancer, the use of the simian model for studying leukemia and the use of interferon as an immune system modulator.

In 1976, he joined the National Institutes of Health Grants Associate Program, which groomed promising scientists for careers in managing N-I-H research programs. Zimmerman was then recruited to be the Scientific Review Administrator of the Allergy and Immunology Study Section of the Immunological Sciences Integrated Review Group, where he evaluated research proposals to provide funds for research in immunology.

Eugene Zimmerman, W3ZZ, was a member of the Delmarva VHF and Microwave Society, the Grid Pirates Contest Group, a Past President of the Potomac Valley Radio Club and an honorary member of the Connecticut Wireless Association.

As we go to air memorial services had not yet been announced. At the time of his passing Gene Zimmermann, W3ZZ, was age 71. (ARRL)

WORLDBEAT: 2012 OLYMPIC TORCH RELAY TRACKED ON APRS

The 2012 Olympic Torch Relay route is being tracked on the APRS.fi web site. To see it go to http://aprs.fi/ and enter Torch2012 in the Track Callsign field. Also information on the Worked All Britain Follow the Torch Award is on-line at www.worked-all-britain.co.uk. (GB2RS)

**

WORLDBEAT: SPECIAL CENTENIARY CALL FOR WIA

2012 is the Centenary of the Wireless Institute of Australia being established in the State of Queensland. The special Centenary callsign, VK-100-WIQ, was activated on June 1st and will be active through July 31st by way of the W-I-A affiliated radio clubs in Queensland. There is also a Centenary QSL card and a Centenary award available. Details can be found at www.wia.org.au. (WIA)

**

HAM RADIO IN SPACE: LISTEN TO HORYU-2 ON THE WWW

YO8SSQ and YO8TLC have made available a web based receiver to enable listeners to hear the new HORYU-2 amateur radio satellite. This when the new bird is within range of Romania.

The WebSDR receiver is located at the Astronomical Observatory Department of the University in Suceava. That in grid locator KN 37 at a height of 350 meters above sea level.

The hardware consists of two SDR receivers which are fed into 48 kHz sound cards on an AMD Sempron 2600+ computer running Vector Linux. The web page displays a track showing the current position of HORYU-2. It also provides coverage of the 3.65 to 3.710 MHz portion of the 80 band.

You can listen to the HORYU-2 and 80 meter WebSDR receivers at tinyurl.com/sdr-sat-receiver

(HORYU-2 TEAM)

**

DX

In DX Word from the ARRL that 2012 XX9E operation from Macao has been approved for DXCC credit. If you worked that operation you can submit it for DXCC. On the air, ON8ZZ, ON3JA and ON3NT will be active as MU stroke OT9Z from Guernsey between July 16th to the 20th. During their stay on Guernsey, they plan to activate Herm Island on the 17th, Sark Island on the 18th and Alderny Island on the 19th. The group will then head south to be active from Chausey Island between July 27th and the 29th using the call F/OT9Z from . QSL all operations via OT9Z.

OE4JHW reports that he will do a suitcase DXpedition to Kuredu Island between September 2nd and the 4th. More details including the QSL route will be forthcoming in the near future.

AC8G who was planning a 6 night stay in Grenada for the CQ WW SSB Contest, October 27th and 28th, has announced that the airline that was to transport him has cancelled his flight. Other dates offered were not acceptable, so he has terminated his plans the operation.

DL9WVM, will once again be active portable A6 from Dubai through June 30th. . His activity will be on 80 through 10 meters. QSL via Logbook of the World or via his home callsign, direct or by the bureau.

DL2RMC is also on the air slash A6 from Abu Dhabi which started around May 29th. He will be there for 3 weeks depending on his job in United Arab Emerites. QSL as directed on the air.

Lastly N0TG has announced a 2013 operation to Sint Maarten between March 15th to the 23rd. He states that he has the facility arranged, as well as tickets, and all other aspects required so you can look for N0TG, AA4VK and N1SNB to sign slant PJ during that operation. Activity will probably be on all bands and modes. QSL's all three callsigns will go via N0TG.

(Above from various DX news sources)

THAT FINAL ITEM: A PRIMER ON ILLW

And finally a bit of ham radio history on International Lighthouse and Lightship Weekend. From down-under here's Felix Scerri, VK4FUQ:

--

The 15th annual International Lighthouse and Lightship Weekend in August has inspired many to register early with 32 countries and nearly 250 registered already.

Although this is just over half of the countries normally attracted by the event it is slightly ahead of expectations with ten weeks to go.

The weekend increases the public awareness of lighthouses and lightships and their need for them to be preserved, promotes amateur radio and fosters international goodwill.

The event was started mainly by late Mike Dalrymple GM4SUC and the Ayr Amateur Radio Group in 1995 as the Northern Lighthouse Activity Weekend with stations at Scottish lighthouses. It quickly went international.

The third weekend in August coincides with the worldwide lighthouse open day organized by the Association of Lighthouse Keepers that sees public access to many of the featured lighthouses.

During the weekend a group or individual sets up an amateur station at or adjacent to a lighthouse, lightship or marine beacon that is listed.

To register, complete a short online form, read the event rules and have lots of fun. You will see complete statistics on past events, reports from previous years and ILLW are on Facebook too.

--

This year's International Lighthouse and Lightship Weekend is slated for August 18th and 19th and runs 48 hours. If you have access to a lighthouse or lightship you want to activate, you can register for the event on-line at www.illw.org. (WIA News)

WIANEWS WEEK COMMENCING JUNE 10 2012.

WIA Centenary DVD's

The WIA AGM and Annual conference in Mildura

German Radio Ham arrested in Greece

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 3 2012.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

WIA Centenary DVD's

The WIA Centenary DVD set with footage from the 2010
Canberra event have been produced and distributed to most
people who pre-registered interest in receiving a copy.
The three DVD sets are $25 and if you are still chasing a
copy, please send an email to Robert Broomhead VK3DN at his

WIA email address vk3dn@wia.org.au

The WIA AGM and Annual conference in Mildura was held a fortnight ago, but we can't stop talking about it. Intrepid reporter Robert VK3DN provided the material for this report.

Visitors came from far and wide, Laurie ZL1ICU:

{00:22} I'm Laurie Mathews [..] it was great.

There were activities outside the AGM and Technical Conference, traditionally intended for partners, but it attracts its fair share of amateurs as well. Jean VK3VIP:

{00:39} Hi this is Jean [..] we've had here.

In our report last week we highlighted some of the discussion that took place during the open forum. One of the hot topics is: "How to promote Amateur Radio?" Roger VK2ZRH on the topic:

{01:02} This is Roger [..] remarkably good use.

And finally a word from Trent, VK4TS

{00:21} This is WIA Director [..] in Perth in 2013.

Next year in the last weekend of May we'll be hosting the conference in VK6. Mark your diary now so you don't have any surprises. Keep an eye on airfares, or plan to share your ride with a fellow amateur.

While you're on the sun-set coast, I thoroughly recommend that you spend some time here to have a look around. There are many day trips around Perth alone and if you make the time, you'll find an amazing array of flora and fauna, not to mention far flung amateurs across Western Australia.

On the conference front, we expect to call for expressions of interest for the technical talks in the coming weeks. More information about that will be included on the News and in AR magazine.

Still recovering from the lurgy that Bob VK6POP shared with me, I'm Onno VK6FLAB.

ON YOUR BIKE!

Here is WIA Director Bob Bristow VK6POP

"I was recently contacted by Robert VK6ARM, who is involved with the VKS 737 outback radio network. This network conducts regular skeds every day to keep in touch with travellers around Australia in order to ensure their safety and to pass on messages.

Robert told me that they had been alerted to the presence of a pair of Korean cyclists who had set off from Laverton in Western Australia to cycle along the Anne Beadell 'Highway' to Coober Pedy in South Australia.

It was reported that the cyclists appeared not to have a support crew, and that they were not carrying much in the way of supplies.

It was apparent that the Korean Cyclists took the term "highway" to mean it was a major road with supply assured along the way. The Anne Beadell highway is a track.

Robert sought my help to put him in touch with the Amateur Radio Travellers Net, in case there were some Amateurs along the road who could render assistance. I referred him to Bob VK6KW, who along with others conducts the travellers net on 20 metres every day..

It turned out that no Amateurs were travelling that road, however there were some on the road who use the VKS737 network. Police services have been alerted.

A few people have come across the cyclists and have given them food and water, as much as they can spare. Others have left water supplies along the track for them.

We can only hope that these fellows both survive their ordeal and appreciate their folly, and the concern and support given to them by complete strangers.

It's also a fine example of successful collaboration between volunteers of two radio based services dedicated to the safety of travellers in the outback.

The Amateur Radio Travellers Net operates every day at 0200 UTC on 14.116 MHz. Information about the VKS737 network can be found on
vks737.on.net

Who said radio is a thing of the past?

I'm Bob VK6POP

Tune in to understand VHF marine radio

The Australian Communications and Media Authority has produced two new videos that provide recreational boaters with up to date information about using VHF marine radios.

The first video shows recreational boaters the importance of operating VHF marine radio correctly. It includes a re-enactment of an actual rescue by the NSW Office of Boating Safety and Maritime Affairs and Marine Rescue NSW.

The second video, produced in collaboration with the Bureau of Meteorology, is about how and why boaters should always check the weather on their VHF marine radio before setting sail and while at sea.

(Blake Murdoch ACMA Media)

Radcomms2012 Run this week.

The Australian Communications & Media Authority's annual radiocommunications forum ran last Wednesday and Thursday at Melbourne's Sofitel on Collins, boasting more than 20 expert speakers.

Timely spectrum-related topics included the growing requirements of broadband mobile, satellite observations of climate change, spectrum issues and the convergence review, and space astronomy.

For over six years, the Radcomms program series have become the peak industry gathering to discuss Australian spectrum issues and future planning.

>From cyclone warnings to planetary health, from galaxies to gigabits, from floods to soil fertility, radio spectrum is not only a core enabler of our modern mobile economy, but also a vital tool in understanding the world and universe around us.

This year's key speakers included Dr Compton Tucker, senior research scientist in the Earth Sciences Division at NASA's Goddard Space Flight Centre; Dr Georg Schone, chief technology officer, LS telcom AG; and Mike Quigley, CEO NBN Co.

HOME OF THE GOOD GUYS

Air Cadets radio exam

The Radio Communications Foundation in the United Kingdom has announced agreement has been reached with the Air Cadets Organisation to accept a pass in their ACO Radio Communications Foundation Equivalent examination as equivalent to a pass in the Foundation Radio Amateur examination.

Ofcom has also accepted that the ACO Foundation Equivalent examination syllabus meets the Radio Amateur Foundation level requirements and will issue a Radio Amateur Foundation level licence via the Radio Society of Great Britain on receipt of a successful Air Cadet candidate pass details.

The RSGB is offering those under 21 who achieve their licence through this route a year's free membership of the Society.

SILENT KEY

As you know we seldom do 'Silent Keys' on the National News, instead leaving it to local club and state level news.

However we have learnt of the passing recently of VK6BDB Sean Leahy.

No not the Cartoonist but his Father who was aged 86!

A tribute written by cartoonist Sean Leahy after the passing of his father, his story made me really think about the service that this man had given, it was posted the day before ANZAC day.

VK6BDB was born in Long Beach, California and moved to Ireland at the age of 11.

He joined the Irish Army then the British Merchant navy as a radio officer and served on the famous salvage tug the "Turmoil" in the Atlantic only venturing out in terrible weather when ships were in distress.

He stuck with that stoically for years despite a constant battle with seasickness. He married in 1956 and brought his 2 young children to Australia in 1960.

He served as a land-based radio officer for OTC Coastal Radio and took postings with his family to Broome, Perth and Carnarvon in Western Australia before his retirement.

He was in retirement also a ham radio buff. His regular "skeds" with other former radio operator friends overseas and around Australia who only knew him by his voice were a daily ritual he kept for years.

Another Silent Key is one Steve Mendelsohn W2ML.

W2ML was a lifelong friend of OUR friend and NewsLine Editor Bill Pasternak WA6ITF.

This is guy who completely changed Bills life!

" It was in the winter or early spring of 1970. I was dating a gal named Sharon Wagner and every Sunday morning found me winding my way from Brooklyn out to Valley Stream to pick up the lady to go - well - go somewhere or do something. Be it just lunch and a movie or whatever, I would pick her up and we would be off to that proverbial somewhere. And it also became a ritual for everyone on WA2SUR to say hello to Sharon and for her to say hi in return. This with me in control of the transceiver. A Regency HR-2 as I recall.

Well this one Sunday after we had all said our hello's via WA2SUR, Steve says something like: "-you two have been going out for months. When are you going to ask the girl to marry you?"

At first I hemmed and hawed a bit looking for an excuse, but there was none to be had. Steve had put me into a corner where it was either catch the fish or cut bait and run. I knew that I was in love with the lady, so with much of New York hamdom listening in on 146.73 MHz, I asked Sharon to change her last name from Wagner to Pasternak. She immediately accepted and that September Sharon and I said "I Do."

Being honest: If not for Steve, I do not know if I would have asked Sharon or any gal to become my wife. But thanks to him, I was forced to make a decision that was definitely the right one. 40 years so far and headed toward 41.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

630m in Monaco

The telecoms regulator of the Principality of Monaco has allocated the segment 472-479kHz to the amateur service, with secondary status, with a maximum power of one watt eirp.

Radio waves remotely trigger insulin

Researchers have remotely activated genes inside living animals, a proof of concept that could one day lead to medical procedures in which patients'

genes are triggered on demand. The team used radio waves to switch on engineered insulin-producing genes in mice.

Jeffrey Friedman, a molecular geneticist at the Rockefeller University in New York and lead author of the study, said that in the short term, the results will lead to better tools to allow scientists to manipulate cells non-invasively. But with refinement, he thinks, clinical applications could also be possible.

Friedman and his colleagues coated iron oxide nanoparticles with antibodies that bind to a modified version of the temperature-sensitive ion channel TRPV1, which sits on the surface of cells. They injected these particles into tumours, grown under the skin of mice, then used the magnetic field generated by a device similar to a miniature magnetic-resonance-imaging machine to heat the nanoparticles with low-frequency radio waves. In turn, the nanoparticles heated the ion channel to its activation temperature of 42°C. Opening the channel allowed calcium to flow into cells, triggering secondary signals that switched on an engineered calcium-sensitive gene that produces insulin.

After 30 minutes of radio wave exposure, the mice's insulin levels had increased and their blood sugar levels had dropped.

"The great thing about this system is that radio wave heating can penetrate deep tissue, and TRPV1 can focus that stimulus very locally to just where you have the nanoparticles," said David Julius, a physiologist who studies TRPV1 at the University of California, San Francisco.

Friedman said that his team did not develop the method as a way of managing diabetes; insulin and blood sugar levels simply provide convenient physiological readouts for checking that the remote control is working. "There are many good treatments for diabetes that are much simpler," he said. However, the system could potentially be engineered to produce proteins to treat other conditions.

German Radio Ham arrested in Greece

Greek newspapers report on the arrest of a German radio amateur, Baldur Drobnica DJ6SI on holiday in Mastichari, Kos, apparently for the 'crime' of operating amateur radio equipment.

Greek news reports appear to indicate the 75 year old was arrested under a 1929 decree for illegal operation of radio telegraph equipment.
The Aegean News reports that he was on holiday with his wife who has Alzheimer's.

A photograph published by Aegea News show injuries reportedly received from handcuffs.

NEWS FROM ARNEWSLINE USA

HAM RADIO BEING DRAWN INTO DISPUTE OVER OWNERSHIP OF SCARBOROUGH REEF

Ham radio is being drawn into a dispute over the territorial ownership of Scarborough Reef. This as a website pops up claiming correspondence between the Philippine Amateur Radio Association and the ARRL supports mainland China's territorial claim in regard to the land mass that's also known as Panatag Shoal or Bajo de Masinloc.

The report on the Sina website relating to amateur radio says that back in 1990, the then Philippine ambassador to Germany indicated clearly in his letter to a German radio amateur on February 5th that, Scarborough was not within the Philippine territory and sovereignty. This, according to the National Mapping and Resource Information Authority of the Philippines.

The documents issued by the National Mapping and Resource Information Authority of the Philippines and the Philippine amateur radio organization to the American Radio Relay League on October 18 and November 18, 1994 had also are claimed to confirm that the Philippine territorial limits and sovereignty was stipulated by the Article 3 of the Treaty of Paris way back in the year 1889.

Scarborough Reef is located between the Macclesfield Bank and Luzon Island of the Philippines. Over the years it has seen several major DXpeditions and still ranks high as a wanted entity by DXers worldwide. .

You can read the entire claim for yourself on-line at
tinyurl.com/Scarborough-Reef.

==========

WEIRD AND WONDERFUL

Researchers grow Biological Hard Drive from Bacteria

Researchers at the University of Leeds have used a type of bacterium which 'eats' iron to create a surface of magnets, similar to those found in traditional hard drives, and wiring. As the bacterium ingests the iron it creates tiny magnets within itself. The team has also begun to understand how the proteins inside these bacteria collect, shape and position these "nanomagnets" inside their cells and can now replicate this behaviour outside the bacteria. Using this knowledge the team hopes to develop a 'bottom-up'

approach for creating cheaper, more environmentally-friendly electronics of the future.

The magnetic array was created using a protein which creates perfect nanocrystals of magnetite inside the bacterium Magnetospirilllum magneticum. In a process akin to potato-printing on a much smaller scale, this protein is attached to a gold surface in a checkerboard pattern and placed in a solution containing iron. At a temperature of 80�C, similarly-sized crystals of magnetite form on the sections of the surface covered by the protein. The researchers are now working to reduce the size of these islands of magnets, in order to make arrays of single nanomagnets. They also plan to vary the magnetic materials that this protein can control. These next steps would allow each of these nanomagnets to hold one bit of information allowing the construction of better hard drives.

Winter VHF-UHF Field Day

The Winter VHF-UHF Field Day will be held over the weekend of June 23 and 24.

The Field Days have separate sections for single and multiple operator stations. The Field Day runs for 24 hours, but there are also 8 hour sections for operators who may not be able to camp overnight. If you don't like the nice cool weather, there is also a separate Home Station section.

An extra feature in the next Field Day will be an "F Call Challenge", with special certificates for Foundation licensees who participate in any of the single operator sections of the Field Day.

The details have been published in "Amateur Radio" magazine, and they are also available on the contest page of http://www.wia.org.au

(John VK3KM)

The winners of CQ Magazine DX Marathon 2011 have just been announced, and the winner for Oceania, and also Zone 30, is VK4CC, Col Clark! He will receive a trophy for his efforts, a huge achievement in what was really his first year as a serious DXer. Full results are published in the June issue of CQ magazine, out now.

Congratulations, Col!

the news is just in from Bob Locher W9KNI live from Dayton, and who Col cites as his DX Elmer, having been inspired to tackle the Marathon when he read Bob's book "A Year of DX".

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

It is congratulations to VK5VJZ who at 12 minutes into the WIAQ 100 year celebrations became the first appear in the logs as having worked special station VK100WIQ operating out of the 4650 post code zone.

The team who were so "bad" at Cape Liptrap last August have decided to be bad again!

VK3BAD that is.

At the end of August a 20 strong team will travel into the Otway Ranges homing in on The King Parrot Cottage complex near the Village of Pennyroyal for a party. The Pennyroyal Propagation Party , a long weekend of Radio, Delicious Food and Drink and Great Company.

Styled "Wireless Weekends" this inaugural operation follows on from highly popular activations at Cape Liptrap over the past two years, And so great was the demand that the trip was sold out just 3 days after being announced.

The location is high in the mountains with lots of wildlife in the area and great views. The Station will operate on most HF frequencies 160 - 10mtrs and on 6 and 2 mtrs and 70cm with contact to the Melbourne Area via the Geelong 2 mtr repeater. They'll also attempt a live link up on 1250mhz to VK3RTV repeater from a nearby high point which according to plotting software will give a line of sight path of 147km. Also they hope to have a number of live crosses using Skype to access VK3RTV during the weekend so you can see all the action.

So please listen out for VK3BAD on 31st August through until September 3rd.

Further details on QRZ.com under VK3BAD

T6JM

That station from Afghanistan CT1FKN who is signing T6JM is about to depart mid-June. T6JM is mainly QRV on 20m SSB and BPSK31.
QSL T6JM to CT1KFN his home call.

Some special event call signs will be activated to celebrate the London 2012 Olympic and Paralympic Games:

2O12L from London, England and 2O12W from Barry, Wales.

The London 2012 Inspire program has granted the Radio Society of Great Britain (RSGB) -- Great Britain's IARU Member-Society -- use of the "Inspire mark" for these stations.

Both stations will be on-the-air for the duration of the Games, July 27-August 12.

More Special callsigns for UK radio amateurs during 2012

The Radio Society of Great Britain and Ofcom have reached agreement on the optional use of special callsigns for two significant events during 2012.

For the Queen's Diamond Jubilee, all UK amateur stations will have the option of applying for a variation to their licence if they wish, to use a special prefix for a five week period. This will add or substitute the letter "Q" in the place of the Regional identifier in the callsign.

Period: 00.00 BST 5th May 2012 to 23.59 BST 10th June 2012.

For the period of the Olympic Games and Paralympic Games, a similar facility will exist for a seven week period, using the letter "O".

Period: 00.00 BST 21st July 2012 to 23.59 BST 9th September 2012

Read the full details at
http://www.rsgb.org/news/articlelinks.php?id=0263

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

In the past I've talked about the history of Amateur Radio and how as a new participant it's easy to make the same mistakes as those who came before you because you don't yet know enough to ask the right questions, or the right place to look.

Recently I had a conversation on air with an Amateur who had been fascinated with the hobby since the late 1940's, so over 60 years of experience in the field. At the time we were talking about inspiration, that is, what is it that inspired him to become part of the hobby.

He told of a time when he built a kit and made a transmitter and it worked. He was hooked. And while that story continues on, I'm going to go sideways to show a little of the world and how it's changed in those 60 years.

We're all familiar with the idea of going from horse and cart to the automobile. Unless you've actually sat in a cart and experienced it, it's still only sort of an understanding of the change and evolution.

Right now, you're likely sitting next to a radio that has a VFO on it. Probably it's got a digital display of some kind, as you turn the VFO, the display indicates what frequency you're tuned to. The pre-cursor to this is a dial with frequencies indicated and a vernier that indicated what the dial was turned to.

But there was a step before that.

Imagine for a moment that you have a simple receiver. Its got a dial on it that is numbered 1 to 100. You can turn the dial and change its tuning frequency. To know what actual frequency its on, you look up the dial position in a calibration book. So, 39 might be 3.582 MHz. So, you set-up your simple receiver in such a way that you've got it set to the place where

you're wanting to receive.

Then, you turn on your transmitter and tune it to the same place. You know you're in the right place when the simple receiver starts to squeal and then when its tuned it's howling.

Then, you turn on your receiver and tune that to the same place in the same way, you hear it squeal.

Now you can actually key your morse or PTT key and start transmitting.

Sounds like a lot more work than what you go through today.

Here's something else. The simple receiver, it's called a wave meter and it's calibrated in a laboratory. Presumably the manufacturer has a set of crystals that oscillate on the appropriate frequency and the wave meter is calibrated and logs are taken to make the dial position co-inside with a known frequency.

That's what it was like in 1950 to tune your radio.

And here I am with a Yaesu 857d that fits in my hand, runs across multiple bands and transmits up to 100 Watts.

Perhaps that's more illustrative than a horse and cart.

That's history, right there.

I'm Onno, VK6FLAB

REWIND

A leaf out of our history thanks to Jim Linton VK3PC

The American Radio Relay League or ARRL is planning to celebrate its centennial in 2014 and has asked individuals and clubs to start thinking of how best to mark the foundation of the organisation.

Its President Kay Craigie N3KN wants the once-in-a-lifetime event to be truly special.

You may recall that Kay N3KN was the very last to work the special station VK100WIA during the Institutes celebration, with the WIA President Michael Owen VK3KI on the microphone.

The ARRL will draw on historical collections and the memories of living radio amateurs. It will also bring out centennial merchandise.

It encourages local clubs to develop public relations events in 2014 that are both meaningful to radio amateurs and tied in to the observance of the ARRL's 100th birthday.

RSGB also looks at its centenary

The Radio Society of Great Britain has formed a Centenary Working Group headed by Rob Harwood G0HRT who is now planning a number of events next year for the RSGB's 100 years.

This may include Special Event Stations, local club events and other acuities to the hobby.

Rob G0HRT is seeking volunteers among the RSGB membership and may be contacted through centenary@rsgb.org.uk

And a little closer to home, the centenary of the wireless institute in Queensland will happen this year, 2012

The Queensland centenary committee, invite you to celebrate this Centenary and all of its wonderful history through to July 31st .

They have developed a special QSL card, along with a centenary award. These can be Viewed on the WIA website, under news and events, VK4 centenary.

Check out website wia.org.au for further details of history and events.

SOCIAL SCENE 2012

JUN 8-11 VK4 cancelled ! FNNQARG! QLD Cassowary Coast CANCELLED!!!!!!!!!

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

4th July Week Special Event from the Birthplace of John Dunlap

Posted: 08 Jun 2012 07:27 AM PDT
http://forums.qrz.com/showthread.php?349343-4th-July-Week-Special-Event-from-the-Birthplace-of-John-Dunlap&goto=newpost

Once again the Strabane A R S will be running a special event station from the town of Strabane Co. Tyrone Northern Ireland the birthplace of John Dunlap the printer of The American Declaration of Independence. The town was also the birthplace of Sir Guy Carleton the Commander in Chief of British Forces in North America.

We will be operating using the club call MN5ALJ on all HF bands that are open so hope to make the hook-up with you over the 4th July week.

Terry GI7THH

>Patty N6BIS

Yes, definitely!

Recent positive news about amateur radio, including increasing numbers
of licensees, technical innovations, and public service activities, is
there if you look for it. Positive and relevant experiences within
amateur radio are possible for those willing to learn, as well as
respect and work with others towards a common good. Unfortunately,
reading some on-line forums ostensibly about amateur radio might leave
the lingering impression that it's full of people with obsessive or
anti-social personality disorders, those with apparently nothing better
to do with their time, or even the criminally insane. And I'm sure that
the regulators are also watching and drawing their own potentially
unfair conclusions based on this non-representative sample. That's why
I feel that it's important to emphasize this ongoing news about
positive, constructive events within amateur radio, and bring it (within
fair-use guidelines) to on-line forums where it would be on-topic.

GCHQ And Bletchley Park Link Up With The Times Cheltenham Science Festival:

Posted: 07 Jun 2012 05:05 PM PDT
http://www.eham.net/articles/28446

GCHQ And Bletchley Park will be joining forces and inviting the public to take part in a unique recreation of the wartime codebreaking process at this year's Times Cheltenham Science Festival from 12-17 June. These activities will form part of the celebrations marking the centenary of the birth of Alan Turing. For the first time, members of the public will be invited to encrypt a message on one of GCHQ's Enigma machines at the Town Hall, before it is sent to Bletchley Park, home of the wartime codebreakers. Once at Bletchley Park, the message will be decrypted with the help of the Turing Bombe Rebuild and the decoded message 'tweeted' back. The whole event will be live and interactive using a two-way Skype videoconference, ensuring that members of the public in both Cheltenham and Bletchley Park can see every part of the encryption/decryption process. Further interest will be added during the weekend 16-17 June, when the Cheltenham Amateur Radio Association will transmit the encrypted messages to Bletchley Park in Morse code. The messages will be received by their counterparts in the Milton Keynes Amateur Radio Society who will hand them on to the decryption process before 'tweeting' the decoded message back to Cheltenham.

//
Hamilton, MT Exempts Ham Radio Operators from Cell Phone Driving Ban:

Posted: 07 Jun 2012 05:04 PM PDT
http://www.eham.net/articles/28445

HAMILTON -- In July, Hamilton drivers will have to go hands-free when making calls from behind the wheel. Hamilton City Council approved Tuesday a ban on driving and talking on the phone within city limits, with a special exception for ham radio operators. No one showed up to comment during the first hearing last month, but this time the proposal brought several amateur radio operators complaining the ban on "handheld electronic communication devices" could shut them down entirely. The hams said that wasn't just bad for their hobby, but could put them in a position of breaking the law if they were using their radios to help in emergencies. Some testified that their new equipment is designed to keep eyes on the road. Amateur radio operator John Mann said the way he uses his radio, it's less distracting than searching for stations on a typical car radio. "I'm

looking straight ahead," Mann said. Council members agreed with the hams' arguments, and added an exemption for licensed amateur radio operators in addition to people using two-way radios for work or cell phones to report emergencies or calling while parked off the road. Police are also exempt.

Forecasters Calling for 'Near-Normal' Hurricane Season:

Posted: 07 Jun 2012 01:24 PM PDT
http://www.eham.net/articles/28440

Forecasters with the National Hurricane Center are calling for a "near-normal" Atlantic hurricane season for 2012. In its initial outlook for the 2012 Atlantic hurricane season -- which began Friday, June 1 and runs through November 30 -- the National Weather Service's Climate Prediction Center (CPC) is calling for a 50 percent probability of a near-normal season, a 25 percent probability of an above-normal season and a 25 percent probability of a below-normal season. The 2012 hurricane season began early when Tropical Storm Alberto and Tropical Storm Beryl both developed several days before the official start of the season, the first time since 1908 that two tropical storms developed early; the only other year with two storms so early in the

season was 1887.

A New Award for DXpeditions

Posted: 08 Jun 2012 11:53 AM PDT
http://forums.qrz.com/showthread.php?349369-A-New-Award-for-DXpeditions&goto=newpost

The Cass Award encourages DXpeditions to maximize the number of DXers they work by annually presenting a $1000 prize to the single-operator DXpedition that works the most unique callsigns within a 4-week interval. This award is named in honor of Cass WA6AUD (SK), whose stories in the West Coast DX Bulletin taught a generation of DXers that DX IS! The winner of the 2012 Cass Award will be announced in March 2013.

An ☐unlimited☐ award category with a larger prize is under development for introduction in 2013. If you☐d like to pledge a contribution, send email to Contribution@CassAward.com .

To learn more, visit the Cass Award web site at www.CassAward.com .

**

RADIO LAW: FAMED GERMAN DX☐ER DJ6SI ARRESTED IN GREECE

In what has to be one of the strangest international legal issues involving a ham radio operator, famed German DXpedition leader Baldur Drobnica, DJ6SI, has been arrested in Greece. But in a strange turn of events he was permitted to return to Germany if he promised that he would come back to Greece for trial. Amateur Radio Newsline□s Bill Pasternak, WA6ITF, is in the newsroom trying to sort it all out:

--

Let me start by saying that it is very hard to know what has really taken place because most of the news sources are foreign language ham radio blogs and other news reports that have been electronically translated into English. Also, as we go to air there comes a purported statement in German from the person in the center of the controversy, DXer Baldur Drobnika, DJ6SI. It was posted to QRZ.com by YO4PX after being translated by DK5KF. As that is the latest information, lets start there and then take a look at the rest of the story as it seemed to unfold.

The statement credited to DJ6SI reads as follows:

"June 3rd, 2012, 20:46 (UTC 2)

Dear Michael,

I wasn□t charged with espionage. As a reason of my arrest it was stated that:

1. I performed radio traffic without the approval of the Greek authorities;

2. I owned transmitting equipment which enabled the reception of other frequencies;

To the accusation was later added an other point:

I hindered the visualization of the content of my notebook.

I would like to ask you to eliminate the information that I was arrested for espionage, or to replace it with my statement.

Vy 73 Baldur DJ6SI"

Now, the back story:

According to news reports, 75 year old Baldur Drobnica, DJ6SI was on holiday on the Greek island of Kos. That□s where he was reportedly taken into custody for the crime of espionage which was quickly reduced to operating amateur radio equipment. This, even though both Greece and Drobnika□s home country of Germany are both signatories to the CEPT pan-European Amateur Radio licensing agreement.

Even so, Greek news reports appear to indicate DJ6SI was actually arrested under a 1929 Greek law covering illegal operation of radio telegraph equipment even though the CEPT agreement would likely superscede the older law.

According to Greek ham radio blogs the accusation of espionage was based on a complaint that he was □producing strange noises□ with his computer. Those strange noises turned out to be CW and RTTY. This was corroborated by many who notice reports of his operation on Internet-based DX spotting clusters.

Quite quickly the espionage charge appeared to disappear and the reduced charge under the 1929 law implemented. And in a strange turn of events, DJ6SI was permitted to return to Germany but he was told that he must return to Greece to stand trial on June 7th. That hearing is likely taking place as this newscast goes to air. But as several Greek hams have pointed out, DJ6SI would have not been permitted to leave the country if there were any real case or even a suspicion that he was engaged in spying activities.

And one Greek ham radio blog took the matter a lot further. The Radio Amateur Association of Greece issued an angry statement defending DJ6SI. It claims that the responsibility for the entire matter should be placed on the to the shoulders of the officer that ignored laws and regulations, arrested DJ6SI and led him to court. They also place blame on the prosecutor who they say was quick to suggest his conviction based on a law passed in 1927, in the year 2012.

The hams also point out that radio amateurs have been complaining for years to the responsible Ministry that public services and institutions and particularly police have not been informed properly about ham radio. The association says that it□s the governments duty to inform all relevant authorities about amateur radio and its operations.

Obviously. This story is far from over.

For the Amateur Radio Newsline, I□m Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

To QSO LU - CX - CE - PY - ZP - etc. you will Focus South America during
WWSA Contest

Using a very familiar exchange and format, contesters have a prime option
from South America during the second weekend of June, with the WWSA CW
Contest, sponsored by the Grupo Argentino de Radiotelegrafia (GACW).

The focus is on South America, as the 24 hour contest runs from 1500 GMT on
Saturday 9 June to 1500 on Sunday 10June.

We has been trying hard in recent years to get more US and Canadian
stations to join in the WWSA CW Contest, and those that tune in during the
24 hour contest period should recognize a very familiar rhythm.

The contest exchange is the same as CQ WW, using a signal report and your
CQ zone. Example: 59905, 59911, etc.

Multipliers are also counted the same way, making it a familiar format.
Country + CQ zone

Just like CQ WW, contacts between stations in your home country are okay
for zone or country multipliers, but have zero point value. Same continent
= 1 pt - Different continet = 3 pts.

There is one difference in how your score is totaled, as South American
stations are worth extra points - 5 points for stations outside of South

America.

It is a kind of a contest in which all the South Americans will play the role of difficult DX since we grant special points.

For this edition, as we did the previous year, we will grant electronic Diplomas to the winners of the most important categories and when the score justifies it.

In our web site you can find multilingual rules, results, pictures and videos, software, etc.

There is a new address for your WWSA 2012 logs = logs@wwsatest.org

WWSA web site www.wwsatest.org

GACW web site http://gacw.no-ip.org

We will be very happy to contact you in the CW HF bands...!!!

Hams who also enjoy the music and television shows of the 1960s are invited to participate in "The 1960s Pop-Rock Music and TV Shows Net" every Wednesday evening at 7:30 pm Mountain Time. The Net airs for one hour on the 224.500 repeater in Tucson during which time we discuss '60s music and TV, and answer trivia questions for both topics. If you would like to participate in the Net and live outside southcentral Arizona and/or do not own 220 equipment, you are encouraged to join us via SKYPE or Echo Link. Please contact our Net VOIP control operator, KE7GRV (Terry) for connection information at: TR-RYAN@COX.NET

We look forward to you joining us for the only net in the country dedicated to '60s music and TV. Until then, keep on rockin' and help keep the sixties alive!

942. SARL News in English 9/6/2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-06-09 16:45:15 UTC
From: website@sarl.org.za
Message-ID: <36567CE27B3045D28BE4ACA3BC169F66@ZAJNBTCSARL01>
Source record: 2759
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 10 JUNE 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,750 MHz FM from Pretoria (other news readers change to suit) with relays on 7 066 kHz and 3 695 kHz SSB.

SILENT KEY

Eugene "Gene" Marais, ZS6TA, became a silent key on Wednesday 30 May. He was a longstanding member of the SARL and the Highveld Amateur Radio Club. He is survived by a son and two daughters, nephew Chris De Beer, ZS6RI, and grandson, Craig Marais, ZR6CM.

Late news: Ann Hill, widow of Dennis Hill, ZS6AWM, informed us that Dennis passed away on 18 February 2012.

Our sincere condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

INTERNATIONAL EME CONFERENCE IN CAMBRIDGE

SKA TO FEATURE IN THE NEXT INTECNET

YOUTH DAY AND NATIONAL AMATEUR RADIO DAY EVENTS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

INTERNATIONAL EME CONFERENCE TO BE HELD IN CAMBRIDGE

The 15th International Earth-moon-earth (EME) conference will be held at Churchill College, Cambridge, between 15 and 19 August. It is hosted by the UK Microwave Group.

This is the first time that this conference will be held in the United Kingdom (UK), and it provides an opportunity to learn about this most technically challenging aspect of our great science-based hobby. In addition to EME-specific lectures there will be presentations on radio astronomy and deep space communications, as both these subjects have much in common with EME. Two Nobel Physics Laureates from the world of radio astronomy will be present at the conference. Joe Taylor, K1JT, is a keen EME enthusiast and will be presenting a paper on MAP65, while fellow-Laureate Professor Antony Hewish FRS is the speaker at the conference gala dinner on Saturday 18th.

With over 150 delegates and 60 partners from 5 continents already registered, this promises to be a great event. All those wishing to attend must preregister for this conference before 1st August. Day passes and a range of accommodation packages from one to four nights are available. See www.eme2012.com for full details.

SKA TO FEATURE IN THE NEXT INTECNET

Prof Justin Jonas of the SKA team will be the guest on the next Interactive Technical Net (INTECNET) on Sunday 17 June 2012 at 19:30. The net will start at 19:30. Prof Jonas will talk about what part of the SKA will come to South Africa and highlight the science that will be done. He will also participate in an interactive session and answer questions from radio amateurs around the country.

Clubs wishing to link their repeater to the Intecnet interactive audio stream, are invited to send details of their landline number to artoday@sarl.org.za by no later than Wednesday.

REPEATER WORK GROUP MEETS ON 23 JUNE

The SARL Repeater manager, Frik Wolff, ZS6FZ, reports that several clubs and repeater groups have responded to an invitation for all division 6 clubs to send their representative to the repeater work group meeting. It will be held at the National Amateur Radio Centre on Saturday 23 June at 09:00.

To assist with catering arrangements, please send details of who will be attending to vubandplanning@sarl.org.za if you have not already done so.

MORE RTA DATE CHANGES

Just to confuse everyone, we had to make more changes to the dates of the SARL Radio Technology in Action symposiums to overcome clashes with other events. The final dates are now as follows: Durban remains on 21 July at the brand new venue on the Howard College Campus of the University of KwaZulu Natal.

Johannesburg has moved to 18 August and Cape Town now moves to 29 September. Port Elizabeth remains on 1 September. Details are also on the SARL web at www.sarl.org.za.

YOUTH DAY AND NATIONAL AMATEUR RADIO DAY EVENTS

Have you organised a National Amateur Radio and Youth Day event? If you are planning an event or activity please send the details to artoday@sarl.org.za today.

The Sasolburg Amateur Radio Club as well as the Boland Amateur Radio Club has arranged various activities. SARL NEWS has not heard from any other Radio clubs.

The programme for Saturday 16 June will be updated and made available on the web on Monday 11 June.

Just in case you missed last Sunday's SARL-news, here is a reminder of the agreement with ICASA that will allow unlicensed persons to operate an amateur radio station under the supervision of a licensed radio amateur without the need to register as an educational station for Saturday 16 June. Here is a further incentive to set up a demonstration station, involve the youth in the youth day sprint and show the man in the street how great amateur radio is. The SARL has produced a special, eye catching metal pin badge to hand out to young people operating a demonstration station. Have a look at www.sarl.org.za and place the order for your club on Monday. Orders will be shipped on Tuesday by counter to counter parcel mail.

Tracking details for Peter Davis, ZS6IQ, on the Vaal Dam has changed to www.aprs.fi and lookup ZS6IQ-10 (Not -9) The tracker is now operational. Try it out. The boat is currently on land for some TLC. Look up ZS6IQ on qrz.com for info on the day.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is at moderate levels. There is a chance for M-class flares from Sunspot 1494.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 86.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be less frequent and mostly on east-west paths. Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

16 June - Amateurradio and youth day event. 17 June - Intechnet at 19:30 with Prof Justin Jonas as speaker. 23 June - Repeater group meeting at NARC at 09:00.

SARL News invites clubs and individuals to submit news items of interestto radio amateurs and shortwave listeners. Submit news items - ifpossible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays

on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dirk, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Flip Britz, ZS6BSO, and edited by George Honiball, ZS6NE.

Thank you for listening. 73.

/EX

Teens Participate in Nationwide Ham Radio Event:

Posted: 08 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28452

Lawton teens spend the weekend on USS Batfish: Muskogee, OK - Kelsee Smith and Trevor Watts scan the airwaves for other ham radio operators. Their contact log shows they've been pretty busy. "I like the foreign ones the best," says Smith. "We talked to West England, Trevor got Africa, we got an airplane that was 38,000 feet over Arizona." Smith and Watts are two of ten students from Lawton Middle School's Viking Radio Club participating in Museum Ship's Weekend - an amateur radio event where operators try to contact as many museum ships as they can in two days. "We have several hundred contacts as least," says Justin Holder, one of the Ham Radio instructors with the group. "When the radio operators hear the young kids on the radio there's what we call a 'pile up' - several people trying to get in contact all at once."

//
Ham Radio Volunteers Relay Messages During Emergencies:

Posted: 08 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28451

EUGENE, Ore. -- Western Oregon counties have emergency plans in place in the event of a major catastrophe like an earthquake or tsunami. Part of the plan includes volunteers. Monday through Saturday, like clockwork, Bob Welfel checks his home weather station. His automated systems give rain totals and current temperatures, and it's fed into his ham shack. This is where he gives his daily report. Broadcasting via amateur radio is a hobby Welfel picked up 50 years ago. With his antennas, he can reach Alaska, Japan and even Australia. Reaching someone is relatively easy. You have to make sure you're on the same frequency and the person you are trying to reach is available at the same time. Matt Dillon is also an amateur radio operator as well as an instructor and engineer. While you might think new technology would render ham radios obsolete, Dillon say's that's not the case. "Amateur radio is a growing hobby. There are now over 704,000 amateurs," Dillon said.

//
Propagation Forecast Bulletin #23 de K7RA:

Posted: 08 Jun 2012 03:52 PM PDT
http://www.eham.net/articles/28450

Average daily sunspot numbers increased about 60% during the past week (May 31 through June 6), when compared to the previous seven days (May 24-30). The increase was 48.5 points, from 81.9 to 130.4. Average daily solar flux was up 18.6 points from 111.6 to 130.2.

http://forums.qrz.com/showthread.php?349528-1A0C-1A0X-1A0Z-Sovereign-Order-of-Malta&goto=newpost

Thirty years have passed since 1A made its way onto the DXCC list. And an activation by an International team looks to celebrate the uniqueness of this event. So, from the 1st to the 4th July, we will listen them on the air as 1A0C from Santa Maria del Priorato, home of the Sovereign Military Order of Malta.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 10th June 2012

Silent Key

The death has occurred of Jackie Buckley EI9EJ of Finuge, Lixnaw, Co. Kerry on Monday 4th June 2012. Jackie will be sadly missed by his radio friends in Co. Kerry and further afield. The Kerry Amateur Radio Group are deeply saddened by his passing. Ar dheis De go raibh a anam dilis.

Licence Examination Final Reminder

Next Thursday, June 14th is the closing date for entries to sit the next Amateur Station Licence Examination which will be held in the ComReg Offices in Dublin on Thursday, 28th June at 2 p.m. Full details, including entry procedure, examination fee and how to pay the fee on line are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line it is still necessary to complete and forward the application form. We wish all those sitting the examination the best of luck.

Change in 40 Metre News Frequency

The present 40 metre radio news frequency has become increasingly busier on Sunday mornings. This has lead on occasions to some difficulty in the reception of both the bulletins and the reports on the transmissions. It has been decided, therefore, to move the transmission of the 40 metre news to a new frequency of 7123 kHz on and from Sunday the 1st of July. This frequency was selected after monitoring a range of frequencies over a period of time by amateurs who use this particular transmission of the radio news bulletin.

Gene Zimmerman W3ZZ SK

Readers of QST will be sorry to hear of the death on Sunday last, 3rd June of Gene Zimmerman W3ZZ. Gene wrote the popular QST column 'The World Above 50 MHz' from 2002 to 2011. Over the years he worked more

than 140 DXCC entities on 6 metres, 38 States on 144 and 220 MHz and held the VHF/UHF Century Club (VUCC) on the 50 to 1296 MHz bands. Gene was first licensed in 1956 and held an Amateur Extra Licence since 1963. May he rest in peace.

CW Field Day

We heard just two EI stations participating in last weekend's CW Field Day - Shannon Basin Radio Club (call sign EI3Z/P) and Gerard EI5KF/P. Shannon Basin Radio Club operated from the grounds of Garbally College, Ballinasloe; they report that despite occasional generator and computer problems they achieved a very satisfactory result, with more than 900 QSOs in the log.

Gerard EI5KF operated from a site near Glocca Morra in the Kilworth Mountains, North Cork. He reports that the real contest was the weather, as he was operating from a tent in a night of wind and rain. With a modest set-up his log includes QSOs with DX stations in JA, VK, ZL, A6 and 9M among others. The principal support for this contest comes from IARU Region 1 countries: many other field day stations were active in the UK and in Germany, with smaller numbers in some other European countries including Switzerland, Ukraine, The Netherlands and France.

Radio-Frequency Identification

At a recent South Dublin Radio Club meeting, Daniel EI9FHB gave a talk on radio-frequency identification (RFID) - a system that uses radio-frequency electromagnetic fields to exchange data with travel cards, access cards and many other identification tags. He demonstrated some of the technology behind these systems and referred to some of the security weaknesses in them - these weaknesses being due in part to the ability to pick up very weak signals from a distance, an aspect of radio frequency propagation that would be familiar to many radio amateurs.

HAM CON

The Northern Ireland Amateur Radio Conference takes place Saturday 16th June /at/ Technology Education Centre, Omagh, BT78 1FA. Registration from 11am, Conference begins at 12 noon with John Breen EI7BV on "How did Amateurs get their bands: The VHF, UHF, SHF &EHF Bands" Further details at http://gn4oma.blogspot.co.uk

---

OK1WC Memorial activity

This activity runs on the first 4 Mondays in the month (2m, 6m, 80m SSB, and 80m CW in turn), always from 16:00 to 17:00 UTC. There is no

need to work any specific country. Score on the VHF is based on QRB (1km=1 point) with no multipliers, on HF each QSO counts one point; multipliers are the last letters of the wkd stations suffixes. All details are included in rules at http://www.hamradio.cz/ok1wc/rules_en.txt.

DX News

Charles NK8O will be travelling to Tanzania this month on a work assignment and has been issued with the callsign 5H9CP. He prefers CW operation and will be active from 11 - 22 June. His QSL Manager is EA7FTR and logs will be uploaded to Logbook of the World.

Vlad UA4WHX was recently active as E40VB from Palestine. He is now QRV again from Egypt and using the callsign SU9VB. Please read his QRZ.com page for up to date QSL information.

The rare DXCC entity of Mount Athos was heard recently on CW. The resident amateur Monk Apollo SV2ASP reports that his call was pirated on 24 April, 8 May and 17 May. He was however active on 17m CW on 26 May from 1130 - 1700z and on 27 May from 1030 - 2000z. Please check your logs.

To celebrate one hundred years of Amateur Radio in Queensland, Australia a special event callsign of VK100WIQ will be aired until the end of July. Various clubs in Queensland which are affiliated to the Wireless Institute of Australia will activate the special callsign during that period.

Fatima Shrine Activation

Members of the Amateur Radio Association of the District of Leiria (ARAL) will activate CS5FAT from its facilities in the Cova da Iria at the Shrine of Fatima in Portugal between June 10-13th

---

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

1A, S.M.O.M. (Press Release #1): "Thirty years have passed since 1A made its way onto the DXCC list. And an activation by an International team looks to celebrate the uniqueness of this event. So, from the 1st to the

4th July, we will listen them on the air as 1A0C from Santa Maria del Priorato, home of the Sovereign Military Order of Malta. The callsign that will be used belongs to the 'The Order of Malta's Italian Relief Corps (CISOM)", an organization specialized in bringing assistance and relief during emergencies. This underscores the dual value of this activation. On the one hand, there's the fun side ham radio, giving a not so easy 'new one' to as many stations as possible (especially from the U.S. and Japan). On the other hand, however, there's the noble goal, as often seen in ham radio, where a spirit of cooperation and mutual aid are shared by operators all over the world. The team's aim, in fact, is to raise funds thanks to donations and contributions from QSL requests
in order to buy radio equipment which The Order of Malta's Italian Relief Corps volunteers will be able to use in case of emergencies. The operators list includes: 1A0X, 1A0Z, EA2RY, EA5RM, EA7AJR, EA7KW, F5CWU, IN3ZNR, IT9YVO, IZ8IYX, PB2T, SP3DOI and KH6CG as a pilot for North America and Pacific. They will be active on HF+6m and the QSLs for contacts with 1A0C can be requested via Francesco Cozzi, 1A0Z. A website will be online soon, stay tuned! 73 de 1A0C"

2012 TOPBAND MOST WANTED SURVEY. This annual survey of 160 Meter DX needs is taken by Garry/NI6T and Larry/K8UT and is now available online at: http://survey.hamdocs.com/?sid389
Please submit your needs list between now and August 31, 2012. Modifications submitted after August 31, 2012, will be used for the following year's survey. The results for 2012-2013 will be available in September 2012. A link to the 2011 Topband Most Wanted Survey results is available at: http://www.k8ut.com/tiki-list_file_gallery.php?galleryId

5H, TANZANIA. Just a reminder that Chas, NK8O/VE3ISD, has traveled to Mwanza on Lake Victoria for several years working there but has never operated any amateur radio from Tanzania. Look for him for the first time to operate as 5H9CP between June 11-22nd. Chas states, "I am primarily a CW operator. QRP and straight key operators, please be ready! After fighting through pile-ups with my QRP station at home, I understand the challenges. The rig on this trip will be an Elecraft KX3 and antenna arrays will depend on the trees, how high I can get the ropes to go, and whether a dipole, loop, or vertical will be the best for the site from which I choose to operate. Times and frequencies will be published [QRZ.com] before my departure for Tanzania, but they definitely will not be written in stone. Operating times will depend entirely on my responsibilities and schedule at the Nyakato Health Center." QSL via NK8O.

9K2, KUWAIT (Special Event). Members of the Kuwait Amateur Radio Society will be active with the special callsign, 9K2KCBB, between June 13-15th. Activity is to celebrate "World Blood Donor Day" which is held on June 14th every year. See <http://en.wikipedia.org/wiki/World_Blood_Donor_Day> or <http://www.who.int/worldblooddonorday/en/>. Activity will be on CW, SSB and RTTY. QSL direct to 9K2RA.

A5, BHUTAN. The members of the FGC DX Group (Foundation for Global Children) are now QRT as A5A. The ClubLog shows as of 2308z, June 6th, the A5A team made 38068 QSOs with 14819 unique callsigns (20879/CW and 17189/SSB). Breakdown is: 337/AF, 6954/AS, 25273/EU, 4929/NA, 309/OC and 266/SA. QSL A5A via JH1AJT (see Web page for details). For more details and update, visit the A5A Web apge at: http://bhutan2012.com/index.php

A5, BHUTAN. Just a reminder (in case you did not work the A5A operation) that a JA team of operators are now active from a hotel (altitude 10,000 ft.) in Thimpu between now June 14th. Operators mentioned with their A5 callsigns are Shigeo/JA1JQY (A52JY), Nakayama/JA1KJW (A52KJ), Kaoru/ JA3MCA (A52MA), Akira/JK1EBA (A52BA) and Kunio/JA8VE (A52VE). Activity will be on 160-6 meters [with an emphasis on 6 meters] using CW, SSB and RTTY. A beacon will be on 50.125 MHz. QSL via their home callsigns.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
XX9E - Macao; 2012 Operation

DXER ARRESTED IN GREECE UPDATE! Amateur Radio Newsline reported an update this week, and that well-known DXer/World-Traveller Baldur Drobnika, DJ6SI, stated that "I wasn't charged with espionage. As a reason of my arrest it was stated that:
1. I performed radio traffic without the approval of the Greek authorities;
2. I owned transmitting equipment which enabled the reception of other frequencies;
To the accusation was later added an other point: I hindered the visualization of the content of my notebook."

Kostas, SV1DPI, also reported an update on June 9th, stating [edited]: "According to the RAAG's site, the Court decided yesterday (June 8th) that Baldur is innocent for the first accuse (operating his rig). According to the Court for the 2nd accuse (destroy of his computer and possible evidence of his activity), he was guilty. This second case will be examined again in the future, and I hope they get the right decision in the future. Baldur was, of course, in Germany (he left after the first judge) and only his lawyer was at the Court. My opinion is that what happened was by mistake in an island (Kos) very close to Turkey (the 2 coasts are only some meters far) where the Authorities were too suspicious... When Greek or foreign hams ask for special calls from the Islands which are too close to our borders, the Navy has been asked for approval. If Greece would like to have this policy for some of the islands, it should have signed the CEPT with the exception of these islands but we didn't. So everyone should have better knowledge of the laws and stop asking these papers in general because it has no sense. But unfortunately it seems that we have more important things to do during this time frame... All SV hams, we ask from Baldur to forgive our country for the bad behavior..."

EFC 2012 ON THE AIR. Look for many stations (and we do mean many - too many to list) from the Ukraine and Poland to be active during the "European Football Championship 2012" between now and July 5th. The on-the-air

activity by Polish and Ukrainian amateurs that are affiliated with PZK
and UARL will have numerous special event stations using the special
prefixes: Polish - 3Z2012, HF2012 and SN2012
Ukrainian - EM2012, EN2012 and EO2012.
The complete list of callsign can be found at:
http://sq2rh.idsl.pl/efc/index_en.php?go=They will be operating concurrently with the 2012 European Football Championship, which this year is organized jointly by Poland and Ukraine.
More detailed information about their activities can be found on the
"EFC 2012 on the AIR" Web site at: http://efc2012.pzk.org.pl
Activity will be on all the amateur bands. There are two awards which can
be earned during this period, as well as many interesting QSL cards and
prizes.

IOTA NEWS.....
AN-013. Henry, LU4DXU, reports that Juan Manuel, LU4ZS, is currently based and active from the Argentine Marambio station on Seymour Island. Activity has been on 80 and 40 meters, usually working his fellow Argentine stations. QSL via LU4DXU.

AS-008. Look for JA2MET to be active as JA2MET/1 from Mikura-jima, North Izu Islands (WW Loc. PM93TU), in the Philippine Sea and the Miyake Subprefecture of Tokyo Metropolis, between June 26th and July 1st. Activity will be on all HF bands and modes. Mikura-jima is also within the boundaries of the Fuji-Hakone-Izu National Park (WFF JAFF-009). QSL via his home callsign, by the Bureau or direct.

AS-147. Taka, JA8COE, will be active as homecall/8 from Yagishiri Island between June 16-19th. Activity will be on the 40/20/17/15 meters using SSB, PSK and RTTY. QSL via his home callsign, direct or by the Bureau.

EU-032. Tim, ON5HC, will be active as F/OO5C/P from Ile d'Oleron during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ Low-Power/SSB entry. QSL via ON5HC.

EU-038. Ray, PE1GUR, will be active as PA6FUN from Ameland Island (WLOTA 1059, WW Loc. JO23VK) between July 30th and August 15th. Activity will be on 6 meters only (Watch Es, Ms and Tropo). QSL via PE1GUR, by the Bureau or direct.

EU-044/
EU-139. Operators Waldi/SP7IDX and Mek/SP7VC will be active as LA/SP7IDX and LA/SP7VC from Mageroya Island (WW Locator KQ21VC) between June 20-29th. They plan to have 2 stations on the air - One on the HF bands and the second on 6 meters. Operations will be on 80-6 meters using SSB and RTTY. They will also be in the RSGB IOTA Contest (July 28-29th). Their equipment consist of a IC-746, TS480sat, w/Heil headsetHC6, and amps for HF and 6m, with the following antennas - HEX-BEAM by SP7IDX TECHNOLOGY 20-10m, R-7 vertical 20-10m, 6 element yagi for 6m and 2x Inverted L for 80-40m.,PA for HF and 6m. The software is

Win-Test sending QSOs to Clublog in real time and Mixw. During
their travel to Mageroya Island, there is a possibility to
activate Seskaro Island (EU-139) in the evening or at night
of June 19th and the next day June 20th, during the morning.
The QTH WW Locator is KP15VR and callsigns will be SM/SP7VC
and SM/SP7IDX. QSL via their home callsigns. The log will be
uploaded in LoTW. For more info, see:
http://sp7idx-hexbeam.eu
http://www.sp7vc.pl

EU-045. Operators Antonio/IZ8IQL, Giorgio/IZ8FAV, Sal/IZ8GGF, Carlo/
IZ0EGC, Giuseppe/IZ0GZW and Gianni/IW0BTN will be active as
IB0F from Ponza Island (IIA LT-001, MIA MI-076, WLOTA 1395)
in the Tyrrhenian Sea between July 23-31st. They will also
participate in the RSGB IOTA Contest (July 28-29th). QSL
information TBA. Watch QRZ.com.

EU-056. Operators Glenn/LA8XRA and Trond/LA9VDA will be active as
LA6Q from Little Sand&#65533;y Island between August 13-17th. This
will be a first activation of the Sand&#65533;y Lighthouse (WLOTA
LH-2769). Activity will be on the 80-10 meters using CW, SSB
and RTTY. QSL via LA9VDA, direct or by the Bureau (E-mail
requests for Bureau cards can be sent to: la9vda [at] gmail
dot com). Trond states, "Thanks to W5BXX Dave for sponsoring
us."

EU-079. Operators Glenn/LA8XRA and Trond/LA9VDA will be active as
LA6Q from J&#65533;nsholmen (Jonsholmen) Island between August
10-13th. Activity will be on the 80-10 meters using CW, SSB
and RTTY. If they have time, he will make side trips to Dimna
Island (EU-079, WLOTA 2438) and Nerlands&#65533;y Island (EU-079,
WLOTA 2193). QSL via LA9VDA, direct or by the Bureau (E-mail
requests for Bureau cards can be sent to: la9vda [at] gmail
dot com). Trond states, "Thanks to W5BXX Dave for sponsoring
us."

EU-158. (Update) Operators Mike/SV1RK, Stavros/SV3CJU, Costas/SV1AER
and Gabriel/SV1GSV were expected to be active from Sapienza
Island (LH GRE116, WLOTA 1471, WW LOC KM06US) as J48SAI between
June 8-10th. Activity will be on the HF bands and 6 meters
using CW, SSB and RTTY. QSL via LoTW or via SV1RK, by the Bureau
or direct.

NA-067. Nathan, N4YDU, will be active as W4O from Ocracoke Island
between 2300z July 26th, and 1200z July 29th. He plans to
be in the RSGB IOTA Contest (July 28-29th) as a Single-Op/
All-Band/Low-Power entry. QSL via N4YDU - Direct Only.

OC-128. Dandy, K6ZRH/DU1IMA, will be active as K6ZRH/DU1 from Palawan
Island (WLOTA 1612) between June 10-30th. Activity will be on
40/20/15 meters SSB. QSL via his home callsign, direct only.

OC-170. (Op Needed!) members of the West OZ DX Group are planning a visit to Woody Island this year. The group is looking for keen operators to join them. The visit will likely occur in the southern spring, leaving Perth on a Thursday and returning on a Tuesday. If you are interested, please contact them at: Webmaster@westozdx.net
For update, watch: http://www.westozdx.net

SA-037. To celebrate Venezuelan Navy Day, members of the Grupo DX Caracas will be active as YW5B from La Blanquilla Island between July 11-16th. Activity will be on 160-2 meters using CW, SSB, Satellites, FM and the Digital modes. QSL manager TBA.

J3, GRENADA (Is Still On!). Terry, KS5Z, is planning a 7 day stay in Grenada with the guidance of Harry, AC8G, for the CQWW DX SSB Contest (October 27-28th). Interested operators should contact Terry via his E-mail address <ks5z@arrl.net> for additional information.

KH6, HAWAII. The Hawaii IOTA Club (KH6RRC) was born to explore and operate from "New-One IOTA" islands in Hawaii. Founding members are David/AH6HY, Merle/K5MT, Yuri/N3QQ, Dick/N7RO and Lanny/W5BOS. They welcome participation from interested parties in their planned expeditions and state, "73 and CU soon from KH6!". The provide a map on QRZ.com of all the Hawaiian archipelago, and also mention that the Papahanaumokua'kea Marine national monument spans the archipelago from Nihoa to Kure Atoll, it is one of the largest Marine Protected Areas in the world.

NEW AWARD FOR DXPEDITIONS. Dave, AA6YQ, reports [edited]: "The Cass Award encourages DXpeditions to maximize the number of DXers they work by annually presenting a 1000 USDs prize to the single-operator DXpedition that works the most unique callsigns within a 4-week interval. This award is named in honor of Cass, WA6AUD (SK), whose stories in the West Coast DX Bulletin taught a generation of DXers, that "DX IS"! The winner of the 2012 Cass Award will be announced in March 2013.
An 'unlimited' award category with a larger prize is under development for introduction in 2013. If you'd like to pledge a contribution, send

E-mail to <Contribution@CassAward.com>. To learn more, visit the Cass
Award Web site at: http://www.CassAward.com "

OG0/OH0, ALAND ISLANDS. Look for the following operators and callsigns to be
active from Aland Islands during the CQWW DX RTTY Contest (September
29-30th):
OG0Z - Raimo, OH3BHL, as a Single-Op/Single-Band (10m) entry. QSL
via W0MM.

NEW MANAGER. Ron, AC7DX, is now the QSL Manager for LS1D effective
June 4th, 2012.

V26E LOGS ON LOTW. Darrell, AB2E (V26E), informs OPDX, "Just a note to
DXers, anyone who worked me for my end of May trip as V26E should be
able to find their QSLs in LoTW. I uploaded 5500+ QSOs today (both
general and contest QSOs), and already I see over 700 QSO matches.
Congratulations especially to 5 of the stations I worked w/100 watts

on 6M who show QSLed on LoTW. Of course, as always, any non-US stations desiring a regular QSL should send an SAE w/new IRC or 2 USDs for an immediate response (USA stations SASE is fine)."

QSL RECEIVED VIA LoTW: 7O6T, DH4JQ, J37T, KH7Y, MU0FAL, OK1DX, PJ4C, PJ5/SP6EQZ, PR2X, PY2NZ, TG7WW, VK2DX, VP5/KE1B, VP5/NE7D, XU7ACY and YV5OIE

QSLS RECEIVED VIA MAIL: 3C0E, 3C6A, 3D2R, 3W2BB, 5N7M, 5V7V, 6H6IARU, C31CT, A35YZ, FW0NAP/P, FW0NAR, HK0NA, KG4WV, T88RF, TL0CW, V31WW, V73NS and ZA20QA

QSLS RECEIVED VIA THE BUREAU: 3B9/G3TXF, 4K9W, 5R8HL, 9Q1EK, 9X0R, A6/DL9WVM, CT9/DL3KWR, DK4PL, DL1CA, DL7VKD, DL8LRZ/P, DL9GR, E44M, EA1CDV, EA8AOP, EK6TA, FJ/SM5FUG, FO0PT, FY/G3TXF, GM3MZX, HB9MGS, HC/SM6FKF, HD2M, IK8HJG, IN3NJB, IS0OFC, IZ0FVH, IZ0MQN, J73CCM, JA1KEV, JA4DND, JA5PJ, JA6ATL, JG2AJK, JH1BBS, JH3LSS, KB1SUA, KC0BMF, ON3LA, P29VCX, P29VLR, S59SV, SA4BFH, SV5/DJ5AA/P, T30AQ, T6MB, UX5IO, VU2ATV and WA3WZR

RUSSIAN IOTA, ARCTIC STATION, RRA and RFF OP. Operators Victor, RW0BG (RRC #869), and Igor Petlin, plan to travel along the Yenisei River to the North on the Yenisei River from Dudinka. They will start from Talnah in early July. Scheduled stops on the islands of the Yenisei River for the "Russian Robinson" program are: Kazan Island (RR-06-32), Mininskie Island (RR-06-33), Nikandrovskie Island (RR-06-34), Deryabinskie Island (RR-06-35) and the Island of Golchikha (RR-06-36). It is also planned to stop at the existing Sopochnaya hag Polar Station. Interest in the polar stations on the air is always great. The second phase of the expedition is the Kara Sea. They are planning to stop at Deer Islands (RR-06-06) and Shokalski (RR-06-05, IOTA AS-083, Gydansky Reserve RFF-030). If they have time, they will also work in the RSGB IOTA Contest. The third stage of their expedition is Ob Bay, and possibly stopping on the islands in the IOTA group AS-109; which they have not yet decided. Further possible stop in the Ob Bay are Chulym to Achinsk, moving to the city of Krasnoyarsk on a vehicle (~ 160 km). The final stage on the river Yenisey is a possible stop for a short activity at the Biosphere Reserve Tsentralnosibirsky (RFF-096) to Dudinka, then return in Talnakh.

SV9, CRETE. Luc, ON6DSL, will be active as SV9/ON6DSL/P from the Island of CRETE (EU-015) between August 27th and September 3rd. Activity will be a holiday style, a SOTA portable and SSB only operations, and using a FT817ND w/5w QRP into a multiband dipole. QSL via his home callsign, direct or by the UBA Bureau.

V7, MARSHALL ISLANDS. Steve, G3ZVW (aka ZD8N and AF6SU), is now active as V73/AF6SU from the V73AX Kwajalein Amateur Radio Club (KARC) station on Kwajalein Island. Activity has been mainly on 20 meters CW. QSL via G3ZVW, direct or by the RSGB QSL Bureau. PLEASE - Do not send your cards via the U.S. callsign or address!

VQ9, CHAGOS ISLANDS. Chuck, W4XP, will be active as VQ9XP from the VQ9X club station on Diego Garcia (AF-006) between August 9-25th. Activity will be limited to his spare time with a focus on 6 meters and some HF (160-10m) operations. QSL via his home callsign, direct or LoTW.

W3, UNITED STATES (Special Callsign). The Montgomery County (Maryland) Amateur Radio Club (MARC) will use the special callsign W3M during its Field Day operations on July 23-24th. The operation will take place from Davis Airport in northern Montgomery County, MD (FM19kf).

W9DXCC CONVENTION. Jim, N7US, reports: "The Northern Illinois DX Association invites you to join us at the 60th annual W9DXCC DX convention, to be held Friday and Saturday, September 14th and 15th, at the Holiday Inn in Elk Grove Village, IL.
New this year is a four session class, 'DXing from the Black Hole', preceding the convention, from 1-5 PM on Friday. Targeting beginning DXers, each session will cover a different aspect of DXing, including operating practices, station design, chasing awards, QSLing, and propagation from the Black Hole.
The convention kicks off at 7:30 Friday evening with registration/packet pick-up and an open bar, followed by a hospitality suite hosted by the Northern Illinois DX Association at 10 PM. Registration on Saturday starts at 8 AM, followed by the program at 9 AM.
Program highlights include HK0NA Malpelo Island by W0GJ, T32C Christmas Island by G3SVL, K9AJ's IOTA update, and propagation by K9LA. The CW copying contest is at 5 PM, followed by a reception and the banquet at 6:30 featuring noted DXer and contester Fred Laun, K3ZO. The audio/visual setup is top notch, making it easy to see and hear the programs.
A hospitality suite hosted by the Greater Milwaukee DX Association is at 10 PM.
The Holiday Inn is conveniently located just west of O'Hare International Airport and just off Interstate 90. The hotel offers a free airport shuttle and low room rates.
Complete convention details are available on the Web site at:
http://www.w9dxcc.com
NOTE: We will NOT be mailing flyers and registration forms this year. Please save a copy of this E-mail and register on the Web site. You can pay by check or PayPal for your convenience. Discounts will be available for those signing up for both the class and the convention and for registrations received by September 6th. We look forward to seeing you."

*RAC Bulletin 2012-032E - New ARES merchandise now available at the
RAC Online Store - Cafepress*
2012-06-10

**

Following a review of how we distribute ARES merchandise, and to whom,
I am very happy to advise that there are now many new items available
through the RAC Online Store - Cafepress. Why not have a look
athttp://www.cafepress.rac/ca_radio.

Items that fall under the heading "credentials or identification" will
only be available from the Chief Field Services Officer. In making
this announcement I would like to acknowledge the work of our Office
Coordinator Frank at our HQ in Ottawa in having this merchandise
designed and added to our store. Thanks Frank!

73,

Doug Mercer VO1DTM/VO1DM CEC
Chief Field Services Officer

GB2RS NEWS

Sunday 10th June 2012

The news headlines:

* International EME Conference approaches

* Celebrating wartime codebreaking

* German amateur arrested in Greece

The 15th international EME conference is being held at Churchill College, Cambridge, between 15 and 19 August. it is hosted by the UK Microwave Group. This is the first time that this conference has been held in the UK, and it provides an opportunity to learn about this most technically challenging aspect of our great science-based hobby. In addition to EME- specific lectures there will be presentations on radio astronomy and deep space communications, as both these subjects have much in common with EME. Two Nobel Physics Laureates from the world of radio astronomy will be present at the conference. Joe Taylor, K1JT, is a keen EME enthusiast and will be presenting a paper on MAP65, while fellow-Laureate Professor Antony Hewish FRS is the speaker at the conference gala dinner on Saturday 18th. With over 150 delegates and 60 partners from 5 continents already registered, this promises to be a great event. All those wishing to attend must pre register for this conference before 1st August. Day passes and a range of accommodation packages from one to four nights are available. See www.eme2012.com for full details.

GCHQ and Bletchley Park will be joining forces and inviting the public to take part in a unique recreation of the wartime codebreaking process at this year's Times Cheltenham Science Festival from 12 to 17 June. These activities will form part of the celebrations marking the centenary of the birth of Alan Turing. For the first time, members of the public will be invited to encrypt a message on one of GCHQ's Enigma machines at the Town Hall, before it is sent to Bletchley Park, home of the wartime codebreakers. Once at Bletchley Park, the message will be decrypted with the help of the Turing Bombe Rebuild and the decoded message `tweeted' back. The whole event will be live and interactive using a two-way Skype videoconference, ensuring that members of the public in both Cheltenham and Bletchley Park can see every part of the encryption/decryption process.

Further interest will be added over the weekend of 16 and 17 June, when the Cheltenham Amateur Radio Association will transmit the encrypted

messages in Morse code to Bletchley Park using the call sign GB5AMT. Sending an encrypted message has been uniquely approved by Ofcom for this special event station. The messages will be received at GB2BP, operated by members of the Milton Keynes Amateur Radio Society. The messages received by each station will then be compared and collated at a central point, then fed into the Bombe machine in Block B at Bletchley Park.

You will find the Cheltenham ARA station in Imperial Gardens, Cheltenham, or can contact them by calling GB5CSF on 40m. Milton Keynes ARS, at Bletchley Park, will be using two or three receiving stations, in order to more closely recreate the reception conditions during the war.

On 30 June and 1 July, Milton Keynes ARS will be further commemorating Alan Turing's work by using the callsign GB2AMT from the green outside the Mansion at Bletchley Park. MKARS were regional winners of the RSGB Club of the year and runners up in the National competition for 2011.

Last week, news reports came out from Greece that Baldur Drobnica, DJ6SI, had been arrested on the Greek island of Kos. He was reportedly taken into custody for the crime of espionage, which was quickly reduced to operating amateur radio equipment. This came about even though both Greece and Germany are both signatories to the CEPT pan-European Amateur Radio licensing agreement. The Radio Amateur Association of Greece are concerned that public

Copyright © RSGB 2012. Not for public release before Monday 11 June 2012 except as a GB2RS broadcast. services and institutions, particularly the police, have not been informed properly about amateur radio. DJ6SI has since returned home and is awaiting a further trip to Greece for trial.

Oldham Amateur Radio Club will be holding an ARDF event on 30 June at Strinesdale Moor. Registration will be from 10am. For further information please contact Phil Ellis, M0GIE, by email to philipus@ntlworld.com. Alternatively, visit the club web site at www.oarc.org.uk.

And now for the details of rallies and events for the coming week

The 11th Junction 28 QRP Rally will take place today, 10 June, at Alfreton Leisure Centre, Church Street, Alfreton, Derbyshire DE55 7BD. The event is organised by the South Normanton Alfreton and District Amateur Radio Club in association with the G-QRP Club. Doors open at 10am and admission is £2.50. There will be trade stands, special interest groups and catering facilities. More from Russell Bradley, G0OKD, on 01773 783 658.

HAM CON, the Northern Ireland Amateur Radio Conference, will take place on Saturday 16 June at the Technology Education Centre, Omagh BT78 1FA. Registration is from 11am. The Conference begins at 12 noon with John

Breen, EI7BV on How did Amateurs get their bands: The VHF, UHF, SHF & EHF Bands. Further details at http://gn4oma.blogspot.co.uk.

The 25th Newbury Radio Rally and Boot Sale will be held on 17 June at the Newbury Showground, next to M4 Junction 13. Doors open at 9am and admission is £2. There will be trade stands, special interest groups and a demonstration marquee with display of amateur radio on air.

Now for the news of special events

Welland Valley Amateur Radio Society will be putting GB0BON on the air on 16 and 17 June at Rupert's Viewpoint. It will be the 367th anniversary of the Battle of Naseby and the third anniversary of GB0BON. This year they will be specifically inviting young people from both local youth groups and local schools to visit the station and see an amateur radio field day setup in operation.

Eddie, G0VVT will be operating from Belleek Pottery Museum under the call of GB0BPM on 16 and 17 June for Museums on the Air.

Reading and District Amateur Radio Club will be taking part in Museums on the Air on 16 and 17 June from the Museum of Berkshire Aviation, Woodley, using the callsign GB2MBA. They plan to use mainly 80m, 40m and 20m. Visitors are welcome.

On 17 June, the Radio club of Binche will activate the Special Event Station ON44WAR from the historical place of Br£ly- de-Pesches in Belgium in order to commemorate the Belgian Resistance. Activity will be from 9am to 5pm local time. Full details on their website, www.on7ry.be.

The Kent Weald Radio Club will be holding a field event at Headcorn Airfield, Kent, TN17 9HX, from 15 to 24 June. This activity will encompass the two Museums on the Air weekends. Using the callsign of GB1HA, the station will use HF, VHF & UHF bands. Visitors are welcome to call in to see the operation.

Copyright £ RSGB 2012. Not for public release before Monday 11 June 2012 except as a GB2RS broadcast. And now the DX news compiled from 425 DX News and other sources

Pat, F4EBT will be travelling in the French Polynesia area of the Pacific until 24 June. He is using the callsign FO/F4EBT from at least two different islands in the IOTA OC-046 group and at least four different islands in the IOTA OC-067 group. QSLs go via his home call or via the French bureau.

VP2MDD will be on the air from Montserrat. Graham, M0AEP will be on the island from 7 June until 6 August. He will concentrate on 12, 10 and 6m.

Chas, NK8O is working at Mwanza on Lake Victoria, Tanzania and plans to be active as 5H3CP from 11 to 22 June. Activity will be in his spare

time with QRP power on various HF bands using CW. QSL to his home call.

Dandy, K6ZRH will be on the air as K6ZRH/DU1 from Palawan Island, Philippines, IOTA OC-128, from June 10 to 30. Activity will be on 40, 20 and 15 meters using SSB. QSL direct to his home call.

John, K9EL is on the air as FS/K9EL from St Martin until 24 June. Activity is holiday style on 6 to 80m using CW, SSB and RTTY. QSL to his home call.

Now the contest news

The 24 hour French DDFM 6m Contest finishes at 1600UTC today, 10 June. The exchange is signal report, serial number and the first four digits of your Locator.

Today, Sunday 10th, the Practical Wireless 2m Low Power Contest runs for seven hours. The maximum permitted power for this event is 3 watts and the scoring is 1 point per contact, multiplied by the total number of Locator squares worked. Running from 0900 to 1600UTC and using all modes, the exchange is signal report, serial number and locator.

The final event for today, 10 June, is the second 144MHz Backpackers contest. Running from 0900 to 1300UTC and using all modes, the exchange is signal report, serial number and locator.

On 12 June the 432MHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

The CW leg of the 80m Club Championships takes place on 13 June from 1900 to 2030UTC. The exchange is signal report and serial number.

The 50MHz Trophy takes place on 16 and 17 June from 1400 to 1400UTC. Invariably there are numerous portable stations active and, with the event taking place in the peak of the Sporadic-E season, the chance of working DX at some point during the 24 hours is high. Using all modes the exchanges is signal report, serial number and locator.

The IRTS 80 Counties Contest takes place on 17 June from 1400 to 1700UTC. Using SSB and CW, the exchange is signal report and serial number. EI and GI stations also give their county.

Copyright © RSGB 2012. Not for public release before Monday 11 June 2012 except as a GB2RS broadcast. The Worked All Britain 50MHz phone contest takes place on Sunday 17 June from 0900 to 1500UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website, www.worked-all-Britain.co.uk or from the Contest Manager, G3XKT, by email to aebbooks@ntlworld.com.

And now the solar factual data for the period from Friday the 1st to Thursday the 7th of June, compiled by Neil Clarke, G0CAS on Friday 8th of June.

Eight new sunspot regions emerged during the period. Most were small and some have already decayed and disappeared. Solar activity was mostly low but on the 3rd and the 6th activity increased to moderate levels when a single M class solar flare took place. Several coronal mass ejections occurred but most did not head our way. Solar flux levels increased from 129 units on the 1st and the 2nd to 140 by the 6th. The average was 132 units. The 90 day solar flux average on the 7th was 117 units, that's the same level as last week. X-ray flux levels showed a slight increase, and by the end of the period were up to B6 units. The average was B4.8 units. Geomagnetic activity started at quiet levels but, as forecast, a coronal hole disturbance arrived during the 3rd and lasted till the 6th. The most disturbed day was the 3rd, with an Ap index of 26 units. The average was Ap 15 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second on the 3rd to 780 by the 6th. Speeds then declined to 590 by the end of the 7th. Particle densities were high for several days from the 1st and reached 57 particles per cubic centimetre on the 4th. Densities then declined to only one particle per cubic centimetre by the 7th. Bz varied between minus and plus 3 nanoTeslas on the quietest day and between minus 15 and plus 12 nanoTeslas on the 3rd, which was the most disturbed day. For much of the week increased geomagnetic levels depressed HF MUFs, which fell below 20MHz on several days. VHF radio aurora occurred on the 2nd through to the 6th, though, at best it appears to have been workable only from areas north of the central belt of Scotland.

And finally the solar forecast. This week the quieter side of the Sun is expected to rotate into view. Saying that, solar activity could increase to moderate levels on the occasional day. However, activity should be at low levels on most days. Solar flux levels are expected to decline and be around the 110 mark by next weekend. Geomagnetic activity is expected to be mostly quiet, however, if an Earth directed coronal mass ejection takes place then activity would increase. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 14MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 29MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 1100 and 1500 hours. Sporadic-E is expected to take place most days. Openings up to 144MHz are possible. Historically, the coming couple of weeks normally prove to be the best time for openings on 144MHz, though, they can take place until August but at a lower rate of occurrence.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. South Birmingham Radio Society will be at the Alfreton QRP Radio rally on Sunday 10 June. Monday sees them getting ready for VHF NFD, while on Tuesday there are training classes with Dave Murphy, G8OWL. Shack and aerial work is on Friday, then on Sunday 17th the club is visiting the Newbury Radio Rally. Contact Don, on 01214 581 603, for more information.

Wythall Radio Club is at the J28 QRP Rally on Sunday 10 June. There's a mock Intermediate exam on Monday and a committee meeting on Tuesday. On Saturday 16th the club starts operating its weekend special event at Wythall Transport Museum. Details from Chris, G0EYO, on 07710 412 819.

Lincoln Short-Wave Club is taking part in the 432MHz UK AC on Tuesday. Wednesday sees G6COL on the air from the shack plus a quiz and social night at the BSA club. Thursday sees the club simplex net on 145.375MHz from 8pm. On Saturday 9 June there's the surgery in the shack from 9am, plus the start of the weekend Museums on the Air event from 10am at East Kirkby. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday Telford & District Amateur Radio Society is having a talk on SOTA by 2E0CHV/G8XYJ/M6BAF, then on Sunday 17 June it's the 6m Trophy on the Long Mynd with G0UFE in charge. Contact Mike, G3JKX, on 01952 299 677.

Now we return to the traditional listing in date order. On Monday 11 June Gloucester Amateur Radio & Electronics Society is having a picnic and operating in the field. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 11 June Stratford Upon Avon District Radio Society is having an introduction to antenna modelling on a PC by Clive, G0CHO. Contact G0CHO, on 01608 664 488.

On Tuesday 12 June Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 12 June Eagle Radio Group is having a talk on the 2011 DXpedition to Christmas Island by Nick, G3FAL. Contact John, M6JMS, on 01754 873 926.

On Tuesday 12 June Loughborough & District Amateur Radio Club turns to valves again with Andrew, G7SEG. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 12 June Worcester Radio Amateurs Association is having a talk. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday 13 June Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 13 June South Kesteven Amateur Radio Society is having a talk on oscillators and waveform generators by M0CVO. Contact Nigel, M0CVO, on 01476 402 550.

On Friday 15 June Bromsgrove & District Amateur Radio Club is having a VHF and course planning night. Contact Chris, M0BQE on 01905 776 869.

Copyright © RSGB 2012. Not for public release before Monday 11 June 2012 except as a GB2RS broadcast. On Friday 15 June Melton Mowbray Amateur Radio Society has its annual G4RPS Memorial Trophy fox hunt. New rules are in course of discussion. For more information contact Geoff, G3STG, on 01664 480 733.

On Saturday 16 June Cheltenham Amateur Radio Association commences its weekend event, operating GB5CSF at Cheltenham Science Festival. Contact Derek Thom, G3NKS, on 01242 241 099.

On Saturday 16 June Welland Valley Amateur Radio Society commences its weekend event, operating GB2BON at Rupert's Viewpoint for the Battle of Naesby. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. On Sunday 10 June Denby Dale Radio Club is taking part in the 1940's weekend at Thwaite Mills, Leeds. On Wednesday there's a club net on 145.575MHz. Saturday 16th sees the club commence operating GB2TMI for Museums Weekend. Details from Richard, M0RBG, on 07976 220 126.

Sheffield Amateur Radio Club is planning for VHF Field Day and holding its summer quiz on Monday. On Wednesday they are taking part in the RSGB 80m Contest CW from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday, Wakefield & District Radio Society is having a talk and demo on SSTV by Andy, 2E0MBQ. The Intermediate and Advanced Licence courses continue from 13:30 on Saturday. Contact Ken, G8FSO, by email to g8fso@wdrs.org.uk.

Now we return to the traditional listing in date order. On Monday 11 June Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 11 June Bolton Wireless Club is watching an HF DXpedition video presentation with Gerry, G1SWH. For details, send an email to boltonwireless@gmail.com.

On Tuesday 12 June Halifax & District Amateur Radio Society is having a club night. Contact Martin, M0GQB, on 01422 341 317.

On Tuesday 12 June Morecambe Bay Amateur Radio Society is having a fox hunt with Brian Reid. Contact Sheila, on 07867 516 836.

On Wednesday 13 June Hornsea Amateur Radio Club is taking part in the 80m Club Contest CW. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 14 June Ripon & District Amateur Radio Society is having a video night. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 14 June South Manchester Radio and Computer Club is preparing for Sale Festival. Details from Ron, G3SVW, on 01619 693 999.

On Friday 15 June East Cleveland Amateur Radio Club is holding a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 15 June Tynemouth Amateur Radio Club is holding Morse tuition putting G0NWM on the air. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 16 June Otley Amateur Radio Society commences its weekend event for the 50MHz Trophy Contest. Details from Paul, 2E0PAK, on 07768 996 370.

On Sunday 17 June Durham and District Amateur Radio Society will be operating GX4WAB on behalf of Worked All Britain to celebrate the Olympic Torch being in Durham. Details from David Barclay, on 0191 3888 113.

Copyright © RSGB 2012. Not for public release before Monday 11 June 2012 except as a GB2RS broadcast.

NEWS FOR NORTHERN IRELAND On Saturday 16 June the West Tyrone Amateur Radio Club HAM CON conference takes place at the Technology Education Centre, 2 Spillers Place, Omagh BT78 1FA. Doors open at 11am for the noon start. A number of high profile amateurs will be speaking on a diverse range of subjects. Details from Philip, MI0MSO, on 07793 386 795, or online at http://gn4oma.blogspot.co.uk.

On Saturday 16 June members of the Enniskillen Amateur Radio Society will be taking part in the local 10k, hoping to raise funds for charity. Details are online at www.earsni.co.uk.

NEWS FOR SCOTLAND We start with clubs that have several events this week. Cockenzie & Port Seton Amateur Radio Club is taking part in the Practical Wireless 144MHz QRP Contest on Sunday 10th. On Saturday 16th they commence their Museums on the Air weekend event, operating GB2MOF at the Museum of Flight, East Fortune. More information from Bob, GM4UYZ, on 01875 811 723.

On Monday 11 June Aberdeen Amateur Radio Society is involved with two Olympic Torch Worked All Britain GS4WAB Special events this week. On

Monday they will be operating at Corgarff and on Tuesday it's Walker Park, Aberdeen. On Thursday 14th they are holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

Glenrothes & DRC is preparing for the club outdoor activities on Wednesday. On Saturday 16th they commence their weekend event for Museums on the Air from Scotland's Secret Bunker. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

Now we return to the traditional listing in date order. On Tuesday 12 June Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 13 June Lothians Radio Society is holding its AGM. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Worthing & District Amateur Radio Club is taking part in the Practical Wireless QRP contest on Sunday 10th. On Wednesday they are taking part in the 80m Club Championships CW and having a discussion evening. Contact John, G8FMJ, on 01273 593 232.

Farnborough & District Radio Society is running a 80m CW net 3.570MHz from 1pm on Monday, followed by a 2m net on 144.675MHz at 8pm. On Wednesday there's a natter night, then on Friday it's the Top Band net on 1.995MHz from 8pm. Contact Neville, G3SPD, on 01252 404 816.

Shefford & District Amateur Radio Society is holding a committee meeting on Monday. On Thursday there is a talk by Stewart, G3RXQ, entitled "I heard that pardon!". Details from John Burnett, M6JBU, on 07860 804 793.

Norfolk Amateur Radio Club is holding a committee meeting on Monday. On Wednesday they're taking part in the RSGB 80m Club Championship CW alongside an informal meeting, Bright Sparks, plus the shack and workshop are open. Details from Chris Danby, G0DWV, on 01603 898 678.

Chelmsford Amateur Radio Society is having a club net from 8.30pm on Tuesday, followed by a committee meeting on Wednesday. Contact Martyn, G1EFL, on 01245 469 008.

Copyright © RSGB 2012. Not for public release before Monday 11 June 2012 except as a GB2RS broadcast. On Wednesday 13 June Mid-Sussex Amateur Radio Society is doing tank track clearance on Wednesday, then having a talk on cable cars by Ian Gledhill on Friday. Contact Rob, 2E0RJA, on 01444 232 129.

Now we return to the traditional listing in date order. On Monday 11 June Coulsdon Amateur Transmitting Society is holding a micro-DF hunt, organised by Dennis, M0NDJ. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 11 June Southdown Amateur Radio Society is having a talk by Dave, G8PUO on PCs and logic. Details from John, G3DQY, on 01424 424

319.

On Monday 11 June Surrey Radio Contact Club has its construction contest. Contact John, G3MCX, on 020 8688 3322.

On Monday 11 June West Kent Amateur Radio Society is being given an insight to astronomy by Brian, G7THJ. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 12 June Brede Steam Amateur Radio Society is at the shack. Contact Steve, on 01424 720 815.

On Tuesday 12 June Harwell Amateur Radio Society is having a talk on the T32C DXpedition by Don, G3XTT. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday 12 June South Essex Amateur Radio Society is on the air. Contact Dave, G4UVJ on 01268 697 978.

On Wednesday 13 June Darenth Valley Radio Society Radio is on the air and having a natter night. Details from Bob, M0RAW, on 01322 663 804.

On Wednesday 13 June Harwich Amateur Radio Interest Group invites club members to speak about their other hobbies. Details from Kevan, 2E0WMG, on 07766 543 784.

On Wednesday 13 June Southgate Amateur Radio Club is having a talk on the early pioneers of radio by David Sharp, M0XDS. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Thursday 14 June Edgware & District Radio Society is having a surplus equipment and junk sale. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 14 June Hilderstone Radio and Electronics Club is having a natter night. Details from Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday 14 June Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 14 June Reading & District Amateur Radio Club is having a talk on the new multi-band mobile phones by Trevor Gill, G8IBO. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 14 June Vange ARS is watching the Historic Southend DVD. Contact Steve, G0KVZ, on 01268 552 606.

On Friday 15 June Wey Valley Amateur Radio Group is having a DX University session with Roger Western, G3SXW. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 16 June Bittern DX Group commences its weekend event, operating GB2OH at Oxburgh Hall for CASHOTA. Details from Linda, G0AJJ,

on 01692 404 154.

On Saturday 16 June Horndean & District Amateur Radio Club commences its weekend event special event station GB0RMM from the Royal Marines Museum, Eastney, Portsmouth. Contact Stuart, G0FYX, on 02392 472 846.

On Loughton & Epping Forest Amateur Radio Society commences its weekend event at North Weald Airfield. Contact Marc Litchman, G0TOC, on 02085 021 645.

Copyright © RSGB 2012. Not for public release before Monday 11 June 2012 except as a GB2RS broadcast. On Sunday 17 June Bromley & District Amateur Radio Society is having an advanced tutorial. Details from Andy, G4WGZ, on 01689 878 089.

On Sunday 17 June Newbury & District Amateur Radio Society is running the Newbury Radio Rally. Contact Rob, G4LMW, on 01635 862 737.

On Sunday 17 June Radio Society of Harrow is at Old Redding, operating GX3EFX/P. More information from Linda, G7RJL, on 02083 868 586.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Exeter Amateur Radio Society is looking at ham radio construction for under a fiver on Monday from 8pm at the Moose Centre. The 2m club net is on Tuesday at 19.45 and the 4m net on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

South Bristol Amateur Radio Club is holding a table top sale on Thursday. On Saturday 16 June they commence their International Museums on the Air weekend event. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Now we return to the traditional listing in date order. On Monday 11 June Weston Super Mare Radio Society is holding a Morse class & natter night. Details from Paul, G3SDH, on 01761 221 206.

On Tuesday 12 June Mid Somerset Amateur Radio Club is having a talk on the Somerset Kits and QRP by Tim Walford, G3PCJ. Details from Nick, 2E0FGQ, on 01749 346 320.

On Tuesday 12 June Plymouth Radio Club is having a natter night and is on the air. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

On Tuesday 12 June Poldhu Amateur Radio Club is having a talk on the Titanic cruise by Cliff, G3UYN. Details from Keith Matthew, G0WYS, by email to vickeith@globalnet.co.uk.

On Wednesday 13 June Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 14 June Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

NEWS FOR WALES On Sunday 10 June Aberystwyth & District Amateur Radio Society is at Aberystwyth Cliff Railway Open Day, running public demos from 11.00, then on Sunday 17th they have an open night. Contact Lloyd, 2W0LLT, on 01239 711 297.

On Thursday 14 June Marches Amateur Radio Society will be visiting the Hack Green Secret Nuclear Bunker for a curator-guided tour. Everyone is to meet at 18:30 at the Black Park Community Centre to allow time to travel. Anyone is welcome to come along. The cost is £10 per person. More information is online at www.marchesradiosociety.org.

# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
04 - 10 June 2012

Solar activity was at low to moderate levels during the period. Low
levels were observed at the beginning of the period with Region 1499
(N16, L=184 class/area Cao/060 on 09 June) responsible for a
majority of the C-class x-ray activity. An increase to moderate
levels was observed on 06 June as Region 1494 (S18, L=199 class/area
Cso/160 on 06 June) produced an M2/1b x-ray flare at 2006 UTC.
Associated with this event were both Type II (estimated shock speed
of 1148 km/s) and Type IV radio sweep signatures. Location of Region
1494 on 06 June and LASCO imagery suggested part of this coronal
mass ejction (CME) would be Earth directed. From 07-08 June, solar
activity returned to low levels. From 09-10 June, a return to
moderate levels was observed as new Region 1504 (S18, L=89
class/area Dai/120 on 10 June) dominated the visible disk in total
area and solar activity producing three M-class x-ray events. The
three M-class events that Region 1504 was responsible for were an
optically uncorrelated M1 event at 09/1132 UTC, the second event was
another M1/Sf at 09/1653 UTC, and finally another optically
uncorrelated M1 event on 10/0645 UTC.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to high flux levels during the period. The period started at
normal background levels from 04-05 June, then at high levels for
the remainder of the period.

Geomagnetic field activity was at quiet to active levels with
isolated major storm periods observed at high latitudes. For a
majority of the summary period, Earth was under the influence of a
favorable positioned coronal hole high speed stream (CH HSS). Early
on 04 June, solar wind speeds, as measured by the ACE spacecraft,
hovered around 350 km/s. Around midday on 04 June, solar wind speeds
increased to almost 650 km/s as a CH HSS arrived. This increase in
```

solar wind speeds helped drive the geomagnetic field from quiet to active levels with isolated major storm periods observed at high latitudes through 05 June. Predominantly quiet to unsettled levels prevailed from 06-09 June as effects from the CH HSS waned. A return to quiet levels was observed on 10 June as solar wind speeds returned to normal background levels. On 08 and 10 June, small changes were observed in data from the ACE spacecraft indicating the possible arrival of a weak, partially Earth-directed CMEs, however very little if any correlating activity was attributed to these arrivals.

Forecast of Solar and Geomagnetic Activity
11 June - 07 July 2012

Solar activity is expected to be at low to moderate levels from 11 June - 21 June as Region 1504 rotates across the solar disk. A return to predominantly low levels is expected for the remainder of the period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 11-12 June, 20-25 June and then from 03 July through the end the period. Normal to background levels are expected for all other time periods.

Geomagnetic field activity is expected to be at predominantly quiet levels from 11-17 June, 21-30 June and 04 July through the end of the period. From 18-19 June and 01-03 July, quiet to active levels are expected due to the CH HSS effects.

Memorial Day of British S.S. Transylvania torpedoed in front of the Isle of Bergeggi

Posted: 11 Jun 2012 04:17 AM PDT
http://forums.qrz.com/showthread.php?349751-Memorial-Day-of-British-S-S-Transylvania-torpedoed-in-front-of-the-Isle-of-Bergeggi&goto=newpost

Savona 16th ☐ 17th June 2012

SS TRANSYLVANIA technical characteristics:

Launched 23rd May, 1915

Tonnage: 14,348 grt

Propulsion: two steam turbines Pearsons, eight steam boilers, twin screw.

Length: 548.3 feet /167.1 m

Breadth: 66.6 feet / 20.3 m

Draught: 42 feet /13.3 m

Speed: 17,5 knots /32.4 Kmh

The historical event

S.S. Transylvania was a luxury passenger liner built in 1914 by Scott☐s Shipbuilding Company, Greenock (Port Glasgow). At the beginning of World War I, the Transylvania was taken over by the Royal Navy for service as a troop transport on completion. On May 3rd, 1917 the Transylvania sailed from Marseille (France) escorted by the two Japanese destroyers Matsu and Sakaki. She was carrying more than 3000 passengers among crew members, soldiers and nurses, all directed to Alessandria (Egypt). At about 10 a.m. on May, 4th 1917 the ship was on her course in front of the Isle of Bergeggi, two miles south off the Coast of Cape Vado, when she was hit by two torpedoes fired by the German UB63 under the command of Lieutenant Otto Schultze and sank. The two escort ships immediately came to the rescue but there was a strong south-westward current. Many shipwrecks were rescued by local fishermen, off the coast of Finale Ligure and Noli who received a silver medal by the British Government.

The victims were 407 in all, 86 of which were buried in the town cemetery in Zinola. A marble memorial (Cross of Pradani) has been erected on the rocks in front of the area, in honour of the many who died in the shipwreck.

The finding of the wreckage.

On October 7th 2011, after 94 years from the sinking, the Carabinieri Divers☐ Corp of Genoa in collaboration with Gaymarine of Lomazzo (Como) with the aid of Pluto, a small submarine vehicle of the Italian Navy, found the wreck of Transylvania at a depth of 630 metres, two and a half miles off the coast of the Isle of Bergeggi, Savona.

ShipRadio Memorial

On the 95th anniversary of the sinking of the S.S. Transylvania, the local Section of Radio Amateur Association wants to celebrate the victims of this tragic event.

From 07.00 a.m. GMT of June 16th , to 07.00 p.m. GMT of 17th a radio station is being activated with the call sign

IQ1SV

☐Special Event☐

released to Savona A.R.I. Section by the Ministero dello Sviluppo Economico ☐ Telecomunicazioni.

The radio station will work from two different locations:

- a fixed station located in Saint Elena☐s Fort on the heights of the town of Bergeggi, 385 metres over the sea level, looking on to the area of the sinking.

- a mobile maritime station located on the G.P.S. coordinates of the wreck.

The multi operator station will work on 10 ☐ 15 ☐ 20 ☐ 40 ☐ 80 ☐ 160 meters with CW, phone and digital PSK31 emissions.

Each contact will be confirmed with a special commemorative QSL (QSL manager IQ1SV via Association or direct with IRC c/o P.O. box 133 ☐ 17100 SV ☐ Italy).

A.R.M.I. (Italian Radio Amateur Association) and I.N.O.R.C. (Italian Naval Old Rhythmers Club) will participate to this radio memorial as operators along with the A.R.I. Section of Savona.

The event will be carried out with the agreement of:

Lega Navale Italiana, Port Authority of Savona, C.U.L.P. (Port Workers of Savona) and the Municipalities that gave help and assistance to the shipwrecks.

On June 16th a wreath will be laid at sea. All the maritime authorities are invited to this ceremony.

W5A - Amelia Earhart Last Flight Commemoration

Posted: 10 Jun 2012 07:59 PM PDT
http://forums.qrz.com/showthread.php?349720-W5A-Amelia-Earhart-Last-Flight-Commemoration&goto=newpost

Led by KB5YLG and sponsored by Tri-County Amateur Radio Club of North Texas WC5C, the W5A operation will be QRV Weekends all day, and evenings during the work week. Operators will include KE5NCS, KE5SCG, KG5OA and others, in a truly back yard operation, June 24 - Jul 7, 2012.

Amelia Earhart's last flight departed Lae, New Guinea, on July 2, 1937. 2012 is the 75th anniversary. There are four prevailing theories of her demise, (1) that she was lost at sea after running out of fuel. (2) that she landed in the Marshall Islands and survived, taking on a new identity and surviving to old age in New Jersey, (3) that she landed in Saipan or neighboring island and was executed by the Japanese in Saipan, and (4) that she and navigator Fred J. Noonan made an emergency landing on Gardner Island (now Nikumaroro), and survived days or weeks before succumbing to the elements.

One of the amazing things to consider is how no in situ test has ever been made of the pre and post loss radio messages. Much data was collected at the time of the disappearance, and that data has been evaluated and analyzed repeatedly, but no one has ever tested. Was her loss one that could have bdeen prevented as simply as paying close attention to the communications?

Well, here's to the memory of beautiful American personality, and the 75th anniversary of her disappearance. May she rest in peace, and may the truth be know.

QSL Cards and original art certificates offered, $2 to cover cost.

This special even operation will be conducted with an antenna modeled after the antenna atop her Lockheed Electra L-10E, and will be SSB and CW, and 50 watts, as was her power level operating AM and CW in 1937.

The logged data will help establish a baseline data set for comparison purposes in future studies.

Regards and 73!

David KB5YLG

Auburn students successfully command AubieSat-1

Posted: 11 Jun 2012 01:50 AM PDT
http://forums.qrz.com/showthread.php?349738-Auburn-students-successfully-command-AubieSat-1&goto=newpost

Auburn students successfully command AubieSat-1

John Klingelhoeffer, WB4LNM, AubieSat-1 Technical Mentor at Auburn University Alabama reports that the satellite has been successfully commanded to change the transmission mode.

On the AMSAT Bulletin Board John says ☐A short message was received Saturday evening indicating that uplink commands sent to AubieSat-1 were properly received, decoded, and initiated additional telemetry downlink data. AS-1 has been in orbit for about 9 months. Stations are asked to continue to monitor the downlink and pass any received telemetry to the group here [AMSAT-BB] for dissemination.☐

Watch Reception of AubieSat-1 at K5QXJ

AubieSat-1 was launched from Vandenberg AFB, California in October, 2011. The CubeSat is an undergraduate built satellite developed by Auburn University. Over the weekend of June 9-11 the AubieSat-1 controllers changed the transmission mode of the satellite to increase the quantity of telemetry. The increased telemetry rate will provide data to indicate how well solar cell protection is working. It should also provide additional onboard housekeeping information.

AubieSat-1 transmits with a power of about 800 milliwatts on a frequency of 437.475 MHz. The beacon signal, along with telemetry, is sent using A1A continuous wave Morse code at 20 words per minute.

Additional telemetry from the onboard science experiment will use CW transmissions up to 60 WPM.

SB SAT @ AMSAT $ANS-162.01

ANS-155 AMSAT News Service Weekly Bulletins

AMSAT News Service Bulletin 162.01

From AMSAT HQ SILVER SPRING, MD.

June 10, 2012

To All RADIO AMATEURS

BID: $ANS-162.01

Status of ISS Ham Radio Operations

ISS Amateur Radio Project Engineer Kenneth Ransom, N5VHO reports the ARISS digipeater has changed frequency from 145.825 MHz (up/down) to 437.550 MHz (up/down). The same digi alias ARISS is still used.

This change was started with the docking of the ESA Automated Transfer Vehicle (ATV). The ATV is an expendable, unmanned resupply spacecraft delivering propellant, water, air, payloads and experimental supplies to the International Space Station (ISS).

Packet operations were moved to the Columbus Module UHF radio when the Kenwood D700 radio was recently powered off due to needing an additional air purifier to support the ATV. Normally the air purifier is located in the ATV but recent power support issues related to the ATV and ISS necessitated the system be relocated to the Service Module. The purifier is now using the power outlet that the Kenwood radio normally uses. The Russian team has agreed to briefly power the purifier off for the scheduled ARISS school events but then will re-activate the purifier right afterwards. This appears to be a long term impact as ATV is currently scheduled to depart from ISS in September.

[ANS thanks Kenneth Ransom, N5VHO for the above information]

AMSAT-NA Board of Directors Nominations Due This Friday, June 15

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. A valid nomination requires either one current Member Society, or five current individual members in good

standing, to nominate an AMSAT-NA member for the position.

Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK.

The three nominees receiving the highest number of votes will be seated as regular board members with two year terms. The two nominees receiving the next highest number of votes will be seated as alternate directors for one year.

Written nominations, consisting of names, calls and individual signatures, should be mailed to: AMSAT-NA, 850 Sligo Ave #600, Silver Spring, MD, 20910. They must be received no later than June 15th. No other action is required.

Nominations may also be made by electronic means including e-mail, FAX, or electronic image of a petition. Electronic petitions should be sent to MARTHA@AMSAT.ORG or faxed to 301-608-3410, and also must be received by June 15th. If using any electronic submission, there is a second, verifying step:

ELECTRONIC SUBMISSIONS WITHOUT THIS SECOND, WRITTEN VERIFICATION ARE NOT VALID UNDER THE EXISTING AMSAT-NA BYLAWS. A verifying traditional written petition MUST be received at the AMSAT-NA office at the above address within 7 days following the close of nominations.

[ANS Thanks AMSAT Secretary Alan Biddle, WA4SCA for the above information]

AMSAT 2012 Symposium Announcement and Second Call for Papers

This is the second call for papers for the 2012 AMSAT Annual Meeting and Space Symposium to be held in Orlando, Florida on the weekend of October 26-28, 2012 at the Holiday Inn, Orlando Airport Hotel.

Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community:

Papers for publication in the ProceedingsSymposium PresentationsPoster PresentationsEquipment and Operating Demonstrations

We request a tentative title of your presentation as soon as possible, with final copy to be submitted by October 1 for inclusion in the printed proceedings.

Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv at amsat.org.

The Symposium weekend will feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques, News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting open to AMSAT membersMeet Board Members and OfficersAnnual General Membership MeetingAnnual Banquet□Keynote Speaker and Door Prizes

If you are interested in a Monday Trip (October 29) to the Kennedy Space Center please contact Martha via email: martha at amsat.org. The trip will include a round trip bus from the hotel and entrance to the Space Center. The cost will be about $100. This is a wonderful experience for those that haven't been and for those that have been multiple times. We need to get an idea of how many will participate to select the correct bus.

Watch the AMSAT Symposium web pages for the latest updates.

[ANS thanks Dan Schultz, N8FGV for the above information]

SA AMSAT Update Reports That SumbandilaSat Recovery Work Continues

SA AMSAT posted a report on their web there is still a recovery opportunity for SumbandilaSat.

The team at SunSpace are still incrementally reading back the program code from the nine power modules in an effort to determine the extent of the corruption. With SumbandilaSat going through eclipses, the satellite is not as much available as the team would like. SumbandilaSat□s batteries failed which means that the satellite is only active when the solar panels are illuminated.

□We need the information to confirm that the changes we made to stop repeated corruption were effective.□ Johann Lochner ZR6CBC who spends considerable of his free time on recovery of SumbandilaSat said. □It is our aim to ultimately reprogram one of the power modules to automatically switch the amateur radio transponder on and off.□

Because of the shorter illumination of the solar panels in the Southern hemisphere and most likely poor orientation of the satellite with respect to the sun, progress is much slower than originally anticipated. □Where we had three passes to work with in January we currently have one□, Johann said.

In early June 2011 for an unknown reason (but probably related to a major radiation event on 7 June) the primary controller on the power distribution unit (PDU) powering the On-Board Computer (OBC) stopped responding to commands from the ground station.

It later appeared that the battery had failed and nothing was heard from the satellite for some time. The ground stations at SANSA Space operations at Hartbeeshoek and the Electronic Systems Laboratory at Stellenbosch University are receiving telemetry when the satellite's solar panels are illuminated by the sun.

Johann said with SumbandilaSat responding when it is in full sunlight the team is confident that some operations will be restored even to the point where it may be possible to do some imaging and have the amateur radio transponder back in operation.

[ANS thanks SA AMSAT for the above information]

Amateur Radio Reports Requested for AubieSat-1

John Klingelhoeffer, WB4LNM, AubieSat-1 Technical Mentor at Auburn University is requesting telemetry reception reports from amateur satellite operators after a new operating mode is commanded aboard the satellite.

AubieSat-1 was launched from Vandenberg AFB, California in October, 2011. The cubesat is an undergraduate built satellite developed by Auburn University. Over the weekend of June 9-11 the AubieSat-1 controllers changed the transmission mode of the satellite to increase the quantity of telemetry. The increased telemetry rate will provide data to indicate how well solar cell protection is working. It should also provide additional onboard housekeeping information.

AubieSat-1 transmits with a power of about 800 milliwatts on a frequency of 437.475 MHz. The beacon signal, along with telemetry, is sent using A1A continuous wave Morse code at 20 words per minute. Additional telemetry from the onboard science experiment will use CW transmissions up to 60 WPM.

Please post your reception reports on the AMSAT-BB.

An example of receiving the AubieSat-1 downlink can be found on the DK3WN SatBlog.

[ANS thanks John Klingelhoeffer, WB4LNM for the above information]

ARRL 9 cm Band Plan Updated

Outside of ITU Region 1, the Amateur Satellite Service has a 9cm band allocation of 3.400 GHz - 3.410 GHz on a non-interfering basis. No current satellites are active on this frequency range at present. The new band plan reserves allocations for EME and amateur satellite operation.

The detailed graphic of the 9 cm band plan and accompanying article is posted on the ARRL web.

In ARRL Bulletin 14 ARLB014, released on June 5 the report reads:

The ARRL Board of Directors has unanimously voted to approve the 9 cm band plan, as presented by the ARRL UHF/Microwave Band Plan Committee. Earlier this year, the committee asked radio amateurs for comments on a proposed 9 cm band plan, explaining that the purpose of these band plans is to share information about how the amateur bands are being used and to suggest compatible frequency ranges for various types of application. The committee also recognized that local conditions or needs may necessitate deviations from a band plan, and that regional frequency coordinating bodies may recommend alternatives for use in their respective regions.

The new 9 cm band plan includes the following notations:

This band plan includes all other emission modes authorized in the 9 cm amateur band whose necessary bandwidth does not exceed the suggested bandwidths listed.Weak Signal Terrestrial legacy users are encouraged to move to 3400.3-3401.0 MHz, as time and resources permit.Broadband segments may be used for any combination of high-speed data (e.g. 802.11 protocols), Amateur Television and other high-bandwidth activities. Division into channels and/or separation of uses within these segments may be done regionally, based on need and usage.Per ITU RR 5.149 from WRC-07, these band segments are also used for Radio Astronomy. Amateur use of these frequencies should be first coordinated with the National Science Foundation.

[ANS thanks the ARRL for the above information]

LVB Tracker Boxes in Stock at the AMSAT Office

Martha says she now has LVB Tracker boxes in stock at the AMSAT Office. The cost is $200 plus $20 shipping.

The AMSAT Store Website is currently down due to technical issues so you can place your order via these routes:

Call Martha at the AMSAT Office (301-589-6062) 10:00 AM-6:00 PM EDTFax - 301-608-3410Mail - AMSAT, 850 Sligo Ave #600, Silver Spring MD 20910

The LVB Tracker is a rotator interface designed to to be used as an interface between tracking software and the Yaesu 4500/5500 series of Az/El rotators.

Here's why you want one:

Several physical interface options including RS-232, USB and TCP/IP over 10/100 Ethernet (tested by not implemented)Uses standard EasyComm and Yaesu GS-232 protocolsCross-platform compatibility - Windows, Linux, BSD, MacCompatible with existing real-time prediction programs such as SatPC32 and NovaOpen sourceIntegrated firmware programmer for easy installation and upgrade

Watch a demo of the LVB Track Interface with the Yaesu G-5500 rotator (does not use the AMSAT enclosure)

[ANS thanks Martha at the AMSAT Ofice for the above information]

13 Original Colonies Special Event Includes Satellite Operations

The 2012 13 Colonies Special Event stations will operate from July 1 through July 5. Operators will be on the satellites again this year for the special event.

Recognizing that the 4th comes in the middle of the week (Wednesday) and that some operators will be going to their work on the 2nd, 3rd and 5th, we will add a BONUS DAY on Saturday, 30 June 2012. Stations will operate from 09:00 AM Eastern (1300Z) right through until the 5th. Keep in mind that there may be fewer operators available on the work days so, PLEASE BE PATIENT!

Please send your QSL requests directly to each operator.

Satellite operations are planned as part of the Special Event.

Field Day - Two Weeks and Counting

AMSAT Director Contests and Awards, Bruce Paige, KK5DO reminds you that Field Day is now only TWO WEEKS away!

Each year the American Radio Relay League (ARRL) sponsors Field Day as an emergency preparedness exercise. The event takes place during a 24-hour period on the fourth weekend of June. For 2012 the event takes place during a 27-hour period between 1800 UTC on Saturday, June 23, 2012 and 2100 UTC on Sunday June 24, 2012. Those who set up prior to 1800 UTC on June 23 can operate only 24 hours.

The Radio Amateur Satellite Corporation (AMSAT) promotes its own version of Field Day for operation via the amateur satellites, held concurrently with the ARRL event.

The AMSAT Field Day 2012 event is open to all Amateur Radio operators. Amateurs are to use the exchange as specified in ARRL rules for Field Day. The AMSAT competition is to encourage the use of all amateur satellites, both analog and digital.

For the complete listing of the AMSAT Field Day Rules, along with discussion of selecting the satellites to operate, please refer to the documents posted on-line at:

http://www.amsatnet.com/fd2012.doc

http://www.amsatnet.com/fd2012.pdf

Links are also accessible from http://www.amsat.org front page.

[ANS thanks AMSAT Director Contests and Awards, Bruce Paige, KK5DO for the above information]

Satellite Shorts From All Over

+ Congratulations to Jerry Brown, K5OE upon reaching his VUCC award upgrade to 1,008 grids. Jerry said his contacts ranged from 2003 on AO-40 to new grids can be attributed to "modern" rovers, including ND9M, WD9EWK, and

W5PFG to new grids are credited to Yuri, UT1FG/MM.+ Congratulations to Bob Johnson, W7LRD for earning Satellite Worked All States #326. Congratulations to Ron Oldham, N8RO for earning Satellite Worked All States #328.+ Congratulations to Al Ward, W5LUA and Charles Hoover, K0VXM for completing a Florida (EL98) to Texas (EM13) contact on 10 GHz on June 5. This spanned a distance of 1,606.63 km, or998.357 miles (report via Dave, KB0PE)+ Watch a NASA promotional video about the Educational Launch of Nanosatellites (ELaNa) program. AMSAT's Fox-1 cubesat is a participant of this program.+ Ib, OZ1MY noted AO-7 is once again entering eclipse periods. AO-7 will awaken in either Mode-A or Mode-B randomly upon entering the sunlit portion of its orbit. It is only operational while in sunlight. Watch, and update the status of AO-7 on the OSCAR Status Page.+ Follow the links to download your free copy of SatMagazine. The June issue features the STRaND-2 nanosats on pages 25 and 26; Additionally on page 71 there is a picture of the satellite OSCAR-5 that was built by radio amateurs at the University of Melbourne, Australia.+ AMSAT received the sad news of the passing of Chris Heijzelaar, PA5RWE. He was a very active satellite operator. Condolences can be left at: http://www.het-bar.net (via Andre, PE1RDW)+ The ARRL posted the video of the Dayton 2012 presentation by AMSAT Vice-President Educational Relations Mark Hammond, N8MH describing the different roles and opportunities for Technical Mentors and Ground Station operators to play in an ARISS contact with the International Space Station.+ While the AMSAT on-line store is closed due to technical issues you can place an order through the AMSAT office. The hours are 10:00 AM - 6:00 PM EDT. The phone number is 301-589-6062. Martha is looking forward to hearing from you!

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that please keep in mind when a mechanical engineer, a chemical engineer and a computer engineer were carpooling to work when the car broke down. The mechanical engineer speculated it might be a problem with the engine. The chemical engineer thought they should check the fluids. The computer engineer suggested they all get out of the car and get back in again, then see if it restarts.

73,

This week's ANS Editor,

JoAnne Maenpaa, K9JKM

1A0C - Soon on air!

Posted: 09 Jun 2012 02:05 PM PDT
http://forums.qrz.com/showthread.php?349531-1A0C-Soon-on-air!&goto=newpost

1A0C-CISOM.jpg

Thirty years have passed since 1A made its way onto the DXCC list. And an activation by an International team looks to celebrate the uniqueness of this event. So, from the 1st to the 4th July, we will listen them on the air as 1A0C from Santa Maria del Priorato, home of the Sovereign Military Order of Malta.

The callsign that will be used belongs to the □The Order of Malta□s Italian Relief Corps (CISOM)□, an organization specialized in bringing assistance and relief during emergencies. This underscores the dual value of this activation. On the one hand, there□s the fun side ham radio, giving a not so easy □new one□ to as many stations as possible (especially from the US and Japan).

On the other hand, however, there□s the noble goal, as often seen in ham radio, where a spirit of cooperation and mutual aid are shared by operators all over the world. The team□s aim, in fact, is to raise funds □ thanks to donations and contributions from QSL requests □ in order to buy radio equipment which The Order of Malta□s Italian Relief Corps volunteers will be able to use in case of emergencies.

The operators list includes: 1A0X, 1A0Z, EA2RY, EA5RM, EA7AJR, EA7KW, F5CWU, IN3ZNR, IT9YVO, IZ8IYX, PB2T, SP3DOI and KH6CG as a pilot for North America and Pacific.

They will be active on HF+6m and the QSLs for contacts with 1A0C can be requested via Francesco Cozzi, 1A0Z.

A website will be online soon, stay tuned!

Amateur Radio Field Day

Posted: 09 Jun 2012 12:37 PM PDT
http://forums.qrz.com/showthread.php?349522-Amateur-Radio-Field-Day&goto=newpost

ARRL Field Day is the single most popular on-the-air event held annually in the US and Canada. Each year over 35,000 amateurs gather with their clubs, friends or simply by themselves to operate. It is an excellent opportunity to demonstrate Amateur Radio to local elected community leaders, key

individuals with the organizations that Amateur Radio might serve in an emergency, as well as the general public.

Dates- Field Day 2012 will be held June 23-24, 2012. Field Day is always the fourth full weekend of June, beginning at 1800 UTC Saturday and running through 2059 UTC Sunday.

You do not have to be a member of the Club or a registered user of this website to sign up. If you are a member of the club you can register for this site and then sign up for field day using your website username.

. There is no charge for attendance, we would appreciate knowing how many people will be attending. Gifts of cash and volunteer time are needed and will be greatly appreciated. The Amateur Radio Club of El Cajon, Inc. is a 501(c)7 and gifts are not tax deductible.

HAMRADIONOW.tv

EPISODE 12C: Hamvention TOUR

Three Days of Dayton!

Nobody covers the Hamvention like HamRadioNow. This year we worked out little corkscrew tails off,

covering new products from the major manufacturers, some of the little ones, and a little more of

the strange and unusual. Our coverage comes in three videos, one each for Friday, Saturday and Sunday.

So stop by our web site, pop some popcorn, settle back and relax. We've worn ourselves out and done all the work.

Ham Radio Operators Monitor OC Wheelmen's 'Ride Around the Bear':

Posted: 10 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28455

Members of the Orange County Wheelmen bicycle club started and finished their 28th Annual 'Ride Around the Bear' in Redlands. Ham radio volunteers with San Bernardino County helped monitor the Orange County Wheelmen's 100-mile "Ride Around the Bear," which started and finished Saturday at Sylvan Park in Redlands. Jeff Sabatini manned one of 12 comm sites on Highway 38's dogleg curve at the Forest Falls turnoff in Mill Creek Canyon. He had his pickup rigged with a radio tower to increase his signal output and reception in the steep-sided mountain gulch. "Ham radio works when everything else won't," Sabatini said. "This is good practice for emergency situations. Fire, flood, earthquakes."

//
Man (NM5Z) Paralyzed After Dive Accident: 'Don't Give Up':

Posted: 10 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28454

Chitto River -- and words of warning for anyone who likes to jump into a good hole of water.
"Don't dive!" says Pickard, 55, of McComb, who's been a quadriplegic since a plunge into the Bogue Chitto River in 1973. Though paralyzed, he stays active and has accomplished much -- serving as a deacon in his church, building and maintaining websites, repairing computers and communicating with people around the world via ham radio. Though a quadriplegic -- paralyzed in all four limbs -- Pickard can raise and lower his arms. Wrist braces help him perform such tasks as holding an upside-down pencil to tap out words on a computer and operating a modified ham radio handset.

//
Group Connected -- Radio Enthusiasts Visit Mildura for Annual Event:

Posted: 10 Jun 2012 04:57 PM PDT
http://www.eham.net/articles/28453

The wonders of amateur radio were discussed and celebrated in Mildura at the weekend. About 185 people gathered for the Wireless Institute of Australia's AGM, but it wasnt all business. Social events, including a civic reception and paddleboat lunch cruise on the Murray River,kept

enthusiasts busy. The AGM is held at a different location every year and Michael Owen, president of the WIA, from Melbourne, yesterday said} Mildura's weather had turned it on for members - some of whom had travelled from New Zealand and Darwin. From Morse code to digital radio broadcasting, WIA members had the chance to share their knowledge and interests. "The weekend is a mixture of social, business and technical matters," Mr Owen said yesterday. "This morning a group from South Australia launched a high altitude balloon and tracked that using radio technology and a repeater on it; using communications as far away as Adelaide and Melbourne but using VHF;, so it's a mixture of all sorts of things involving 185 people."

CK6S - Special Event Station for the 100th Anniversary of the Calgary
Stampede

Posted: 12 Jun 2012 06:51 AM PDT
http://forums.qrz.com/showthread.php?349920-CK6S-Special-Event-Station-for-the-100th-Anniversary-of-the-Calgary-Stampede&goto=newpost

The Calgary Amateur Radio Association will be operating

special event station CK6S, from July 5 to 15th, 2012 celebrating

the 100th Anniversary of the Calgary Stampede.

A special QSL card will be available through the QSL bureau or direct,

following the CK6S/VE6AO QSL instructions on QRZ.com.

Planned frequencies are in the general portion of the US phone

bands around 3.825, 7.180, 14.250, 21.320 & 28.475 +-QRM

Watch the packetcluster for real time posting of operating times

and exact frequencies.

All amateurs within the City of Calgary can also use special

prefixes CJ6 for VA6 and CK6 for VE6 for the same

period.

Work 10 Calgary stations and you can qualify for the

Stampede City Award, illustrating the chuckwagon races;

http://forums.qrz.com/showthread.php?349896-Radio-Amateur-VK5ZAI-on-TV-show&goto=newpost

Radio Amateur VK5ZAI on TV show

This video shows Tony Hutchison VK5ZAI on the Channel 7 Today Tonight TV show talking about amateur radio and the ARISS schools program.

The show provides some great insights as to how Amateur Radio can provide support for NASA as well as raise public awareness through the ARISS schools program.

Tony VK5ZAI has provided many Telebridge links for the International Space Station (ISS) to schools around the world. An ISS Telebridge contact is where a dedicated ARISS amateur radio ground station, located somewhere in the world, establishes the radio link with the ISS. Voice communications between the students and the astronauts are then patched over regular telephone lines.

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

Visit us at the HAMRADIO in Friedrichshafen
Europe's largest amateur radio meeting HAMRADIO takes place from
Jun 22-24 at the Convention Center in Friedrichshafen on Lake Constance
We would be pleased to meet the DXNL subscribers at the booth of the
DARC Committee "DX and HF contesting" (hall A1, booth 462).

9K, KUWAIT
The "Kuwait Amateur Radio Society" activates the special event station
9K2KCBB from Jun 13-15 to mark the World Blood Donor Day on June 14.
The will work in SSB/CW/RTTY. QSL via 9K2RA, unfortunately only direct.

CT, PORTUGAL
Joao,CT1BWU, is licensed for 30 years now and celebrates this with the
special callsign CR6BWU. QSL via homecall.

CY0, SABLE ISLAND, NA-063 (update)
Alan has put down his 40m/80m/160m antenna but he can still work on
30m/20m/17m/15m/12m/10m in PSK and BPSK31 using his TS-690s and a
Hygain AV-18VS 10m high. His stay will last until the end of the year.

KH0, MARIANA ISLANDS, OC-086
Tony,JA6CNL, will visit the Northern Mariana Islands (OC-086, USi
NI002S, WLOTA 1333, Loc QK25uf) again from June 15-18. He works as KH0N
in CW only on 80m-6m. QSL via homecall.

OD, LEBANON
Gaby,OD5NJ, has been spotted on 15m from 1430-1600 UTC. QSL via EA5BYP.

ON, BELGIUM
The radioclub of Binche (ON7RY) commemorates the Belgian resistance
fighters of World War II on the historic spot Bruly-de-Pesche by using
the special callsign ON44WAR on Jun 17. They will use a Whaddon MK VII
PARASET for this purpose. QSL via ON7RY.

PA, THE NETHERLANDS
The special event station PA300BPM draws attention on the 300th horse market in Numansdorp until June 28. QSL via PD2GSP.

SM, SWEDEN
Richard,SM2TOS, Urban,SM2SXA, Gunnar,SM2IUF, Patrick,SA2BDO, Mats,SA2AWO, Rune,SM2EKA, and Maria,SA2YLM, are planning an expedition to a Lancaster bomber which crashed on Oct 29, 1944, at Porjus (JP97ua) using the special callsign SE2EE on June 16/17. The Avro Lancaster bomber Mk1 NF920 "Easy Elsie" was one of 37 with the mission to sink the Tirpitz in Norway. QSL via SM2TOS.
See also: http://www.sm2tos.se/easyelsie/eng

SV, GREECE
The Greek special event station SX135HRC is active until July 31 on the occasion of the 135-year old existence of the Greek Red Cross. QSL via SV1EOS.

TF, ICELAND, EU-168
Volkmar,TF/DL4AOJ, will be QRV from the island of Grimsey (EU-168) working mainly on SSB and maybe some CW with his IC 706 (100 watts) and GPA 404 (40m/20m/15m/10m) from June 15-19. He travels and operates alone so the restriction for all his luggage (tech/clothing/food/etc..) is what he can carry along. He still hopes to make a good number of QSOs, though.

UA1, EUROPEAN RUSSIA
Members of the RZ1CWC team (Victor,R1CBN, Vladimir,UA1CIO Andrew,RN1CW) and other OPs will show up from Annenskoe Fortification (WCA UA-00024, COTA-RU C-124) and from Vyborg Castle (WCA UA-00004, COTA-RU C-104, ARLHS ERU-231, RLHA RLE-new) on Jun 16. They also plan to activate Vysotsk Fortress (WCA UA-00022, COTA-RU C-122) on Jun 16/17. Listen for RZ1CWC/p in CW/PSK/SSB on all bands. The log will be uploaded also to WCA E-Log. QSL via RN1CW. See also: http://www.rz1cwc.qrz.ru and http://www.wcagroup.org/ENG/main.html
---
The new award program "Gallery of the Great Genius of Russia" (GGGR) was launched in Russia. Following special event stations will be active until Aug 30:
R11GGGR Op: RK1AN
R12GGGR Op: RZ1AWZ
R22GGGR Op: UA2FDM
R44GGGR Op: UA4LAQ
R66GGGR Op: RU6BS
R73GGGR Op: UA6MM
R77GGGR Op: RK6AH
All QSLs via UA6MM.

UA9, ASIATIC RUSSIA
The city of Komsomolsk-on-Amur celebrates its 80th anniversary. The local HAMs participate in this event with the special event station UE80C from June 1 until August 31. QSL via bureau.

V7, MARSHALL ISLANDS, OC-028
Steve,G3ZVW/ZD8N, will be QRV as V73/AF6SU from the clubstation V73AX
on Kwajalein atoll (Ralik chain, OC-028, Loc RJ38ur) until the end
of June. He has been worked on 20m CW already. QSL via G3ZVW.

VE, CANADA
The Burnaby Amateur Radio Club (VE7BAR) was assigned the special call
CG7CWPC in celebration of the 100th anniversary of the "CW Parker
Carousel" (shown in "Burnaby Village Museum"). They will work in all
modes on all bands from Jun 15 until July 15. QSL via VE7ESS.
See also: http://www.ve7bar.org

The Kitchener Waterloo Amateur Radio Club (KWARC) celebrates its
90th anniversary with the special callsign VC390IC from June 18 until
July 2. The station consists of a Viking Pacemaker transmitter and
a Gonset G63 receiver. Operations will take place in SSB on 40 and 80m.
They have also other equipment for the higher bands.
QSL unfortunately only direct via VE3NQK.

The Laval-Laurentides Amateur Radio Club celebrates its 30th jubilee
by activating the special call VC2L in all modes on all bands from
June 15 until July 15. QSL via VE2NHK.

Mike,VE3NOO, may use the special callsign VX3ROYL from Jun 15 to Jul 15
to mark the 200th anniversary of the escape of the British corvette
"Royal George". He plans to work in all modes on all bands.
QSL via VE3NOO.

Not only WPX friends will be interested in the special callsign VX3T
operated by Pete,VE3IKV, on the occasion of the Calgary Stampede
centennial on June 15. QSL unfortunately only direct via VE3IKV.

W, USA
Andy,N8OFS (SMIRK 6737), will be QRV as N8OFS/p from EN91 for the
SMIRK 50MHz QSO Party running 50 watts in FM on 52.525 MHz from
Jun 15-17. QSL unfortunately only direct via homecall or eQSL.

AWARDS PROGRAM: The Activity Group of Belarus (AGB) draws attention to their
Award trophy and contest programs: http://ev5agb.com

DXCC: The XX9E operation was approved for DXCC credit. QSL cards for the
DXCC and all other ARRL awards can be (re-)submitted for confirmation
at the HAMRADIO in Friedrichshafen.

IOTA: EU-155 was deleted from the list. The further development of the
Po river delta will be monitored continuously. QSOs before October 2011
will be accepted on all applications arriving prior to Sep 1.

Following IOTA expeditions are accepted for credit now:
AT2DW (AS-175), XF1AA (NA-189), 4A3RCC (NA-200), KL7RRC/p (NA-240),
4W0VB/p (OC-232), CW5GI (SA-039), 7O6T (AF-028)

4U1ITU, 4U1UN and 4U1WRC: QSL cards of 4U1ITU, 4U1UN and 4U1WRC will be
available at the booth of the "Swiss DX Foundation" at the HAMRADIO.
Please refer to the time schedule announced at the booth and bring your
QSO information with you.

TCSWAT: The winner of the World Kidney Day Award are: ES1IP, OK2JS, DL1MDU,
EA2DNY, EA7IZZ, EB5CS, EI3CTB, G0TRB, G0WOU, G3OCA, M0TQR, OZ4Z,
RA3PCI, SWL I3-65709

OP wanted: Members of the "West OZ DX Group" are planning a DXpedition to
Woody Island (OC-170) this year. See also: http://www.westozdx.net
If you are interested please send an e-mail to webmaster@westozdx.net

TOPBAND: All 160m enthusiasts are invited to participate in the survey of
Garry,NI6T, and Larry,K8UT, until Aug 31. The results will be published
in September. See also: http://survey.hamdocs.com/?sid=11389 and
http://k8uttw81.k8ut.com/tiki-list_file_gallery.php?galleryId=11

EURAO: The visitors of the HAMRADIO can meet representatives of the European
organization of radio amateurs in hall A1 at booth 769.
See also: http://www.eurao.org/de and http://eurobureauqsl.org

INTERNATIONAL MUSEUMS WEEKENDS: The International Museums weekends will be
held on Jun 16/17 and Jun 23/24 this year. Radio amateurs are invited
to join the IMW by operating their stations from a local museum.
The organizer Harry,M1BYT, asks for registration at:
http://www.ukradioamateur.co.uk/imw

SILENT KEYS: Gene Zimmerman, W3ZZ, passed away at the age of 71 on June 3.
He was responsible for the QST column "The World Above 50 MHz" from
2002 to 2011. He was a member of the "ARRL Contest Advisory Committee",
editor of the "VHF Contesting Column" in CQ Contest magazine, Director
of the CQ VHF Contestes from 2000-02 and an early adopter and advocate
of aggressive contestlog checking. Other HAMs who passed away are:
Peter Kallfelz,DL8YR, Luciano Montanari,I4MNK, Joel Oulie,F6FHP, and
Abel Aguirre,LU8EDK (who has spent 18 summers and 6 winters as a radio
operator in the Antarctic between 1953 and 1997).
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost them, but grateful that we could
get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 13 DIG Spring Contest
Jun 14 DIG Spring Contest
Jun 16 AGCW-DL VHF/UHF Contest
Jun 16/17 JARL All Asian DX Contest
Jun 16/17 Ukrainian Classic RTTY Contest

Jun 17 DIE Contest

Starting in 2012 the "World Castle Weekend" is moved to the third weekend
in June following a request of Spanish HAMs who want to avoid any possible
interferences with the "His Majesty The King of Spain Contest" on Jun 23/24.
See also: http://www.wcagroup.org

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AN-013, several, Trinity Peninsula group: LU4ZS is working from the
Marambio station on Seymour Island (AN-013, AA LU-03, WAP ARG-21,
WFF LUFF-056) at the moment. QSL via LU4DXU.

AS-147, JA8, Hokkaidos Coastal Islands: Taka,JA8COE/8, is going to visit
Yagishiri Island (WLOTA 2512, Loc QN04QK) again from Jun 16-18. The
activity will be postponed by one week if the weather is not suitable.
QSL via homecall.

EU-005, G/GM/GW, Great Britain: The special event station GB0BON will be QRV
from Naseby on Jun 16/17 to remember the Battle of Naseby (June 1645).
They will work on 80m-70cm as long as their generators provide power.
QSL via G4XEX (bureau/direct/eQSL).

EU-021, TF, Iceland: Bill,W4TAA, and Pete,VE3IKV, will show up as TF/VX3T
from the south coast of Iceland (WLOTA 2975/Loc HP83SU) from Jun 17-30.
They will work only on 6m with 100 watts and an 8-ele-yagi. They will
also try to activate other Loc fields. QSLs only direct via VE3IKV.

EU-023, 9H, Malta group: Jeff,N6GQ, is going to spend his holidays on
Malta (MIA MM-001, WLOTA 1113). He will work in holiday style signing
9H3ZZ on the HF bands from Jun 17-29. QSLs direct or via LoTW to N6GQ.

On the occasion of the International Museum weekend in 2012 the special
event station 9H9IMW will be active from the historic city of Valetta
on Jun 16-24. They have an exhibition showing old radio technology
which was provided by Fortunata,9H1ES, and others. More information
about the radios can be found on http://gorga40.tripod.com
QSL direct via 9H9IMS (see QRZ.com).

EU-039, F, Chausey Islands: Chausey Island (DIFM MA-004, DDFM 50, DPF 04,
WLOTA 0424) will be the last stop of Keith's trip from Jun 16-22.
He will work holiday style as F/G3TTC in SSB on 80m/40m/20m/15m.
QSL via G3TTC (bureau/direct).

EU-043, SM6, Goteborg och Bohus/Halland County group: Bernd,DL8AAV, will
show up from Orust Island signing SD1B/6 from Jun 18-30. Listen for
him on the usual IOTA frequencies. QSL via DL8AAV.

EU-048, F, Bretagne (Morbihan) Region group: Keith,G3TTC, is handing out
IOTA points from Ile d'Houat (DIFM AT016, WLOTA 1105) signing F/G3TTC/p
in SSB on Jun 14. QSL via G3TTC (bureau/direct).

EU-112, GM/MM, Shiant Islands: Members of the "GMDX Group" will activate
the Shiant Islands as GB5SI from Jun 15-22. They plan to work in CW,
SSB and RTTY on 80m-6m. QSL via MM0BQI.

EU-125, OZ, Jylland West group: Rico,OZ/DO6EBB, will be active on HF from
Fano Island (DIA NS-002, Loc JO45EK) from Jun 17-30.
QSL only direct or via eQSL to DO6EBB.

NA-092, W5, Texas State West: Dave,AC0QG/5, plans to show up again from
South Padre Island (USi TX007S) between Jun 18 and Jul 13. Listen for
him on the usual IOTA frequencies. QSL direct via homecall.
The log will be uploaded also to the LoTW and eQSL.

Lighthouse activities

KH0N LH 1333 Jun 15-18

WFF activities

DLFF: Ric,DL2VFR, provided following information:
The new WFF Directory was published on Jun 1, 2012, and now there are
also these new DLFF areas:
DLFF-138: Nature Reserve Esterweger Dose
DLFF-139: Nature Reserve Duvenstedter Brook
DLFF-140: Nature Reserve Bislicher Island
DLFF-141: Nature Reserve Koenigsbruecker Heide
DLFF-142: Nature Reserve Doeberitzer Heide
DLFF-143: Nature Reserve Waldnaabtal
DLFF-144: Nature Reserve Charlottenhofer Weihergebiet
DLFF-145: Nature Reserve Stadtwald Augsburg
DLFF-146: Nature Reserve Rotwildpark Stuttgart
The special event station DQ125HSB is working in SSB on 2m from the
nature park Harz (DLFF-063) on Jun 16 (1200-1700 UTC). QSL via bureau.

ONFF: The clubstation ON6WL/p will be active on 40m and 20m from the ONFF
area "De Buylaers Lokeren" (ONFF-065) on Jun 17 (0700-1100 UTC).
This activity counts also for the BCA (Belgian Castle award) with the
reference OV-006 and WCA ON-00338. QSL via ON5JE.

SPFF: Zbig,SP2IU/p, plans to activate following WFF areas:
SPFF 129: Nature reserve Szaniecki (Jun 17, starting 0800 UTC)
SPFF 065: Nature reserve Nadnidzianski (Jun 17, starting 1300 UTC)
SPFF 052: Nature reserve Kozubowski (Jun 18, starting 0800 UTC)
Zbig works in CW and SSB mainly on 20m and 40m. QSL via homecall.
The logs will be uploaded also to the WFF LogSearch.

YOFF: YP7P and YR7WFF are working in CW, SSB and digital modes on HF/50 MHz/
VHF/UHF from YOFF-373 (2228m a.s.l., Loc KN15TI) from Jun 14-19.
QSL via homecall (bureau/direct).

DXer arrested on espionage (update)

According to Baldur,DJ6SI, himself, he was not accused of espionage.
He was accused of
1) making radio communications without the consent of the Greek authorities
2) operating a transceiver which can receive also non-HAM frequencies.
Later they added a point this he was not willing to hand over his laptop
for the contents to be checked. In the hearing of June 8 they only kept the
charge up of destroying his notebook for the purpose of destruction of
evidence. This point is judged later.

Many thanks for contributing to this issue of the DXNL are going to:

QA's Amateur Radio Operators Take Part in 'Art of the Deals':

Posted: 11 Jun 2012 05:33 PM PDT
http://www.eham.net/articles/28458

CENTREVILLE The Queen Anne's Amateur Radio Club (QAARC) operators will demonstrate some of their communication equipment and provide information about amateur radio and their club at the "Art of the Deals" from 9 a.m. to 1 p.m. Saturday, June 16, in the Courthouse Square, Centreville. Amateur radio operators using small transceivers with very low power (known as QRP) will demonstrate how to communicate with other amateurs around the world using inexpensive, low power equipment and antennas. Two devices for local communication will also be demonstrated. One is a tiny two-watt transceiver the size of a cigarette pack that is used to communicate on both very high (VHF) and ultra high frequencies (UHF) for unit-to-unit communication or via a repeater that retransmits the signal at much higher power. The second device is a "go-kit" contained in a cat-litter container. This transceiver also operates on VHF and UHF with power as high as 50 watts. It can be a self-contained base station.

4x4HAM Field Day Invitation

Posted: 12 Jun 2012 11:24 AM PDT
http://forums.qrz.com/showthread.php?349953-4x4HAM-Field-Day-Invitation&goto=newpost

http://www.4x4ham.com/

If you can't make it in person, be sure to listen for W7AZO "Off Road and
On The Air"

4x4 Ham Field Day - June 22-24, 2012

Please join the 4x4 Ham group for ARRL Field Day June 22-24, 2012. You can camp all weekend with us or just stop in Saturday or Sunday. This is our 4th year operating Field Day on the Mogollon Rim. In that time, we've become the BEST and biggest Field Day site in Arizona!

ARRL Field Day is held the 4th full weekend of June each year. The Field Day objective is to work as many stations as possible on any and all amateur bands (excluding the 60, 30, 17, and 12-meter bands) and to learn to operate in abnormal situations in less than optimal conditions. Bonus points are given for operating without commercial power, using technologies like solar/battery combinations, portable generators, etc.

We will be providing all the radios, antennas, and other equipment needed. If you have your own, feel free to bring it. We will have many Extra class control operators on site, so if you are a Technician, General, or even someone interested in ham radio, but no license yet, you can join us and operate with Extra class privileges. We are also hosting a testing session Saturday at 9am, so pre-register for that if interested. As always, we'll eat well with group breakfast and potluck dinner on Saturday. The site is not difficult to access and is RV and trailer friendly.

If you are a interested in ham radio or newly licensed Technician, this is an excellent event to attend to get hands on experience. Throughout the weekend we'll be providing radio tutorials and many learning opportunities. We plan to operate/demonstrate many modes including SSB, CW (Morse Code), APRS, PSK31, NTS radiogram traffic, satellite contacts, etc. All activities are family friendly, so bring them along.

For directions and all other information related to the 4x4 Ham Field Day site, follow this link.

1A0C - Soon on air!

Posted: 09 Jun 2012 02:05 PM PDT
http://forums.qrz.com/showthread.php?349531-1A0C-Soon-on-air!&goto=newpost

1A0C-CISOM.jpg

Thirty years have passed since 1A made its way onto the DXCC list. And an activation by an International team looks to celebrate the uniqueness of this event. So, from the 1st to the 4th July, we will listen them on the air as 1A0C from Santa Maria del Priorato, home of the Sovereign Military Order of Malta.

The callsign that will be used belongs to the □The Order of Malta□s Italian Relief Corps (CISOM)□, an organization specialized in bringing assistance and relief during emergencies. This underscores the dual value of this activation. On the one hand, there□s the fun side ham radio, giving a not so easy □new one□ to as many stations as possible (especially from the US and Japan).

On the other hand, however, there□s the noble goal, as often seen in ham radio, where a spirit of cooperation and mutual aid are shared by operators all over the world. The team□s aim, in fact, is to raise funds □ thanks to donations and contributions from QSL requests □ in order to buy radio equipment which The Order of Malta□s Italian Relief Corps volunteers will be able to use in case of emergencies.

The operators list includes: 1A0X, 1A0Z, EA2RY, EA5RM, EA7AJR, EA7KW, F5CWU, IN3ZNR, IT9YVO, IZ8IYX, PB2T, SP3DOI and KH6CG as a pilot for North America and Pacific.

They will be active on HF+6m and the QSLs for contacts with 1A0C can be requested via Francesco Cozzi, 1A0Z.

A website will be online soon, stay tuned!

Amateur Radio Field Day

Posted: 09 Jun 2012 12:37 PM PDT
http://forums.qrz.com/showthread.php?349522-Amateur-Radio-Field-Day&goto=newpost

ARRL Field Day is the single most popular on-the-air event held annually in the US and Canada. Each year over 35,000 amateurs gather with their clubs, friends or simply by themselves to operate. It is an excellent opportunity to demonstrate Amateur Radio to local elected community leaders, key individuals with the organizations that Amateur Radio might serve in an emergency, as well as the general public.

Dates- Field Day 2012 will be held June 23-24, 2012. Field Day is always the fourth full weekend of June, beginning at 1800 UTC Saturday and running through 2059 UTC Sunday.

You do not have to be a member of the Club or a registered user of this website to sign up. If you are a member of the club you can register for this site and then sign up for field day using your website username.

. There is no charge for attendance, we would appreciate knowing how many people will be attending. Gifts of cash and volunteer time are needed and will be greatly appreciated. The Amateur Radio Club of El Cajon, Inc. is a 501(c)7 and gifts are not tax deductible.

RFinder The World Wide Repeater Driectory now supports Allstar linked repeaters!

Posted: 11 Jun 2012 06:20 PM PDT
http://forums.qrz.com/showthread.php?349867-RFinder-The-World-Wide-Repeater-Driectory-now-supports-Allstar-linked-repeaters!&goto=newpost

Press Release

06/11/2012

From the QTH of W2CYK

For immediate release

After repeated requests from our users RFinder - The World Wide Repeater directory now fully supports Allstar linked repeaters! The web version already supports realtime node status, followed by Android by end of week. Apple support will follow as soon as Apple "approves" the update.

The WWRD Supporting Allstar is just another step of making The World Wide Repeater Directory, it's third party applications such as RT Systems and CHIRP and of course the RFinder family of programs on iPhone, Android and www, Ham Radio's one-stop-shop for repeater data, no matter what the technology used for repeating radio signals.

RFinder is available in the Apple App Store for iPhone and Google Play/Market for Android; the web version can be found at http://www.rfinder.net.

RT Systems radio programming software for Window is WWRD enabled and can be found at http://www.rtsystemsinc.com

CHIRP is open source software and is WWRD enabled and can be found at http://chirp.danplanet.com

Hurricane Watch Net Enters 47th Season

Posted: 02 Jun 2012 11:47 AM PDT
http://forums.qrz.com/showthread.php?348642-Hurricane-Watch-Net-Enters-47th-Season&goto=newpost

Amateur Radio□s Hurricane Watch Net is geared up and ready for its 47th year of activity. Formed in 1965 by Jerry Murphy, (Amateur radio call sign K8YUW), during Hurricane Betsy, the Hurricane Watch Net was an informal group of radio amateurs who recognized a need to provide communications to and from hurricane affected areas. Over the years the net has relayed reports in to the National Hurricane Center and just as importantly out to the many Amateur Radio stations located in the path of hurricanes.

While the net continues to use original HF radio frequencies, typically 14.325 MHz, the inner workings have grown with today□s technologies. To the casual listener the net is anchored by a single net control station, but there might be as many as a dozen net control stations located all over the United States and in the islands all connected to an Internet channel while this is going on. This instant □back-channel□ communication helps accommodate the shifting radio coverage on the HF bands. It also helps coordinate operation on multiple HF frequencies. When a maritime Amateur Radio operator or one on an island reports weather conditions in a storm all of those net control stations are listening. At times, the acting control operator will lose propagation and another will pick the report up. The control stations will then coordinate a □shift□ with the better positioned station picking up the net. All together there are 37 control operators, spread from Florida to Arizona to Canada all with the idea of adequate communication into the storm affected area.

The back channel communication also serves as a conversational link to the National Hurricane Center in Miami, FL where hurricane experts can request information and reports from our net stations, and confirm the data we supply.

Many of the tools we use to conduct the net are available to all through the official Hurricane Watch net website, http://www.hwn.org. These tools include color graphics of a storm□s position and forecast direction, conversion tools to handle different measuring standards, and the latest detailed reports and forecasts from the NHC. The HWN is also working to keep a database of our frequent contributors so that we don□t need to repeatedly ask your location and details, but get right to your reporting.

This technology of Internet-relayed satellite pictures, radar positions and statements may raise the question of why maintain contact on □old fashioned□ HF radio. The storms of last year again proved to answer that-

by taking out power, blocking satellite signals and otherwise interrupting technology. As we□ve come to expect, it left the Ham Radio Operator who has the ability to put a signal out with trained, detailed observations to keep the rest of the world appraised.

The primary reason for our overwhelming success over the 46 years of our existence is hundreds of fellow amateur radio operators in the affected area who monitor the storm's progress and voluntarily bring to us that data which is so vitally important. You need not be a member to enable those vital reports to us. Additionally, we often find ourselves needing relay assistance to capture essential information. We always appreciate your cooperation by allowing a clear frequency so that we can hear weak and impaired signals which might be coming from an affected area. For more information on how you can participate in the Hurricane Watch Net, visit http://www.hwn.org.

During the next 50 MHz IARU Contest (June 16-17) will be active Marco as IS0BSR/IM0 from JM48FX in Sant?Antioco Isl. (IOTA EU-024).

Setup:
5 el. I0JXX
2 el. DK7ZB
FT857 + PA (500 Watt)

Thank you

SOURCE: tnx to Alex IV3KKW direct to MMMonVHF

** DXCC: I: Italy; square JN56; start 2012-06-09 **

Steffen DD0VF qrv from JN56RM as IN3/DD0VF in June

This year some mountain hiking in South Tyrol again.
I'll be QRV in the morning and evening for MS. Reasonable
good take off from QTF 40-60 and 180-290 (G/GW shall work
with some offset to south).
Rig: only 50W, 4 or 7el (depending on space of balkony)

I could be also QRV from abt 2500m asl for a few hours
(possible calls IN3/DD0VF, IW3/DD0VF, HB9/DD0VF)

Let me know if you still need JN56.

SOURCE: tnx to Steffen direct to MMMonVHF

** DXCC: OH: Finland; square KP33; start 2012-06-21 **

Markku, OH8UV, will be QRV on 50 MHz as OH7UV from KP23 with 100W in 4 el.

SOURCE: Markku, OH8UV, direct to MMMonVHF

** DXCC: D6: Comoros; start 2012-08-01 **

HF and 6m Activity planed as D64K (LH81PJ)

We will have a station dedicated to 6m with a K3, ACOM1000 and long yagi.

Dates to be confirmed.

Operators are: C31CT/EA3QS, IW3SQY, IZ4AKS, IZ8GCE, SP3DOI, IV3DSH, EA3AKY

Expedition website: www.d64k.com

SOURCE: Josep EA3AKY direct to MMMonVHF

** DXCC: VU: India; square ????; start 2012-05-23 **

Until July 8th, Taj, VU2DJ, Sabu, VU2ELJ, Sree, VU2OB, Prabin,
VU2POL, Peeter, VU2PJP, Murali, VU2FWW, Thomas, VU2VJT, Sunil,
VU2ATB, Ashraf, VU3MTY, Mujeeb, VU3WII and Sanal, VU3SIO, will
activate the special call sign 8T1M from 160 - 2 Meter in CW, SSB,
PSK, RTTY, FM and D-STAR. QSL via VU2MLQ.

Slidell 'Ham Radio' Operators Invite Public To See Them In Action:

Posted: 12 Jun 2012 05:12 PM PDT
http://www.eham.net/articles/28460

Where were you during Hurricane Katrina? A handful of the members of the Ozone Amateur Radio Club were holed up in locations throughout eastern St. Tammany -- the hospital that now is Ochsner - North Shore, the National Weather Service office off Airport Road, a private residence in Pearl River -- doing what they could to keep people throughout the world informed about what really was happening in Slidell.

Ham Radios to Mark Carousel's 100th:

Posted: 12 Jun 2012 05:11 PM PDT
http://www.eham.net/articles/28459

Eric Stapleton is doing his best to connect fans of carousels and ham radios this weekend. A member of the Burnaby Historical Society and a director of the Burnaby Amateur Radio Club, Stapleton wanted to combine his two passions in marking the 100th anniversary of the C.W. Parker Carousel No. 119 at Burnaby Village Museum. The result is an event that kicks off with the club operating outside the carousel at the museum this weekend, June 16 and 17, when members will talk to ham radio operators at the C.W. Parker Carousel Museum in Leavenworth, Kansas, where the village's carousel was built.

Ham Radio All Talk in Times of Crisis

Posted: 14 Jun 2012 08:06 AM PDT
http://forums.qrz.com/showthread.php?350186-Ham-Radio-All-Talk-in-Times-of-Crisis&goto=newpost

20120614_C8503_PHOTO_EN_15143.jpg

Despite the prevalence of the Internet, Amateur Radio has never failed as a lifeline during times of crisis. To demonstrate this capability, the Central Toronto Amateur Radio Club (aka CenTor) is conducting an Amateur Radio emergency preparedness exercise on June 23 - 24, 2012, which will be open to the public.

Often called "ham radio", Amateur Radio is a non-commercial radio service, which allows licensed operators to use various types of radio communications equipment to communicate with one another, both locally and around the globe, for both public service and recreational purposes. Amateur Radio operators, often referred to as "hams", are federally licensed by Industry Canada and are allowed to use specially allocated radio frequencies to carry out their operations. Hams come from all walks of life and are located all over the world.

"Amateur Radio plays a very important role in the communications capabilities of our modern society", said Peter Dale, President, CenTor, and licensed Amateur Radio operator with the call sign of VE3EYI. "Not only does it facilitate communications during times of emergency or natural disaster, it is also a lot of fun and a great way to learn about electronics and wireless communications, especially for young people", Dale added.

The emergency preparedness exercise being put on by CenTor will be part of an annual event called "Field Day". During this event, hams all over North America will be setting-up emergency stations in public places and communicating with one another over a 24-hour period for points as part of a large North American emergency preparedness contest.

Anyone interested in learning about Amateur Radio and its capabilities is encouraged to attend.

EVENT DETAILS

When

Start: June 23, 2012 @ 8:00am

End: June 24, 2012 @ 2:00pm

Where

Revera Leaside Retirement Living

10 William Morgan Drive, Toronto, ON

The station will be set up on the lawn behind the building and is
accessible from the West parking lot. A visitor reception desk will be
set-up at the station to receive guests.

Who

Members of the public are encouraged to attend this event to see what
Amateur Radio is all about.

IQ1SV Memorial Day SS Transylvania.

Posted: 14 Jun 2012 06:40 AM PDT
http://forums.qrz.com/showthread.php?350174-IQ1SV-Memorial-Day-SS-Transylvania&goto=newpos
t

Memorial Day of British S.S. Transylvania torpedoed in front of the Isle of
Bergeggi

16th - 17th June 2012.

From 07.00 a.m. GMT of June 16th , to 07.00 p.m. GMT of 17th a radio
station is being activated with the call sign

" IQ1SV Special Event SS Transylvania" released to Savona A.R.I. Section
by the Ministero dello Sviluppo Economico Telecomunicazioni.

The radio station will work from two different locations:

- a fixed station located in Saint Elenas Fort on the heights of the town of Bergeggi, 385 metres over the sea level, looking on to the area of the sinking.

- a mobile maritime station located on the G.P.S. coordinates of the wreck.

The multi operator station will work on 10 15 20 40 80 160 meters with CW, phone and digital PSK31 emissions.

Each contact will be confirmed with a special commemorative QSL (QSL manager IQ1SV via Association or direct with IRC c/o P.O. box 133 17100 SV Italy).

A.R.M.I. (Italian Radio Amateur Association) and I.N.O.R.C. (Italian Naval Old Rhythmers Club) will participate to this radio memorial as operators along with the A.R.I. Section of Savona.

See Special event section.

SimpleSat Look Down v1.0 now available

Posted: 13 Jun 2012 09:45 AM PDT
http://forums.qrz.com/showthread.php?350058-SimpleSat-Look-Down-v1-0-now-available&goto=newpost

SimpleSat Look Down v1.0 now available

SimpleSat Look Down is a free, easy-to-use software app for satellite tracking.

Written by Tom Doyle W9KE it includes a satellite look down window that displays the view from the satellite looking down at the earth as it moves along.

It uses .NET 4 and runs on Windows 8, Windows 7, Vista and XP.

Tom has released a collection of videos that explain how SimpleSat Look Down works and they can be seen at

http://www.uk.amsat.org/?p=8217

You can download SimpleSat Look Down from

http://www.tomdoyle.org/SimpleSatLoo...tLookDown.html

MEDIA RELEASE 2012-3 - Ham Radio Operators Prepare to Support Manitoba
Marathon*

2012-06-14

Winnipeg 14 JUN 2012 • Over eighty-five Amateur Radio Operators and supporting personnel will be providing volunteer communications support for the Manitoba Marathon this Sunday. Amateur Radio Operators have been involved in the Manitoba Marathon for more than thirty-two (32) years.

The Manitoba Marathon is the largest scheduled annual Amateur Radio activity in Manitoba. Every Ham Radio club and organization in the Winnipeg area is involved. This reflects the large public service component of the hobby which includes providing emergency communications in times of natural disasters and in the event of the failure of the regular communication facilities. Ham Radio operators have provided this essential service for everything from local flooding and fibre-optic cable cuts to earthquakes in New Zealand and tsunamis in Japan.

Amateur Radio Operators will be stationed at almost every Hospitality Station along the race route as well as staffing a number of course vehicles including those providing mobile medical communications.

To learn more about the Amateur Radio Emergency Service, go towww.winnipegares.ca <http://www.winnipegares.ca/>.

Special Event Station CK6S July 5 - 15, 2012
2012-06-12

CK6S - Special Event Station for the 100th Anniversary of the Calgary Sta
mpede

The Calgary Amateur Radio Association will be operating special event sta
tion CK6S, from July 5 to 15th celebrating the 100th Anniversary of the C
algary Stampede.

A special QSL card will be available through the QSL bureau or direct, fo
llowing the CK6S/VE6AO QSL instructions on QRZ.com.

Planned frequencies are in the general portion of the US phone bands arou
nd 3.825, 7.180, 14.250, 21.320 & 28.475 +-QRM

All amateurs within the City of Calgary can also use special prefixes CJ6
for VA6 and CK6 for VE6 for the same period.

Work 10 Calgary stations and you can qualify for the Stampede City Award,
illustrating the chuckwagon races: http://cara.memberlodge.com/Default.a
spx?pageId=5198

73,

Michael Ross, VE6TC
Calgary Amateur Radio Association

==> + ARRL FIELD DAY: NOTIFY YOUR NEIGHBORS ABOUT ARRL FIELD DAY, JUNE
23-24

It's not too late to get information about your ARRL Field Day
<http://www.arrl.org/fieldday> activities out to the public. ARRL Field
Day -- the largest on-the-air operating event -- is the one of the best
opportunities of the year for showing our Amateur Radio capabilities to
the public. ARRL Media and Public Relations Manager Allen Pitts, W1AGP,
notes that the ARRL has made many media materials available for local
use: "Our visibility to the public is important in antenna, band
preservation and texting issues, so we encourage you to use this
opportunity to showcase what Amateur Radio can do," he said. Download
an audio PSA <http://p1k.arrl.org/pub/pr/Field%20Day/> that can air on
local radio stations. Send out a press release or invite your local
```

officials
<http://www.arrl.org/files/file/Field-Day/2012/2012-FD-PR-Info-V2.pdf>
to your Field Day site. Send high-definition video files
<http://p1k.arrl.org/pub/pr/> suitable for airing to your local
television stations. Get more information on ARRL Field Day, including
the 2012 ARRL Field Day logo and operating tips here
<http://www.arrl.org/field-day>. Looking for a Field Day station near
you? Find one here <http://www.arrl.org/field-day-locator>.

==> + ARRL FIELD DAY: W1AW ANNOUNCES 2012 FIELD DAY BULLETIN SCHEDULE

Stations active during ARRL Field Day -- June 23-24 -- are eligible
to receive 100 bonus points for copying the special Field Day bulletin
transmitted by W1AW (or K6KPH on the West Coast). You must include an
accurate copy of the message in your Field Day submission. The Field
Day bulletin must be copied via Amateur Radio; it will not be included
in Internet bulletins sent out from Headquarters and will not be posted
to Internet BBS sites.

W1AW will operate on the regularly published frequencies. The special
PSK31 bulletin will be transmitted on the regular W1AW digital
frequencies:

- CW frequencies: 1.8025, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675,
28.0675 and 147.555 MHz.
- Digital frequencies (includes PSK31 and MFSK16) using 45.45-baud
Baudot: 3597.5, 7.095, 14.095, 18.1025, 21.095, 28.095 and 147.555 MHz.
- Phone frequencies: 1.855, 3.990, 7.290, 14.290, 18.160, 21.390,
28.590 and 147.555 MHz.

The Maritime Radio Historical Society's K6KPH will transmit the 2012
W1AW Field Day message for the benefit of West Coast stations on
3.5815, 7.0475, 14.0475, 18.0975 and 21.0675 MHz, CW only. The
frequencies for K6KPH Digital (RTTY, BPSK31 MFSK16 and FEC AMTOR) will
be 7.095 and 14.095 MHz. Click here
<http://www.arrl.org/news/w1aw-announces-2012-field-day-bulletin-schedule>
for the complete schedule.

==> + DIGITAL EDITION OF JULY QST AVAILABLE JUNE 15

The digital version of the July QST will be available to ARRL members
on Friday, June 15. The digital version includes many features not
available in the print version, such as:

- An expanded look at the Dayton Hamvention® (including a look at
the many new products that were introduced).
- Product Review videos on the Alinco DJ-G29T dual-band handheld
transceiver and the WaveNode WN-2d station monitoring system.
- Audio from "A Transceiver Comes Home," by QST Editor Steve Ford,
WB8IMY.
- Links to the winning videos from the 2012 QST Video Contest.

Watch your e-mail inbox for a link to the digital edition of the July issue of QST.

==> + FCC NEWS: MIGNON CLYBURN RENOMINATED FOR NEW TERM AS FCC COMMISSIONER

On June 6, President Barack Obama announced that he will nominate Mignon Clyburn for a new five-year term as one of five FCC Commissioners. Clyburn, a Democrat, came to the Commission in August 2009, filling the unexpired term of Republican Deborah Taylor Tate, whose tenure as a Commissioner came to a close in January 2009. Clyburn's current term expires June 30, 2012. "In renominating Commissioner Clyburn, President Obama has made an outstanding choice for the Commission and for the American people," said FCC Chairman Julius Genachowski. "As I know from working with her for the past several years, Commissioner Clyburn is a strong leader, focused on helping all Americans harness the benefits of broadband. I congratulate her." Read more here <http://www.arrl.org/news/president-obama-announces-nomination-of-mignon-clyburn-for-new-term-as-fcc-commissioner>.

==> + GETTING LICENSED: NEW AMATEUR EXTRA CLASS QUESTION POOL EFFECTIVE JULY 1

The new Amateur Extra class (Element 4) question pool <http://www.ncvec.org/page.php?id=358> -- released by the National Conference of Volunteer Examiner Coordinators (NCVEC <http://www.ncvec.org/>) in January 2012 -- becomes effective on Sunday, July 1. The current Amateur Extra class pool expires on June 30, 2012 and cannot be used after that date. This new question pool -- including graphics and diagrams -- will remain valid until June 30, 2016. The new Amateur Extra pool contains 702 questions, from which 50 are selected for an Element 4 examination. As of June 13, three questions -- E1D09, E2A14 and E6E10 -- have been removed <http://www.arrl.org/withdrawn-questions> from the new pool. The current Technician class question pool <http://www.ncvec.org/page.php?id=349> that became effective July 1, 2010 is valid through June 30, 2014. The current General class pool <http://www.ncvec.org/page.php?id=350> that became effective July 1, 2011 is valid until June 30, 2015.

==> + CALL FOR NOMINATIONS FOR ARRL DIRECTORS AND VICE DIRECTORS FOR CENTRAL, HUDSON, NEW ENGLAND, NORTHWESTERN AND ROANOKE DIVISIONS

The ARRL is governed by its Board of Directors. A voting Director is chosen by ballot by the full (licensed) members in each of the 15 ARRL divisions. Vice Directors -- who serve in the absence of the Director from a Board meeting and succeed to the position of Director should a vacancy occur -- are chosen at the same time. Elections are held in five divisions per year. It only takes 10 full members in a division to nominate a candidate for either office.

This fall, ARRL members in the Central, Hudson, New England, Northwestern and Roanoke Divisions will have the opportunity to choose a Director and a Vice Director for a three year term that starts January 1, 2013. Beginning in 2012, ARRL members in Divisions where there are contested elections will be able to vote electronically. Members with valid e-mail addresses in their membership profiles will be sent instructions on how to vote by e-mail; members without e-mail addresses, or whose e-mails bounce, or who request a paper ballot, will be sent a ballot by postal mail as in the past. Read more here <http://www.arrl.org/news/call-for-nominations-for-arrl-directors-and-vice-directors-for-central-hudson-new-england-northweste>.

==> + ARDF UPDATE: TEAM USA FORMING AFTER USA ARDF CHAMPIONSHIPS

By ARRL ARDF Coordinator Joe Moell, K0OV

From DXing to microwaves, nearly every facet of our hobby has its competitions. But there are no more ardent contesters than the ones who take to the fields and forests to see who can locate the greatest number of radio transmitters in the shortest time. They call themselves foxhunters, foxtailers, radio-orienteers and ARDFers. Each year, they come together from around the country to see who is best. Every two years, the best from each country gather to see who is tops in the world. The 12th USA ARDF (Amateur Radio Direction Finding) Championships took place May 30-June 3 near Mt Laguna, California. In September, the 15th ARDF World Championships will get under way at the resort city of Kopaonik, in central Serbia. Standard rules and procedures of the International Amateur Radio Union govern these competitions. Read more here <http://www.arrl.org/news/ardf-update-team-usa-forming-after-usa-ardf-championships>.

==> PAPERS REQUESTED FOR ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

Amateurs are invited to submit technical papers for presentation at the 31st Annual ARRL and TAPR Digital Communications Conference (DCC <http://www.tapr.org/dcc>), to be held September 21-23, 2012 at the Sheraton Gateway Airport Hotel in Atlanta, Georgia. These papers will also be published in the Conference Proceedings (you do not need to attend the conference to have your paper included in the Proceedings). The submission deadline is July 31. Please send papers to: Maty Weinberg, ARRL, 225 Main St, Newington, CT 06111, or you can make your submission via e-mail <maty@arrl.org>. For more information about the conference, see the DCC website <http://www.tapr.org/dcc> or call 972-671-8277.

==> SOLAR UPDATE

Tad "All for the love of sunshine <http://www.youtube.com/watch?v=T7ZLEQ3MCZA>" Cook, K7RA, reports: Solar activity was lower this week, although for the past few days, sunspot numbers and solar flux were rising. The average daily sunspot numbers declined more than 14.3 points to 116.1, while the average

daily solar flux was off by 14.5 points to 115.9. There were five new sunspot groups this week: two each on June 9-10, and one more on June 13. The latest prediction has solar flux at 145 on June 14-16, 140 on June 17-18, 135 on June 19-20, 120 on June 21, 110 on June 22-26, 105 on June 27-28, followed by a climb back to 120 on July 1-12. The predicted planetary A index is 5 on June 14-15, 8 on June 16-17, 10 on June 18-19, 8 on June 20-21, and 5 on June 22-25. The next peak in geomagnetic activity is predicted for July 1-3, with planetary A index at 15, 12 and 10. Look for more on the ARRL website on Friday, June 15. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Hank Williams Jr's All for the Love of Sunshine <http://en.wikipedia.org/wiki/All_for_the_Love_of_Sunshine>.

==> THIS WEEK IN RADIOSPORT

This week:

- June 15 -- NCCC Sprint Ladder
- June 16 - ARRL Kids Day <http://www.arrl.org/kids-day>; Feld Hell Sprint; SARL Youth Day Sprint; AGCW VHF/UHF Contest
- June 16-17 -- West Virginia QSO Party; All Asian DX Contest (CW); Ukrainian DX Classic RTTY Contest
- June 17 -- WAB 50 MHz (Phone)
- June 18 -- Run for the Bacon QRP Contest
- June 21 -- NAQCC Straight Key/Bug Sprint

Next week:

- June 23-24 -- ARRL Field Day <http://www.arrl.org/fieldday>; His Majesty King of Spain Contest (SSB); Marconi Memorial HF Contest; Ukrainian DX DIGI Contest
- June 27 -- SKCC Sprint
- June 27-28 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 30 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-electronics-expo-firecracker-hamfest>,
Harrisburg, Pennsylvania
- July 20-22 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-78th-glacier-waterton-international-hamfest>,

East Glacier, Montana
- July 26-28 -- Central States VHF Society Conference

Ofcom have not announced anything yet, otherwise there would be an
official
announcement or reference made on the official organ of OFCOM - it's
website !

Like all other announcements they get placed here:-
http://licensing.ofcom.org.uk/radiocommunication-licences/amateur-radio/licensing-updates/

which at the time of writing contains nothing about the 144Mhz band.

The only info floated via an unverified 3rd party of dubious
credentials call RSGB ltd
which if quoted in a court of law wouldn't stand up as a defence for
anything.

So as far as I'm concerned - 2m remains untouched by the Olympics !

985. Amateur Radio Newsline(tm) Report 1818 - June 15 2012

Amateur Radio Newsline(tm) Report 1818 - June 15 2012

Amateur Radio Newsline report number 1818 with a release date of June 15, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Colorado and New Mexico go on high alert as wildfires rage in both states; new problems for a South African ham radio satellite; Brunei says that it is cracking down unlicensed use of ham radio gear; a verdict in the case of Greece vs. DJ6SI and ARRL Field Day 2012 is right around the corner. Find out the details are on Amateur Radio Newsline(tm) report number 1818 coming your way right now.

**

RESCUE RADIO: COLORADO AND NM HAMS STAND BY AS FLAMES RAGE

Ham radio operators in Colorado and New Mexico are on high alert as wildfires whip across areas of both states. Bill Pasternak, WA6ITF, is in the newsroom with what we have so far:

--

Amateur radio emergency operators in Colorado and New Mexico are on standby alert and a number are already involved in coordinated relief efforts as wildfires rage across mainly wilderness areas of both states.

In Colorado, the best information came on Tuesday night the 12th from Amanda Alden K1DDN. Alden and her husband Jeff, K0JSC, live in Carson City, Colorado. She reported on the Ham Nation Internet TV show that hams further North in the Ft. Collins area are very much involved in providing various types of communications, with APRS markers for the fire areas being one of the major resources.

Alden said that she has been in contact with Eugene Bentz, KI6MPA. He is the EOC operator and resource net control. He told Alden that about 25 assistants are providing communications to the Forrest Service, the Colorado State Patrol, the Larimer County Sheriff, the Red Cross as well as county officials. Also, APRS information regarding fire locations is being posted to both AGW Tracker and APRS.fi. The makers show fire locations as well as EOC's, Incident Command Post and shelter markers. At the time of K1DDN's report that fire was about 15 miles west of the city of Ft. Collins.

Moving south into New Mexico, Jay Miller, W5WHN, in Albuquerque has been in monitoring the work of the hams involved in the Little Bear Fire that erupted on Saturday the 9th. He tells Newsline that Joe Kenmore, K5FBK was in the Lincoln County EOC when this blaze was first discovered. As this newscast is prepared, Gerald Minor, N5RKE, is at the Shelter in Ruidoso and Ed Meyer, WK7ED, is active at the shelter in Capitan.

Currently, the W5BI system at Rio Rancho has been linked receive only at this time the 449.3 to 146.98 on Buck Mountain. This allows Albuquerque and Santa Fe to talk directly to the affected area, if needed. Also the 146.66 MHz NM5ML repeater at Capitan has performed well linking back to all parts of the State.

As we go to air, there has not yet been any mass call-out of hams in either state, and hams involved in emergency communications groups were told on the 13th not to self deploy. But the word is to have their go kits ready and to be ready to provide assistance as is needed.

More information as we get it.

For the amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles. Jim.

--

According to fire officials it will be some time before these fires are contained and controlled. We will have updates in future Amateur Radio Newsline reports. (ARNewsline(tm), TWIT.TV, W5WHN)

**

HAM RADIO IN SPACE: BATTERIES FAIL ON SUMBABDILLASAT

More problems for the South Africa built SumbabdilaSat ham radio satellite. Amateur Radio Newsline's Norm Seeley, KI7UP, tells us the latest on the seemingly problem prone bird:

--

South Africa Amsat reports that the satellites batteries on SumbandilaSat have failed which means that the satellite is only active when the solar panels are illuminated.

The report from SA-Amsat says that the satellite recovery team at SunSpace is still incrementally reading back the program code from the nine power modules. This, in an effort to determine the extent of the problem. But with SumbandilaSat going through eclipses, the satellite is not available for as long each day as the team would like.

According to Johann Lochner, ZR6CBC, because of the shorter illumination of the solar panels in the Southern hemisphere winter and poor orientation of the satellite with respect to the sun, progress is much slower than originally anticipated. Lochner said that there where three passes to work with in January but this month they currently have

one.

That said, ZR6CBC says that SumbandilaSat is responding when it is in full sunlight. As such, the recovery team is confident that some operations will be restored. He says that it may even be possible to do some imaging and have the amateur radio transponder back in operation. However, no one will speculate as to when.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Updates on the condition of SumbandillaSat can be found on-line at www.amsatsa.org.za (SA AMSAT)

**

ENFORCEMENT: BRUNEI GOING AFTER UNLICENSED MOBILE OPERATORS

The Brunei government says that it is cracking down on anyone found operating amateur radio gear without government authorization. Members of that nation's citizenry who are convicted of illegal use of amateur radio equipment without a license from the Authority for Info-communications Technology Industry of Brunei Darussalam or AITI will face a maximum fine of 10,000 Brunei dollars, up to three years imprisonment, or both.

This new anti pirate operating campaign appears aimed primarily at those unlicensed individuals who use mobile gear on the VHF and UHF amateur bands. It was announced by the AITI during a briefing on the first of several joint operations with the Berakas Police to crack down on illegal use of radio equipment. The operations involved a dedicated corps of sixteen police personnel and seven AITI officials. (Borneo Bulletin)

**

RADIO LAW: DJ6SI VS. GREECE - THE COURT DECISION

A court decision in the case of DXer Baldur Drobnica, DJ6SI, who stood trial last week in Greece on three charges involving his operation of an amateur radio station on the vacation island of Kos. The three crimes he was eventually charged with were conducting radio traffic without permission from the Greek Government. Operating a transceiver that covered more spectrum than just the ham radio bands permitted by Greece and his refusal to surrender his equipment to the officer who investigated the incident.

According to a note posted to the Internet by his attorney, Drobnica was acquitted on counts 1 and 2 after the court ruled that he was a properly licensed radio amateur. However he was convicted on the third count of refusing to surrender his equipment to the arresting officer.

No word of what penalties if any were imposed on the single count conviction. However his lawyer is reported to already have filed an appeal on count three and the court is expected to hold a separate trial on this issue at a later date.

Please keep in mind that this report is based on multiple language translations beginning in Greek with some of it electronic. As you all know, the latter have been known to leave you wondering if the translation is completely accurate. One report in translated English is on-line at tinyurl.com/dj6si-verdict. (SV5BYR)

WORLDBEAT: RADIOSPORT FEDERATION OF AZBERAIJAN APPLIES FOR IARU MEMBERSHIP

The Federation of Radiosport of Azerbaijan has applied for International Amateur Radio Union membership. The IARU Region 1 website reports that the application has found to be in order and a proposal that organization be elected as an IARU member has been put out to vote. Member Societies have been requested to return their vote forms not later than November 1st. The Federation of Radiosport of Azerbaijan was founded back in December of 2001. (IARU Region 1)

HAM HAPPENINGS: POWER OUTAGE AFFECTS HAM-COM PLANO TEXAS

If you are old enough, you may remember 1970's Bobby Russel southern the folk song titled The Night the Lights Went Out in Georgia. Well this time it wasn't a song and it took place in Texas when the lights and the air conditioning went out at the Plano Center on Saturday, June 9th. This during the annual Ham Com gathering. Chip Margelli, K7JA, of CQ Magazine was there and gave a brief synopsis of what occurred:

--

K7JA: "Well, early in the afternoon the lights in the Plano center went out. They had gone out the previous day and stayed off for about 30 seconds so it was no big deal. But on Saturday they stayed off for quite a while and folks that got onto the Internet to the Plano power company were told it would be 4 hours that the power would be out. S a lot of exhibitors along about 2 o'clock and 2:30 began packing up because it appears as if power was not going to come back on. It came back at about 3:30 or 4 - somewhere in there -but by then some of the

crowd had gone. So it really was quite an impact. The lights were bad enough but the lack of air conditioning really impacted on everyones willingness to stay inside."

--

Unlike most ham radio shows that are full weekend events, Ham-Com is held Friday and Saturday that closes both days at 6 p.m. local time. Even so, K7JA says that it was "interesting" to have the lights come back on and discover that many of the other exhibitors had already packed up and left. Not to mention the attendees:

--

K7JA: "At the CQ booth we were quite fortunate because we were by an exit, so there was a little bit of light there. We were doing `candle light specials' to entice people to stop by our booth.

"But if was definitely a downer for everybody in the exhibit area. The dealers and especially the manufacturers who'se radios are so dependant on their displays. A lot of the transceiver manufacturers were just stopped dead in the water because they couldn't get their displays to show off all of the neat things that the radios could do."

--

At airtime the reason for the power failure has not been announced. According to Chris Boone, WB5ITT, the outage appeared to affect only the convention facility. In a e-mail to Newsline Boone said that all the stores around the convention center were ok and the street lights still worked as well. (ARNewsline(tm))

**

RADIO POLITICS: FCC ANNOUNCES TWO SPECTRUM-SHARING AGREEMENTS WITH MEXICO

A new spectrum sharing agreement between the United States and Mexico for the 800 Mhz and 1 point 9 Gigahertz bands has been negotiated by the FCC.

According to a June 11th press release by the FCC, the new 800 MHz Protocol allots band segments between the United States and Mexico, specifies the technical parameters for operation on these band segments within 68 miles of the common border. It also creates a bi-national Task Force to support the transition of incumbent operators along the border to the new allotment plan.

The new protocol for 800 MHz replaces a previous agreement and paves the way for completion of 800 MHz re-allocation or re-banding by U.S. public safety and commercial licensees operating along the U.S.-Mexico border.

Higher up in frequency, a new protocol for the 1 point 9 Gigahertz band allows the Sprint Nextel Corporation to deploy C-D-M-A service along the border with Mexico. Sprint obtained access to the 1 point 9 Gigahertz band in 2004. This, as compensation for vacating its spectrum holding in the lower segment of the 800 MHz band in accordance with the rebanding project.

The FCC ordered re-banding will alleviate interference to public safety licensees in the band caused by commercial cellular licensees. The relevant documents are available on the International Bureau web site at tinyurl.com/border-agreement. (FCC)

**

RADIO LAW: FCC RULES THAT STATE COURT CANNOT ORDER RADIO STATION LICENSE TRANSFER

The FCC has ruled that a license issued by that agency cannot be used by a local court to satisfy a debt.

In its finding the commission ruled that a court in Puerto Rico exceeded its authority in ordering a broadcaster to turn over the license of WEGA-AM to help satisfy a financial judgment.

The FCC had been asked to approve the involuntary assignment of the WEGA-AM license to Carmelo Santiago Roman, owner of VI/MAN Broadcasting System Corporation, This, after the local court ordered station owner A Radio Co. to turn over cash, the license and other property to a court-appointed holder pending a final court order in their financial dispute. Both sides then presented arguments to the FCC explaining their legal views about the involuntary license transfer.

Now in issuing a decision, Peter Doyle, who is Chief of the FCC's Media Bureau's Audio Division, stated that his agency retains exclusive authority to license broadcast stations. He noted that when a state court's decision is contrary to commission policy, the commission is neither bound by the state court order nor need take action to allow the order to be carried out.

Doyle continued that a license, unlike a station's physical assets, is not subject to a mortgage, security interest, attachment or similar property right. What's more, licenses are subject to the FCC's consent before any transfer. As such the decision of the court in Puerto Rico to "attach" the license of WEGA-AM is invalid from the outset. (FCC, RW)

**

HAM HAPPENINGS: RFINDER NOW FULLY SUPPORTS D-STAR LISTINGS

The world wide on-line repeater directory known as RFinder now supports D-Star. This, as a direct result of its editorial staff attending the D-Star forum at the recent Dayton.

According to a press release by the publication, it became apparent that there was a lack of D-Star repeater locating options to the vastly growing population of D-Star user base. As a result, as of May 24th RFinder fully supports D-Star in the directory.

RFinder is available in the Apple App Store for iPhone and Android devices. The web version can be found at www.rfinder.net (RFINDER)

**

HAM HAPPENINGS: INTERNATIONAL EME CONFERENCE TO BE HELD IN CAMBRIDGE ENGLAND

The 15th International Earth-Moon-Earth or EME conference will be held at Churchill College, Cambridge, between 15 and 19 August. This is the first time that this conference will be held in the United Kingdom and its planners say that this will provide an opportunity to learn about this most technically challenging aspect of the hobby.

The event will be hosted by the UK Microwave Group. In addition to EME-specific lectures there will be presentations on radio astronomy and deep space communications, as both these subjects have much in common with EME.

Two Nobel Physics Laureates from the world of radio astronomy will be present at the conference. Joe Taylor, K1JT, is a keen EME enthusiast and will be presenting a paper on the MAP65 digital mode. His fellow-Laureate Professor Antony Hewish is the speaker at the conference gala dinner on Saturday August 18th.

All those wishing to attend must pre-register for this conference before August 1st. Day passes and a range of accommodation packages from one to four nights are available. See www.eme2012.com for full details. (Amsat-UK)

**

NAMES IN THE NEWS: DARA ANNOUNCES 2012 - 2013 LEADERSHIP

Some names in the news. The Dayton Amateur Radio Association, sends word from Ron Moorefield, W8ILC, that Ron DuBon, N6JRL, has been re-elected as the organizations President. This at the organizations meeting on Friday, June 1st.

Also retaining their seats on the DARA Board are Secretary Nancy Krodel, KC8RMT; Treasurer Jon Thuermer, KB8SRQ; Senior Trustee Jerry Miller WD8QAI and Junior Trustee Scott Meyers, AC8DE.

Others elected to the DARA board for 2013 are Vice Pesident Reuben Meeks, W8GUC, Meeks had previously served as Dayton Amateur Radio Association President back in 2001 and 2002. (W8ILC)

**

NAMES IN THE NEWS: TWO AWARDS CREATED TO HONOR THE LATE EUGENE ZIMMERMANN, W3ZZ

To honor long-time VHF contester Eugene Zimmerman, W3ZZ, who became a Silent Key on June 3, two new awards have been introduced for the ARRL June VHF Contest in his memory.

First, the ARRL Contest Branch has renamed the plaque for the Overall Winner for the Limited Multi-Operator the Gene Zimmerman, W3ZZ Memorial Plaque. Zimmermann had been a very active as part of the K8GP team in this category. At the same time the League issued a special thank you to Jeff Klein, K1TEO, who graciously relinquished his long-time sponsorship of this plaque to allow this to happen.

In addition, a new award has been created, thanks to Tim Duffy K3LR and Dave Zeph, W9ZRX. The W3ZZ Rookie Award will be awarded to the top Single-Op, Low Power score on a minimum of two bands by a "rookie" submitting a log in the contest for the first time. This award is open to any operator that has never submitted a log to the June VHF Contest.

Both of these awards were made available beginning with last weekend's ARRL June VHF Contest. (KX9X, ARRL, VHF Reflector)

HAM HAPPENINGS: ARRL FIELD DAY - JUNE 23 AND 24

For those few who are not yet aware, the annual ARRL Field Day takes place each year on the 4th weekend of June. This year the Field Day starts at 1800 UTC on Saturday, June 23rd and runs through 2100 UTC on Sunday June 24th. And while its billed as an emergency preparedness exercise, its also a great chance for you to tell the world about your hobby and the service it provides to the community. Allen Pitts, W1AGP, is the Manager of Media and Public Relations for the ARRL:

--

W1AGP: "Its also a chance for us to show off to various legislators and government agencies to remind them that we are here; that we need the spectrum. We provide emergency services and most of all, we have fun doing it."

--

Again, these years ARRL Field Day takes place from 1800 UTC on Saturday, June 23rd and runs through 2100 UTC on Sunday June 24th. We hope to hear you on the air. (ARNewsline(tm))

**

RADIOSPORTS: AUSTRALIA VHF-UHF FIELD DAY JUNE 23-24

Meantime, down-under Australia's Winter VHF-UHF Field Day will be held over the same weekend of June 23 and 24. The event runs for 24 hours, but there are also 8 hour sections for operators who may not be able to camp overnight. There are also separate categories for single and multiple operator stations. And if you don't like the cold weather of the Southern hemisphere winter, there is also a separate home station category. More details are on the contest page at wia.org.au (VK3KM)

**

HAM RADIO IN SPACE: PHONESATS SHOWN AT MAY MAKER FAIRE

Turning to ham radio in space related news, some new amateur radio satellites based on cellphones were recently shown to the public at the 2012 Bay Area Maker Faire in San Mateo, California. Amateur Radio Newsline's Skeeter Nash, N5ASH, reports:

--

Among the displays was one for the PhoneSat amateur radio satellites. These are a pair of ham radio satellites both of which run the Android operating system and will be enclosed in a standard 1U CubeSat structure.

PhoneSat 1.0 cost about $3500 and is built around the Nexus One smartphone. It will operate on battery power only with a mission lifetime of approx 1 week. Its big brother called PhoneSat 2.0 used a Nexus S smartphone and has solar panels on each face for a mission lifetime that should last at least two weeks when it will likely de-orbit.

The IARU has coordinated a frequency of 437.425 MHz for the AX.25 AFSK downlink.

The first launch is scheduled for the third quarter of 2012 on the Antares-110 launch vehicle. It will carry two PhoneSat 1.0 satellites and one PhoneSat 2.0. A second PhoneSat launch is expected to occur sometime in 2013.

--
The 2012 Bay Area Maker Faire took place May 19th to the 20th. Several news reports estimate that 65,000 to 70,000 attended this ever growing West Coast event that was held the same weekend as the Dayton Hamvention. (Phonesat Team)

**

HAM RADIO IN SPACE: ARISS DIGIPETER MOVES TO 437.550 MHZ

The Amateur Radio on the International Space Station or ARISS digipeater has changed frequency from 145.825 MHz to 437.550 MHz. Packet operations were moved to the Columbus Module UHF radio when the

Kenwood D700 radio was recently powered off due to needing an additional air purifier to support the recently arrived Automated Transfer Vehicle or ATV.

Normally the air purifier is located in the ATV but recent power support issues necessitated the system be relocated to the Service Module. As a result the purifier is now using the power outlet that the Kenwood radio normally uses.

The Russian team has agreed to briefly power the purifier off for the scheduled ARISS school events but then will re-activate the purifier right afterwards. This appears to be a long term impact as ATV is currently scheduled to depart from ISS in September. (ARISS, AMSAT, N5VHO)

**

RADIO IN SPACE: NASA SCRAPS GEMS X-RAY RESEARCH TELESCOPE PROJECT

According to space.com, NASA has cancelled a project to build an X-ray telescope designed to look for black holes, neutron stars, and the remnants of dead star systems and radio the results back to Earth. This due to cost overruns.

The GEMS telescope, short for Gravity and Extreme Magnetism Small Explorer, had a budget of $105 million plus additional costs associated with launching it into space. But what have been termed as soaring development costs caused NASA to scrap the project.

The telescope was reportedly still in the design stage and no hardware had been built when the space agency pulled the plug on the mission. (Space)

**

HAM HAPPENINGS: EFC 2012 ON THE AIR.

On the air keep your ears open for numerous special event stations from the Ukraine and Poland to be active during the 2012 European Football Championship 2012 that runs through July 5th. This is an on-the-air activity by Polish and Ukrainian amateurs that are affiliated with PZK and UARL national societies and will use special prefixes such as 3Z2012 from Poland and EM2012 from the Ukraine to mention only two. Operations will be on all the amateur bands and there are two awards which can be earned during this period. More detailed information about their activities can be found on the web at efc2012.pzk.org.pl. (Southgate)

**

DX

In DX, word that F4EBT will be traveling in the French Polynesia area of the Pacific until 24th June. He is using the callsign FO stroke

F4EBT from at least two different locations in the Islands on the Air OC-046 group and at least four different islands in the OC-067 group. QSLs go via his home call or via the French bureau.

NK8O is working at Mwanza on Lake Victoria, Tanzania and plans to be active as 5H3CP through June 22nd. Activity will be in his spare time with QRP power on various HF bands using CW. QSL direct to his home call.

Lastly, M0AEP under the call VP2MDD will be on the air from Montserrat until August 6th. He says that he will concentrate on 12, 10 and 6 meters. Please QSL this operation as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: SHORTWAVE NEWS: WASHINGTON DC GATHERING FINDS NEW INTERNATIONAL BROADCASTING INITIATIVES

And finally this week, a large number of the presentations at the recent National Association of Shortwave Broadcasters meeting centered on the idea how shortwave radio can find a place in the 21st century. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

Dismissed by some as a relic of the Cold War era disappearing under the shadow of emerging digital communications, many of the conference's speakers argued that the answer to shortwave's future may reside in providing service to areas of the world with little electric power. Also, that it remains an effective means of relaying information to citizens of countries with repressive regimes. It was noted that because shortwave radio is harder to interrupt than the Internet, Radio Free Asia, the conference host, broadcasts to the highly censored areas like North Korea.

Presenting the results of a study on which audiences were tuning into shortwave across the globe was Dr. Kim Andrew Elliott. Elliott is an audience research specialist. He pointed out that in countries like Nigeria and Zimbabwe, people tended to own more radios than televisions. According to Elliott. 32% of those surveyed face to face in the impoverished, politically tumultuous nation of Zimbabwe said that they own shortwave radios,

Another presenter was Thomas Witherspoon, who founded Ears to Our World. This is a U-S based non-profit organization that supplies shortwave radios to developing, conflict-riddled nations like South Sudan. Witherspoon said he is skeptical when people dismiss shortwave radio's future on premises like the Internet is everywhere.

Witherspoon says that we can look at the reasons why radio is on the decline, or instead the ways we can invest in shortwave radio and why

we should do that. He says that it's affordable, and broadcasters are doing it pretty efficiently.

One of the conference's attendees was Shahnaz Ghavami of the United States FCC. She said that after that after spending the day with the international broadcasters it makes you think about shortwave as something new.

For the Amateur Radio Newsline, I'm Heater Butera-Howell, KB3TZD, in Berwick, Pennsylvania.

--

The National Association of Shortwave Broadcasters meeting was held May 10th and 11th in Washington, D.C. (RW, B&C, others)

Digital QST

Dear ARRL Member,June 2012 QST - Digital Edition
<http://www.nxtbook.com/nxtbooks/arrl/qst_201207/>

The digital edition of July /QST/ is available now! Go to this link and
start reading: July 2012 /QST/
<http://www.nxtbook.com/nxtbooks/arrl/qst_201207/>

*Here is a sample of what awaits you!
*

* How's Solar Cycle 24 working for you? Learn what you can expect in
the future.
* Wire dipole antennas don't have to be straight. Find out why.
* Optimize 43-foot vertical antennas for better performance on higher
bands.
* Learn about a "mystery" transceiver that returned to ARRL HQ after
32 years.
* See ARRL Laboratory reviews of the new Alinco DJ-G29T transceiver
and WaveNode WN-2d station monitoring system.
* Discover how you can enjoy the benefits of software defined radio
with an analog transceiver.
* ...and more!

*Your July issue of digital /QST/ also has content you won't find in the
printed magazine...*

* Video overviews of the Alinco DJ-G29T and the WaveNode WN-2d.
* An audio interview with Ken Kopp, Kï¿½PP, about the "mystery" transceiver.
* Extra information about upgrading your analog radio to SDR.
* The Considerate Operator's Frequency Guide.
* Book review: /Blackbird/, a military thriller with Amateur Radio as
part of the plot.
* A link to the ARRL multimedia page where you can watch the winning
videos in the 2nd Annual ARRL Video Contest.
* An in-depth report on the 2012 Dayton Hamvention, including a list
of products that made their first appearance at the show.

Every issue of /QST/ is filled with the news and features you need to
keep active in Amateur Radio. After you read through it, visit the
Digital /QST/ Feedback Form

<http://www.arrl.org/digital-qst-feedback-form> and tell us what you enjoyed!

73,

Steve Ford, WB8IMY
Editor

P.S. Remember ARRL Field Day is June 23-24. Event information and details for ordering official 2012 Field Day merchandise (shirts, hats, and pins) can be found at www.arrl.org/fieldday.
<http://www.arrl.org/field-day>

What is a digital edition?
The digital edition of /QST/ is a web-based edition of the journal...a way to read and interact with the current issue of /QST/ anytime, anywhere. It simulates the look and feel of our printed version, complete with page flipping, indexing and easy ways to move around to get to the content you want. You can choose to read it online, or download the entire issue to your laptop. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.

How do I access the digital edition?
Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst <http://www.arrl.org/qst>.

To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.

Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.

Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions. Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

>144.1000MHz (Perseids Meteor Scatter CW Calling).

Ok, so you can use the calling frequencies, but you can't QSY off of
them to have a QSO.

Who thought that one up ?

(No don't tell me I already know)

NZ4O Daily Condensed MF/HF/6M Radiowave Propagation Forecast

Posted: 14 Jun 2012 07:14 AM PDT
http://forums.qrz.com/showthread.php?350179-NZ4O-Daily-Condensed-MF-HF-6M-Radiowave-Propagation-Forecast&goto=newpost

The NZ4O "Daily" Condensed HF/6M Radiowave Propagation Forecast has
been published on Thursday Jun 14, 2012 at 1300 UTC and is valid for the
next 24 hours.

This daily condensed HF/6M radiowave propagation forecast can also be
found at http://www.wcflunatall.com/dailycondensedhfprop.htm ,
http://www.facebook.com/pages/SolarCycle24org/139198369462931 and
http://lists.contesting.com/mailman/listinfo/spaceweather .

The complete MF/HF/6M 7 day period radiowave propagation forecast can be
found at http://www.solarcycle24.org .

This radiowave propagation forecast is provided free of charge to the
radio hobby communities but donations are graciously accepted. You can
donate by going to http://www.paypal.com and clicking on the "Send Money"
tab. My Paypal ID/email address is thomasfgiella@tampabay.rr.com .

NOTE! This HF/6M radiowave propagation forecast covers all
continents and all hemispheres.

Field day questions - two operators, which call sign?

Posted: 14 Jun 2012 07:54 PM PDT
http://forums.qrz.com/showthread.php?350249-Field-day-questions-two-operators-which-call-sign&goto=newpost

Hello! My brother and I are planning on doing field day together this year.
We are both licensed. We will be operating with temporary antennas from a
(non-licensed) friend's acreage. We will have one or two radios setup, not
sure yet. Hopefully I will have an HF and antenna and a 6M antenna, so I
might get two radios going. With only one 25 amp power supply, we will
probably not be TXing at the same time though.

I think we should be class B? 1B or 2B? What if we have two radios but can
only TX on one of them at a time (due to antenna interference between the
two or power supply issues).

What call sign should we use? I'd like to use mine and I'm sure he would
like to use his own too.

Thanks.

//
Hams in Space to Present at the University of Missouri Kansas City

Posted: 14 Jun 2012 11:04 AM PDT
http://forums.qrz.com/showthread.php?350200-Hams-in-Space-to-Present-at-the-University-of-Missouri-Kansas-City&goto=newpost

On July 20th, the Hams in Space Team will be giving their Satellite
Presentation at the University of Missouri, Kansas City□s Communiversity.

Communiversity is the University□s Community Education Program available to anyone from the community who wishes to attend.

7:00 PM, Friday, July 20, 2012

Communiversity; University of Missouri, Kansas City

Flarsheim Hall, Room 260,

5110 Rockhill Road

Kansas City, Missouri

http://www.umkc.edu/commu/

We□re preparing this presentation to be enjoyed not only by Licensed Hams but also to members of the general community as a means of putting Amateur Radio□s best foot forward, through information about at least one of the fun and amazing things that can be done with Ham Radio!

You will need to pre-register in order to attend: The University requires a $9.00 fee, plus a $2.00 registration fee to attend Communiversity classes. Some of you may be wondering, "Why should I pay $11.00 to see a presentation that I might see given at my local ham club meeting for free?" The answer is simple: The University provides comfortable, state of the art class rooms, with all the visual aid equipment and resources provided. Additionally, by attending this class you would be helping support an outstanding community education service available to all of us in the Kansas City area. The Hams in Space Team does not receive any of this money. It all goes to support the program.

The University offers five different ways to register, including Mail, In-Person, by Telephone, by 24 by 7 Fax, and On-Line. I prefer the On-Line Class Registration as it allows you to also browse the Communiversity Class Catalog, and sign up for e-mail new and information about upcoming classes and events. It□s also fast, and very convenient! The UMKC Communiversity Web Site is: http://www.umkc.edu/commu

For more information about the UMKC Communiversity, or to obtain a copy of their current class catalog, go to their web site at: http://www.umkc.edu/commu, or give them a call at (816) 235-1448. You may also contact their office at:

Office of Student Involvement - Communiversity

University of Missouri Kansas City

Student Union, Suite 320

5100 Cherry Street

Kansas City, Missouri 64110

If you plan to attend this presentation, please register early. If the anticipated attendance exceeds the capacity of the presently scheduled

class room, the University may be able to make arrangements to move the presentation to a larger class room.

So spread the word to your friends; Hams and Non-Hams alike! Register to attend the Hams In Space Presentation at the University of Missouri, Kansas City, Communiversity, and help put Amateur Radio☐s Best Foot Forward while at the same time supporting an Outstanding Community Service!

Amateur Radio Satellites-- Exciting Communications Made Fun and Easy

Our presentation provides licensed hams with information on how to successfully get on the air with FM Amateur Radio Satellites, in most cases either with equipment they may already possess, or by obtaining a few specialized, inexpensive items. While explaining techniques and procedures, an emphasis of ☐Keep it Simple☐ and ☐Have Fun☐ is stressed throughout. Non-licensed people interested in amateur radio are certainly welcome to attend.

CONVENER: Randal Schulze, Eddy Paul, and Jeremy Widner

CLASS FEE: $9.00

Sec. A: 1 session(s); Beginning Friday, July 20, 2012 7:00 PM;

Flarsheim Hall, Rm. 260, 5110 Rockhill Rd., UMKC Campus, KCMO, Rockhill Rd. south of 51st.;

Session 1: Friday, July 20, 2012 7:00 PM - 9:00 PM

RAC Bulletin 2012-033E - Operators wanted for VA3RAC Canada Day Contest Station
2012-06-14

The Radio Amateurs of Canada Day Contest is fast approaching and we are looking for a VE/VA Amateur to operate under the VA3RAC call sign.

You do have to be a RAC member and once the contest is over you are required to submit a copy of your log to RAC Headquarters so if anyone wants a QSL for your contact we can verify the QSO.

For complete rules goto:http://www.rac.ca/en/rac/programmes/contests/files/2012%20RAC%20Canada%20Day%20Contest%20Rules%20-%20English%20and%20French.pdf.

Here is your chance to be a rare one and never have to leave your home QTH.

Reply to Jeff Stewart, VA3WXM atva3wxm@sympatico.ca <mailto:va3wxm@sympatico.ca>and myself atve3xt@rac.ca <mailto:ve3xt@rac.ca>.

Hope to work you on July 1st.

NZART Headquarters Infoline Issue 253

15 June 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Midland District Council Vacancy

· NZART 5 MHZ Working Party

· Old Timers Club (O.T.C.)

· Associazone Radiomatori Italiani IQ1TW – Sezione
di Tortona

· Whangarei Branch 28 Equipment Sale and entertainment

Debby Says… Another successful conference has come and gone and
a very special thanks goes to the Nelson organising committee and Branch
for their tremendous efforts for not only ensuring there was something
appealing for everyone to enjoy, but also turning on the most beautiful
weather we have enjoyed over a Queens Birthday weekend for a number of
years.

Many of you will have heard on the broadcast from conference that
Council had agreed to run a membership promotion from the end of June.
Council has now reconsidered this date as new information was recently
learned from our Administration Liaison Officer and RSM regarding the
removal of silent keys. It appears that RSM have a large number of death
certificates and address amendments they have yet to process so their
database will be accurate.

A membership drive is quite costly so Council do want to make sure that
we reach as many non-members as possible and do not upset anyone whose
partner or spouse may have become a silent key. The membership drive
will now be posted out during September. More details of this will be
advised shortly.

Talk soon…ZL2DL

****

Council Vacancy Midland District

The recent resignation of Simon Lewis ZL4PLM from Council has created a casual vacancy and in accordance with the Constitution, clauses 3.7 d. and e., Council wish to make an appointment to fill this position. If any member in the Midland Electoral District is interested in putting their name forward, please contact Debby ZL2DL at Headquarters. If you have any questions about this position on Council or would like more information, please contact the President, Vaughan ZL1TGC by email: zl1tgc@nzart.org.nz or phone (09) 4181071.

****

NZART 5 MHz Working Party

As members may be aware, it was agreed at WRC 2012 that the next WRC will consider a possible new allocation to the amateur service on a secondary basis within the band 5 250-5 450 kHz and invited the ITU-R:

1 to study spectrum requirements for a secondary allocation to the amateur service within the band 5 250-5 450 kHz;

2 to carry out sharing studies on the impact to other services currently allocated in the band referred to in invites ITU-R 1 and in the adjacent bands;

3 to complete studies in time for WRC-15.

The ALO, Don Wallace (ZL2TLL) would like to put together an NZART working party to look at what we can do in New Zealand to gather evidence to support an international allocation in the 5 MHz area.

If you would like to assist with this, please contact the ALO at nzart@wallace.gen.nz.

****

Old Timers' Club-OTC (ZL)

a.. To recognise service to Amateur Radio;
b.. To revive and maintain interests and good fellowship among the older members in the common cause;
c.. To offer advice and encouragement to newer Amateurs;
d.. The Club is affiliated to the New Zealand Association of Radio Transmitters (Inc.)

Greetings,

Having attended the OTC AGM in Nelson 2012, without realising at the time a new OTC scribe for the Break-In column was asked for, placed my hand up a few days later and this was accepted. The first column has been drafted with AGM details and minutes for the next Break-In due August 2012, so ask for additional input from OTC members, not only the next, but following OTC columns.

Articles relating to all aspects of OTC or of vintage radio for publication in the OTC section of Break-In are most welcome, and to be addressed to our new Scribe, Stephen ZL1TPH; Postal address, 68 Kath

Hopper Drive, Orewa, 0931 or via email to zl1tph@nzart.org.nz We also accept large picture files sent via email and will transcribe hand written letters into text.

73, Stephen ZL1TPH

IARU HF World Championship

The annual IARU HF World Championship will be held on the weekend of July 14 and 15, 2012. The complete rules can be found at http://www.arrl.org/iaru-hf-championship. I am collecting information as to what IARU Headquarters (HQ) stations and IARU Officials (AC, R1, R2 and R3) will be QRV during the contest. Can you please supply me with the callsign that will be used, the list of operators if possible, the QSL information, the IARU abbreviation (i.e. ARRL) and any other details you see of interest. This information will be published in The Daily DX and The Weekly DX.

Also can you please verify that your IARU society information is correct at http://www.iaru.org/iaru-soc.html.

Thank you,

Bernie McClenny, W3UR

Stay Tuned...

Posted: 14 Jun 2012 05:03 PM PDT
http://www.eham.net/articles/28478

It's no secret that some home phones in Sequoyah County are being replaced by family plans with cell phone companies. Talking is turning into text, and communication over the Internet is vastly growing with social media Web sites, and smart phones. You may have heard someone say, "I forgot my cell phone today, I didn't know what to do," or "I think I'll die without my cell phone." If worst comes to worst, will people know what to do, could people actually die, if communication was lost? What could actually happen if a natural disaster or a zombie apocalypse eliminates Internet communications and cell phone towers in the area?

//
Field Day Promotes Emergency Communication:

Posted: 14 Jun 2012 05:00 PM PDT
http://www.eham.net/articles/28477

The Lake Monroe Amateur Radio Society is ready to "ham it up" again for its 36th annual Field Day. The word "amateur" often brings the interpretation of a novice in a particular skill, however, the 160 Federal Communications Commission licensed members of the Lake Monroe Amateur Radio Society push the meaning of the word through their personal pursuit of radio communication. Instead of using their specific skills for financial gain, they offer their services to the community and to volunteer hours of time to put on events and programs, such as Field Day and the Neighborhood Ham Watch. The goal, said LMARS board member Norm Lauterette (WA4HYJ call sign), is for everyone to enjoy and be informed about the benefits of amateur radio.

//
Commissioners Issue Proclamation For Amateur Radio Week:

Posted: 14 Jun 2012 05:01 PM PDT
http://www.eham.net/articles/28476

Ham radio operators, and the good work they do when widespread communication is needed during disasters, will be recognized next week. June 18th-24th is Amateur Radio Week, with the Richland County Commissioners issuing a proclamation supporting the observance.

//
Ham Radio All Talk in Times of Crisis:

Posted: 14 Jun 2012 05:01 PM PDT
http://www.eham.net/articles/28475

TORONTO, June 14, 2012 /CNW/ - Despite the prevalence of the Internet, Amateur Radio has never failed as a lifeline during times of crisis. To demonstrate this capability, the Central Toronto Amateur Radio Club (aka CenTor) is conducting an Amateur Radio emergency preparedness exercise on June 23 - 24, 2012, which will be open to the public. Often called "ham radio", Amateur Radio is a non-commercial radio service, which allows licensed operators to use various types of radio communications equipment to communicate with one another, both locally and around the globe, for both public service and recreational purposes. Amateur Radio operators, often referred to as "hams", are federally licensed by Industry Canada and are allowed to use specially allocated radio frequencies to carry out their operations. Hams come from all walks of life and are located all over the world. "Amateur Radio plays a very important role in the communications capabilities of our modern society", said Peter Dale, President, CenTor, and licensed Amateur Radio operator with the call sign of VE3EYI. "Not only does it facilitate communications during times of emergency or natural disaster, it is also a lot of fun and a great way to learn about electronics and wireless communications, especially for young people", Dale added.

//
Colorado's Amateur Radio Operators Fill in Wildfire-Coverage Gaps:

Posted: 14 Jun 2012 05:01 PM PDT
http://www.eham.net/articles/28474

A 5:15 a.m. phone call Sunday asked amateur radio operator Randy Long to find more volunteers to aid communication in the High Park fire zone -- and warned him to evacuate his home. Long, an Amateur Radio Emergency Service coordinator for Larimer and Weld counties, fled his house southeast of Buckhorn Mountain and started rallying more licensed ham operators to work the fire. Since Saturday, he has been managing operators staffing eight-hour shifts around the clock. They're doing such things as setting up portable radio repeaters and relaying messages between the fire lines and command posts. About 40 operators have volunteered. "My guys don't start before I do, and they don't finish after I do," said Long.

Call For Nominations for ARRL Directors and Vice Directors:

Posted: 14 Jun 2012 04:34 PM PDT
http://www.eham.net/articles/28466

The ARRL is governed by its Board of Directors. A voting Director is chosen by ballot by the full (licensed) members in each of the 15 ARRL divisions. Vice Directors -- who serve in the absence of the Director from a Board meeting and succeed to the position of Director should a vacancy occur -- are chosen at the same time. Elections are held in five divisions per year. It only takes 10 full members in a division to nominate a candidate for either office.

WIANEWS WEEK COMMENCING JUNE 17 2012.

Centenary of organized Amateur Radio in Queensland is off to a great start.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 17 2012.

AUSTRALIAN NEWS

We thank the Radio Amateurs of Canada who host the web page ariss.org for
news that a Sydney School has used the ARISS program to let their students
speak with the crew of the International Space Station.

St Anne's Primary School in Strathfield back last Wednesday used the
telephone system connected to LU8YY for the Children to pose
such questions as

Can you text in space? How do you communicate with your family?

How do toilets work in space?

What do you do to keep entertained?

NERG member Ethan VK3ETC and friend Ross VK4WRC will be operating portable
from VK2, VK4 and VK5 while organising the 2012 Patrol4x4.com National Forum

Meet up to raise money for the Royal Flying Doctor Service.

They'll be operating from the 4th-10th July around 7:30-10:00pm AEST on HF when parked up.

The convoy will run through Corner Country (Tiboorburra, Cameron's Corner, Innamincka, Birdsville) on:

80m 3.550 MHz,
40m 7.140 MHz, and
20m 14.130 MHz +/- QRN/M.

(nerg news)

TRIPLE M ROX

A radio staff member at Triple M Adelaide has been taken to hospital with head injuries after being attacked with a claw hammer. The attack occurred about 3pm on June 12, on the steps of the radio station on Greenhill Rd at Unley. The staff member was treated for minor head injuries at the Royal Adelaide Hospital.

National FunFlight Day - November 4, 2012

National FunFlight Day is an event staged by Australian flying clubs to provide joy flights for children and families touched by adversity. It also helps pilots maintain their flying hours.

The Bendigo, Victoria-based Midland Amateur Radio Club, VK3CMZ, was invited to participate in the National FunFlight Day by the Bendigo Flying Club in November 2011. The Club didn't pass up this opportunity for some public exposure and mounted an operating HF and UHF/VHF station. A handheld in a plane also provided communication back to children on the ground.

The day was a success and another invitation has been received for the event being held on November 4th this year. However, as the event is a national event, the Midland Committee saw it as a worthwhile national amateur radio publicity event and approached the FunFlight manager regarding other amateur clubs' participation. Response was very positive and contact information has now been provided to participating flying clubs so that they can contact

their nearest amateur radio club.

So, there you have it. If you are looking for another opportunity to showcase amateur radio, your local flying club might be contacting you. If they don't, maybe you contacting them might bring about the same result

More event information may be found at http://www.funflight.org/.

Kevin Crockett
President
Midland Amateur Radio Club

Central Highlands to Gladstone link on test

Steve VK4SMW, President of the Central Highlands Amateur Radio Club says during the weekend of 9th and 10th of June work was completed on the radio link from the Central Highlands repeater network in to Gladstone.

The system is on trial at the moment, with the Gladstone portal frequency of 439.800MHz with access CTCSS tone of 91.5 Hz.

Mike VK4QS says :-

Well it seems the Centenary of organized Amateur Radio in Queensland is off to a great start. The opening six days of June saw the Queensland Advisory Committee, Don VK4BY, Alan VK4SN, and Mike VK4QS along with two volunteer operators, Ray VK4NH, and Ken VK4QH, fill the airways with VK100WIQ.

Operations both locally and of a DX nature were warmly received, with many stations intrigued with what the call sign was in fact celebrating. Conditions were indeed very poor with a recent Mass Coronal Emission from the sun playing havoc with propagation on the HF Bands

By June 7th, Clem and members of the Southside Amateur Radio Society took up the mantle working hard to log many contacts over the following three days with VK100WIQ. By Sunday June 10th the call sign went north to be operated by a keen group of Amateurs from the Central Queensland Amateur Radio Association.

>From their field base at Weasel Park near Rockhampton this group undertook three days of full on amateur radio activity with VK100WIQ. In fact they were keen enough to film their time at Weasel Park for all of us to see. This can be viewed on the QAC Website at, www.wiaq.org.au where there is also a You Tube link.

This is something that other clubs in the up and coming weeks may consider when undertaking their three days to promote the Centenary on air. Once you

have made a film or even taken photos of the time spent on air then consider sending it to Mr Alan Shannon VK4SN, of the Queensland Advisory Committee. Alan can see about up loading the links, your story and the photos on the WIAQ site for the world to see. It then becomes part of the collective Centenary archive for the future.

To all clubs participating in the Centenary celebrations with VK100WIQ, it is requested that you upload your Log as per the email sent by Al Shannon VK4SN, by way of the Centenary Logbook. This can be found on the WIA Website under the heading News and Events. This will drop down to show VK4 Centenary, and access, as per your password to the Logbook etc.

Enjoy your time promoting Centenary with VK100WIQ, and work as many clubs and operators that fire it up on air between now and July 31st 2012.

What use is an f-call? (20120115)

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

Tolerance has many definitions, one is: a fair, objective, and permissive attitude toward those whose opinions, practices, race, religion, nationality, etc., differ from one's own. It's not a new concept, it's been around since the end of the Middle Ages.

For some reason this week I had a wide spectrum of contacts within Amateur Radio, some great, some disappointing. I had a debate on the merits or otherwise of the NBN, an email from a 14 year old F-call who is being ignored on air, a few posts from an Amateur friend in the transgender community and an email vociferating refugee payments.

I find it curious that we as a community have a medium that ignores lines on a map, stronger still, encourages us to share experiences with amateurs around the world while having members act in an intolerant way toward others. I think that debate is good and required, but in such a debate it might be smart to use the same tenant's we use on air. Listen more than you talk.

Now you might ask yourself what on earth does this have to do with having an F-call?

As we attract more people into the hobby we need to work to keep our community healthy and happy. I think we should encourage those around us to learn from the long history that Amateur Radio represents and perhaps encourage tolerance, as it is clear to me, has been the backbone of Amateur Radio since day one.

Why does it matter?

For one, your Amateur Radio signal goes outside the boundaries of this country. Sometimes it's heard across the planet, even into space. Sometimes your utterances will make it into the ears of people who have laws and customs completely different from yours.

As you know, having an Amateur License is a privilege which works because there is global cooperation on the matter, but if we abuse our privilege, we'll soon learn how fragile cooperation becomes.

The melting pot that Amateur Radio represents is a wonderful community. It has people from all walks of life with differing opinions, life-styles and experiences. What attracted me to Amateur Radio was that those differences don't matter, we all have one thing in common, being Amateurs.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Germany gains 1331 callsigns in 2011

The German telecommunications regulator the Federal Network Agency have released their report for 2011 part of which covers amateur radio.
The report says there were 62 Amateur Radio Exams, 731 amateur radio certificates and 1331 ham radio call sign issued

THE TEN MILLION DOLLAR HAMVENTION.

It's said that Dayton this year resulted in an estimated $10,000,000 impact for the region!

HAMVENTION 2012 OFFICIAL FIGURE SAYS OVER 24000 ATTENDED!

This good news was announced by 2012 Hamvention General Chairman Mike Kalter, W8CI and according to Mike, this was an increase over last year. He attributed it in part to the excellent weather during Hamvention weekend.

W8CI also noted that many vendors reported excellent sales during the three days of Hamvention and many restaurants, hotels and motels also reported increased sales.

AMATURE RADIO WEEK

The Michigan House of Representatives in the USA has issued a resolution recognizing the public service contributions of Michigan's Amateur Radio Operators.
The State house passed House Resolution No. 287, A resolution to declare June 17-23, 2012, as Amateur Radio Week in the state of Michigan.

FRS application for IARU membership

The Federation of Radio sport of Republic of Azerbaijan (FRS), founded 30 December 2001, has applied for IARU (International Amateur Radio Union) membership.

IARU Region 1 report that the application was found to be in order and a proposal that FRS be elected as IARU member has been put out to vote.

NEWS FROM ARNEWSLINE USA

HAM RADIO HELPS LOCATE AND CONVICT PERSON WHO STOLE FROM NATIONAL ARCHIVES

J. David Goldin ,WB1EZA, is being hailed as a hero by the United States National Archives. This after helping to solve exposed what authorities have called one of the most egregious instances of theft of historic materials from where the government preserves its historic documents, photographs and recordings. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

According to news reports when J. David Goldin, WB1EZA, saw a recorded interview of baseball great Babe Ruth for sale on eBay he knew something was wrong. That's because there was only one original record of that 1937 interview of Ruth on a hunting trip, and Goldin had donated it to a government archive more than 30 years ago.

So Goldin, who is described as an avid record collector, launched his own investigation that led directly to uncovering the person now believed responsible for stealing close to 1000 artefacts from the National Archives.

Goldin began his sleuthing by purchasing a different recording from the same on-line seller. When the deal was complete he recognized the name of the seller as being the same National Archives employee who had received the Babe Ruth and other historic recording that Goldin had donated thirty years earlier.

Goldin then took his findings to federal investigators. They in turn obtained a search warrant and raided the home of retired National Archives employee Leslie Waffen. There authorities carted away two truckloads of materials. Now, after pleading guilty, a judge in Maryland has sentenced Waffen, to an 18 month prison term and fined him $10,000.

Before retiring, Waffen had worked at the National Archives for 40 years.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

United Stares Inspector General, Paul Brachfeld, whose office investigated the theft, says that he plans to honour Goldin. He told the press that there are some people who give tips who are just passive. He said that J. David Golden wasn't like that. He called Goldin a sentinel.

THE ROLE OF SOCIAL MEDIA IN REPORTING EMERGENCIES TO THE PUBLIC

"Emergency Management Without Social Media.Fail" is the
title of a very interesting op-ed article by author Tim
Burrows posted across several social media websites. In it,
Burrows looks at both the positive and negative effects on
the public that social media can have in attempting to
disseminate and update information of a disaster, accident
or other event that the public needs to know.

Whether you agree or disagree with Burrows assessment of the
role of social media in regard to the accuracy of the
information being made public, his article is a very
interesting evaluation for anyone involved in the world of
emergency communications. You can read the entire story on-line
at tinyurl.com/emergency-social-media

WEIRD AND WONDERFUL

PrintSat - An Amateur Radio 3D Printer CubeSat

Students at Montana State University (MSU) are planning to build their new
amateur radio satellite PrintSat with nano-carbon-impregnated plastic using
a 3D printer!

David Klumpar KD7MFJ of MSU said 3D printing "will further lower the costs
and speed the development of very small satellites, enabling future
scientific missions comprised of dozens of satellites flying in formation."

Jim White WD0E, president of Colorado Satellite Services, explained that
3-D printing has evolved in the past few years to be a very inexpensive and
fast way to make mechanical parts. With PrintSat, the entire structure of
the small satellite will be printed.

As the first use of additive manufacturing for a satellite, they plan to
show they can make parts that cannot be made in traditional ways."

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

The team who were so "bad" at Cape Liptrap last August have decided to be bad again!

VK3BAD that is.

At the end of August a 20 strong team will travel into the Otway Ranges homing in on The King Parrot Cottage complex near the Village of Pennyroyal for a party. The Pennyroyal Propagation Party , a long weekend of Radio, Delicious Food and Drink and Great Company.

Styled "Wireless Weekends" this inaugural operation follows on from highly popular activations at Cape Liptrap over the past two years, And so great was the demand that the trip was sold out just 3 days after being announced.

The location is high in the mountains with lots of wildlife in the area and great views. The Station will operate on most HF frequencies 160 - 10mtrs and on 6 and 2 metres and 70cm with contact to the Melbourne Area via the Geelong 2 mtr repeater. They'll also attempt a live link up on 1250mhz to VK3RTV repeater from a nearby high point which according to plotting software will give a line of sight path of 147km. Also they hope to have a number of live crosses using Skype to access VK3RTV during the weekend so you can see all the action.

So please listen out for VK3BAD on 31st August through until September 3rd.

Further details on QRZ.com under VK3BAD

Sovereign Military Order of Malta

Thirty years have passed since 1A made its way onto the DXCC list.

An activation by an International team looks to celebrate the uniqueness of this event. So, from the 1st to the 4th July, we will listen for them on the air as 1A0C from Santa Maria del Priorato, home of the Sovereign Military Order of Malta.

The callsign that will be used belongs to 'The Order of Malta's Italian Relief Corps (CISOM)" an organization specialized in bringing assistance and relief during emergencies.

(SouthGate)

BROADCAST MONITORING SWL AND SCANNER NEWS

NERG news report that the internet forum known as AURFSCAN.COM started out as a popular place to hold discussions and swap exchange information with radio scanner enthusiasts but has since grown to include amateur radio activities, with quite a few VK amateurs contributing to this busy forum.

In addition to the usual forum posts, there is wiki, files, and personal blog pages however some of these require you to join at a small annual fee.

Check out the forum at:
aurfscan.com.au

Radio Netherlands English service closes down

Following the closure of the Dutch service in May, Radio Netherlands has announced that the English service will end on June 29.

And, since RNW's English web stream will end on 29 June, there will be no more Listening Guide.

The measures are a result of steep budget cuts imposed by the Dutch government.

On 29 June they will broadcast a radio show looking back at the past decades of Radio Netherlands Worldwide.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

Reporting Harmful Interference to ACMA

We Radio Amateurs often deal with signals down in the noise, so interference is something we are very sensitive to.

We often experience interference from a number of devices sold on the market today, such as lighting systems, inverters, solar systems (especially roof-top solar systems), and all manner of switch-mode power supplies.

The ACMA has the responsibility of enforcing the EMC regulations, but the ACMA is now very much a complaint's driven and evidence based organization and will but it's resources where they are most needed. That's why it is very important if that if you suffer long-term harmful interference to you communications from any device you should let the ACMA know about it.

The ACMA has an interference reporting form in the Radio Communications section of their website. There is no fee for making an interference report to the ACMA but it's very important that only valid interference to YOUR communications over a long period of time is reported.

So please, take a look at the interference reporting form on the Radio communications section of the AMCA website and if you suffer harmful interference from any device, make a report and let the ACMA know about it it will only help you and your fellow radio amateurs.

This is Phil Wait VK2ASD for the WIA.

The on-line R066 form is at:
acma.gov.au/interforms/radcomms_form.asp

A sample of a completed interference reporting form is at:
acma.gov.au/webwr/_assets/main/lib310172/r066-request_for_investigation_of_interference_to_radiocommunications_(sample_form).pdf

Again the ACMA form number is R066 and that a copy of this news item is also on wia.org.au with the links included.

IARU Monitoring System Newsletter

The May issue of the IARU Monitoring System (IARUMS) newsletter reports on a 'Clansman' transmission in the amateur radio 28 MHz band, possibly from the Falkland Islands.

The newsletter says:

"Clansman" is the name of a F1B system, used by the British military. Parameters: 300 Bd and 850 shift.

The system was daily transmitting on 28181.5 kHz and well audible in Germany every late noon. Our bearings were showing South America. DK2OM thinks the emissions are coming from the Falkland Islands.

There is also a report on the CODAR radar system in North East India, Bay of Bengal, that is operating on 14070-14125 kHz.

SumbandilaSat recovery work continues

SA AMSAT posted a report on their website that there is still a recovery opportunity for SumbandilaSat.

The team at SunSpace are still incrementally reading back the program code from the nine power modules in an effort to determine the extent of the corruption. With SumbandilaSat going through eclipses, the satellite is not as much available as the team would like.

SumbandilaSat's batteries failed which means that the satellite is only active when the solar panels are illuminated.

"We need the information to confirm that the changes we made to stop repeated corruption were effective." Johann Lochner ZR6CBC who spends considerable of his free time on recovery of SumbandilaSat said.

"It is our aim to ultimately reprogram one of the power modules to automatically switch the amateur radio transponder on and off."

REWIND

LENORE JENSEN, W6NAZ, PHONE PATCHING TO VIETNAM VIA MARS

And finally this week, a piece of ham radio history that you can enjoy and share with friends. While perusing the latest ham radio videos posted to YouTube, our producer Bill Pasternak, WA6ITF, came across one featuring the late radio, television and film actress Lenore Jensen, W6NAZ, running phone patches to Vietnam.

These phone patches were done through the Military Affiliate Radio System which often used frequencies just outside the regular High Frequency ham bands. Overseas telephone calls were difficult to make decades ago and sometimes impossible depending on location, so for U.S. service men stationed around the world, ham radio filled the void. This was an all with volunteer effort and Lenore Jensen, W6NAZ, was at the forefront of the activity.

--

Audio bite from film

--

The film is titled "A Visit to Mars" and was part of the United States Army produced series "The Big Picture." Bill dates the documentary to the late 60s and notes that the phone patch was obviously simulated for filming. He asks: Did you ever hear noise-free audio on High Frequency DX, or the public always remembering to say "over?"

These details aside, the film appears to be accurate overall. It depicts the way things were done about 50 years ago and is a trip back in time. You can see it yourself on-line at tinyurl.com/LenorePatchingToVietnam. And LenorePatchingToVietnam is spelled as one word.

AUSTRALIA'S MOST WANTED

Request for Information!

Do you know anything about the Althorpe Island Light House wireless communications operations.?

Lighthouses of Australia a volunteer group whose aim is the preservation of Australian Lighthouses is looking for information on this famous Australian lighthouse.

A reliable means of communication with the lighthouse was the driving force behind the establishment of a wireless telegraphy system in the late 1890s. It appears this means of communications was all too hard to set up and a cable was finally laid in about July 1911.

This created it's own problems of not being able to send messages after 6 o'clock because the telegraph operator on the mainland had gone home.

It seems that during the Second World War the lighthouse was equipped with a pedal wireless set that enabled them to communicate with Cape Borda Lighthouse and from there, messages were relayed to the mainland -- this was in use into the 1950s.

If anyone can elaborate on what has already been researched or know what type of radio systems were employed, please send it to Ross VK2VVV.

vk2vvv@wia.org.au

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

The PRC restricts the import of radio transmitting equipment, other than
the temporary import of mobile phones. You need to ask this question of
your Chinese embassy. You would need an import licence and my guess is
that you will not get one.

I don't know if there are any (transmitting) licence exempt allocations,
or whether they are available to non-citizens.

SARL NEWS - SUNDAY 20 JUNE 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 MHz FM from Pretoria (other news readers change to suit) with relays on 7 066 kHz and 3 695 kHz SSB.

SILENT KEY

It is with deep regret that the passing away of Johan 'Krit' Kritzinger, ZU4JK, on Sunday 10 June 2012 is announced. We extend our sincere condolences to his family and friends.

(PAUSE)

In the news today:

SARL ROADMAP PRESENTED TO ICASA

GOOD NEWS FOR SADC VISITORS

You are listening to ZS6SRL. Stay tuned for more details on these items and other important and interesting items.

SARL ROADMAP PRESENTED TO ICASA

The SARL presented the Roadmap to regulatory reform to ICASA at the quarterly liaison meeting held last week Thursday. It was briefly discussed and agreed to set up a working group to consider the various aspects tabled in the document.

The roadmap deals with the: Corrections to the current regulations, Operating privileges for visitors from SADC countries, Quick access to 600 kHz, Amateur allocation at 5 MHz, Expansion of the 160 metre band and Increased output power limits.

A copy of the SARL proposal to ICASA is available at www.sarl.org.za.

Amateurs wishing to comment on the document should send an email to artoday@sarl.org.za.

The first meeting of the work group will be held in July.

GOOD NEWS FOR SADC VISITORS

The SARL would like to have an agreement in place similar to the CEPT one. Meanwhile ICASA has advised the SARL that, while such a proposal is under discussion, visitors who hold a valid amateur radio license in a SADC country, may apply for temporary authorisation to operate in South Africa. A copy of his license and the period to be spent in South Africa, must be presented. His request must be sent to KMashile@icasa.org.za as well as admin@sarl.org.za. The turn around time will be approximately 48 hours.

SKA TO FEATURE ON THE INTECNET TONIGHT

Prof Justin Jonas of the SKA team will be the guest on the next Interactive Technical Net (INTECNET) tonight, Sunday 17 June. The net will start at 19:30. Prof Jonas will talk about what part of the SKA will come to South Africa and highlight the science that will be done. He will also participate in an interactive session and answer questions from radio amateurs around the country.

125 CANDIDATES PASSED THE RAE IN MAY

A total number of 144 candidates wrote the amateur radio examination class A in May this year. The pass rate was 81% with 116 candidates passing the examination. 10 candidates wrote the class B examination, of which 9 candidates passed.

Highest marks of 94% was achieved by 2 candidates: B Jakovljevic, ZS6BAT, and HC Von Stockhausen, ZS6VST.

The youngest candidate to sit the examination was 11 years old. He is GJ du Toit with the call sign ZU5GDT.

All candidates who have passed and received their curator ad litem signs, may go on the air and do not have to wait for the official license documents, which may take a few weeks to be processed. The results are published on www.sarl.org.za and the letters have been mailed.

All successful candidates, who submit an application form to the SARL, will receive a complimentary membership of the SARL for one year. The membership includes full excess to Radio ZS on the web and all other membership services such as the QSL bureau.

There are a few candidates who have not submitted the HF evaluation documents. They will only receive their curator ad litem signs once the paperwork has been received by the SARL.

INVITATION FOR ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

Amateurs are invited to submit technical papers for presentation at the 31st Annual ARRL and TAPR Digital Communications Conference to be held from 21 to 23 September 2012 at the Sheraton Gateway Airport Hotel in Atlanta, Georgia. Papers will also be published in the Conference Proceedings (you do not need to attend the conference to have your paper included in the Proceedings). The submission deadline is July 31. Please send papers to Maty Weinberg at maty@arrl.org. For more information about the conference visit www.tapr.org/dcc.

REPEATER WORK GROUP MEETS ON 23 JUNE

The SARL Repeater manager, Frik Wolff, ZS6FZ, reports that several clubs and repeater group have responded to an invitation for all division 6 clubs to send their representative to the repeater work group meeting to be held at the National Amateur Radio Centre (NARC) on Saturday 23 June at 09:00.

To assist with catering arrangements, please send details of who will be attending to vubandplanning@sarl.org.za if you have not already done so.

WHO'S WHO ON VHF AND UHF?

A comprehensive data base is currently being prepared of all the VHF and UHF amateurs who are equipped for VHF and UHF operation, and specifying all those who are currently active on 50, 70, 144, 432 and 1 296 MHz. All amateurs in South Africa and the neighbouring states are invited to submit their details, irrespective whether they are members of the SARL or not. The following information is required: Full name, cell or landline number, city or town, call sign, locator, power and type of antenna equipped for on each band, which bands you are currently active on and the transmission modes used.

Please help to prepare and update an accurate list of VHF/UHF amateurs in Southern Africa, and make an effort to submit your data and/or those of your friends as it will be of great value to the VHF fraternity. You could post your details on the VHF Forums, zsvhf mailman list, via cell on 084 612 9600, landline at 041 581 2425 or e-mail to mcbosch@webafrica.org.za.

CONTEST NEWS

Today 17 June is World QRP Day and radio amateurs are encouraged to operate using low power. You will be pleasantly surprised with the results you can achieve using 5 watts or less on the bands. Give it a try!

SARL TOP BAND QSO PARTY.

This is a fun activity to promote contacts on 160 metres between radio amateurs in Southern African countries and to encourage radio amateurs to apply for the SARL Top Band Award. The event is open to all licensed amateurs that have access to the 160 metre band.

The QSO party will run from 00:00 (Zero hours) UTC or 02:00 CAT on Thursday 21 June to 00:00 (Zero hours) UTC or 02:00 CAT on Monday 25 June. You may use CW and phone during the QSO Party on the following frequencies - CW from1 810 to 1 838 kHz and Phone from 1 840 to 1 850 kHz.

The exchange is a RS(T) report and provincial or country abbreviation. Following the QSO, the station must change the dial frequency by at least 2 kHz for the next QSO, unless a period of 10 minutes has lapsed between contacts. The frequency of each QSO must be shown on the log sheet.

Each station can be worked once on Phone and once on again on CW. Each contact will count three (3) points and five (5) additional bonus points will be awarded for each South African call area and each DXCC country worked. Total Score = (Total QSO points) plus (Bonus points).

Log sheets must be submitted by Monday 2 July to the West Rand Amateur Radio Club, PO Box 5344, Weltevreden Park, 1725 or sent by e-mail to contest@sarl.org.za.

PEARS FUN CONTEST

The Port Elizabeth amateur radio club held a fun contest on 26th May. There was only 1 winner, Gerrit, ZS2XD, with 54 QSO's and a total of 675 points. Congratulations Gerrit!

WEST RAND FLEA MARKET

The West Rand Amateur Radio Club is hosting its next flea market on Saturday 30 June at 12:00 at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Phillip, ZS6PVT, at 083 267 3835.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is at moderate levels. Sunspot 1 504 continues to expand into a large sized sunspot cluster and now spans the size of at least 4 planet Earths. This sunspot now harbours enough energy to produce X-class flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 90.

Amateurs will have fun on the bands from 20 to 10 meter, which will provide lots of DX with 15 m providing the best openings and 20 meter not far behind. 10 meter openings will be less frequent and mostly on east-west paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 17 June - Today, top band QSO-party, all day. 17 June - This evening at 17:30, Intechnet about the SKA with Prof. Justin Jonas as guest speaker. 23 June - Repeater group meeting at 09:00 at the NARC. 30 June - West Rand flea market starting at 12:00 at Kroton

Street. For more information, contact Phillip, ZS6PVT, at 083 267 3835

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,725 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dirk, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Flip Britz, ZS4GE/6, and edited by George Honiball, ZS6NE.

Thank you for listening. 73.

/EX

The blurb goes on to say:-

>Broker network Ten Insurance has launched a new scheme for
>The Radio Society of Great Britain (RSGB), the not-for-profit
>national organisation for amateur radio enthusiasts.

>The new scheme will provide specialist cover for the 24,000
>licensed radio amateurs and enthusiasts in the UK.

24,000 ?

That's an odd mistake for the society to make about the number
of radio amateurs in the UK.

Even before the Fuckwits Licence there were about 60,000.
How many now - 75,000 ?

24,000 is more like the figure the RSGB would quote as having
membership reach to when negotiating a deal with anyone, but
not what you'd like to admit to having when you're claiming to
speak for all Uk radio amateurs or trying to convince OFCOM
that they have much support !

Thankfully it appears that this press announcement might have
inadvertantly given the game away, and I doubt the RSGB are
happy for such a figure to leak out ;-))

>Read the full article at
>http://www.postonline.co.uk/post/news/2184648/
>insurance-launches-scheme-amateur-radio-djs

A crap website that wants you to register just to look at some
crappy insurance industry press releases.

1) Foxtrot Oscar !

and

2) Judging by the url it's nice to see that the RSGB has correctly portrayed the market to them. Or have they been listening to too many FL scum on 2m ?

Leonardo's to Host American Radio Relay League Kids Day on Saturday:

Posted: 15 Jun 2012 05:46 PM PDT
http://www.eham.net/articles/28487

Leonardo's Discovery Warehouse and Adventure Quest will host the first American Radio Relay League Kids Day on Saturday. The event is part of a national event held each year and is sponsored by Enid Area Ham Radio Club. The day is intended to get kids interested in Ham Radio. The Enid Amateur Radio Club was founded in 1936 and has included prominent members, such as astronaut Owen K. Garriott. Garriott previously has credited Ham Radio and getting him interested in subjects such as electrical engineering, eventually leading to him becoming an astronaut. Throughout the day Saturday, kids around the country will have an opportunity to communicate with one another using Ham Radio. High frequency, very high frequency and ultra high frequency radio rigs will be available for kids to use and make contact with kids from around country.

Hams Gear Up to Set Long Distance Records, Practice Emergency Communication

Posted: 15 Jun 2012 05:44 PM PDT
http://www.eham.net/articles/28486

PASO ROBLES -- Members of the Paso Robles Amateur Radio Club will work around the clock this weekend to set up field radio communication stations, get on the air and contact thousands of other operators in the U.S. and Canada as participants in the American Radio Relay League's Field Day. According to Joel Kaye, AD6KH, club president, Field Day is the annual "shakedown run" for the ARRL's National Field Organization. "Field day is a way for hams to get outdoors and have fun under some difficult conditions," Kaye said. "But it's also a chance to fine tune emergency communication skills. We use generators and battery power, and we set up antennas in the field. The idea is to put together a self-sufficient, working station quickly and begin making contacts." The ARRL Field Organization has been effective in establishing emergency communication nets during floods, hurricanes, fires, earthquakes and other major disasters. Field Day offers training for such emergencies as well as providing a contest environment where the objective is to make the highest number of contacts during the 24-hour contest period.

//
Ham Radio Operators Monitor OC Wheelmen's 'Ride Around the Bear':

Posted: 15 Jun 2012 05:44 PM PDT
http://www.eham.net/articles/28485

Members of the Orange County Wheelmen bicycle club started and finished their 28th Annual 'Ride Around the Bear' in Redlands. Ham radio volunteers with San Bernardino County helped monitor the Orange County Wheelmen's 100-mile "Ride Around the Bear," which started and finished Saturday at Sylvan Park in Redlands. Jeff Sabatini manned one of 12 comm sites on Highway 38's dogleg curve at the Forest Falls turnoff in Mill Creek Canyon. He had his pickup rigged with a radio tower to increase his signal output and reception in the steep-sided mountain gulch. "Ham radio works when everything else won't," Sabatini said. "This is good practice for emergency situations. Fire, flood, earthquakes."

//
Modern Day Heroes of Tele-Communications Revealed:

Posted: 15 Jun 2012 05:44 PM PDT
http://www.eham.net/articles/28484

Novato, CA, June 15, 2012 --(PR.com)-- HeroBook features the great men behind the evolution of the telephone. They are our modern heroes of today for without their brilliant innovations, the world would be different from what it is at present. If we talk about the history of telephones, Alexander Graham Bell's name would have a ring to it. However, electronic communications didn't begin with the telephone although it is considered as the first speech transmitter. Alexander Bain created the first patented facsimile where the images from a flat metal surface are scanned by a stylus then transmitting it to another fax machine. After his invention, many have created improved versions. Years later when Samuel Morse was able to convince the government to fund his transmitter's wires, the Morse code communication using the telegraph was opened to the masses. It was one of the widely used devices during the time of War. After these three origins of electronic communication devices, various innovations sprouted for the past century.

[IARU-R2-News 194] IARU HF World Championship 2012
2012-06-15

To IARU Region 2 Member Societies:

The IARU HF World Championship 2012 will take place the second full weekend of July, beginning 1200 UTC Saturday and ending 1200 UTC Sunday (July 14-15, 2012).

The objective of this contest is to contact as many other amateurs, especially IARU member society HQ stations, around the world as possible using the 160, 80, 40, 20, 15 and 10 meter bands.

We invite all IARU Region 2 member societies to actively participate with their official stations.

The rules for this year are available here:

http://forums.qrz.com/showthread.php?350529-Public-Demo-of-Emergency-Communications-from-23-to-24-June-2012&goto=newpost

Public Demo of Emergency Communications from 23 to 24 June 2012

THE AMATEUR RADIO VOLUNTEERS CORPS OF PUERTO RICO

Despite the Internet, cell phones, email communications and other technologies, each year, entire regions are without communication. Tornadoes, fires, storms, rain and even the occasional drop fiber optic cables, leaving people without the media. In these cases the amateur radio service is the only one who has never failed so what Amateur Radio has been the media worldwide. These radio operators, often called "Radio amateurs" provide emergency communications for free to all agencies, from the American Red Cross, FEMA, the Salvation Army and even the International Space Station (ISS).

"The Amateur Radio Volunteers Corps Puerto Rico" will join thousands of amateur radio groups and radio operators around the world to demonstrate the capabilities of emergency communications. Since the past year, the news has been full of information for radio amateurs providing emergency communications during disasters that occur in every city in the world, including the California wildfires, winter storms, tornadoes and other events worldwide. When trouble is brewing, Amateur Radio groups are often the first to offer its communications equipment to provide information and help communities across the world.

On the weekend of June 23-24, 2012 the public will have the opportunity to meet and talk with hams and see for themselves that the Amateur Radio Service is so important to the U.S. and P.R. come and share with us today. Come and called the emergency communications work and the amateur radio group is working with the CERT team in the U.S. and Puerto Rico.

This annual event, called "Field Day" or field day is a test of how to use single-minded alternative power sources like power plants, solar cell, batteries and other equipment all group and radio operators will be limited to works emergency stations in parks, malls, schools and recreational flights around the world. Their motto that, "When all else fails, there are the amateurs" are more than words to Amateur Radio, we can send messages in many forms without the use of telephone systems, internet or any other

infrastructure that can be compromised if of an emergency. More than 35,000 hams participarte in this worldwide event.

Demostración Pública de Comunicaciones de Emergencia del 23 al 24 de junio de 2012

EL CUERPO DE RADIOAFICIONADOS VOLUNTARIOS DE PUERTO RICO

A pesar de la Internet, los teléfonos celulares, comunicaciones por correo electrónico y otras tecnologías, cada año, regiones enteras se encuentran sin comunicación. Los tornados, incendios, tormentas, lluvias e incluso la caída ocasional de cables de fibra óptica, dejar a la gente sin los medios de comunicación. En estos casos el servicio de los radioaficionados es el único que nunca ha fallado por eso lo Radioaficionados a sido el medio de comunicación a nivel mundial. Estos operadores de radio, a menudo llamado "Radio aficionados" ofrecer comunicación de emergencia de forma gratuita para todas las agencias, desde la Cruz Roja Americana, FEMA , el Salvation Army e incluso para la Estación Espacial Internacional (ISS).

"El Cuerpo de Radioaficionados Voluntarios de Puerto Rico" se unirá a miles de grupos de radio aficionados y operadores de radio de todo el mundo para demostrar sus capacidades de comunicaciones de emergencia. Ya que Durante el año pasado, la noticia ha estado llena de información de los radioaficionados que proporcionan comunicaciones de emergencia durante los desastres que ocurren en todas las ciudades del mundo, incluyendo los incendios en California, las tormentas de invierno, tornados y otros eventos en todo el mundo. Cuando se avecinan problemas, los grupos de Radio Aficionado a menudo son los primeros en ofrecer sus equipos de comunicaciones para dar la información y ayudar a todas las comunidades del mundo.

En el fin de semana del 23-24 de junio de 2012 el público tendrá la oportunidad de conocer y hablar con radioaficionados y ver por sí mismos por que el Servicio de Radioaficionados es tan importante para los EE.UU. y P.R. ven y comparte con nosotros en este día. Ven y conoce como la comunicaciones de emergencia funciona y los grupo de radio aficionados trabaja junto a los equipo de CERT de Estados Unidos y Puerto Rico.

Este evento anual, llamado "Día de Campo" o field day es una prueba de cómo se usan sola mente las fuentes de alimentación alternas como plantas eléctricas, celda solares, baterías entre otros equipos todos los grupo y los operadores de radio estarán limitados a trabaja estaciones de emergencia en los parques, centros comerciales, escuelas y en las aéreas recreativas de todo el mundo. Su lema ese, "Cuando todo falla, están los radioaficionados" son algo más que palabras para los radioaficionados, nosotros puede enviar mensajes en muchas formas sin el uso de sistemas de telefonía, internet o cualquier otro tipo de infraestructura que puede verse comprometida en caso de un emergencia. Más de 35.000 radioaficionados participan de este evento en todo el mundo.

Ham Radio Deluxe and ROC for TNCs now available in a bundled package

Posted: 16 Jun 2012 05:22 AM PDT
http://forums.qrz.com/showthread.php?350385-Ham-Radio-Deluxe-and-ROC-for-TNCs-now-availabl
e-in-a-bundled-package&goto=newpost

Tampa FL, St. Paul MN☐ June 16, 2012

HRD Software, LLC and W4PC software today announced a bundle package for
Ham Radio Deluxe and Radio Operations Center Software for Timewave/AEA and
Kantronics TNCs.

Many hams want to use the ARQ modes in Pactor, AMTOR and GTOR that are supported in hardware TNCs but not in soundcard software modes. Now W4PC Software☐s Radio Operations Center 3.99 for the TNCs synchronizes with the HRD DM-780 soundcard mode program so either ROC or DM-780 can key the radio through the TNC. If the TNC has a built-in soundcard (PK-232SC) or soundcard interface (PK-232PSK, PK-900PSK and DSP-232+), no radio-TNC-computer interconnection changes are necessary to switch between soundcard modes and the TNC modes.

☐The old meets the new☐, said Rick Ruhl, W4PC, owner of W4PC software and an owner of HRD, ☐ W4PC Software, HRD and Timewave programmers and engineers have combined to make TNCs and soundcard mode software compatible for the first time.

Randy Gawtry, owner of Timewave Technology and also an owner of HRD said, ☐Timewave has added a USB soundcard and rig control board to the legendary PK-232 to give the new PK-232SC a single USB cable connection to the computer from the TNC. Even with rig control, precision-timed hardware CW and FSK, there are only four connections from the TNC to the radio. Using only AFSK modes requires just two connections☐

The bundle price for ROC and HRD is $99.95.

HRD 5.2X is free, but will include a no charge upgrade to version 6.0 with
the purchase of 5.X support for $59.95. The retail version of HRD will be
$79.95 when it is released in August 2012. Those that have purchased or
will purchase the 5.X support will still get one year of support from the
date of the 6.0 release.

You can purchase and download the Ham Radio Deluxe/ROC bundle at
http://www.ham-radio-deluxe.com.

Special Event K4O in Puerto Rico

Posted: 17 Jun 2012 06:11 AM PDT
http://forums.qrz.com/showthread.php?350526-Special-Event-K4O-in-Puerto-Rico&goto=newpost

K4O - Special Event in Puerto Rico

On Sunday July 1st 2012, the Puerto Rico Olympic Committee will be
celebrating the Flag Bearing of the Puerto Rico Delegation to the Summer
Olympic Games in London. This event marks the beginning of the
transatlantic journey to represent Puerto Rico in this international event.
The delegation will depart the Olympic Committee and will walk to the
Governor□s Mansion to receive the flag that will be used in the opening
ceremony and remain hoisted in the Olympic Village throughout the Games.

In celebration of such an important event, The Puerto Rico Amateur Radio
League will be joining the Olympic Committee in this celebration by setting
up a special event station from the Puerto Rico Olympic Committee
headquarters. We will be using the special callsign □K4O□ for this event.

We would like to use our radiowaves to let the world know that the Puerto
Rican delegation is ready for the games in London. Operation will be on
June 30 (9:00am-5:00pm) and July 1 (9:00am-2:00pm) from the headquartes of
the Puerto Rico Opympic Comitte in San Juan.

Contact Information: www.prarl.org 787-633-6847

Dr. José C Vicéns

President

Puerto Rico Amateur Radio League

El domingo 1 de julio de 2012 se celebra el abanderamiento de la delegación de Puerto Rico a los juegos Olímpicos de Londres 2012. Este evento marca el comienzo de la jornada trasatlántica para representar internacionalmente a Puerto Rico en el escenario olímpico. La delegación viaja desde el comité Olímpico de Puerto Rico hasta la fortaleza para ser recibidos por el gobernador y entregarles la monoestrellada que van a utilizar cuando marchen en el estadio Olímpico en Londres.

Con motivo de este significativo evento para Puerto Rico, Liga de Radioaficionados de Puerto Rico (Puerto Rico Amateur Radio League) estará celebrando junto al comité Olímpico de Puerto Rico conmemorando tan digno evento con una transmisión especial. Estaremos utilizando unos indicativos especiales ☐K4O☐ para conmemorar tan importante evento.

Queremos dejarle saber al mundo a través de nuestras ondas de radio que la delegación de Puerto Rico está lista para los Juegos Olímpicos en Londres. Estaremos operando los días 30 de Junio (9:00am-5:00pm) y 1 de julio (9:00am ☐ 2:00pm) desde la sede del Comité Olímpico de Puerto Rico en San Juan.

All Asian DX Contest - Politically Anti-American

Posted: 17 Jun 2012 05:57 AM PDT
http://forums.qrz.com/showthread.php?350525-All-Asian-DX-Contest-Politically-Anti-American&goto=newpost

I feel that the politicizing of the AA contest is bad and that people should avoid the contest until they stop. They have a part in their rules that is political says "(excluding U.S. auxiliary military radio stations in the Far East, Japan)." These are ham stations that are operated by mainly Americans. But, I remember one operated by a British guy many years ago. It is very impolite to treat the guests like that when they are visiting a country.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 17th June 2012

Silent Key

We have just heard with regret of the death on Tuesday, 22nd May of Dan Byrne EI2CK , 35 Endsleigh, Douglas Road, Cork. Dan's funeral took place on Thursday 24th May after Requiem Mass in St. Columba's Church to St. Finbarr's Cemetary. We extend our sincerest sympathy to his family. May he rest in peace.

Silent Key

The many friends of Joe Clarke CEng MIEI EI5CI will be sad to hear of his death on the 13th of June 2012, peacefully at his residence. A long time radio experimenter he was very knowledgeable in data modes and with Michael Lawlor EI3CN and Dermot Flanagan EI6FZ he was responsible for setting up the Dublin Digipeater in the late 1980's. In the early days of packet he operated his own bulletin board using a Commodore 64 Computer. A popular and approachable amateur he helped many getting started in computers and packet radio. Joe worked in electronics and held posts in the old Department of Posts and Telegraphs, Dublin Airport and Siemens Nixdorf eventually starting his own company Network Facilities. He resided for many years at Cowper Road, Rathmines, Dublin and later moved to Tinahely, County Wicklow. He will be sadly missed by his wife Maura, sons Ronan and Aodan, daughters-in-law Christine and Anne, Godson, relatives and friends. Ta se imithe ar sli na firinne anois. Ar dheis De go raibh a hanam dilis.

Counties Contest

A brief reminder that the IRTS 80 metres Counties Contest takes place today, Sunday 17th June. The contest runs from 14:00 to 17:00 UTC, and covers both CW and SSB. See the IRTS Contests page www.irts.ie/contests for the full rules: note, in particular, the need to observe the Band Plan -the relevant frequency ranges are listed in the contest rules.

Change in 40 Metre News Frequency

The present 40 metre radio news frequency has become increasingly busier on Sunday mornings. This has lead on occasions to some difficulty in the reception of both the bulletins and the reports on the transmissions. It has been decided, therefore, to move the transmission of the 40 metre news to a new frequency of 7123 kHz on and from Sunday the 1st of July. This frequency was selected after monitoring a range of frequencies over a period of time by amateurs who use this particular transmission of the radio news bulletin.

EI0IRTS

Affiliated clubs and individuals are invited to help put EI80IRTS on the air in this our 80th Anniversary year. If you or your club wish to use EI80IRTS please contact Ger McNamara EI4GXB at ei4gxb /at/ gmail.com or Thos Caffrey EI2JD at thoscaffrey /at/ hotmail.com. Reports from SWL's are particularly welcome and a very attractive award is available for working the station.

DX News

Jeff N6GQ will be in Malta from 17 - 29 June. He will sign 9H3ZZ and QSLs go via his home callsign and Logbook of the World.

For those needing Iceland on 6m look out for TF/VE3MMQ and TF/VE3IKV between 17 and 30 June. These stations will be activated by W4TAA and VE3IKV from the south coast of Iceland. They will run 100w to an 8 ele yagi.

Members of the Telford and District Amateur Radio Society will be visiting Guernsey from 22 - 27 June. Their callsign will be GP3ZME/P and they will operate all bands 160 - 6m plus VHF and UHF. QSLs go via G3ZME.

Uli DL9WVM will be back in Dubai until 30 June where he will sign A6/DL9WVM. While there he will look into the possibility of operating from Dibba Rock in the Gulf of Oman which may count as AS-124 for the IOTA award..

Steve G3ZVW is QRV as V73/AF6SU until the end of the month. He is using the V73AX club station on Kwajalein Atoll in the Marshall Islands. QSL to G3ZVW direct or bureau.

German radio hams gain access to 472-479 kHz

Radio amateurs in Germany are now allowed to operate in the new 472-479 kHz band. Power limit is 1 watt e.r.p , max. bandwidth 800 Hz.

BBC is developing 3D radio

Researchers at the BBC's technology unit, BBC R&D, have been developing acoustics that can trick the listener into believing they are really at events such as concerts with sound coming from every direction - even above and below.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th-June, through Sunday, 17th-June there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/m, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T32, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1A, S.M.O.M. (Press Release #2). The 1A0C Web page is now active, and the following press release was posted [edited]:
"Following the first press release about 1A0C, we proudly announce that the website about the amateur radio activity that will be held

from 1st to 4th July 2012 in Santa Maria del Priorato is now online.
You can visit it at: http://www.1a0c.com
While you'll find full details on the activation on the website, we
would like to remind you the strong commitment of the team to offer
the elusive 1A entity to as many hams outside Europe as possible. So,
since the beginning, we ask for understanding from European operators,
reminding them ham radio is also about being fair.
The website contains also a 'Donation' page. We ask every ham interested
to work 1A to check it, as the July activation of Malta Order has a goal
beyond amateur radio. Every QSO will contribute to that goal, so it's
really important to raise awareness about our project.
Thanking in advance for cooperation and help in spreading the word,
we kindly aim anyone looking for further details to get in touch with
p.r. and media contact <1a0c@1a0c.com>."

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as
2M1EUB for 14 days beginning June 26th. Activity will be on 160m, 80m,
and the satellites (mostly AO-7 B/A mode), as well as 2m SSB. Grid SQ.
covered should be IO76, IO77, IO87 and IO86. Check out QRZ.com under
2M1EUB for more info.

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as
2M1EUB for 7 days beginning March 24th. Activity will be from the eastern
side of Scotland in the Cairngorms National Park (WFF GMFF-001). Activity
will be on 160m, 80m, and the satellites (mostly AO-7 B/A mode), as well
as 2m SSB. Check out QRZ.com under 2M1EUB for more info.

9Y, TRINIDAD AND TOBAGO. Jim, N6TJ, will once again be active as 9Y4W from
Scarborough, Tobago Island (SA-009, WLOTA 0412), during the CQWW DX CW
Contest (November 24-25th) as a Single-Op entry. QSL via DL4MDO, direct
or by the Bureau.

CY0, SABLE ISLAND (Update). After the surprise announcement by Alan,
VE1AWW, on going QRT from Sable (see OPDX.1064), the following announce-
ment showed up on the <http://www.cy0dxpedition.com> Web page dated
June 9th [edited]: "Operators Murray/WA4DAN and Ron/AA4VK are scheduling
their third attempt to activate Sable Island in September/October, 2012.
The exact dates are being worked out with the Sable station and Environ-
mental Canada. The Team will plan to go the first opportunity allowed,
which is expected to be early October. We are committed to make Sable
Island happen in 2012. More details to follow."

DXPEDITION VIDEOS OF THE WEEK (New Feature). With more and more DXpeditions
putting their videos on YouTube and other Web services, we decided to list
them (possibly) each week. This week's listings include:
2012 EJ0PL Saltee Island (EU-103) -
http://www.youtube.com/watch?v=I9kM6TrWg
2011 TX7M Marquesas Island - http://vimeo.com/44033816
2011 9L5MS Sierra Leone - http://www.youtube.com/watch?v=hvlxjYoHs
2011 Rockall (IOTA EU-189) Preview DVD -
http://www.youtube.com/watch?v=j0j92R7Q8

1990 T33R & T33T Banaba Island -
http://www.youtube.com/watch?v=PpDCXqHIg

E5, SOUTH COOK ISLANDS. Norman, 5B4AIF, will be active as E51E from a villa in Tautu Village on Aitutaki Island (OC-083) between December 10th and January 5th (2013). Activity will be holiday style using just basic antennas. Norman states, "I hope to have the HF2V for 40/80m. Shipped in advance everything else will travel with us. Inverted V's will be used for other bands unless I can get something 2nd hand to leave there. The radio will be a IC-7000, the amp will have the full legal power of 400 watts. I would like to operate at least SSB and RTTY, I am learning CW so if I am feeling able I will do some slow morse, but if no one sends slowly I will have to try another mode." QSL via EB7DX only. He is a ClubLog user.

IOTA NEWS.....
AS-006. David, VO1AU, was active as VR2/VO1AU from Lantau Island, Hong Kong, this past weekend. Operations were mostly CW and 6 meters using 100 watts and simple antennas. QSL via VO1MX.

AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, during the RSGB IOTA Contest (July 28-29th) as a Single-Op entry. QSL via eQSL.

AS-047. Operators Kan/JE1SCF and Yoshi/JG4IQC will be active as homecall/6 from the Daito Islands between June 27th and July 2nd. Activity will be on 40-10 meters including the 30/17/12 meter band, but mainly CW and on 20/17/15 meters. They will use a HB9CV (20/15/10m) and a long-wire (40m). QSL via their home callsign.

AS-099 Berkin, TA3J, was active as TA3J/0 this past week from Yassica Adasi (Yassica Island). QSL via the TA3J QSL Service at <http://www.aydogmus.gen.tr/ta3j/qslservice.htm>, direct (only SASE and 1 IRC, no green stamps please) or by the Bureau. No eQSL. SWL QSL cards are OK. Twitter: @TA3J

AS-158. Members of the Harbin Institute of Technology Amateur Radio Club will be active as BY2HIT/2, Guanglu Island between July 25-31st. They will have 18 operators in a Multi-Op entry in the RSGB IOTA Contest weekend (July 28-29th). QSL via BY2HIT direct. Visit their Web page at: http://www.qsl.net/by2hit

EU-029. Philipp, HB9EYW, will be active as OZ/HB9EYW from Falster Island (DIA SJ-016, WLOTA 1961) between July 10-19th. Activity will be holiday style, and he will focus his operations on 40 meters. QSL via his home callsign by the USKA Bureau.

EU-034. Frank, DL1FT, will be active as ES0FTZ from Saaremaa Island (WLOTA 1401) between July 8-19th. Activity will be holiday style (on vacation) and his preferred bands will be 40/20 meters. QSL direct to DL1FT, or by LoTW and eQSL. Visit his

Web page at: http://www.DL1FT.de

EU-043. Bernd, DL8AAV, will be active as SD1B/6 from Orust Island between June 18-30th. Activity will be on, or near, the usual island and IOTA frequencies. QSL via DL8AAV, direct or by the Bureau.

EU-044/
EU-139. (Typo in OPDX.1065) Operators Waldi/SP7IDX and Mek/SP7VC will be active as LA/SP7IDX and LA/SP7VC from Mageroya Island (WW Locator KQ21VC) between July 20-29th (not June).

EU-056. (Correction) Operators Glenn/LA8XRA and Trond/LA9VDA will be active as LA6Q from Sand�y Island (not Little Sand�y Island) between August 13-17th. This will be a first activation of the Sand�y Lighthouse (WLOTA LH-2769). Activity will be on the 80-10 meters using CW, SSB and RTTY. QSL via LA9VDA, direct or by the Bureau (E-mail requests for Bureau cards can be sent to: la9vda [at] gmail dot com). Trond states, "Thanks to W5BXX Dave for sponsoring us."

EU-064. Operators Geoffrey/F4FVI, Johan/F4GTD, Phillipe/F5TRO, Nicolas/F8BDB and Chris/HB9ELV will be active as TM1NOI from Noirmoutier Island between August 12-14th. Activity will be around the IOTA frequencies (+/- QRM): 3755, 7055, 14260, 18128, 21260, 24950, 28460 and 29600 kHz. A special QSL card will be printed. QSL via HB9ELV direct, by the Bureau via F4FVI or by eQSL or LoTW. For more details, see QRZ.com.

EU-073. A group of Italian operators will be active as IJ7A from San Pietro Island (Grid JN80NK) between July 28-29th. Operators mentioned are Gianni/I7PHH, Davide/IK4DCT, Vin/IK7IMO, Art/IK7JWY, Piero/IK7VJX, Roby/IK7XIV, Bartolo/IW7ECA and Luigi/IZ7PDX. The team will be active during the RSGB IOTA Contest as a Multi-Op entry. QSL via IK7XIV, by the Bureau or direct. For more datails and updates, watch:
http://ij7a.jimdo.com
http://www.hamradioweb.org/forums/forumdisplay.php?fh

EU-087. Operaors Adde/SM0SHG and Olle/SA0BVX will active as SB3X from Bramon Island during the RSGB IOTA Contest (July 28-29th). Their equipment will be an Elecraft K3 with a 1 kW amp into a Spiderbeam (20/15/10m) and possibly a dipole for 40m. QSL via SM0SHG, direct or by the Bureau. All QSOs will be uploaded to LoTW.

EU-091. Operators Michele/IK7FPX, Gilberto/IK7LMX, Gianarlo/IK7QMJ, Cesare/IK7XNF, Paolo/IK7UXW, Angelo/IZ7CTE, Jean/IZ7SIA and Ivo/9A3A/I7 will be active as IQ7HK from Capezzone Island (Porto Cesaro-Lecce) during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Dxpedition/Mixed-Mode/Low-Power entry. QSL via IK7FPX (see details on QRZ.com).

EU-121. Members of the Shannonbasin Radio Club and Galway Radio Experimenters Club will be active as EJ3Z from Inis Boffin Island off the west coast of Galway during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Low-Power entry. Operators mentioned are Enda/EI2II, Niall/EI4CF, Anthony/EI6GGB, Fergus/ EI6IB, Brian/EI8IU, Tony/EI3HA, Patrick/EI9HX and possibly others. QSL via EI6GUB.

NA-092. Dave, AC0QG, will once again be active as AC0QG/5 from South Padre Island (USI TX007S, Cameron County, Texas) between June 18th July 13th. Activity will be on the HF bands, on or near the usual island and IOTA frequencies. QSL via his home callsign, direct or by LoTW or eQSL.

NA-139. Stan, N2US, will be active as N2US/3 from Assateague Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ 12H entry. QSL via his home callsign, by the LoTW, Bureau or direct.

NA-213. Operators Allan/KV4T, Steve/KI4GGJ, John/AJ4T, Gaston/W4CCF and Nicholas/KJ4AVG will be active as homecall/p from Dauphin Island (USI AL002S, Mobile county, Alabama) between June 22-25th. Look for KV4T/P on 17m CW and AJ4T/P on 20m SSB. The other operators will roam the bands. QSL via the operator's home callsign.

OC-177. Members of the ORARI DXpedition & Contest Team will be active as YE0M from Kaliage Besar Island, in the Seribu Islands IOTA group, from July 6-9th. Activity will be on 160-10 meters, including 6 meters, using CW, SSB and RTTY. QSL via YB1GJS. For more details, see: http://www.ye0m.com

OC-227. Operator YL Lyn, VK4SWE, a resident of Sweers Island, plans to once again be active during the RSGB IOTA Contest (July 28-29th). QSL via direct or eQSL.

K8CX'S 2012 DAYTON HAMVENTION PHOTO GALLERY. Tom's, K8CX, 2012 Dayton Photo Gallery is now up at: http://hamgallery.com/dayton2012/
This is Tom's 16th consecutive year for the gallery, and it contains 306 photos taken at Crowne Plaza at various events and hospitality suites.
You may submit your own Dayton photos to be included in this gallery. Please read the guidelines listed on the top of the gallery page. There is also an interesting Dayton Hamvention history link on top of this page.
ADDED NOTE: There is also a recap of this year's HamVention at:
http://hamgallery.com/gallery/D/hamvention2012.htm
If anyone has a forum review or interesting story, please submit it to K8CX <k8cx@hamgallery.com> to be included on this page.

KH8, AMERICAN SAMOA (Update). Members of Russian Robinson Club (RRC), Yuri/N3QQ and Dick/N7RO will be making a quick trip down to American Samoa between June 27th and July 3rd, and will possibly be active as KH8PPG or KH8RRC, depending on how fast the FCC acts on their vanity callsign application, from Pago Pago. Activity will be on 40-10 meters using CW, SSB and RTTY, with two stations on the air - one operating 100 watss and the other with 600 watts. Yuri tells OPDX that they "Plan to stay at hotel, near the beach, and have a RTTY station ready to go, all tested/packed." QSL via N7RO. While there, they will install a UHF repeater system for the StarKist tuna plant, and also talk with the U.S. Fish & Wildlife Service (FWS), as well as boat owners, about a potential expedition in the future to Rose Atoll (OC-190); possibly during this winter (no dates yet).

KP4, PUERTO RICO (Special Event). Dr. Jos� C Vic�ns, President of the Puerto Rico Amateur Radio League (PRARL), announced [edited], "On Sunday July 1st, 2012, the Puerto Rico Olympic Committee will be celebrating the Flag Bearing of the Puerto Rico Delegation to the Summer Olympic Games in London. This event marks the beginning of the transatlantic journey to represent Puerto Rico in this international event. The delegation will depart the Olympic Committee and will walk to the Governor's Mansion to receive the flag that will be used in the opening ceremony and remain hoisted in the Olympic Village throughout the Games. In celebration of such an important event, The Puerto Rico Amateur Radio League will be joining the Olympic Committee in this celebration by setting up a special event station from the Puerto Rico Olympic Committee headquarters. We will be using the special callsign "K4O" for this event. We would like to use our radiowaves to let the world know that the Puerto Rican delegation is ready for the games in London. Operation will be on June 30th (9:00am-5:00pm) and July 1st (9:00am-2:00pm) from the headquarters of the Puerto Rico Opympic Comitte in San Juan."

TEST CRUISE OF OH10X/MM ON BALTIC SEA. Kristina Cruises Ltd with Radio Arcala, OH8X, are in the process of testing whether a permanent amateur radio station will suit the maritime environment and serve DXers in their leisure time, whether cruising in the Mediterranean or off West Africa or just doing island-hopping in the Caribbean.
The objective for the first run is to look at potential interference issues both ways - from the amateur radio station to the ship's navigation system and from the ship's advanced PC networks to the reception of amateur

radio transmissions.
But while testing, with Martti, OH2BH, at the helm, another target is to contact all continents and achieve WAC to celebrate the occasion of signing a possible permanent agreement for the station to be available for guests with an amateur radio license.
The onboard station will be active at the peak propagation hours to various continents on 14267 kHz from June 20-24th, 2012, and the test cruise will take the ship to Estonia (ES), Gotland, Sweden (SM1), Aland Islands (OH0), and back to Finland.
The ship M/S Kristina Katarina is a 138m long vessel and has a cruising speed of 15 knots, with a maximum number of 450 guests and a crew of up to one-hundred. The ship is owned by a private Finnish company with a Finnish crew sailing under the Finnish flag. Two Finnair jetliners are backing the operations for change of passengers at a variety of ports along the way." For more details, see the following Web pages:
http://www.qrz.com/db/OH10X
http://www.kristinacruises.com/en/cruises/ms-kristina-katarina/introduction

P29, PAPUA NEW GUINEA (IOTA op). An international team will visit five islands belonging to Papua New Guinea between October 19th and November 4th. Operators mentioned are Derek/G3KHZ, Hans/SM6CVX, Hans-Peter/HB9BXE, Eddy/K5WQG, Axel/DL6KVA and Non-ham Stig Nyman. The team will use the boat "M/V Barbarian", and start their travels from Kokopo in New Britain on November 18th, sailing via Kavieng to Emirau. The islands scheduled by the full team will be:
October 20-24th - Callsign P29VCX; Emirau Island (OC-103) in the St. Matthias IOTA Group. QSL via SM6CVX.
October 27-31st - Callsign P29NI; Simberi Island (OC-099) in the Tabar IOTA Group. QSL via G3KHZ.
November 2-4th - Callsign TBA; Lihir Island (OC-069) in the Lihir IOTA Group. QSL Manager TBA.
The main team will fly home on November 6th. However, Hans/SM6CVX and Stig Nyman will continue to Buka on the "M/V Barbarian", and plan to activate the following:
November 6-9th - Callsign P29VCX; Buka Island (OC-135) in the Solomon Island IOTA Group. QSL via SM6CVX.
November 9-12th - Callsign P29VCX; Manu Island (OC-205) in the Admiralty Island IOTA Group. QSL via SM6CVX.

Activity will probably be 40-10 meters using mostly CW with some SSB just like last year's activity. They do have a Web page at:
http://www.p29ni.yolasite.com

P4, ARUBA. Herman, ON4QX, will be active as P4/ON4QX from Aruba between now (June 16th) and July 2nd. Activity will probably be on all bands, and mostly RTTY. QSL via ON4QX.

CHANGE in QSL ROUTE. Ralph, K2PF, informs, "I am no longer handling QSL cards for 4J9NM. QSL card request should now be sent direct to Denis, 4J9NM."

F8ATS/6W QSLS at FRIEDRICHSHAFEN. Tony, F8ATS, who was active as F8ATS/6W, will be attending the "HamRadio Messe" in Friedrichshafen and will have his QSL cards. Look for him at the CLIPPERTON DX CLUB/UFT stand on Saturday, June 23rd, from 1300-1400z. So, if you QSO'd him when being in Senegal, bring your QSL with details and you'll get your F8ATS/6W QSL card, from him. You can also write to Tony at <f8ats@yahoo.fr>, until June 21st, so you'll not have to wait for your card, in Fried.

SP9YFF DIPLOMAS. Members of the SP9YFF Team sent out the following [edited]: "Welcome radio Friends of Flora & Fauna -- Representatives of national WFF programs. We would like to ask you to post information about free-of-charge SRG SP9YFF diplomas at local portals and websites. These diplomas are assigned for hunters who managed to establish contact with SP9YFF expeditions. Further informations is available at: http://www.sp9yff.pl/dyplom/ff.php? "

QSL RECEIVED VIA LoTW: 2M0ONW, 4O3A, 4Z4DX, 5B4AIZ, 7O6T, 7Q7PRO, 9H1EJ, 9Q6AL, 9Z4AM, A92IO, A61BK, A65BR, CN8KD, CO2VE, CT1FIU, CT1GPQ, CU2KG, CX7TT, DF4WC, DU3/N0QM, EA6AZ, ER4DX, F8PDR, HC2/W7SE, HS0ZJU, JT1CO, KP2MM, LU2VH, LZ907SKB, MD0CCE, MU/PA2A, MW0ZZK, OJ0B, ON5UN, ON7CD, ON8RH, OZ9XU, PJ4C, PT5T, PT7ZT, PY0FM, PZ5P, RJ6J, RN3ZIC, RV3LO, RW6HX, RZ3FW, S59ABC, S79RR, SN2012WA, ST2AR, TA3AX, TF2LL, TF3Y, TK4LS, TK4LS, VK3EW, VK9XS, VP2MQR, VP2V/NY6X, VP5/KE1B, VY2SS, XE1L, XU7ACY, YJ0VK, YO6LV, YT2A, YV5JF, ZC4LI, ZL4PW, ZP6CW and ZQ2FK

QSLS RECEIVED VIA MAIL: 3C0E, 3C6A, 9M2ESM, 9M0L, A35YZ, AL1F, AT2DW, DJ6OI/p, E51BKV, EJ0PL, FK/F4BKV, FS/F8PDR, FW0NAR, FW0NAR/P, HG15IPA, HK0NA, SV2BOH, TZ6NU, V25DR, V37NS, V85SS, VP2ETE, VP2EST, VP5H, XT2BW, YC6ODD, ZA20QA and ZF2AM

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SILENT KEYS.....
* It was reported that Jean-Luc, F6BIV, became a Silent Key (SK). He was an avid digital DXer and DXpeditioner. He was also an active

member of the Clipperton DX Club (Medal of Merit) and the Provins ARC [F6KOP] (and KOP Team).

* Sayed, SU1SA, President of Egyptian Radio Amateurs Society (ERASD), became a Silent Key (SK) on June 13th.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above operators.

T30 & T32, WESTERN AND EASTERN KIRIBATI. Benaia, T32BN, who works for the Police Force of the Kiritimati Government, can also be active spo-radically as T30BN during job transfers to Tarawa, W. Kiribati. Bill, VK4FW, informs OPDX that he is just getting things set up and as time progresses Bill will assist him with antennas for various bands. As this was being written, there were no QSNs been reported yet. QSL both callsigns via VK4FW.

TC, TURKEY (LH Ops!). Members of the Special Wireless Activity Team (TCSWAT) and the Giresun Radio Amateurs and Nature Sports Club (GITRAD) will be activating some new lighthouses for the WEBLOTA. Between June 30th and July 1st, look for TC6BLH to be on the air from the Sinop Boztepe Lighthouse, and during the IOTA weekend (July 27-29th), look for the lighthouse on Kefken Island (AS-159) to be activated as TC2KLH. The TC2KLH team will probably a Multi-Op/Island entry in the contest. Detailed information about the WEBLOTA is available at:
http://www.tcswat.org/awards/WEBLOTA/index.html
Unfortunately, the joint activity from Giresun Island (AS-154) as TC0HA had to be cancelled as the necessary permission could not be obtained from the authorities. QSL via TCSWAT, see details on their Web site at:
http://www.tcswat.org

UR DX DIGI 2012 CONTEST. Victor, UT7FP, wants to remind everyone that the 2012 Ukrainian DX DIGI Contest will be held June 23-24th. Complete details can be found at: http://www.izmail-dx.com
--or--
http://ut7fp.kiev.ua

VP9, BERMUDA. Operators George/WB3IGR and XYL Katherine/WB3LTH will be active as homecall/VP9 between June 18-21st. Activity will be on 160-6 meters using SSB and the Digital modes. Operations will be mostly during their mornings and evenings. QSL via their home callsigns direct. No LoTW or eQSL.

W9DXCC CONVENTION (Correction/Update). Jim, N7US, from the Northern Illinois DX Association, informs: "I need to make a correction. The Friday night bar is a cash bar, not an open bar!. We are continuing to firm up the program and look forward to a great convention (even if everyone has to buy their own drinks!)."

XV, VIETNAM. Andy, P29CS, is currently working in Vietnam, and expects to be active as XV3C for the next few weeks during his spare time. Andy has with him an Icom 706 II DSP, a Spider Beam for 10m, G5RV and a 500 watt amp. QSL Via M0URX.

YASME FOUNDATION PRESS RELEASE [YASME AWARDS AND EXPANDED LIST OF ELIGIBLE CALL SIGNS]: "The Yasme Foundation has for many years offered two Yasme Awards, available at no cost to qualifying applicants. The first Yasme Award, in the form of a handsome plaque, is offered to those amateurs who submit proof of 30 QSOs with Yasme officials and DXpeditions that have at least one Yasme official as a participant. The second, the Yasme Supreme Award, is in the form of a representation of the YASME boat used by Danny Weil in his around-the-world DXpedition and is available to those who submit proof of 60 QSOs with Yasme officials and DXpeditions with a Yasme official as a participant. See <www.yasme.org>.
After a year-long evaluation of the rules for qualifying call signs, the Board of Directors is pleased to announce that the rules for qualifying call signs have been revised. As a result, many call signs have been added to the list. The revised list of call signs eligible for both awards is available at the Yasme Foundation website:
http://www.yasme.org/DXpeditions.html
The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing (long distance communication) and the introduction and promotion of Amateur Radio in underdeveloped countries. For additional information about The Yasme Foundation, visit our website at <www.yasme.org>.
Wayne A. Mills, N7NG, President
The Yasme Foundation

Board of Directors:
Wayne Mills, N7NG, Director and President
Fred Laun, K3ZO, Director and Vice-President
Rusty Epps, W6OAT, Director and Treasurer
Kip Edwards, W6SZN, Director and Secretary
Martti Laine, OH2BH, Director
Mac McHenry, W6BSY, Director
Ward Silver, N0AX, Director
Robert Vallio, W6RGG, Director"

YU, SERBIA (WFF Op!). Operators Milan/YU5CW, Miso/YU1GU, Miro/YT1UM and Mirko/YU3MMM will be active as homecall/p from the Special Nature Reserve "Obedska Bara" (YUFF-039) between June 23-24th. Activity will be on HF bands. QSL via the bureau.

http://www.eham.net/articles/28494

'HAM' Field Day -- The ARRL (American Radio Relay League) has a nationwide "Field Day" event each summer. This event consists of members of amateur radio groups taking their equipment to "the field" and exercising their capabilities. One such group of "hams" is the local 4x4 Ham group and it will be operating a station on the Rim. Non-radio folks are invited to attend and learn about amateur "ham" radio. Please join the 4x4 Ham group for ARRL Field Day June 22-24. The Field Day objective is to work as many stations as possible on any and all amateur bands (excluding the 60, 30, 17, and 12-meter bands) and to learn to operate in abnormal situations in less than optimal conditions.

//
Staying Connected:

Posted: 16 Jun 2012 05:17 PM PDT
http://www.eham.net/articles/28493

Ham radio operators plan for annual emergency training day: They provided support during Hurricane Isabel in 2003, to La Plata during its devastating 2002 tornado and to the Pentagon during the Sept. 11 terrorist attacks. They are amateur radio operators, and during emergency situations, they could end up being Calvert County's only source of communication with the rest of the world. That's all according to the word of Les Dickey of Prince Frederick, a member of the Calvert Amateur Radio Association, the oldest amateur radio club in the county, dating back to the 1950s, the group's website states. Dickey, other members of CARA, volunteers and officials from the Calvert area are gearing up for the annual CARA Field Day, when amateur radio operators try to make contact with other emergency communications participants throughout the U.S. and Canada for a 24-hour period.

//
Nutley Club Reactivates USS Ling's Radio Room in Hackensack:

Posted: 16 Jun 2012 05:16 PM PDT
http://www.eham.net/articles/28492

Brazil, Germany, Russia, France, Belgium and all around the world HAM radio enthusiasts contacted the Nutley Amateur Radio Society, who broadcast recently from the re-activated radio room of the USS Ling on the Hackensack River, a part of Museum Ships Weekend. The event is well-known in the HAM radio world and typically attracts enthusiasts from all over, said NARS president David Calo. The way is works is HAM radio operators contact the station and get special certificate cards for their participation. The NARS' six members - Kelly Palazzi, Tony Testa, Bob Portner, Pete Gloistein, Frank Levine and Calo - operating three radio stations from a Saturday afternoon through Sunday morning nonstop, two within the vessel and one outside. "It's a constant thing," with contacts coming in many at one time, Calo said. From there, the staff confirm their QSO, with conversations commonly held through Morse Code. The contact list included stations from the Ukraine, Spain, England, Scotland, Argentina, Bulgaria, Sweden and around America, contacting a total 564 stations.

An Old Form Of Talk Radio Is All In The 'Hamily':

Posted: 16 Jun 2012 05:13 PM PDT
http://www.eham.net/articles/28491

If amateur radio were to paraphrase Mark Twain, it'd be, "The reports of my death are greatly exaggerated." No, the evolution of cell phones hasn't killed off amateur radio. In fact, "hams" (amateur radio operators) have an advantage to cell phones. As teenager Matthew Warren (K5CLS) explained it, in places where cell phone reception is intermittent or almost non-existent (he wasn't referring to Rio Rancho's City Center area and Cleveland High School), amateur radio can be a godsend \& and sometimes, key to "God send help." Matthew's family consists of ardent ham radio operators -- and it's a four-generation deal, and probably destined to add a generation after he and his two sisters have grown up and have families of their own. Their mother, Suzanne (KF5JMH), said her father, Fred Lete, known to ham radio operators as KC5IPK, has been into amateur radio for decades, even to the extent to building a "repeater" on the crest of Sandia. "As long as you can see the (Sandia) crest, you've got a signal," says her husband, Richard (KF5JME), another ham. And Suzanne's stepmother (KD5VPR) is also a ham.

Massive Solar Flare In March Broke Sun Storm Records:

Posted: 16 Jun 2012 05:07 PM PDT
http://www.eham.net/articles/28490

A massive flare that exploded from the solar surface in March unleashed the highest-energy light ever seen during a sun eruption, scientists say. On March 7, the sun let loose a massive X5.4 solar flare during its biggest outburst in five years. NASA's Fermi Gamma-ray Space Telescope saw an unusually long-lasting pulse of gamma rays -- a form of light with even greater energies than X-rays -- produced by the flare. At the flare's peak, the gamma rays that were emitted from the sun were 2 billion times more energetic than visible light, making it a record-setting detection during or immediately after any previously seen solar flare, researchers said. In

fact, as the flare erupted, the sun briefly became the brightest object in the gamma-ray sky.

GB2RS NEWS

Sunday 17th June 2012

The news headlines:

Ofcom announces that a small block of 2m is required for the London 2012 Summer Olympic Games

New Interference Regulations announced to protect London 2012

German amateurs get 472-479kHz band

In the July RadCom it was announced that Ofcom had approached the RSGB to discuss temporary usage of a few channels on 2m to support the London 2012 Summer Olympic Games. Following negotiations with the RSGB to minimise the impact on amateurs, Ofcom has now announced that it will temporarily authorise a small block of 12.5kHz channels on that band. The frequencies are from 144.0125MHz to 144.1375MHz, but only for the period 27 July to 28 August 2012. The frequencies specifically exclude the CW calling frequency, 144.050MHz, and the Meteor Scatter calling frequency, 144.100MHz. Ofcom are also aware of the various contests on 4 and 7 August and will work with Game users to keep operations to a minimum on these dates. Usage of this spectrum by Games users will be in the vicinity of London Olympic venues, and will be limited to handhelds with a maximum output of 5 watts. Ofcom emphasises that use of Primary Amateur spectrum is only for the specified time period and does not constitute a change of usage. The full Ofcom statement can be found at www.rsgb.org/Olympics.

Ofcom has announced its decision to make the Wireless Telegraphy (Control of Interference from Apparatus) (the London Olympic Games and Paralympic Games) Regulations 2012. These Regulations will regulate the intensity of the electromagnetic energy at which electrical and electronic apparatus operates, such that it does not cause undue interference with wireless telegraphy apparatus used for public safety purposes, within a specified protection area, for the duration of the 2012 Olympic and Paralympic Games. They will come into force in July 2012, prior to the commencement of the Games. Copies of the Regulations will be available via www.legislation.gov.uk.

German amateurs with a Class A licence are now allowed to operate in the new 472-479kHz band. The power limit is 1W erp, with a maximum signal bandwidth of 800Hz.

Cyprus is going to hold the EU presidency, for the first time, for the six months from 1 July. To commemorate the occasion, a number of Cyprus Amateur Radio Society members have been granted the use of P3EU, which will only be valid for the six months until 31 December. There will be a 24 hour special event on 1 July. A special QSL card will be available. Operators will be active on the HF bands using SSB and CW for the 24 hour event and using all modes on the HF and VHF bands during the six months of P3EU.

The Worked All Britain group would like to thank all the clubs and individuals who have taken part in the Torch Relay so far. It runs until 27 July, so there's still plenty of time to work stations around the UK as the torch makes its way to London. Check out the WAB website for full details, www.worked-all-britain.co.uk. Today the Durham and District Amateur Radio Society will be operating GX4WAB to commemorate the Olympic Torch being in Durham in the NZ24 Square. Operation will be on all HF bands and 2 metres.

And now for the details of rallies and events for the coming week

The 25th Newbury Radio Rally and Boot Sale will be held at the Newbury Showground, next to junction 13 of the M4 today, 17 June. Doors open at 9am and admission is ?2. There will be trade stands, special interest groups and a demonstration marquee with display of amateur radio on air.

Hull & District Amateur Radio Society will be holding an open event on Sunday 24 June at the HADARS Club House, Walton Street Leisure Centre, Goathland Close, Walton Street, Hull. There will be a Bring and Buy followed by an auction at 1pm. Doors open for viewing at 10.30am. There will be a BBQ and refreshments available. Further details from Julian on 07901 230 012.

On Sunday 24 June the West Of England Radio Rally takes place at the Cheese & Grain, Bridge Street, Frome, Somerset BA11 1BE. There will be car parking, catering, disabled facilities, trade stands and an RSGB book stall. Contact Shaun, G8VPG, on 01225 873 098

Now for the news of special events

Welland Valley Amateur Radio Society will be putting GB0BON on air today, 17 June at Rupert's Viewpoint. It will be the 367th anniversary of the Battle of Naseby and the third anniversary of GB0BON.

Eddie, G0VVT will be operating from the Belleek Pottery Museum under the call of GB0BPM today, 17 June for Museums on the Air.

Reading and District Amateur Radio Club will be taking part in Museums on the Air today, 17 June from the Museum of Berkshire Aviation, Woodley using the callsign GB2MBA. Visitors are welcome.

Today, 17 June, sees the second and final day of IQ1SV, commemorating the torpedoing of SS Transylvania in 1917 near the isle of Bergeggi, Italy, with the loss of 407 lives. Operation is on 160, 80, 40, 20, 15 and 10m, with SSB, CW and PSK31. A commemorative QSL card is available.

Full details are on QRZ.com.

Also today, the Radio club of Binche will activate the Special Event Station ON44WAR from the historical place of Br�ly-de-Pesches in Belgium in order to commemorate the Belgian Resistance. Activity will be from 9am to 5pm local time. Full details are on their website, www.on7ry.be.

The Kent Weald Radio Club will be holding a field event at Headcorn Airfield, Kent, TN17 9HX, until 24 June. This activity will encompass the two Museums on the Air weekends. Using the callsign of GB1HA, the station will use HF, VHF & UHF bands. Visitors are welcome to call in to see the operation.

GB4H will be on the air from Coventry on 23 and 24 June. Run by the Coventry Amateur Radio Society, they plan to have HF and VHF stations.

On 23 and 24 June, Milton Keynes ARS will be running GB2AMT within Bletchley Park to recognise both the Centenary of the birth and the memory of Alan Turing, whose wartime work at the Bletchley Park is well known. The station will be working all HF bands.

North Wakefield Radio Club will be operating a Special Event Station at Holt Cross Station, Middleton, Leeds, to commemorate the 200th anniversary of steam festival at Middleton Light Railway. The station will be on the air from approximately 9am to 5pm over the weekend of 23 and 24 June. The expected callsign for the event is GB2MLR.

Huntingdonshire Amateur Radio Society will be operating GB2RRM for International Museums Weekend on 23 and 24 June from the Ramsey Rural Museum, Ramsey, Cambridgeshire.

And now the DX news compiled from 425 DX News and other sources

Guernsey may not be not a particularly rare DX entity, but an unusual prefix will soon be visiting, in the form of GP3ZME/P. Telford & District ARS are visiting the island from 22-27 June, operating on all HF, VHF and microwave bands up to 24GHz. They will be active on most modes including data, PSK etc. More details are on QRZ.com.

Taka, JA8COE, will be active as homecall/8 from Yagishiri Island, AS-147, between June 16 and 19. Activity will be on 40, 20, 17 and 15 metres, using SSB, PSK and RTTY. QSL via his home callsign, direct or via the Bureau.

Operators Waldi/SP7IDX and Mek/SP7VC will be active as LA/SP7IDX and LA/SP7VC from Mageroya Island, EU-044, WW Locator KQ21VC, between June 20 and 29. They plan to have 2 stations on the air - one on the HF bands and the second on 6m. Operations will be on 80-6m will use SSB and RTTY. They will also be in the RSGB IOTA Contest on July 28 and 29. They will be using Win-Test to send QSOs to Clublog in real time. During their travel to Mageroya Island, there is a possibility to activate Seskaro Island, EU-139, WW Locator KP15VR, in the evening or night of June 19 and the morning of the 20th. Callsigns there will be SM/SP7VC and

SM/SP7IDX. QSL via their home callsigns. The log will be uploaded in LoTW.

Dandy, K6ZRH/DU1IMA, will be active as K6ZRH/DU1 from Palawan Island, OC-128, WLOTA 1612, between June 10th-30th. Activity will be on 40, 20 and 15 metres, SSB. QSL via his home callsign, direct only.

Now the contest news

The 50MHz Trophy finishes today, 17 June, at 1400UTC. Using all modes the exchanges is signal report, serial number and locator.

The IRTS 80 Counties Contest takes place today, 17 June, from 1400 to 1700UTC. Using SSB and CW, the exchange is signal report and serial number. EI and GI stations also give their county.

The Worked All Britain 50MHz phone contest takes place today, Sunday 17 June, from 0900 to 1500UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website, www.worked-all-Britain.co.uk, or from the Contest Manager, G3XKT, by email to aebbooks@ntlworld.com.

On 19 June the 1.3GHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes, the exchange is signal report serial number and locator.

The SSB leg of the 80m club championships takes place on 21 June from 1900 to 2030UTC. The exchange is signal report and serial number.

The 50MHz CW Contest is a new event to the calendar. It runs from 0900 to 1200UTC on the morning of Sunday 24 June and the exchange is signal report, serial number and locator.

In the afternoon of the 24th the 4th 70MHz Cumulative takes place from 1400 to 1600UTC. The exchange is also signal report, serial number and locator.

The Marconi Memorial Contest runs for 24 hours on the 23rd-24th, from 1400 to 1400UTC. There are single-op and multi-op categories in this CW event, in which the maximum permitted power is 100 watts. There is also a 5 watt QRP category. Using the 1.8 to 28MHz contest bands. the exchange is signal report and serial number.

Finally, the UK?G Cumulative Contest takes place on Sunday 24th. Activity will be on 5.7, 10 and 24GHz from 1000 to 1600UTC. Using all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 8th to the 14th of June, compiled by Neil Clarke, G0CAS on Friday 15th of June.

Thanks to the STEREO Behind spacecraft, which allows us to see sunspot groups for more than a week before they rotate into Earth view, we had advance warning of a solar flare producing region. This group rotated into view on the 9th and produced two M class flares that day. Since

then further M class flares have taken place on the 10th, 13th and the 14th. The remaining days' solar activity was low, with only C class solar flares occurring. Solar flux levels increased from 124 units on the 8th to 149 by the 14th. The average was 135 units. The 90 day solar flux average on the 14th was 118 units, that's one unit up on last week. X-ray flux levels averaged B6.4 units and increased from B4.7 units on the 8th to B9.7 by the 14th. Geomagnetic activity started at quiet levels but, on the 11th, a glancing blow from a coronal mass ejection increased activity. An Ap index of 16 and 14 units were recorded on the 11th and the 12th respectively. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 630 kilometres per second on the 8th to 350 by the 14th. Particle densities were low, except for a brief increase to 14 particles per cubic centimetre on the 13th and 12 on the 14th. Bz varied between minus 10 and plus 5 nanoTeslas on the 11th and the 12th and between minus and plus 3 nanoTeslas on the quiet days. Sporadic-E occurred daily on 28, 50 and 70MHz but openings on 144MHz were few and brief and only enjoyed by parts of the UK.

And finally the solar forecast. This week we still have the active side of the Sun looking our way. The large active region looks set to continue producing large solar flares on some days. Solar flux levels may peak today or tomorrow at around 145 units, levels are then expected to decline gradually. For the next couple of days, geomagnetic activity is expected to be at unsettled levels due to a recurring coronal hole. However, even though activity should be quiet for the remainder of the period, there is the possibility that a coronal mass ejection could take place as a result of a large solar flare from the large active region. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the south. Darkness hour lows could be around 15MHz later in the week, but could be several MHz lower at first due to the coronal hole disturbance. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. Mid morning will be the best time to try this path. However, MUFs via the long path will be slightly higher and the best time to try this will be around midday. Sporadic-E is expected to take place most days with opening up to 144MHz possible in any stronger openings that take place.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Lincoln Short-Wave Club is taking part in Museums on the Air at East Kirkby from 10.00 on Sunday 17 June. There's a committee meeting at the shack on Monday, and on Tuesday the shack sees participation in the 1.3GHz UK AC from 20.00. A formal meeting takes place at the BSA Club at 20.15 on Wednesday. Thursday sees the club simplex net on 145.375MHz from 8pm. On Saturday 23 June there's the surgery in the shack from 9am, plus the weekend Museums on the Air event from 10am at East Kirkby and the 70MHz Cumulative at the shack from 14.00-16.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is visiting the Newbury Radio Rally on Sunday 17 June, then spending Monday getting ready for VHF NFD. Thursday see training classes with Dave Murphy, G8OWL, and on Friday there's shack and aerial work. Contact Don, on 01214 581 603.

Telford & District Amateur Radio Society is taking part in the 6m Trophy on the Long Mynd on Sunday 17 June, with G0UFE in charge. On Wednesday they are planning for NFD and making final arrangements for the week-long Guernsey DXpedition, which leaves on Friday. Contact Mike, G3JKX, on 01952 299 677.

Friskney and East Lincolnshire Communications Club has a club net on Monday from 7pm, on 144.165 USB, vertical polarization. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. On Friday there is an HF club net on 3.748MHz from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

Welland Valley Amateur Radio Society is visiting the Kettering club on Monday, then taking part in the 80m SSB Club Contest on Thursday. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

Wythall Radio Club is holding an Intermediate exam on Monday, then on Tuesday there's a free 'n' easy evening. Details from Chris, G0EYO, on 07710 412 819.

Coventry Amateur Radio Society is having a video night on Friday 22 June. On Saturday 23 June they commence their Museums on the Air weekend event, operating GB4H at The Herbert Art Gallery & Museum, Coventry. Contact John, G8SEQ, on 07958 777 363.

Now we return to the traditional listing in date order. On Monday 18 June Aldridge & Barr Beacon Amateur Radio Club is having a talk on long wire & vertical antennas. Contact Albert, G0KFS, on 01922 614 169.

On Monday 18 June Gloucester Amateur Radio & Electronics Society is having an informal and newcomers' night. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Tuesday 19 June Derby & District Amateur Radio Society is considering technical topics. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 19 June Loughborough & District Amateur Radio Club is having a talk on 70cm TV by Albert, G1KSC. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 19 June Worcester Radio Amateurs Association is holding a club net on 145.350MHz FM from 7.30pm. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Wednesday 20 June Midland Amateur Radio Society is planning for Field Day and holding training classes. Details from Norman, G8BHE, on 07808 078 003.

On Thursday 21 June Cheltenham Amateur Radio Association is having a talk on ATUs by Mike, G3TSO. Contact Derek Thom, G3NKS, on 01242 241 099.

NEWS FOR THE NORTH OF ENGLAND

We start with advance notice that Oldham Amateur Radio Club will be holding an ARDF event on 30 June at Strinesdale Moor. Registration will be from 10am. For further information please contact Phil Ellis, M0GIE, by email to philipus@ntlworld.com, or visit the club web site, www.oarc.org.uk.

Now for clubs that have several events this week. Sheffield Amateur Radio Club is holding a social evening and, if weather permits, a barbecue, on Monday 18 June. On Thursday they are taking part in the RSGB 80m SSB Club Contest from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

Wakefield & District Radio Society is on the air and holding a committee meeting on Thursday. On Saturday 23 June the Intermediate and Advanced courses continue from 13.30. Details from Ken, G8FSO, by email to g8fso@wdrs.org.uk.

On 22 June East Cleveland Amateur Radio Club is on the air on Friday. On Saturday 23 June they commence their International Museums Weekend event, operating GB0ZLB from The Zetland Lifeboat Museum, The Esplanade, Redcar, TS10 3AH. For more information contact Alistair, G4OLK, on 01642 475 671.

Now we return to the traditional listing in date order. On Monday 18 June Angel of the North Amateur Radio Club is having a talk on RAYNET by Geoff Darby. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Tuesday 19 June Halifax & District Amateur Radio Society is holding a field evening on Norland Moor. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday 19 June Morecambe Bay Amateur Radio Society is having a talk on antennas for beginners by Ken Hough. Contact Sheila, on 07867 516 836.

On Tuesday 19 June Otley Amateur Radio Society is having a Morse class by G0WNT. Contact Paul, 2E0PAK, on 07768 996 370.

On Tuesday 19 June Stockport Radio Society is having a talk on LC networks and antenna matching by Bernard, G3SHF. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 20 June Denby Dale Radio Club is having a presentation on Kirchhoff's rules by Ian Thompson. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 20 June Hornsea Amateur Radio Club is having a talk on The U2 Incident by G0WHO. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 21 June Hornsea Amateur Radio Club is taking part in the 80m SSB Club Contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 21 June Ripon & District Amateur Radio Society is on the air. Details from Rob Hall, M0RBY, on 07876 085 631.

On Thursday 21 June South Manchester Radio and Computer Club is holding a SSB BBQ. Details from Ron, G3SVW, on 01619 693 999.

On Friday 22 June Tynemouth Amateur Radio Club is having a talk about the Old Days by M0WJW. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

We start with clubs that have several events this week. On Wednesday Glenrothes & DRC is preparing for its forthcoming outdoor activities, then on Saturday 23 June they commence their weekend event for Museums on the Air from Scotland's Secret Bunker. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

Aberdeen Amateur Radio Society is renovating the club's antenna on Thursday. Friday sees the start of the Museums Weekend event at the Bennachie Centre. Contact Fred Gordon, MM0ODL, on 01975 651 365.

Now we return to the traditional listing in date order. On Tuesday 19 June Livingston & District Amateur Radio Society is holding Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 20 June Cockenzie & Port Seton Amateur Radio Club is having an HF activity night from 19:00 to 22:00. More information from Bob, GM4UYZ, on 01875 811 723, www.cpsarc.com

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with advance notice that Crystal Palace Radio & Electronics Club will commence its next Foundation training course on Saturday 21 August. It will continue for the next three Saturdays, followed by the Foundation exam on the evening of Friday 10 August. The venue for the training course is the Parish Rooms, St Johns Church, Sylvan Road, Upper Norwood, SE19 2RX. Details are on the web at www.g3oou.co.uk.

And now for clubs that have several events this week. Bromley & District Amateur Radio Society is holding an Advanced tutorial on Sunday 17 June. Tuesday sees a DF hunt in the local area by Richard, G8ITB. Details from Andy, G4WGZ, on 01689 878 089.

Radio Society of Harrow is at Old Redding on Sunday 17 June calling CQ GX3EFX/P. On Friday, RSGB Regional Manager Alison Johnson, G8ROG and RSGB Board member Don Beattie, G3BJ are visiting. The venue for this event is Harrow Arts Centre, Greenhill Room, 171 Uxbridge Road, Hatch End HA5 4EA, and all are welcome to attend. More information from Linda, G7RJL, on 02083 868 586.

East Kent Radio Society is considering computers and amateur radio on Monday, then on Sunday 24 June it's the Stelling Minnis meeting and picnic. Details from Karl Davies, M1DFM, on 01227 710 120.

Farnborough & District Radio Society is running a 80m CW net 3.570MHz from 1pm on Monday, followed by a 2m net on 144.675MHz at 8pm. On Wednesday there's a slow CW 80m net on 3.570MHz, then on Friday it's the Top Band net on 1.995MHz from 8pm. Contact Neville, G3SPD, on 01252 404 816.

Chelmsford Amateur Radio Society is having a club net from 8.30pm on Tuesday. On Saturday 23 June they are operating GB100MWT from Sandford Mill to commemorate the opening of New Street and the International Wireless Conference visit 100 years ago. Marconi & RAF personnel are particularly invited. Contact Martyn, G1EFL, on 01245 469 008.

Norfolk Amateur Radio Club is preparing for Barford Rally on Wednesday, then taking part in the RSGB 80m SSB Club Championship on Thursday. Details from Chris Danby, G0DWV, on 01603 898 678.

Worthing & District Amateur Radio Club is holding a discussion evening on Wednesday, then taking part in the RSGB 80m SSB Club Championship on Thursday. Contact John, G8FMJ, on 01273 593 232.

Now we return to the traditional listing in date order. On Sunday 17 June Newbury & District Amateur Radio Society is running the Newbury Radio Rally. Contact Rob, G4LMW, on 01635 862 737.

On Monday 18 June Braintree & District Amateur Radio Society is having a talk on Ham Radio Deluxe by Richard, 2E0XRS. For more information contact John, M5AJB, on 01787 460 947.

On Monday 18 June Burnham Beeches Radio Club is having a talk by Roy, G8CKN, entitled ``Antennas don't have gain''. Contact Dave, G4XDU, on 01628 625 720.

On Tuesday 19 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 19 June Verulam Amateur Radio Club is having a social evening with the GB3VH repeater group from 7.30pm at the Rose and Crown Pub, Sandridge. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday 20 June Chesham & District Amateur Radio Society is holding a members' forum. More details from Terry, G0VFW, on 01442 831 491.

On Thursday 21 June Colchester Radio Amateurs are holding a wire antenna experimental evening with Jeff, G7TAT. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday 21 June Cray Valley Radio Society is holding its annual DF hunt around Eltham, South East London. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 21 June Horndean & District Amateur Radio Club is having a presentation on Yaesu UK by their amateur radio sales person Andre Ravary. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 21 June Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 21 June Shefford & District Amateur Radio Society is looking at the club project with Richard, G3NII. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday 21 June Sutton & Cheam Radio Society is having a talk by Peter Woolhouse, G7PWV, on the RNLI and Thames Lifeboat Operations. Details from Darren, M0PRV, on 07525 753 702.

On Thursday 21 June Vange ARS is having a talk on the T32C DXpedition to Kiritimati,�Christmas Island, by Fred Curtis, G3SVK. Contact Steve, G0KVZ, on 01268 552 606.

On Friday 22 June Cambridge & District Amateur Radio Club is having a fox hunt trial evening. Contact Ron, G3KBR, on 01223 501 712.

On Friday 22 June Mid-Sussex Amateur Radio Society is having a windmills evening at Jack and Jill Windmill. Cyprus Hall is closed. Details from Rob, 2E0RJA, on 01444 232 129.

On Sunday 24 June Loughton & Epping Forest Amateur Radio Society is operating GB2AVF at Abridge Village Fete. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Sunday 24 June South Essex Amateur Radio Society is operating GB2BM at Bay Museum for Museums on the Air. Details from Dave, G4UVJ, on 01268 697 978.

On Sunday 24 June Waterlooville Amateur Radio Club is holding a fundraising night. Contact Rich, G4IBW, on�0772 225 002.

NEWS FOR THE SOUTH WEST

We start with clubs that have several events this week. Appledore & District Amateur Radio Club is having a practical demo of the club's new radio equipment on Monday. On Sunday 24 June, club members are Abbotsham Fete Transmitting Station. Contact Brian Jewell, M0BRB, on 01237 473 251

for more information.

Exeter Amateur Radio Society has its 80m net on Monday at 19.45, the 2m net on Tuesday at 19.45 and a 4m net on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

Trowbridge & District Amateur Radio Club is having a natter night and holding a committee meeting on Wednesday. On Sunday 24 June they have a club table at the West Rally, Cheese and Grain, Frome. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

South Bristol Amateur Radio Club holds its summer BBQ on Thursday. Saturday 23 June is the start of the club's International Museums on the Air weekend, and on Sunday 24 June they're at the West of England Radio Rally. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Now we return to the traditional listing in date order. On Monday 18 June Weston Super Mare Radio Society is holding its 2m DF contest. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 20 June Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 21 June Cornish Radio Amateur Club is having a workshop evening. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 21 June Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

NEWS FOR WALES

On Sunday 17 June Carmarthan Amateur Radio Society is holding an open night. Contact Lloyd, 2W0LLT, on 01239 711 297.

On Monday 18 June Dragon Amateur Radio Club is watching a video on QRP. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 19 June Wrexham Amateur Radio Society is on the air on 20m and 40m. Details from Carl Morris, MW0TBB, by email to tydraig@wrexham-ars.co.uk.

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
11 - 17 June 2012

Solar activity was at low to moderate levels. Low levels were
observed on 11 - 12 June due to numerous weak C-class flares from
Regions 1499 (N16, L=184, class/area Cao/060 on 09 June), 1504 (S17,
L=087, class/area Ekc/750 on 16 June), 1506 (N11, L=076, class/area
Hax/100 on 12 June) and 1507 (S26, L=111, class/area Dso/130 on 16
June). Activity increased to moderate levels on 13 and 14 June due
to M-class flaring from Region 1504. At 13/1317 UTC, a long duration
M1/1n was observed with associated Type IV and 10 cm (260 sfu) radio
signatures. On 14 June, another long duration M1/1n was observed at
14/1435 UTC with associated Type IV and 10 cm (1400 sfu) radio
signatures. CME signatures were detected with both of the events.
Solar activity decayed to low levels on 15 - 17 June with numerous
C3 or smaller x-ray events observed from Region 1504.

A greater than 10 MeV proton event at geosynchronous orbit was
observed during the period. The event began at 16/1955 UTC, reached
a maximum of 14 pfu at 16/2020 UTC and ended at 16/2255 UTC. This
weak event was most likely associated with the 14 June M1 x-ray
flare.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels on 11 June and moderate levels on 12 - 17 June.

Geomagnetic field activity ranged from quiet to major storm levels.
Quiet to unsettled levels were prevalent from 11 June through late
on 16 June with a brief period of minor storm conditions late on 11
June to early on 12 June due to a sustained period of southward
interplanetary magnetic field (IMF) Bz. At 16/2022 UTC, field
conditions increased to active levels and further increased to minor
to major storm conditions through 17/1500 UTC and decayed to active
levels through the remainder of the period. This increase in
activity was a result of combined effects from the 13 and 14 June
CMEs. On 16 June, three separate sudden impulses were observed at
```

the Boulder magnetometer; 16/0957 UTC (28 nT), 16/2019 UTC (28 nT) and 16/2115 UTC (25 nT). ACE data indicated three shock arrivals at 16/0900 UTC, 16/1931 UTC and 16/2031 UTC. Solar wind speed increased from about 350 km/s to 425 km/s with the first shock, and further increased to around 560 km/s with the second and third shocks. With each successive shock, total IMF field strength reached 10 nT, 17 nT and 34 nT respectively. A magnetopause crossing was also observed by the GOES-15 satellite from around 16/2200 UTC - 16/2300 UTC.

Forecast of Solar and Geomagnetic Activity
18 June - 14 July 2012

Solar activity is expected to be at low to moderate levels through 21 June when Region 1504 will rotate around the west limb. Mostly low levels are expected through 25 June. Low to moderate levels are possible from 26 June - 14 July due to the return of old Regions 1494 (S16, L=198) and 1496 (N17, L=204) on 26 June and the return of old Region 1504 (S17, L=087) on 04 July.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels on 18 - 25 June, normal to moderate levels on 26 June - 03 July and return to high levels on 04 - 14 July.

Geomagnetic field activity is expected to be at unsettled to active levels with isolated minor storm periods on 18 June due to continued effects from the 13 and 14 June CMEs. Quiet to unsettled levels with isolated active periods are possible on 19 - 20 June due to effects from a recurrent coronal hole high speed stream (CH HSS). Mostly quiet conditions are expected from 21 - 26 June. A return to quiet to unsettled levels with isolated active periods are possible on 27 - 30 June with isolated minor storm periods on 01 - 05 July due to a pair of recurrent CH HSS. Mostly quiet conditions are expected on 10 - 14 July.

HAMRADIONOW.tv

Episode 13: Field Day - Get Up and GOTA

Now this is a talk show... 90 minutes of Jeff & Gary on the studio couch,

talking about lots of stuff, but mostly how they operated a unique GOTA station at

last year's Field Day, and playing lots of video of cute kids operating GOTA.

And, oh yeah, we're now an 'Award Winning' show (details at the end of the podcast)

FYI, PRC officials flat turned down a request to import these 4 radios for short-term use. No explanation given.

Thanks.

Officials of totalitarian police states don't have to give explanations.

They were actually made on the 11th of June, and put to parliament on
the 15th, so they were more than an intention at the publication date of
the news bulletin.

> Paralympic Games) Regulations 2012. These Regulations will regulate the
> intensity of the electromagnetic energy at which electrical and
> electronic apparatus operates, such that it does not cause undue
> interference with wireless telegraphy apparatus used for public safety

What they actually do is give Ofcom the power to tell individual
operators of equipment to reduce their emissions or face criminal
prosecution. My impression is that the key point is that equipment that
meets the CE requirements may still actually cause interference, and
have to be controlled.

> purposes, within a specified protection area, for the duration of the

'Ham' Radio Will Show Off Emergency Capabilities, June 23-24:

Posted: 17 Jun 2012 05:38 PM PDT
http://www.eham.net/articles/28496

TIFTON -- Despite the Internet, cell phones, email and modern communications, every year whole regions find themselves in the dark. Tornadoes, fires, storms, ice and even the occasional cutting of fiberoptic cables leave people without the means to communicate. In these cases, the one consistent service that has never failed has been amateur radio. These radio operators, often called "hams" provide backup communications for everything from the American Red Cross to FEMA and even for the International Space Station. Tifton's "hams" will join with thousands of other amateur radio operators showing their emergency capabilities June 23-24. Over the past year, the news has been full of reports of ham radio operators providing critical communications during unexpected emergencies in towns across America including the California wildfires, winter storms, tornadoes and other events world-wide. When trouble is brewing, amateur radio's people are often the first to provide rescuers with critical information and communications. On the weekend of June 23-24, the public will have a chance to meet and talk with Coastal Plains Amateur Radio Club members, the local ham radio operators, and see for themselves what the Amateur Radio Service is about as hams across the USA will be holding public demonstrations of emergency communications abilities.

RAC Bulletin 2012-034E - British Columbia-Yukon Section Manager
Election Results
2012-06-18

**

Congratulations are extended to Paul Giffin, VA7MPG who was recently
elected Section Manager for the balance of his appointed term that
ends October 30, 2013. He ran unopposed eliminating the need for a
balloted election.

Paul, I join with all British Columbia/YT members in wishing you
congratulations.

Probably the easiest way of getting radios for use in Tibet is to source
them locally, and get them shipped to a convenient collection point.
China and Hong Kong are certainly not short of manufacturers!

Even for an American in the UK, that would be the best approach, as
radios not specifically approved for PMR 446 are not covered by the
class licence.

For China, it will be part a question of protecting their own industry
and partly a national security issue. Given its history, national
security is likely to be a particularly important issue in Tibet.

I note that the OP's intended radio (Motorola Spirit UHF) is 1 channel.
2W. The Chinese public service radios are only 0.5W (and with a tiddly
antenna), so even if these are readily available, they might not be
quite suitable.

>For China, it will be part a question of protecting their own industry
>and partly a national security issue.

Importing two-way radios into China would probably not be threatening
their own industry. They probably originated there in the first place!

> Given its history, national security is likely to be a particularly
>important issue in Tibet.

It says in
http://tel_archives.ofca.gov.hk/en/ad-comm/tsac/ns-paper/nsp2002p3.pdf

"In December 2001, the Ministry of Information Industry of China
announced that short-range portable radio transceivers, or
"walkie-talkies",
operating in the band 409.7500 – 409.9875 MHz with transmitter power not
exceeding 0.5W were exempted from licensing."

Presumably these are legal to use throughout all of China - but you
never know. In certain countries, being legal does not guarantee you
won't have problems. Only a couple of weeks ago, a German radio amateur,
operating absolutely 100% legally when on holiday in Greece, was
arrested and hauled before the courts. I believe he is back home, but
may need to return for a full trial.

Ham Radio Deluxe and Radio Operations Center Software

Posted: 16 Jun 2012 05:22 AM PDT
http://forums.qrz.com/showthread.php?350385-Ham-Radio-Deluxe-and-Radio-Operations-Center-Software&goto=newpost

Tampa FL, St. Paul MN☐ June 16, 2012

HRD Software, LLC and W4PC software today announced a bundle package for Ham Radio Deluxe and Radio Operations Center Software for Timewave/AEA and Kantronics TNCs.

Many hams want to use the ARQ modes in Pactor, AMTOR and GTOR that are supported in hardware TNCs but not in soundcard software modes. Now W4PC Software☐s Radio Operations Center 3.99 for the TNCs synchronizes with the HRD DM-780 soundcard mode program so either ROC or DM-780 can key the radio through the TNC. If the TNC has a built-in soundcard (PK-232SC) or soundcard interface (PK-232PSK, PK-900PSK and DSP-232+), no radio-TNC-computer interconnection changes are necessary to switch between soundcard modes and the TNC modes.

☐The old meets the new☐, said Rick Ruhl, W4PC, owner of W4PC software and an owner of HRD, ☐ W4PC Software, HRD and Timewave programmers and

engineers have combined to make TNCs and soundcard mode software compatible for the first time.

Randy Gawtry, owner of Timewave Technology and also an owner of HRD said, ☐Timewave has added a USB soundcard and rig control board to the legendary PK-232 to give the new PK-232SC a single USB cable connection to the computer from the TNC. Even with rig control, precision-timed hardware CW and FSK, there are only four connections from the TNC to the radio. Using only AFSK modes requires just two connections☐

The bundle price for ROC and HRD is $99.95.

HRD 5.2X is free, but will include a no charge upgrade to version 6.0 with the purchase of 5.X support for $59.95. The retail version of HRD will be $79.95 when it is released in August 2012. Those that have purchased or will purchase the 5.X support will still get one year of support from the date of the 6.0 release.

You can purchase and download the Ham Radio Deluxe/ROC bundle at http://www.ham-radio-deluxe.com.

Newsdesk@rsgb.org.uk wrote:

: In the July RadCom it was announced that Ofcom had approached the RSGB
: to discuss temporary usage of a few channels on 2m to support the London
: 2012 Summer Olympic Games. Following negotiations with the RSGB to
: minimise the impact on amateurs, Ofcom has now announced that it will
: temporarily authorise a small block of 12.5kHz channels on that band.
: The frequencies are from 144.0125MHz to 144.1375MHz, but only for the
: period 27 July to 28 August 2012. The frequencies specifically exclude
: the CW calling frequency, 144.050MHz, and the Meteor Scatter calling
: frequency, 144.100MHz. Ofcom are also aware of the various contests on 4
: and 7 August and will work with Game users to keep operations to a
: minimum on these dates. Usage of this spectrum by Games users will be in
: the vicinity of London Olympic venues, and will be limited to handhelds
: with a maximum output of 5 watts. Ofcom emphasises that use of Primary
: Amateur spectrum is only for the specified time period and does not
: constitute a change of usage. The full Ofcom statement can be found at
: www.rsgb.org/Olympics.

So, I've seen no comments on the topic of just what this means in reality.
So, Duffcom have approved the usage of these 2m "channels" for Olympic
communications purposes, however, presumably on a secondary basis or,
at best, co-primary. Nowhere have they or anyone else indicated that
the current primary users - i.e. Us - are prohibited from using the
frequencies (or are they channels?) for our own legitimate purposes at
the same time.

Given that they are smack band in the primary EME portion of the band,
I would imaging that their special awareness to contest needs are
moot.

Or have I become too assimilated into the US culture (if there is such
a thing!) where the ARRL would actually instigate legal proceedings
against the FCC should they try such a stunt?

Do you really expect the RSGB to bite the hand that feeds it?

Unless Ofcom has failed to update their information, it also has to have things like a permanently attached antenna, absolute power limits, etc., basically to make it non-trivial to modify outside of the specification. As pointed out elsewhere, the proposed equipment doesn't comply with those conditions, so wouldn't have been legal for PMR 446 use.

I used approved loosely, to mean designed to meet the conditions of the licence exemption.

Ham Radio Operators Showcase Emergency Communications Skill This Weekend:

Posted: 18 Jun 2012 07:11 PM PDT
http://www.eham.net/articles/28502

Ham radio operators from around Jacksonville will showcase the emergency benefits of their wireless communications gear from 2 p.m. Saturday to 2 p.m. Sunday at the Marshside Campus of Neptune Beach Baptist Church, 13723 Atlantic Blvd. The annual "Field Day" event ends the Amateur Radio Week" sponsored by the American Radio Relay League, and is open to the public. Using only emergency power supplies, ham radio operators nationwide will construct emergency stations in parks, shopping malls, schools and backyards around the country. Their slogan, "When All Else Fails, Ham Radio Works." Amateur, or ham radio, can communicate around the world when a hurricane or natural disaster leaves people without the internet, cell phones, email and other modern communications. Duval County and the Beaches area's "hams" will join with thousands of other amateur radio operators to showcase their emergency capabilities this weekend.

//
Ham Radio All Talk in Times of Crisis:

Posted: 18 Jun 2012 07:06 PM PDT
http://www.eham.net/articles/28501

TORONTO, June 14, 2012 -- /CNW/ - Despite the prevalence of the Internet, Amateur Radio has never failed as a lifeline during times of crisis. To demonstrate this capability, the Central Toronto Amateur Radio Club (aka CenTor) is conducting an Amateur Radio emergency preparedness exercise on June 23 - 24, 2012, which will be open to the public. often called "ham radio", Amateur Radio is a non-commercial radio service, which allows licensed operators to use various types of radio communications equipment to communicate with one another, both locally and around the globe, for both public service and recreational purposes. Amateur Radio operators, often referred to as "hams", are federally licensed by Industry Canada and are allowed to use specially allocated radio frequencies to carry out their operations. Hams come from all walks of life and are located all over the world. "Amateur Radio plays a very important role in the communications capabilities of our modern society", said Peter Dale, President, CenTor, and licensed Amateur Radio operator with the call sign of VE3EYI. "Not only does it facilitate communications during times of emergency or natural disaster, it is also a lot of fun and a great way to learn about

electronics and wireless communications, especially for young people", Dale added.

Workshop Addresses Radio's Future:

Posted: 18 Jun 2012 07:04 PM PDT
http://www.eham.net/articles/28500

For Ken Zakreski, the future is mobile. Zakreski is the president of Gabriola Radio Society, based in Gabriola Island, B.C. He spoke recently afternoon at a workshop on the future of radio technology at Queen's University. The community radio station on Gabriola Island has low levels of terrain and reach. Zakreski has been exploring new technologies that may help widen its range. A method using high-speed multimedia may help. High speed multimedia radio allows wireless data to be sent over amateur radio frequencies through the use of a router. "It's based on a very simple fluke if you will," he said, "and that's the fact that ham (amateur) radio and Wi-Fi channels overlap." According to Zakreski, this technology is already being used by disaster relief organizations.

NEW HF OPERATORS - THINGS TO DO

Field Days are like county fairs - there is often a little of
everything ham radio and just about always something good to eat! Some
are more of a rodeo and some are more like a picnic but you'll have

fun, no matter what. Take the opportunity to invite a friend to come along and share your hobby, too!

BULLETINS

VE3 stations in this year's Field Day should ALL report "Ontario" as their section (ON or VE3 on CW and digital) The four new Ontario sections DO NOT go into effect until September 1, 2012. The first event that will use the new sections is the 2013 ARRL CW Sweepstakes.

BUSTED QSOS

Minor discrepancies aside, nothing was seriously broken in the last issue.

CONTEST SUMMARY

Complete information <file:///C:/Users/Ward%20Silver/Documents/Editing%20and%20Articles/Contest%20Update/Contest%20Update%20120620.docx#Contests> for all contests follows the Conversation <file:///C:/Users/Ward%20Silver/Documents/Editing%20and%20Articles/Contest%20Update/Contest%20Update%20120620.docx#Conversation> section

June 23-24

- ARRL Field Day
- SARL Top Band QSO Party (Jun 21)
- NAQCC Milliwatt Sprint--CW (Jun 21)
- Worldwide EME Contest
- His Majesty King of Spain--Phone
- Marconi Memorial HF Contest--CW

June 30-July 1

- Canada Day Contest
- Ten-Ten Spirit of 76 QSO Party (Jul 2)
- OK1WC Memorial Contest (Jul 2)
- ARS Spartan Sprint--CW (Jul 3)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The Arizona Outlaws Contest Club <http://www.arizonaoutlaws.net/> (AOCC) will represent the ARRL as the Headquarters Station (HQ) W1AW/7 in the upcoming 2012 IARU HF Championship <http://www.arrl.org/iaru-hf-championship> on July 14-15. As the first ARRL affiliated club with only three years of history to represent W1AW, congratulations are due the AOCC and the Arizona Section. AOCC is setting up 12 primary stations signing W1AW/7, plus back-ups, across the entire state to give everybody a chance to work the ARRL HQ multiplier. (Thanks, AOCC President, Bob K8IA)

Richard K5NA (center) received a lifetime DX achievement award at the HamCom convention from ARRL West Gulf Division Director K5RAV (left) and South Texas Section SEC and good friend Tom N5TW. (Photo by K5OT)
You can "friend" the WRTC2014 community on Facebook <http://www.facebook.com/wrtc2014> as they assemble and organize this international event. "We will be posting photos and other information as we work toward WRTC2014. Please join the WRTC2014 fan page on Facebook and share the journey!" (Thanks, WRTC2014 co-chair, Randy K5ZD)

The Mount Airy VHF Radio Club <http://www.packratvhf.com/> established the Rover Recognition Award in 2005 to honor the efforts of rover stations in VHF, UHF and microwave contesting in memory of Bill Seabreeze, W3IY (SK). Congratulations to this year's recipient, John D'Ausilio, W1RT! For many years John has been roving the grids on the East Coast and delivering hundreds of QSOs to other amateurs on the VHF, UHF and microwave bands. His well-equipped rover, dubbed the "Intergalactic Jitney," has substantial power and antennas for bands from 50MHz though 24GHz.

Dave W9ZRX reminds VHF+ contesters, "Please send me the Cabrillo File from your June VHF Contest operations. These are used to update the VHF Super Check Partial Database <http://www.k3lr.com/w9zrx/> counterpart to the excellent one for HF maintained by WA1Z."

VHF+ contesters should take note of the new 9 cm band plan <http://www.arrl.org/news/arrl-board-of-directors-approves-9-cm-band-plan> in which weak signal terrestrial legacy users are encouraged to move to 3400.3-3401.0 MHz, as time and resources permit.

The AMSAT Field Day 2012 <http://www.amsat.org/> is open to all Amateur Radio operators and encourages the use of all amateur satellites, both analog and digital. Additional information about satellite operation during Field Day is also available on the website. (From the AMSAT bulletin ANS-162)

John K6MM wrote a little summary <http://www.nccc.cc/jug/2012/Jug12june.pdf> of the Dayton Hamvention's contest-related activities for the JUG - the Northern California Contest Club's monthly newsletter.

If you know someone having trouble with their subscription to the Contest Update (or any ARRL bulletin or newsletter), first check to be sure their email address is correct on their Member Profile. If all looks well, this process usually restores normal delivery:

- Log in to your ARRL profile <http://www.arrl.org/> at the top of the ARRL home page
- Click "Edit your Profile"
- Select "Edit Email Subscriptions"
- Uncheck (so that there is no check mark) "ARRL Contest Update (biweekly contest newsletter)"
- Click "Save"

- Return to "Edit Email Subscriptions"
- Check (so that there is a check mark) "ARRL Contest Update (biweekly contest newsletter)"
- Click "Save"

Web Site of the Week - Here is a list <http://www.smithsonianmag.com/history-archaeology/Ten-Infamous-Islands-of-Exile.html?c=y&page=1> of ten fun islands for your next DXpedition! Just be sure you can come home again - unlike some of the more famous and unwilling inhabitants. (Thanks, Norman W9VQ)

WORD TO THE WISE

Safety - Field Day encourages lash-ups in the urge to "get 'er done." Don't let safety take a back seat to expedience - not at Field Day and not when doing antenna work at home. Taking the right approach to safety starts with the person looking back at you in the bathroom mirror - it's not found in books or regulations. My project engineering friend, Dave K5GN, recently suggested three basic rules:
#1 Work safely or not at all.
#2 There's always time to do it right.
#3 Always address risk, never do nothing about it.
Whatever your project - a wire dipole in a tree or a full-size Yagi at 200 feet - make these rules the bedrock of how you and your team operate.

==> SIGHTS AND SOUNDS

The Packrats <http://www.packratvhf.com/> took lots of photos for their annual June VHF Contest expedition to the top of Camelback Mountain. You can enjoy watching the labors of others in the June issue of their Cheese Bits newsletter. While there, enjoy the monthly nibbles of history in the "Wayback Machine" column.

Tom K8CX has posted his gallery of Dayton 2012 photos <http://hamgallery.com/dayton2012/> online, accompanied by a detailed and interesting "recap <http://hamgallery.com/gallery/D/hamvention2012.htm>" of the biggest convention in ham radio. (Thanks, Tim K3LR)

Tim also reports that Tom KB4HQA, recovering from his unfortunate auto accident, has posted the video <http://www.hqaradio.com/ctu2012> of The Spurious Emissions Band's Friday night adventures at the Crowne Plaza hotel as seen in the photo at right.

Each of us can promote ham radio using our different talents and here's a music video <http://www.youtube.com/watch?v=OidowSpbxJo> that takes a new approach to the usual issues of hams and their collections of good stuff! (Thanks, Paul NA4ZI)

Enjoy the craftsmanship of Paul WD7S' 8877-based auto-tune all-band amplifier <http://home.earthlink.net/%7Ewd7s/gallery-5a.htm>, 100%

homebrew! (Thanks, Peter DJ7WW)

==> RESULTS AND RECORDS

The extended writeup by Nate N4YDU for the 2012 ARRL DX CW
<http://www.arrl.org/contest-results-articles> contest should be online
this week - look for special sidebars by K9LA on unusual 10 meter
propagation and by VE7FO on the creation of a brand new operating team.

Today is the log submission deadline for the 2012 CQ WPX CW contest
2012. There have been over 3500 logs received, but many logs are still
missing. You can submit your Cabrilo-formatted log online
<http://www.cqwpx.com/logcheck/> or by email <cw@cqwpx.com> and there
is an ADIF file converter <http://www.cqwpx.com/adif/>, as well. Check
the received log list <http://www.cqwpx.com/logs_received_cw.htm> to be
sure your log was received. (Thanks, CQ WPX Director, Randy K5ZD)

Results of the 2012 French HF CW championship
<http://concours.ref-union.org/contest/> are online. 832 logs were
received and the SSB results are coming soon! (Thanks, Pascal F5LEN)

UBA HF Contest Manager, Marc ON7SS/OO9O reports that the results of
the UBA SSB Contest 2012 are on-line
<http://www.uba.be/en/hf/contest-results> now as well as the contest
certificates
<http://www.uba.be/en/hf/contest-results/contest-certificates>. Marc
will send UBN (Unique-Busted-Not in Log) reports - contact him via the
website and request the report for the call sign you used.

The results of the 2012 7th Area QSO Party
<file:///C:/Users/Ward%20Silver/Documents/Editing%20and%20Articles/Contest%20Update/7qp.or
g>,
the 7QP, are now available - mighty fast work! Plaques and certificates
will go out within three weeks. (Thanks, Dick K4XU/N7XU and the 7QP
admin team - K2DI & WS7N.)

Results for the 2012 Ontario QSO Party
<http://www.va3cco.com/oqp/results/index.htm> are now posted, too.
Certificates for all the winners are downloadable and plaque winners
will be presented with their awards at the annual CCO meeting in August
or sent by mail to those not attending. (Thanks, Bob VE3KZ)

Jay NS4J has posted the 2011 US Islands QSO Party results
<http://www.usislands.org/results2011.html> and certificates are being
printed. (Thanks, John WA4JA)

OPERATING TIP

No surprises! When you transmit your contest exchange, give the
information in the order it is expected - the order in which the rules
show it. While there may not be a required order, surprising the other
station with out-of-order information makes for a slow rate and quick
errors.

==> TECHNICAL TOPICS AND INFORMATION

Five excellent papers (by K4IQJ, K3TUF, K1KP, W2GD, K4ZA and K9LA) presented at the 2012 Dayton Antenna Forum are now available on the K3LR web site <http://www.k3lr.com/> by clicking "Dayton Antenna Summary 2012". The equally good talks by W3LPL and W2GD at the 23rd Annual Dayton Top Band Dinner <http://topbanddinner.com/> are also available under "Presentations" to download their slides. Thanks, (Tim K3LR)

Jim W5IFP recommends the Isobar <http://www.tripplite.com/en/products/model.cfm?txtModelID=3950> solid RFI-filtered and MOV surge protector from Tripp-Lite. It has individual toroid filters on each line inside the metal box with additional filters are between the Stage 1 and Stage 2 outlets. Both the hot and common lines are individually filtered.

Here's an interesting story <http://www.sciencedaily.com/releases/2012/06/120601231558.htm> on the aurora and magnetic reconnection - always of interest to HF operators! (Thanks, Bill AI5I/G4NDH)

The article "An Inexpensive System for Power Line Noise Hunting" by George N4UA appears in the June issue of the Potomac Valley Radio Club newsletter <http://pvrc.org/Newsletters/jun12.pdf>. He uses an airband (130 MHz) receiver and tape-measure three-element Yagi for a inexpensive solution. George reports that folding up the elements acts as an attenuator for when close to the source.

Another example of re-purposing something sold in higher volume at lower prices in a non-ham application was reported by Craig NM4T to hold up a portable antenna mast. "I use a speaker tripod that I bought on sale at the Guitar Center. These are great since they are designed to support heavy speaker units. And, most painter poles slide right into the top of the tripod assembly which also cranks up a few feet. If you buy the matching ballistic material carry bag--You also have a fine case that can be thrown into the car. The bag is big enough for 2 tripods, a 48" telescoping painter pole, some antenna components and accessories."

Cecil W5DXP has a nifty center-fed all-band dipole design <http://www.w5dxp.com/notuner.htm> that uses different lengths of transmission line to adjust the impedance at the transmitter end. This design works as a home or portable antenna. (Thanks, Dave W7AQK)

222 MHz has a lot to offer VHF+ contesters according to Jim KK6MC, "Noise is lower than on two meters, high gain antennas are easy to build and manage, and path losses are less than on 432. Activity is not as high as 6/2/70 cm but I have found it to be a very useful addition to my contesting station. For one thing, the QSO points are worth more and multiply the grids on the other bands. It is a great QRP band, you will probably get further from there with 222 MHz than either 144 MHz or 432 MHz." Jim has used and likes the Elecraft XV222

<http://www.elecraft.com/XV/XV.htm> and Down East Microwave, Inc. (DEMI) <http://www.downeastmicrowave.com/> transverters as good performers. For homebrewers, W1GHZ designed a 222 MHz transverter companion to the FT-817 <http://www.w1ghz.org/222xvtr/222.htm> and a low-power transverter for microwave IF called the miniverter-F <http://www.w1ghz.org/small_proj/small_proj.htm>. (DEMI provides some hard-to-find parts and a kit for the miniverter). Another option is the SignalBlox <http://www.signalblox.com/Original222_144xvtr.html> 100 mW, 222 transverter kit.

How should you apply Prelube spray lube to your crank-up tower cables? George K6GT uses "a big plastic funnel and cut a lengthwise slot (about 1/4" wide) in it, so that I could slip it over the cable. Then I hold the bottom of the funnel against the cable, I've got a low leakage (OK, pretty drippy) funnel whose spout is almost occluded by the cable. When I spray the lubricant, the overspray gets caught by the funnel and runs down onto the cable. It saves a lot of the lube, but not all."

Greg W8WWV has designed a homebrew rotator cage <http://www.seed-solutions.com/gregordy/Amateur%20Radio/Experimentation/RotatorCage.htm> for a sturdier mount on the top of MA-series tubular crank-up towers. This can also be adapted to mount rotators on poles and masts. (Thanks, Mike W4EF)

Technical Web Site of the Week - VE7BQH has just updated his 2 meter and 6 meter antenna comparison tables <http://www.bigskyspaces.com/w7gj/6mTable.htm> that include additional information on each antenna. The changes are explained by him along with links to both text and spreadsheet versions of the tables. (from AMSAT <http://www.amsat.org/> bulletin ANS-169)

==> CONVERSATION

While the Iron is Hot

Here in the Midwest we are looking right into the oven for Field Day with Missouri temperatures in the 90's predicted for Saturday. Checking around the country, most locations will also see the mercury rise into the 80's and 90's...damp Seattle is expecting fog and mid-sixties but if the coffee pot is on and loaded with espresso-ground French Roast, they'll make it through the night. The rest of you out there, grab your sunscreen and a portable fan, put on your best hamster-y tee-shirt and hat, fill the cooler with ice - are you ready for some Field Day?

Not only will the weather be hot but so will the opportunity for lighting a fire in new and potential hams kindled by the attractions of our favorite avocation. Here's a hint - the digital modes are the easiest for a non-radio person to understand and learn, particularly those from the connected generations. Take advantage of their natural keyboard skills and show them how to work RTTY or PSK31. Point out how similar to texting it is. Once they get the hang of digital, voice and other modes come a whole lot easier because they'll understand the flow

of things on the air.

No matter what door these folks come through - public service, weather watching, technical interests, radio-controlled craft, balloons, astronomy - they come to Field Day ready to learn and participate. So let them! Make sure they get an opportunity to play a part in everything from hauling on a rope to setting up the stations to operating and logging. It is your job to reach out and welcome them into the tribe. Don't expect them to push their way in - would you feel comfortable doing that as a newcomer? If they spend the weekend on the periphery of the fun it's probably the last time you'll see them.

Let's assume the best - they came, they saw, they liked it! They want more! "When can we do this again?" is a common question. The right answer is NOT, "Well, um, sometimes we do Sweepstakes in November..." To a teenager, you might as well tell them the next contest is in the 22nd century! Show them how to get to the 3830 score report web page <http://lists.contesting.com/_3830/> where claimed scores are posted right away - no matter that the final results aren't printed until December's QST. They can look at the Web on the smartphone in their pocket, you know. While they have that phone or tablet out, bring up DX Sherlock propagation maps <http://www.vhfdx.info/spots/map.php> and DX Summit <http://www.dxsummit.fi/>. Heck, why not bring a laptop and LCD monitor to run the live spotting and propagation maps in real-time all weekend? You'll have a crowd hanging around watching the show!

Have a plan already in place for someone to host a multi-op for new operators in the upcoming IARU HF Championship (July 14th and 15th). There are the North American QSO Parties <http://www.ncjweb.com/> with RTTY the following weekend and the CW and SSB versions in August. Rookie Roundup's <http://arrl.org/rookie-roundup> RTTY version is on August 19th and that's a perfect opportunity for your fledglings to take their first solo flight! Contest Corral <http://www.arrl.org/contest-calendar> is just packed with short and low-key contests that new operators need and enjoy.

Field Day is not just an operating event, it is our biggest recruitment and PR event of the year. Use that opportunity to celebrate what we do and show others why we enjoy it so much. Help them get interested and start participating. Like the thermometer, barbeque, and coffee pot, our ham radio iron is red-hot on Field Day...don't let it cool!

73, Ward N0AX

==> CONTESTS

June 20 to July 3

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Field Day--Phone,CW,Digital, from Jun 23, 1800Z to Jun 24, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 24. Rules <http://www.arrl.org/contests>

SARL Top Band QSO Party--Phone,CW, from Jun 21, 0000Z to Jun 25, 0000Z. Bands (MHz): 1.8. Exchange: RS(T) and province or country. Logs due: 7 days. Rules <http://www.sarl.org.za/>

NAQCC Milliwatt Sprint--CW, from Jun 21, 0030Z to Jun 21, 0230Z. Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

His Majesty King of Spain--Phone, from Jun 23, 1200Z to Jun 24, 1200Z. Bands (MHz): 1.8-28. Exchange: RS, serial or EA province. Logs due: Jul 15. Rules <http://www.ure.es/>

Marconi Memorial HF Contest--CW, from Jun 23, 1400Z to Jun 24, 1400Z. Bands (MHz): 1.8-28. Exchange: RST and serial number. Logs due: 30 days. Rules <http://www.arifano.it/contest_marconi.htm>

Canada Day Contest--Phone,CW, from Jul 1, 0000Z to Jul 1, 2359Z. Bands (MHz): 1.8-28, 50-144. Exchange: RS(T), Province/Territory or serial. Logs due: Jul 31. Rules <http://www.rac.ca/service/contesting>

Ten-Ten Spirit of 76 QSO Party--Phone,CW,Digital, from Jul 2, 0000Z to Jul 8, 2400Z. Bands (MHz): 28. Exchange: Call, name, member number, S/P/C. Logs due: 15 days. Rules <http://www.ten-ten.org/>

OK1WC Memorial Contest--Phone,CW, from Jul 2, 1600Z - see website. Bands (MHz): 3.5, 50, 144, First through fourth Monday of each month; see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

ARS Spartan Sprint--CW, from Jul 3, 0200Z to Jul 3, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

VHF+ CONTESTS

ARRL Field Day--Phone,CW,Digital, from Jun 23, 1800Z to Jun 24, 2100Z. Bands (MHz): 1.8-28, 50+. Exchange: Category, ARRL/RAC section or DX. Logs due: Jul 24. Rules <http://www.arrl.org/contests>

Worldwide EME Contest--Phone,CW, from Jun 23, 0000Z to Jun 24, 2400Z. Bands (MHz): 5.7G. Exchange: TMO/RS(T) and "R". Logs due: Jun 25. Rules <http://www.dubus.org/>

Canada Day Contest--Phone,CW, from Jul 1, 0000Z to Jul 1, 2359Z. Bands (MHz): 1.8-28, 50-144. Exchange: RS(T), Province/Territory or serial. Logs due: Jul 31. Rules <http://www.rac.ca/service/contesting>

OK1WC Memorial Contest--Phone,CW, from Jul 2, 1600Z - see website. Bands (MHz): 3.5, 50, 144, First through fourth Monday of each month;

see website for bands. Exchange: RS(T) and serial. Logs due: 7 days.

==> NORTHEAST FLORIDA ARES OPS WORK TROPICAL STORM BERYL
```

Nassau County (northeast Florida) ARES® worked closely with county Emergency Management during Tropical Storm Beryl last month. County Emergency Manager Danny Hinson called me (EC Brian Kopp, KC5LPA) on Saturday morning, May 26, about 40 hours prior to landfall, and told me the county Emergency Operations Center (EOC) would be activated and that he could use some emergency communications assistance. I e-mailed and called my Assistant Emergency Coordinators, and then headed to the EOC. One of my AECs came along and we spent the day calling ARES members to line them up for possible shelter and EOC work. We also checked radio communications in the EOC communications center.

```
On Sunday morning, we were back at the EOC and got the word that the
County might open 1 or 2 shelters. By agreement, ARES provides
communications support from the shelters to the EOC so that meant we
needed to have hams ready to deploy. Nassau County has a barrier island
where a large percentage of residents live and there were no plans to
evacuate so we needed to have ARES operators staged on the island and
on the mainland, in case bridge access was closed. It worked out that
we had enough hams on the mainland and on the island so we were
```

covered.

For this storm the county decided to use "unadvertised" shelters. This is a protocol where the county prepares a shelter but does not actively inform the public. When residents call the EOC with a storm related emergency, they are "triaged" on the phone and a decision is made whether to send them to a shelter. A typical candidate resident might be a special needs patient who has an oxygen machine that needs power but is experiencing a local power outage in their area. The first resident that is sent to the shelter, effectively means the shelter is opened. Logistically, ARES had to be ready so we had hams standing by to go into the shelters. In fact, for one of the two planned shelters an ARES couple took their RV to the shelter location in advance of the storm so they could support right away if the shelter opened. They were also able to relay situational information about the shelter to the EOC; for instance, letting the EOC know when the Red Cross had dropped off cots, bedding, and water.

On Sunday night, the storm hit but not before the winds increased significantly from the early estimates. We had hams in the EOC communications room during the height of the storm. They maintained communications with our hams waiting at the shelter, those hams on standby and with hams at the Jacksonville EOC. As it turned out the shelters were not needed for the storm.

One big issue that we hadn't counted on was that being Memorial Day weekend, many county employees were out of town. On Monday morning, after Beryl made landfall and the county was waking up and assessing the damage, Hinson asked us to continue to help out in the EOC since they were short staffed. When Eric Anderson, W4FSA, one of my AECs, walked into the EOC Monday morning he found himself answering telephone calls from the public. Soon after I arrived there ARES was tasked with using our communications skills to collect damage reports. The damage assessment teams included those from the Red Cross, some county employees, and Nassau County Fire Rescue. The teams were calling in reports on the county's 800 MHz radio system. ARES, using county radios we had in the EOC communications room, took down the information and then created a database and map on the fly so the EOC could assess the impact to the county.

In addition, Hinson requested ARES hams provide neighborhood reports of damage, which we collected at the EOC using our ARES Amateur Radio repeater system. There were also some assessment teams who came in from the field with hand written reports and they were sent to us where we data based their information as well. The small communications room was a noisy place for a good part of the day on Monday.

After 3 days of support the Nassau County ARES team was able to stand down from performing a job well done. On the whole the county was lucky. A handful of homes and businesses were damaged, mainly from falling trees, but the majority of the county came through Beryl with minimal impact.

My thanks to our team who helped out: Tony W9AFM, Eric W4FSA, Paul AE4MM, Fred WK1F, Patti WK1E, Ron KC4MYV, Joe KM9V, Tom KJ4WQK, Mike KF4DSK, Dwayne KQ4XF, and Tom KJ4WHK. -- Brian Kopp, KC5LPA <brian@kilocharlie5.com>, Nassau County, Florida ARES Emergency Coordinator

==> HURRICANE STATION WX4NHC ANNUAL STATION TEST A SUCCESS

Each year prior to hurricane season, the Amateur Radio station WX4NHC at the National Hurricane Center in Miami, Florida, conducts a major on-the-air exercise to test all of its radio equipment, antennas and computers, and to practice some of the procedures used during actual hurricane operations. This year was no exception. Julio Ripoll, WD4R, the station's assistant coordinator, filed a report with the ARES E-Letter.

"We did have a malfunction of one of our main computers that is used for EchoLink and APRS during the test due to a faulty fan that caused it to overheat. We reverted to the use of a back up computer to resume operation on the EchoLink/IRLP Hurricane Net that was in progress without missing any contacts. This was good practice of using our backup systems while we were on the air. The faulty main computer is being replaced this week."

Ripoll reported 144 contacts on HF and 59 on EchoLink/IRLP during the test event. "We also received reports via our on-line reporting webpage, Winlink, APRS and e-mail. Stations contacted were from many states, from the west coast to New England, Canada and the Caribbean islands."

"We were surprised and honored to receive a very special weather report from N2OBS in Camp Dwyer, Afghanistan, who relayed our appreciation and best wishes to the men and women in uniform there," said Ripoll. "It was also great to speak with Jean-Robert, HH2JR, in Port-au-Prince, Haiti, and Father John, HH6JH, on Ile de Vache, who were so instrumental to our UM/Medishare Ham Radio Mission after the Haiti Earthquake." "Mike Kelley, KJ4YDX, Vice Chairman of Medical Administration for the University of Miami and former Chief Operations Officer for the UM/Medishare Haiti Mission, spoke with both Jean-Robert and Father John about the past and current UM/Medishare field hospital missions in Haiti and thanked them for their help with the HH2/WX4NHC communications."

Ripoll concluded: "WX4NHC, a group of 30 volunteer Amateur Radio operators at the National Hurricane Center (NHC) appreciated all of the participation and support of the stations that contacted us during our annual test and look forward to their continuing support during the rest of the hurricane season." [Information on the National Hurricane station WX4NHC and an on-line hurricane report form can be found here <http://www.wx4nhc.com/>. - ed.]

==> CALIFORNIA ARES HOSPITAL GROUP TO OPERATE FIELD DAY

The famous Hospital Disaster Support Communications System (HDSCS) of Orange County, California, will participate with Huntington Beach Hospital in this year's ARRL Field Day exercise. The group will be communicating for 24 hours straight under emergency conditions. HDSCS ops plan to make use of the buildings, parking stands, and flagpoles to create antennas. They will be hanging out in those bright yellow surge capacity tents and making Field Day contacts and report exchanges. The members will also make satellite contacts.

District Emergency Coordinator (DEC) April Moell, WA6OPS, invited other operators to visit: "If you live or work nearby we hope you might be able to come and check out the setup, talk with some of our members, and maybe get on and make a radio contact yourself. If you have kids or grandkids, bring them too. Remember you can stop by anytime during the 24 hour time period. We might not be able to provide as thorough a tour after midnight but you can still have some fun checking things out. And maybe you can help keep our radio operators awake."

Listen for the HDSCS operation on one of the various modes, using the call signs W6H and K6MHD. They hope to make contacts with all 50 states. -- April Moell, M.A., CHCom, WA6OPS, District Emergency Coordinator, ARES Hospital Disaster Support Communications System, Orange County, CA

==> LETTERS: ARES AND DIGITAL COMMUNICATIONS STANDARDIZATION

I serve as president of the Loma Prieta Amateur Radio Club (LPARC) in the Santa Cruz mountains of California. My purpose in writing is that our club spans two counties, and I perceive that there are some differences in approach to digital communications between operational areas. One county has a vigorous ARES program, and makes use of Outpost <http://www.outpostpm.org/> software. The other county is a bit newer to the digital communications party for emcomm, and has recently begun to make use of FLDIGI <http://www.w1hkj.com/Fldigi.html> software using MT63-2K mode. Other nearby counties' ARES organizations also use FLDIGI.

It's likely that each approach has its share of advantages and disadvantages, but as a small organization in a relatively small community, LPARC would be challenged to maintain and train on multiple sets of software serving a similar purpose. My question to the emcomm community is: what is being done/planned to steer our DECs towards a common solution for digital communications? We've read about how divergent systems in the public sector cause widespread interoperability challenges, and we don't need to repeat that in our community! I hope we're already working on this. Thank you for broadening visibility of this issue. -- David Katinsky, N2RDT, President, Loma Prieta Amateur Radio Club, California

==> LINKS OF INTEREST

Hughes Announces Emergency Networking Solutions in Anticipation of Hurricane Season

<http://psc.apcointl.org/2012/05/31/hughes-announces-emergency-networking-solutions-in-anticipation-of-hurricane-season/>
-- Solutions Ensure Government and Business Networks Stay Up and Running When Disaster Strikes. -- Thanks, Bob Bauer, KC4HM; APCO International Public Safety Communications, May 31, 2012

==> LETTERS: SURPLUS PUB-SAFETY RADIOS

Has your emcomm group taken advantage of the surplus Public-Safety radios that are being taken out of service? The Muskegon County (Michigan) Emergency Communication Services EmComm group has been using non-compliant commercial transceivers for APRS Digis, APRS trackers, WinLink 2000 go kits, packet operations, portable transceivers, repeaters, portable repeaters, and provides a newly licensed ham with a radio to use until they purchase one.

The FCC has mandated that commercial and public safety users must have their radio systems upgraded to the new narrowband emission standards by January 1, 2013. This mandate applies to users in the VHF 150 MHz and UHF 450 MHz bands. Only a small group of users within these bands are not required to migrate to narrowband emissions such as GMRS, FRS, Marine transceivers, and NOAA weather transmitters.

Set up a meeting with your emergency management agency contact to ask what their plans are for disposing of the non-narrow band equipment. If they have no plans, put a written plan together for donating the radios to your group, emphasizing the benefits to both organizations. Hopefully the decision makers will see the many uses of this older equipment to your group versus being sent to the salvage yard.

After you have secured the equipment one of the first requirements will be to have the radios "wiped clean" of their public-safety frequencies. Agencies with a radio shop might even re-program the radios to your frequencies, or you might already have members of your group that have the necessary equipment for re-programming.

Most commercial radio equipment is capable of being used in the Amateur Radio bands. There are many advantages to using commercial equipment. Two of the many benefits are the capability of operating in congested RF environments, and this is a simple radio to operate for the new ham/emcomm member.-- James C. Duram, K8COP, Emergency Coordinator, RACES Radio Officer, Professional Emergency Manager (PEM), Communications Unit Leader (COM-L); Muskegon County Emergency Communication Services <http://www.mcecs.net/>, Inc., Muskegon, Michigan

==> SILENT KEY: SKYWARN FOUNDER MERLE G. KACHENMEISTER, WA8EWW

Merle G. Kachenmeister, WA8EWW, died May 29 at the age of 82 in the care of Hospice of NW Ohio. He had lived most recently in Blissfield, Michigan. A Navy veteran, he began his career doing weather for the Navy, according to his obituary. He then worked for the US Weather Bureau, later renamed the National Weather Service, where he developed

the SKYWARN weather warning system following the deadly 1965 Palm Sunday tornadoes. In recognition, the US Department of Commerce awarded him a bronze service medal in 1974.

With Amateur Radio operators at the forefront of the SKYWARN program, the ARRL and the National Weather Service have cosponsored SKYWARN Recognition Day since 1999. A pioneering television meteorologist, Kachenmeister retired from WTOL in Toledo, Ohio after stints at several other TV stations. - ARRL Web site

==> CORRECTION: HURRICANE WATCH NET

First, thanks for mentioning the Hurricane Watch Net in your Atlantic hurricane season article in the last issue. There was an error made, however, in regard to when we activate the net. The HWN only activates when hurricanes threaten land in the Atlantic, Caribbean Basin, and Gulf of Mexico.

This will be the HWN's 47th consecutive hurricane season, as the net was begun in 1965 during Hurricane Betsy. We obtain real time, ground truth weather observations from hams in or near these storms and relay the info to the National Hurricane Center in Miami. While our primary focus remains to be on 14.325 MHz, recent solar cycle fluctuations and the resultant propagation anomalies have required us to be flexible and operate on 40 and/or 80 meter frequencies, as well. - Brad Pioveson, W9FX [ARRL Illinois ARES Section Emergency Coordinator; Illinois Emergency Management Agency State RACES Officer; and Army MARS Agency Liaison. Pioveson is also ARRL Central Division representative to the Emergency Communications Advisory Committee (ECAC); and member of the Hurricane Watch Net (since 1995). He serves as President and Chairman of the Board of Directors of the Hurricane Watch Net, Inc. Since 1995, W9FX has served as National Training Officer for SATERN.]

And as a teaser...watch for information about a 2012 hurricane season webinar that will feature presentations by WX4NHC, HWN, VOIP WX Net, and ARRL HQ staff. Information will be made available on the ARRL website and ARRL_EmComm Twitter feed.

==> LETTERS: ARESMAT CONCEPT

This concept [ARESMAT, last issue] is one that was both cussed and discussed at several disaster debriefings that I had the opportunity of taking part in while an active member of the Red Cross Disaster Services Human Resources (DSHR) over the years (1994 through 2005). Several points that need to be clearly agreed upon whenever we ask volunteers to leave home for any period of time are the use of personal vehicles (gas and parking), personal liability, lodging, and meals. Volunteers must be sure that their medical insurance will cover such activities and that they will be able to get refills of any prescriptions that they need. What may be covered by Illinois Volunteer Laws may be quite different from those in the "Host" state. --Tod West, KB9AIL, Illinois ARES OES

==> KI1U FOR A FINAL

[This month, we defer to ARRL's Emergency Preparedness Manager Mike Corey, KI1U, for his compelling essay on upgrading. - K1CE]

Upgrade

Each one of us came into the Amateur Radio Service through a gateway; for some it was shortwave listening, others knew a ham and thought it seemed like something fun to do, and others may have got their start through a scouting project. Many Amateurs, in recent years, have gotten their license because of emergency preparedness or public service interest.

However you came into the hobby your second step, after getting your license, is to put it to good use. Naturally you're going to explore what sparked your interest first, but from there the Amateur Radio Service can offer you much more, but you'll probably need to upgrade.

The importance of upgrading your license is critical for those with an interest in emergency communications and public service. We have a tendency to think that these activities are limited to the VHF/UHF bands and a Technician license will suffice. It is true that many local emcomm and public service activities center on local repeaters, but you wouldn't put only band aids in your first aid kit so why would you only put VHF/UHF in your communications tool box?

The first and most important reason to upgrade is that it will give you more privileges on the Amateur Radio bands. You will have more radio spectrum at your disposal and can move past the gate and explore the rest of the Service. Remember that your Amateur Radio license is not what makes you an asset to emergency communications and public service; your license allows you to get on the air and improve your operating and technical skills. It is being a well rounded Amateur Radio operator that makes you an asset. No one got their driver's license and expected to win the Indy 500 the next day.

Never miss an opportunity to get on the air.

The second reason to upgrade is to add to your communications tool box. We often think of our communications tool box (not to be confused with our go-kit) in terms of modes and devices, but it also includes spectrum. Adding more HF spectrum you can use improves your tool box. It gives you more ways to improve your skills as an Amateur Radio operator and as a communications volunteer to your served agencies.

So, it's time to upgrade! Start by getting a good study manual, available through the ARRL and many Amateur Radio vendors. And don't forget to try a few practice exams before you take the real thing. Practice exams are available online. The next step is to work with your elmer. A good elmer doesn't quit once you pass your Technician exam; they are there to help you learn and grow as an Amateur Radio operator. And finally when you're ready, find an exam session. You can find information on the license classes, exam sessions, and more at

http://www.arrl.org/licensing-preparation-exams Good luck and I hope to hear you on the air! - Mike Corey, KI1U

http://forums.qrz.com/showthread.php?350853-Etherkit-debuts-with-open-source-QRSS-transmitter-kit&goto=newpost

Etherkit debuts with open source QRSS transmitter kit

Etherkit, a new amateur radio kit company devoted to open source hardware, has released its first product for sale.

OpenBeacon is an open source crystal-controlled QRPp beacon transmitter kit which can output a variety of slow-speed modes, including QRSS, DFCW, and Sequential Multi-tone Hellschreiber.

It is configured via USB port, so there are no jumpers to set and you can easily adjust all of the operating parameters via command line. Once configuration is complete, OpenBeacon may be removed from the PC and operate stand-alone, as the on-board microcontroller stores all settings.

Specifications

* Frequency: crystal controlled

* Modes: CW, QRSS, DFCW, Sequential Multi-tone Hellschreiber, Glyphcode, WSPR (experimental)

* Power output: 300 mW nominal (at +13.7 VDC power supply)

* Spectral purity: greatest harmonic www.etherkit.com for more product information, images, full documentation, access to the firmware and software, and to order.

Super Antenna Restarts Antenna Business; Launches New Website

Posted: 19 Jun 2012 04:15 AM PDT
http://forums.qrz.com/showthread.php?350774-Super-Antenna-Restarts-Antenna-Business-Launches-New-Website&goto=newpost

Super Antenna Restarts Antenna Business; Launches New Website

Legendary MP1 and YP3 Back in Production

SAN MATEO, Calif., USA--June 18, 2012-- SuperAntenna Corporation, maker of the legendary MP1☐ Portable Antenna and YP3☐ Portable Yagi, announced today the full restarting of the Super Antenna business begun in 2000 by Vern Wright, W6MMA. The new company, now a California high technology corporation, has begun shipping the MP1☐ Portable Antenna and the YP3☐ Portable Yagi, both re-engineered to a higher standard of performance.

Super Antenna also announced a new web site where hams radio operators can get information on Super Antenna products, download technical papers and manuals or purchase Super Antenna products and accessories. The new website is available at http://www.newsuperantenna.com.

"We are very pleased to reopen Super Antenna to the ham community worldwide. The response from our ham friends around the world has been magnificent and we look forward to providing the best portable antennas and accessories available," said Super Antenna founder and President Vern Wright W6MMA.

SuperAntenna Corporation is located in San Mateo and Lincoln, California, and develops, markets and sells a line of portable antennas and accessories worldwide under the trademark "SuperAntenna☐". SuperAntenna Corporation is the only manufacturer of genuine SuperAntenna☐ products.

The Super Antenna☐ and SuperAntenna☐ names and MP1☐ and YP3☐ are trademarks of SuperAntenna Corporation. All rights reserved worldwide.

Further information about Super Antenna may be found on its web site at http://www.newsuperantenna.com

AMSAT 2012 Symposium Weekend Schedule Posted

The 2012 AMSAT Annual Meeting and Space Symposium will be held in Orlando, Florida on the weekend of October 26-28, 2012 at the Holiday Inn, Orlando Airport Hotel.

The Symposium weekend will feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques, News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting open to AMSAT membersMeet Board Members and OfficersAnnual General Membership MeetingAnnual Banquet□Keynote Speaker and Door Prizes

To help you plan your trip to Orlando the 2012 Symposium Committee has posted a high-level schedule of the weekend's events.

Preliminary 2012 Symposium Schedule

Thursday 25 October 2012

AMSAT Board of Directors Meeting 8am - 9pm

Friday 26 October 2012

AMSAT Board of Directors Meeting 8am - Noon

Trips to SkyCraft 9am - Noon

AMSAT Symposium 1pm - 5pm

Saturday 27 October 2012

Symposium 8am - 3pm

AMSAT General Meeting 3:30pm

AMSAT Banquet 6:30pm - 10pm

Sunday 28 October 2012

7:30am AMSAT Area Coordinator's Breakfast

Local trip of Interest TBD

Monday 29 October 2012

Special trip to Kennedy Space Center 8am-6pm

Contact Martha if interested

Watch the AMSAT Symposium Web Pages for the latest information.

[ANS thanks the 2012 Symposium Committee for the above information]

Candidates for the AMSAT-NA Board of Directors

There are six candidates running for the AMSAT-NA Board of Directors. Three of the candidates are current members of the Board whose term expires this year. Ballots will be mailed to the membership by July 15th, and must be received at the AMSAT-NA Silver Spring, MD office no later than the close of business on September 15th, 2012.

The nominees include (in alphabetical order):

Tom Clark, K3IO *Steve Coy, K8UDMark Hammond, N8MHLou McFadin, W5DID *Gould Smith, WA4SXM *Patrick E. Stoddard, WD9EWK

* Incumbent

[ANS thanks Alan, WA4SCA, for the above information]

Viet Nam F-1 CubeSat Team Invites You to Send Your Name to Space

The latest news from the F-1 CubeSat Team, posted on their website blog and on the AMSAT-UK web with additional photos reports that the satellite's flight safety review is complete and the FSpace team together with their partner NanoRacks LLC has satisfied the technical requirements and

standards set by the launch vehicle provider.

F-1 CubeSat is ready for its scheduled launch in July 21, 2012 from Japan. If everything goes according to plan, the F-1 CubeSat will be delivered to Japan by the end of June. Then along with four other CubeSats (RAIKO, WE-WISH, FITSAT-1 and TechEdSat) F-1 will be loaded onboard HTV-3 ☐Kounotori☐ transfer vehicle for integration with the JAXA HII-B launch vehicle.

These CubeSats will remain aboard the ISS until September, 2012 when Japanese astronaut and radio amateur Akihiko Hoshide KE5DNI should deploy it into space from the ISS using the Kibo robot arm.

F-1 carries two Yaesu VX-3R transceivers using 145.980 and 437.485 MHz.

The FSpace team are offering the public a chance to send their name/callsign and a message into space onboard the F-1 CubeSat. You will also be presented with a certificate!

[ANS thanks the FSpace Team and AMSAT-UK for the above information]

1st Interplanetary CubeSat Workshop Video and Presentations Available

Video and presentations from the 1st Interplanetary CubeSat Workshop, held in and around MIT and Boston on May 29-30 are available for downloading. Copies and videos of all the presentations, posters and ancillary sessions can be found by clicking on their titles.

Please note that this conference was an open conference and did not wish to discuss information restricted by ITAR. U.S. citizens and permanent residents were responsible for ensuring that technical data presented was not restricted by ITAR and that ITAR controlled information was not discussed with non-U.S. citizens.

[ANS thanks the iCubeSat Workshop for the above information]

Credit Card Sized Raspberry Pi Computer Board Runs Ham Radio Software

AMSAT-UK and AMSAT-NA member Dave Johnson, G4DPZ, has been using the Raspberry Pi to run amateur radio satellite software.

The £22 ($35) Model B Raspberry Pi is a credit-card sized ARM-based computer board that plugs into a TV and a keyboard. Based around the 700 MHz ARM11 processor the board has 256 MB SDRAM, two USB ports, Ethernet with composite and HDMI video outputs. Low-level peripherals are GPIO pins, SPI, I^2C, I^2S and UART.

It was developed in Cambridgeshire by a UK registered charity, the Raspberry Pi Foundation, which exists to promote the study of computer science and related topics, especially at school level, and to put the fun back into learning computing.

Dave☐s Raspberry Pi runs Debian Squeeze with Xwindows and is accessed using VNC over his shack network.

The first amateur radio application he got running was the GPredict satellite tracking software, thanks go to Alex Csete OZ9AEC for making such a portable implementation. Dave found the sofware and updates of the Keplerian Two Line Elements from the Internet worked perfectly.

More information about the Raspberry Pi can be found on-line.

GPredict free real-time satellite tracking and orbit prediction software can be found on-line.

See also AMSAT-UK web for photos and additional information about the Raspberry Pi.

[ANS thanks AMSAT-UK for the above information]

Satellite Shorts From All Over

Nick Pugh, K5QXJ posted a video recorded during an AubieSat-1 pass after its recent on-orbit reconfiguration.Plan Ahead! To celebrate Venezuelan Navy Day, members of the Grupo DX Caracas will be active as YW5B from La Blanquilla Island between July 11-16. Activity will be on 160-2 meters using CW, SSB, Satellites, FM and the Digital modes. (Ohio/Penn DX Bulletin No. 1065)The next Hudson Valley Satcom net date is Thursday June 21, 8PM EDT (UTC-4 UTC) on the 146.97 MHz MBARC Repeater (PL 100). The echolink connection has been experiencing problems so you are invited to send an e-mail to N2OXV at arrl.net to make sure that the N2EYH-L EchoLink node is available if you plan to join via this route. (Stu, WA2BSS)A video of the AMSAT-UK FunCube Dongle receiving the HORYU-2 Satellite is posted on-line. You will also find links describing the satellite and a link to software for telemetry decoding.VE7BQH has just updated his 2m and 6m antenna comparison tables and provided additional information on each antenna. The changes are explained by him along with links to both text and spreadsheet versions of the tables.

[ANS thanks everyone for the above information]

ARISS Status - 11 June 2012

Amateur Radio on the International Space Station (ARISS) Status Report June 11, 2012

1. Japanese Contact Successful

On Wednesday, June 6, students attending Kawatinagano Higashi Junior High School in Kawatinagano, Osaka, Japan took part in an Amateur Radio on the International Space Station (ARISS) contact with André Kuipers, PI9ISS on ISS. At the beginning of the contact the school was experiencing a power blackout, but recovered in time so that all children were able to ask their questions. The event supplemented lessons about space and the ISS.

2. Astronaut Training Status

Astronaut Jeannette Epps took and passed her amateur radio license exam last week and was given the callsign KF5QNU. She is not assigned to any future ISS expedition crews at this time.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

Hi all
To those who had contacts with Tony as F8ATS/6W and will attend the
HamRadio Messe in Friedrichshafen:
Tony will be present during the HamMesse of Friedrichshafen, at the
CLIPPERTON DX CLUB/UFT stand on Saturday June 23, from 1300 to 1400 zulu..
So if you QSO'd him when beeing in Senegal , bring your QSL with details
and you'll get your F8ATS/6W QSL cards, from him,
You can write also to Tony at : f8ats@yahoo.fr <mailto:f8ats@yahoo.fr>,
until June 21 so you'll wait no more for your card, in Fried.
Tks to forward this to your friends and clubs
Forwarded with 73, by
Maurice, F5NQL, F6KOP member
Bonjour ï¿½ tous
Ceux qui ont contactï¿½ Tony, F8ATS/6W, lors de son sï¿½jour au Sï¿½nï¿½gal, et
qui seront ï¿½ Friedrichshafen, pourront rï¿½cupï¿½rer leur carte QSL, le
samedi 23 juin, de 1300 ï¿½ 1400 utc, sur le stand commun CDXC/UFT.
Prï¿½parez votre QSL avec les dï¿½tails de votre ou vos QSO et vous
repartirez avec votre carte F8ATS/6W.
Vous pouvez aussi lui ï¿½crire ï¿½ f8ats@yahoo.fr <mailto:f8ats@yahoo.fr>,
avant le 21 juin; ainsi vous n'attendrez pas ï¿½ Fried.

Merci de faire suivre ï¿½ vos amis et R Clubs

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:

http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: ZP: Paraguay ; square GG22; start 2012-06-23 **

Greetings to all,

I plan to be QRV on 144.131 transmitting first on Saturday June 23 from
my moonrise at 1330z for as long as I can stay in the radio club . . .
perhaps until 2359z, my moonset. It does not look like I will have the
new preamp in time for this session, but there is a chance. Without the
new preamp I do not hear as well as I should, for which I apologize.

The station is in GG22BQ, with 250 watts output to a pair of 9 element
horizontally polarized yagis.

Sunday operation is not possible for me, and after the 23rd my only
other window for operation appears to be July 3 and 4. Then I will come
back to the U. S. until early February 2013. I hope to put up the EME
station at the central radio club in Asuncion, ZP5AA, in mid February
2013. I plan to have a 432 mHz yagi to at least work the big stations on
that band. I will also bring back a sequencer and preamps for 144 and 432.

Hope to work many of you on the 23rd.

73 de Steve ZP9EH

SOURCE: Moonet

** DXCC: VP9I: Bermuda ; square FM72; start 2012-07-13 **

All is prepaired and running well. Outside the hours on the Moon the Team will be qrv for
Tropo and MS as well (any skeds pse Mail to DL9MS).
Callsign VP9I is confirmed (thanks to VP9GI!)
A team consistant of Dit, DF7KF, Angelo, DM1AC and Joe, DL9MS
are going to be qrv from Bermuda, FM72OH in July on 144 MHZ via EME
First Infos about the Bermuda Triangel Expedition
to FM72oh

RIG on 144 MHz: xp28 by 7kf, eme power and lna
Call shall be DF7KF/VP9 or possible a special licens call

QSL: only direct to Joe, DL9MS (no QSL via buro!)

Where in the current interface requirement does it say anything about a
permanently attached antenna?

That seems to be a fairly brief summary. More detail is in the older RA
document:
http://www.ofcom.org.uk/static/archive/ra/publication/ra_info/ra357.htm

"5. RADIO EQUIPMENT
PMR 446 radio equipment must be handportable, have an integral antenna,
have a maximum ERP of 500 mW and be compliant with ETS 300 296."

I doubt if they have changed the technical specs.

But change the specs. is exactly what they have done.
ra357 is only there as an archive and is no longer the applicable
document. The current interface document is IR2009.

Barrie Amateur Radio Club keeping others well connected: Doug Mein's trusty ham radio has taken him around the world without leaving his home. As a teenager, Mein was thrilled to connect with other amateur radio enthusiasts on whatever frequency he happened to pick up. "I was a radio ham since I was 16, and I think it's one of the most wonderful hobbies there is," said Mein, a retired Transport Canada employee. "I use Morse code so I can talk to people all over the world regardless of what language they speak. "One language, one world, basically." That love of his unique hobby grew up with him, and Mein is now president of the Barrie Amateur Radio Club. "Amateur radio is a technical hobby, and enthusiasts can learn from each other and socialize at our club," Mein said. "Ham radio operators are usually pretty clever, tinkering around with these radios in their basements or ham shacks."

Which is the document that I have continually referered to on here
many time, but no one listens ;-)

Specifically -

Converted radio equipment

If modifications are made to the equipment, such as adding an antenna
connector, the overall maximum ERP or other technical parameters must
not exceed the permitted levels set out in the Interface Requirement.

Problem solved.

It's good advice for him to remember when he is serving his 5 month jail sentence for refusing to turn over his log files, because he refused to give them a laptop which had nothing to do with his radio operation.

Geoff.

Radio Merit Badge "Doubleheader"

Posted: 20 Jun 2012 01:40 PM PDT
http://forums.qrz.com/showthread.php?350941-Radio-Merit-Badge-quot-Doubleheader-quot&goto=newpost

Preparedness was the theme of the day as over 212 Boy Scouts from three states came together this month for the annual Radio Merit Badge program at Ham-Com 2012 (June 8-9), the state's largest Amateur Radio convention in Plano, Texas.

Scouts learned new skills and got a close look at the latest Amateur Radio gear during the day-long event at the Plano Convention Center.

This popular Radio Merit Badge program strives to cover all of the badge requirements in a fun and interactive way, and to highlight the importance of Amateur Radio as an emergency preparedness tool. Scouts at this year's event enjoyed special speakers, class participation activities and actual on-air contacts with radio "hams" around the world.

Citing the need to "plant seeds for the future," Ham-Com began sponsoring the program a decade ago at their annual Amateur Radio convention by offering free admission and meals to Scouts in uniform. Their goal was to inspire Scouts to pursue Amateur Radio as an avocation, or to perhaps put their newly-learned radio skills to use during times of disaster when normal communications systems are knocked out.

Richard Phillips and James Alderman have been conducting the day-long program at Ham-Com for the past eight years and have seen attendance levels steadily increase. They estimate close to a thousand boys have been through their program so far.

As the Radio Merit Badge program has gained popularity in the Scouting community, Ham-Com's support has grown also. Now Scouts can take their Amateur Radio license exam at no charge during the event.

Allan Batteiger teaches Amateur Radio license classes in the local community and heads up the exam team for the event. This year two lucky Scouts who passed their license exams were each was presented with a special bonus□a brand new ICOM V80 handheld radio and matching antenna courtesy of Ham-Com and Diamond Antenna Corporation.

Event organizers faced a unique, although daunting challenge this year when a computer glitch failed to shut down the online class registration system once all available seats were filled. By the time the error was discovered, almost 600 boys had signed up for the Radio Merit Badge program□three times more than the classroom would seat!

Phillips and Alderman decided to try and accommodate overflow crowds by making this year's program a "doubleheader"□two Radio Merit Badge programs back-to-back in a single day.

Even with two packed sessions, scores of boys who had pre-registered had to be turned away. But stay tuned! Another Radio Merit Badge class is being planned for later this summer.

==> + ARRL FIELD DAY: ARRL FIELD DAY IS THIS WEEKEND: ARE YOU READY?

Tens of thousands of Amateur Radio operators will be firing up portable radio stations from unexpected locations this weekend for ARRL Field Day <http://www.arrl.org/field-day>. On June 23-24, more than 35,000 hams are expected to operate from parks, malls, schools and. yes, fields, around the country. Field Day is the climax of the week-long Amateur Radio Week sponsored by the ARRL. As of June 19, more than 20 states and countless cities and towns have issued proclamations thanking and supporting the hams for their community service work. Looking for a Field Day location? Check out the Field Day Locator <http://www.arrl.org/field-day-locator>. Find information for media and the general public here <http://www.arrl.org/2012FieldDay>. Find

information for radio amateurs and participants here <http://www.arrl.org/field-day-locator>. Check the ARRL Facebook page <http://www.facebook.com/ARRL.org> and the ARRL Twitter feed <http://twitter.com/arrl> throughout Field Day weekend for live updates.

==> ARRL FIELD DAY: W1AW ANNOUNCES 2012 FIELD DAY BULLETIN SCHEDULE

Stations active during ARRL Field Day -- June 23-24 -- are eligible to receive 100 bonus points for copying the special Field Day bulletin transmitted by W1AW (or K6KPH on the West Coast). You must include an accurate copy of the message in your Field Day submission. The Field Day bulletin must be copied via Amateur Radio; it will not be included in Internet bulletins sent out from Headquarters and will not be posted to Internet BBS sites.

W1AW will operate on the regularly published frequencies. The special PSK31 bulletin will be transmitted on the regular W1AW digital frequencies:

- CW frequencies: 1.8025, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675, 28.0675 and 147.555 MHz.
- Digital frequencies (includes PSK31 and MFSK16) using 45.45-baud Baudot: 3597.5, 7.095, 14.095, 18.1025, 21.095, 28.095 and 147.555 MHz.
- Phone frequencies: 1.855, 3.990, 7.290, 14.290, 18.160, 21.390, 28.590 and 147.555 MHz.

The Maritime Radio Historical Society's K6KPH will transmit the 2012 W1AW Field Day message for the benefit of West Coast stations on 3.5815, 7.0475, 14.0475, 18.0975 and 21.0675 MHz, CW only. The frequencies for K6KPH Digital (RTTY, BPSK31 MFSK16 and FEC AMTOR) will be 7.095 and 14.095 MHz. Click here <http://www.arrl.org/news/w1aw-announces-2012-field-day-bulletin-schedule> for the complete schedule.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES RESOURCE GRANTS FOR 11 SCHOOLS

In June, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program (ETP), awarding equipment and resources valued at nearly $16,000 to 11 schools. More than 590 schools across the country have received support from the ETP in the form of grants for equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology. Applications for equipment and resource grants are accepted twice each year; application deadlines are May 1 and November 1. A central goal of the ETP is to develop a foundation of wireless technology literacy among America's teachers and students. It employs Amateur Radio to explore radio science and electronics and provide hands-on activities that engage students' minds and imaginations, opening doorways into math, science and technology curriculum topics, as well as other core curriculum areas such as geography and language

arts. Read more here
<http://www.arrl.org/news/arrl-executive-committee-approves-resource-grants-for-11-schools>.

==> + 2011 ARRL ANNUAL REPORT NOW AVAILABLE

The ARRL Annual Report for 2011 -- now available online -- reviews the major events of the year and documents the renewed growth of both the ARRL and the activities of the Amateur Radio Service. For the fifth consecutive year, ARRL membership grew -- totaling 157,813 members at year end.

According to ARRL Chief Executive Officer David Sumner, K1ZZ, Amateur Radio is flourishing: "Despite challenges on many fronts, Amateur Radio and the ARRL were in better shape at the end of 2011 than at the beginning. In September, we reached a milestone in amateur licensing, with 700,000 individuals licensed by the FCC, and reached 702,056 at the end of December, up .86 percent for the year." Sumner noted that ARRL membership also grew at .86 percent, exactly the same rate as the licensing numbers. "While membership is still short of its all-time high, we have achieved five straight years of growth, straight through the recession," he said. "This record of success is testimony to the professionalism of our membership staff as well as to the diligent efforts of everyone, volunteer and staff alike, who contributes every day to a positive image of the ARRL in the Amateur Radio community." Read more here
<http://www.arrl.org/news/2011-arrl-annual-report-now-available>.

==> + GETTING LICENSED: NEW AMATEUR EXTRA CLASS QUESTION POOL EFFECTIVE JULY 1

The new Amateur Extra class (Element 4) question pool
<http://www.ncvec.org/page.php?id=358> -- released by the National Conference of Volunteer Examiner Coordinators (NCVEC
<http://www.ncvec.org/>) in January 2012 -- becomes effective on Sunday, July 1. The current Amateur Extra class pool expires on June 30, 2012 and cannot be used after that date. This new question pool -- including graphics and diagrams -- will remain valid until June 30, 2016. The new Amateur Extra pool contains 702 questions, from which 50 are selected for an Element 4 examination. As of June 13, three questions -- E1D09, E2A14 and E6E10 -- have been removed
<http://www.arrl.org/withdrawn-questions> from the new pool. The current Technician class question pool
<http://www.ncvec.org/page.php?id=349> that became effective July 1, 2010 is valid through June 30, 2014. The current General class pool
<http://www.ncvec.org/page.php?id=350> that became effective July 1, 2011 is valid until June 30, 2015.

==> + ON THE AIR: ARRL UHF/MICROWAVE BAND PLAN COMMITTEE SEEKS COMMENTS ON PROPOSED 23 CM BAND PLAN

<http://www.arrl.org/images/view/News/Proposed23cmBandPlan.jpg> Last winter, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the Amateur bands between 902 MHz and 3.5 GHz. The excellent level of response provided us with the basis to complete drafts of the 9 cm, 13 cm and 33 cm revised band plans for ARRL Board approval. The Committee has now prepared for your consideration a draft band plan for 23 cm (1240-1300 MHz), the final band on its assigned list. Please look over the accompanying draft and let us know if you have any major concerns. Read more here <http://www.arrl.org/news/arrl-uhf-microwave-band-plan-committee-seeks-comments-on-proposed-23-cm-band-plan>.

==> + FCC NEWS: FCC DOWNGRADES HAWAIIAN HAM'S LICENSE

On June 18, the FCC issued an Order of Modification <http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db0619/DA-12-961A1.pdf>, modifying the license class of Todd Wilson, WH6DWF, of Honolulu, Hawaii, from General to Technician. This stems from an Order Proposing Modification released in March 2012 <http://www.arrl.org/news/fcc-seeks-to-modify-hawaiian-ham-s-license> where the FCC stated <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-12-408A1.pdf> that granting General class Amateur Radio operator privileges to Wilson was "improper." Read more here <http://www.arrl.org/news/fcc-downgrades-hawaiian-ham-s-license>.

==> YASME FOUNDATION ANNOUNCES AWARDS, EXPANDED LIST OF ELIGIBLE CALL SIGNS

The Yasme Foundation <http://www.yasme.org/> currently offers two awards. The Yasme Award, in the form of a handsome plaque, is offered to those radio amateurs who submit proof of 30 QSOs with Yasme officials and DXpeditions that have at least one Yasme official as a participant. The Yasme Supreme Award is in the form of a representation of the YASME boat used by Danny Weil in his around-the-world DXpedition. It is available to those who submit proof of 60 QSOs with YASME officials and DXpeditions with a Yasme official as a participant. These awards are available to qualifying applicants at no cost. After a year-long evaluation of the rules, the Yasme Board of Directors has revised the rules for those call signs that may be used to qualify for the two awards, with many new ones added to the list. The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing and the introduction and promotion of Amateur Radio in underdeveloped countries. -- Thanks to the Yasme Foundation for the information

==> SOLAR UPDATE

Tad "It's brighter than sunshine <http://www.youtube.com/watch?v=Q536JTSe40M>" Cook, K7RA, reports:

Sunspot numbers seemed to be in a free-fall this week: The average daily sunspot numbers declined more than 29 points to 87, while the average daily solar flux fell 6.2 points to 126.2. The outlook for Field Day weekend -- June 22-23 -- is for low sunspot numbers and quiet geomagnetic conditions. The predicted daily solar flux is just 90 for June 21-28, 125 on June 29-July 7, then 130, 135 and 140 on July 8-10, and then rising to 145 on July 11-12. The predicted planetary A index is 5 on June 21-29, then 8 on June 30, 15 on July 1-3, 8 on July 4-5, 5 on July 6-7, 8 on July 8-9, and back down to 5 on July 10-14. Look for more on the ARRL website on Friday, June 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Aqualung's Brighter than Sunshine <http://en.wikipedia.org/wiki/Aqualung_%28musician%29>.

==> + NEW SECTION MANAGER APPOINTED IN SOUTH DAKOTA

Chris Stallkamp, W0ADZ, of Selby, South Dakota, has been appointed as the South Dakota Section Manager, effective June 15. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with Dakota Division Director Greg Widin, K0GW, and with the recommendation of outgoing South Dakota Section Manager Scott Rausch, WA0VKC. Rausch, of Piedmont, has served as South Dakota Section Manager since April 2009. He decided not to run for a new two-year term of office that was scheduled to begin on April 1. After a re-solicitation for nominations this spring did not result in any potential candidates, Stallkamp was then appointed to take the Section Manager reins from Rausch. Stallkamp's appointment extends until March 31, 2014. Stallkamp has been a radio amateur since 2006, and is a member of the Black Hills Amateur Radio Club. Interest in Amateur Radio runs in his family: Both his mother Margaret, KA0BEB, and father Lloyd, KA0ADZ, of Havre, Montana, are also licensed Amateur Radio operators.

==> THIS WEEK IN RADIOSPORT

This week:

- June 23-24 -- ARRL Field Day <http://www.arrl.org/fieldday>; His Majesty King of Spain Contest (SSB); Marconi Memorial HF Contest; Ukrainian DX DIGI Contest
- June 27 -- SKCC Sprint
- June 27-28 -- CWops Mini-CWT Test

Next week:

- July 1 -- RAC Canada Day Contest; WAB 144 MHz Low Power Contest (Phone)
- July 2-8 -- 10-10 International Spirit of '76 QSO Party
- July 3 -- ARS Spartan Sprint
- July 5 -- Michigan QRP July 4th CW Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 30 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-electronics-expo-firecracker-hamfest>,
Harrisburg, Pennsylvania

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Amateur Radio Newsline(tm) Report 1819 - June 22 2012

Amateur Radio Newsline report number 1819 with a release date of June 22, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. U-K hams learn that they will have to share two meters with the 2012 Olympics; the I-A-R-U High Frequency Championship to take place in July; German hams get spectrum at 472 KHz and Radio Netherlands to cease English language broadcasts. Find out the details are on Amateur Radio Newsline(tm) report number 1819 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: UK HAMS TO SHARE 2 METERS WITH OLYMPICS

Ham radio operators in London will be temporarily giving up a part of the 2 meter band to accommodate the 2012 Olympic Games. Jeremy Boot, G4NJH, reports from Nottingham in the UK:

--

British telecommunications regulator Ofcom has announced that a small block of the amateur radio 144 MHz band is to be used for the London 2012 Summer Olympic Games.

The RSGB have issued the following announcement: Following negotiations to minimize the impact on amateurs, Ofcom has now announced that it will temporarily authorize a small block of 12.5kHz channels, ranging from 144.0125MHz to 144.1375MHz, for the period 27 July to 28 August 2012 only.

The frequencies to be used specifically exclude 144.0500MHz the CW Calling frequency and 144.1000MHz which is the Perseids Meteor Scatter CW Calling channel.

Ofcom are aware of the various amateur contests scheduled for 4 and 7 August and will work with Game users to keep operations to a minimum on these dates.

Usage of this spectrum by Games users will be in the vicinity of London Olympic venues and will be limited to handheld equipment operating on a maximum of 5W output.

I'm Jeramy Boot, G4NJH.

--

Ofcom emphasizes that use of primary amateur spectrum is only for the specified time period and does not constitute a change of usage. More is on line on the RSGB 2012 Olympic Pages at www.rsgb.org/olympics. (RSGB)

**

RADIOSPORTS: IARU HF CHAMPIONSHIP ON JULY 14 - 15

The International Amateur Radio Union sponsored High Frequency World Championship 2012 will take place beginning 1200 UTC on Saturday July 14th and ending 1200 UTC on Sunday July 15th. The objective of this contest is to contact as many other amateurs, especially IARU member society Headquarters stations, around the world as possible. This, using the 160, 80, 40, 20, 15 and 10 meter bands. The rules for this year are available on line at tinyurl.com/iaru-hf-championship. (XE1R, IARU-R2)

**

RESTRUCTURING: GERMAN CLASS A HAMS GET 472 KHZ PRIVILEGES

German amateurs with a Class A license are now allowed to operate in the new 472 to 479 kHz band. The power limit is 1 watt effective radiated with a maximum signal bandwidth of 800Hz. (GB2RS)

**

RADIO POLITICS: UAE GOVERNMENT REGULATOR MEETS WITH NATIONAL HAM RADIO SOCIERT

The Emirates Amateur Radio Society has met with the United Arab Emirates Telecommunications Regulatory Authority or T-R-A. This to discuss amateur radio issues.

According to news reports, the meeting shed light on Emirates Amateur Radio Society perspectives related to regulations for radio communications amateurs issued by the T-R-A. This included amateur radio authorizations, frequencies used by U-A-E hams, the mechanism of authorizing visitors and residents to operate in that nation, and cooperation and coordination between the two groups during various activities. The two sides also discussed ways to utilize ham radio to support governmental entities while performing public service activities and at international competitions throughout the year.

At that gathering, the T-R-A stated that the United Arab Emirates is a country concerned with providing various types of communications to users including radio communications. It said that meeting with a specialized entity such as the society is highly important in order to promote radio communications in the country. It added that this meeting garners further significance especially when it takes into consideration that the United Arab Eemirates is a country that hosts numerous desert sports activities and competitions. This it says makes

radio communications a key issue particularly with regard to cases of accidents, disasters, or being lost in the desert.

The meeting took place at the TRA headquarters in Abu Dhabi and brought to light a number of issues related to radio communications. The full report of the meeting in English can be read at tinyurl.com/uae-hams. (Southgate News)

**

PROPAGATION: DOUBLE CME HITS EARTH CAUSING AURORAS

SpaceWeather reports that a geomagnetic storm occured in the wake of the Suns double Coronal Mass Ejection or C-M-E impact on June 16. The hit, which strongly compressed Earth's magnetic field, lit up both poles with bright auroras.

Here in the United States and Canada, the Northern Lights descended as far south as Oregon, Michigan, Wisconsin, Minnesota, Iowa, Washington state and the Dakotas. And as ham radio operators know, this C-M-E also made for some rather interesting conditions on the air, especially on 50 Mhz and above. (SpaceWeather.com)

**

TECHNOLOGY: PHASE MODULATION TESTS ON WWVB

The National Institute of Standards and Technology or N-I-S-T is currently testing phase modulation in addition to the existing amplitude modulation on time standard station WWVB. The AM signal continues while the phase modulation is tested, so there should not be any interruption in service to existing AM devices. However, the NIST warns that phase-locked loop devices AM devices may lose signal lock at times during the tests. The experiment will end prior to the June 30th leap second correction. Questions or comments can be forwarded to WWVB Broadcast Manager John Lowe by e-mail at john (dot) lowe (at) nist (dot) gov. (WB5ITT)

**

BANDPLANNING: COMMENTS SOUGHT ON PROPOSED 23 CM BANDPLAN

Rick Roderick K5UR, who chairs the ARRL UHF and Microwave Band Plan Committee is asking for input on the new proposed amateur 23 cm bandplan. K5UR requests that the ham radio community look over the draft band plan and let him know if you have any major concerns, You can see and download the proposed plan at tinyurl.com/23-cm-plan. Comments go by e-mail to microwave-band-plan (at) arrl (dot) org. (ARRL, Southgate)

**

RADIO LAW: COMMUNICATIONS TOWER LIGHTS NOW FOR THE BIRDS

Federal Aviation Administration officials have decided that operators of tall towers may turn off one type of warning light that may be a cause of bird collisions, and do so without endangering those flying aircraft.

According to news reports federal wildlife researchers found migratory birds get disoriented by steady red warning lights. As a result the FAA has determined it may be okay to turn those off because they claim that pilots can still see towers at night using flashing red warning lights.

Federal wildlife researchers and some conservationists claim that close to 7 million migrating birds die each year when they hit communications towers in the United States and Canada. Broadcasters and other tower owners doubt the number is that high. They point to counter research collated by the FCC that says more birds die from cats and flying into structures such as high rise building windows.

The FCC hasn't made the new light scheme mandatory but officials said recently they would honor the change. You may recall that back last December, the commission began requiring formal public notice and requiring for new towers taller than 450 feet. Also required is an environmental assessment of the potential impact of a new tower on migratory birds. (RW)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W8HVG repeater serving all of southern Michigan.

(5 sec pause here)

**

RADIO LAW: FCC CORRECTS LICENSE CLASS PAPERWORK ERROR

The FCC has modified the Amateur Radio Service license of Todd Wilson, WH6DWF, of Honolulu, Hawaii. This by replacing his General Class operator privileges with Technician Class operator privileges.

No, Wilson did nothing wrong. Rather he was the innocent victim of a clerical error by the ARRL VEC. Heres the back story.

By correspondence dated January 13, 2012, the ARRL VEC notified the Commission that it had made an error in the November 29, 2011 data file and that Wilson was qualified for a Technician Class operator license but not a General Class. Therefore, ARRL VEC requested that the FCC modify Wilson's license to correct the operator privileges authorized.

The Order of Modification was released on March 15, 2012. Wilson did not protest the proposed modification of his license within the requisite thirty-day time frame. Accordingly, he is deemed to have

consented to the proposed modification. Based on the record before it, on June 19th the FCC concluded that it is in the pubic interest to modify the license for Amateur Radio Service Station WH6DWF by changing the authorized operating privileges from General Class to Technician Class. (FCC)

ENFORCEMENT: ANOTHER UNLICENSED FLORIDA ISSUED $15000 NAL

The Tampa FCC Office has issued a $15,000 Notice of Apparent Liability for Forfeiture to Albert R. Knighten, Jr.. This for apparently willfully and repeatedly violating Section 301 of the Communications by operating an unlicensed radio transmitter on the frequency 107.5 MHz from his residence in Fort Myers, Florida. Amateur Radio Newsline's Skeeter Nash, N5ASH, has the details:

--

On December 1st and 9th, 2011, agents from the Enforcement Bureau's Tampa Office T-hunted a signal on 107.5 MHz to an FM transmitting antenna mounted on a tower at Knighten's residence. Agents also determined that the signals on 107.5 MHz exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license.

On December 9, 2011, local law enforcement executed a search warrant for the premises. At that time agents from the FCC Tampa Office interviewed Knighten who was present in his residence when the station was on the air. During the interview Knighten admitted to purchasing and installing the radio equipment. He also claimed to be the sole person operating the unlicensed station and had been doing so for over a month. The FCC agents also inspected the unlicensed radio station before the equipment was seized by local law enforcement.

Now in issuing the Notice of Apparent Liability, the FCC says that because Knighten consciously operated the station and on more than one day, the apparent violation of the Communications Act was both willful and repeated. As such, and based on the evidence before it, that a $15,000 penalty is warranted.

--

Knighten was given the customary 30 days to pay the $15,000 N-A-L or to file an appeal. (FCC)

**

ENFORCEMENT: INCOMPLETE PAPERWORK LEADS TO $10000 FINE FOR NYC COLLEGE STATION

Columbia University in New York City has been issued a $10,000 Monetary Forfeiture based on documents missing from the public inspection file of its non-commercial station WKCR- FM. Amateur Radio Newsline's Fred

Vobbe, W8HDU, is here with the details":

--

The case is unusual because WKCR stated on its renewal application that since its transmission facilities on the World Trade Center had been destroyed on 9/11, the station has faced operating difficulties. As such, it has been transmitting from various temporary locations and with a reduced coverage area.

According to several media reports, Columbia University was totally truthful on its license renewal application. It admitted that WKCR's public file was incomplete. It said the quarterly issues and program lists were not missing deliberately but inadvertently.

However in rendering its decision, the FCC said the missing files occurred over the entire eight-year period of the license grant. This, included a four-year period before its transmitting facilities were destroyed. As such, the regulatory agency stated that WKCR's violations we both serious and displayed a pattern of abuse of the FCC's rules. Because of this, the station came close to having its license renewal granted for a short term period. However the Media Bureau decided not to take that route because WKCR is due to file its next renewal application February 1, 2014.

In the end. the Commission decided that overall WKCR has served the public interest during its license term. That's why it will grant the renewal separately once the forfeiture proceeding is concluded.

For the amateur radio Newsline, Im Fred Vobbe, W8HDU, in Lima, Ohio.

--

Columbia University was given the customary 30 days from the date the FCC decision was rendered to pay the penalty or to file an appeal. (RW, FCC)

RADIO LAW: SCRAP METAL THEFT BECOME A FELONY IN FLORIDA

It's about to get a lot more difficult harder to sell a stolen piece of transmission line or any form of purloined metal in Florida. This as the state severely tightens regulations on how scrap metal dealers operate their businesses in that state. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The new rules that go into effect on July 1st make stealing copper from a utility or communications services provider a Florida state first-degree felony. This translates into the possibility of a thief being sentenced to a 30-year prison sentence and a $10,000 fine. The law also makes knowingly purchasing stolen metals a third-degree

felony, which could mean five years in prison and a $5,000 fine for the purchaser.

But the change likely to have the greatest influence on copper theft is the banning of cash payments for scrap metal. Under the new law all payments must be made by check or an electronic payment system, and payment may be delayed by up to three days.

All scrap-metal dealers will have to be registered with the state, and dealers will be required to keep better records of all purchases, including photographs of the material bought. If they purchase an item with a serial number on it, the dealer will have to check a state database to make sure the item has not been reported stolen.

As to the perpetrators of such thefts, the new law waives civil liability for property owners if someone is injured or killed while trying to steal copper or other regulated materials. In other words a thief or a surviving relative of the thief will not be permitted to file a law suit trying to hold those who own the stolen metals responsible for the perpetrators injuries or death.

Florida Governor Rick Scott signed the bill into law at the end of April.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Copper theft has been an increasing problem for broadcasters, power companies and other industries that use these metals. This is particularly true for those located at remote and unattended sites. Even ham radio operators have in the past years reported theft of antenna transmission lines. (CGC, RW)

HAM RADIO BUSINESS: SUPERANTENNA RETURNS TO THE HAM RADIO MARKETPLACE

SuperAntenna Corporation, maker of the legendary MP1 Portable Antenna and YP3 Portable Yagi, is back in business.

Super Antenna was begun in 2000 by Vern Wright, W6MMA. As some of you may know, the company ceased operations a few years ago to sort out what it termed as legal issues.

On June 18th Super Antenna issued a press release stating that the new company has already begun shipping the MP1 portable antenna and the YP3 portable yagi. Both it claims have been re-engineered to a higher standard of performance.

Super Antenna has also announced a new web site where hams radio operators can get information on Super Antenna products. Its in cyberspace at www.newsuperantenna.com. (Via e-mail)

HAM HAPPENINGS: HAMS IN BROADCASTING VOIP GROUP

Hams in Broadcasting is a new on-line V-O-I-P group that connects those in the broadcasting industry with one another world-wide. The system interconnects IRLP conference bridge 9615, Echolink conference 96150 and Allstar Node 27405 for 24 hour a day communication and chatting between hams who are in the broadcast field. For more information on the "Hams in Broadcast" conference bridge, take a look at tinyurl.com/ar-conference-bridge

Also of note are two nets that meet on the bridge. Every Sunday night at 8:00 PM Eastern there is a general "Hams in Broadcast Net." It is usually hosted by Bruce Schiller, WA2ZST, who works for the CBS network in New York City.

There also is a twice a month "SBE Hams on the Air" net. More information on that gathering is at tinyurl.com/broadcasters-voip (Hams in Broadcasting)

NAMES IN THE NEWS: W0ADZ APPOINTED NEW SOUTH DAKOTA SM

Some names in the news. Chris Stallkamp, W0ADZ, has been appointed as ARRL South Dakota Section Manager, effective June 15.

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with Dakota Division Director Greg Widin, K0GW, and with the recommendation of outgoing South Dakota Section Manager Scott Rausch, WA0VKC.

Rausch had served as South Dakota Section Manager since April 2009. He decided not to run for another term of office that was scheduled to begin on April 1st. After a re-solicitation for nominations this spring did not result in any potential candidates, Stallkamp was then appointed to take the Section Manager reins from Rausch. Stallkamp's appointment extends until March 31, 2014. (ARRL)

**

NAMES IN THE NEWS: VA7MPG ELECTED RAC SM OF BC AND YUKON SECTION

And congratulations to Paul Giffin, VA7MPG who was recently elected Section Manager for Radio Amateurs of Canada's British Columbia and Yukon Section Manager. This, for the balance of his appointed term that ends October 30, 2013. VA7MPG ran unopposed eliminating the need for a balloted election. (RAC)

WORLDBEAT: RADIO NETHERLANDS WORLDWIDE TO CEASE ENGLISH LANGUAGE BROADCASTS ON JUNE 29TH

Radio Netherlands English service will closes down at the end of June. According to the International broadcaster, the decision to curtail English language transmissions on June 29th is the result of steep budget cuts imposed by the Dutch government and a concomitant change in focus of the station. As such, providing the world with what it terms as a realistic image of the Netherlands, as it has done since 1947, will no longer be one of its statutory duties.

According to the stations website, as of July 1st there will no longer be a daily review of the Dutch papers and coverage of Dutch news stories will also cease. And, since the English webstream will also end on June 29th, there will be a Listening Guide posted or mailed out.

For its final English language transmission on June 29th, Radio Netherlands plans to broadcast a show looking back at the past decades of its service. Its asking listeners who may have a memory to share to sent that by e-mail to letters (at) rnw (dot) nl.

The shut down of the long popular Radio Netherlands English language transmissions follow the closure of the Dutch service in May. More is on-line at www.rnw.nl/english/article/were-changing (RNW)

MAKING WAVES: HAM RADIO TEST CRUISE OF OH10X/MM ON BALTIC SEA.

Radio Arcala, the massive ham radio contest station that operates as OH8X near the Arctic Circle in association with Kristina Cruises Ltd. are in the process of testing to see if a permanent amateur radio station will suit the maritime environment and serve DX'ers in their

leisure time.

The ship used for the first evaluation held June 20th to the 24th was the M/S Kristina Katarina which is owned by a private Finnish company. The onboard ham radio station consisted of an Icom IC-7600 on the top deck. The antenna was a 20 meter long wire fed by a remote antenna tuner.

The first run that was to ascertain any potential interference issues from the amateur radio station to the ship's navigation system. Also to see the impact from the ship's advanced P-C networks to the reception of amateur radio transmissions.

During the test cruise, the station was to be active at the peak propagation hours to various continents on 14.267 MHz. The test cruise took the ship to Estonia, Gotland, Sweden, the Aland Islands, and back to Finland.

In addition to the technical evaluation, famed DXer Martti Laine, OH2BH, was on-board with a target to contact all continents. This to celebrate the signing a possible permanent agreement for the station to be available for guests who hold an amateur radio license.

The M/S Kristina Katarina is a 138 meter long vessel. It has a cruising speed of 15 knots and can hold a maximum of 450 guests. Two Finnair jetliners were available backing the operations for change of passengers at a variety of ports along the way.

For more details on this interesring ham radio cruise evaluation, please take your web browser to www.qrz.com/db/OH10X. Information on the cruise line is at tinyurl.com/ham-cruise. (Radio Arcala)

WORLDBEAT: SARL AND ICASA WORKING TOWARD CEPT LIKE VISITORS LICENSE

The Independent Communications Authority of South Africa, better known as the ICASA and the South African Radio League are in negotiations to create a CEPT like ham radio license that is universally accepted. In the meantime, the telecommunications regulator says that visitors to South Africa who hold a valid amateur radio license in a Southern African Development Community recognized country may apply for temporary authorization to operate in South Africa. A copy of his or her license and the period to be spent in South Africa, must be presented.

All requests go by e-mail to KMashile (at) icasa (dot) org (dot) za as well as admin (at) sarl (at) org (dot) za. The turn around time for applications will be approximately 48 hours.

According to Wikipedia, The Southern African Development Community is an inter-governmental organization headquartered in Gaborone, Botswana. Its goal is to further socio-economic cooperation and integration as well as political and security cooperation among 15 southern African

states. It complements the role of the African Union. (SARL)

ON THE AIR: CYPRUS AND THE EUROPEAN UNION PRESIDENCY

To commemorate the first time that Cyprus will hold the European Union presidency, a the Cyprus Amateur Radio Society have been granted the use of the callsign P-3-E-U for a six month period that expires on December 31st. Using that call sign, club members will host a 24 hour special event operation on July 1st on the High Frequency bands using SSB and CW for the 24 hour event. For the duration of the 6 months of Cyprus holding the presidency club members will be active using the P-3-E-U call on all modes on the High Frequency and VHF bands. A special QSL card will be available. (OPDX)
